S-7220D-433
S-7220D

Please read this manual before using the machine.
Please keep this manual within easy reach for quick reference.
Safety Instructions

Thank you very much for buying a BROTHER sewing machine. Before using your new machine, please read the safety instructions and the explanations given in the instruction manual.

With industrial sewing machines, it is normal to carry out work while positioned directly in front of moving parts such as the needle and thread take-up, and consequently there is always a danger of injury that can be caused by these parts. Follow the instructions from training personnel and instructors regarding safe and correct operation before operating the machine so that you will know how to use it correctly.

Safety indications and their meanings

This instruction manual and the indications and symbols that are used on the machine itself are provided in order to ensure safe operation of this machine and to prevent accidents and injury to yourself or other people. The meanings of these indications and symbols are given below.

Indications

⚠️ DANGER
The instructions which follow this term indicate situations where failure to follow the instructions will result in death or serious injury.

⚠️ WARNING
The instructions which follow this term indicate situations where failure to follow the instructions could result in death or serious injury.

⚠️ CAUTION
The instructions which follow this term indicate situations where failure to follow the instructions may result in minor or moderate injury.

Symbols

This symbol (⚠️) indicates something that you should be careful of.
The picture inside the triangle indicates the nature of the caution that must be taken. (For example, the symbol at left means “beware of injury”.)

This symbol (🚫) indicates something that you must not do.

This symbol (✔️) indicates something that you must do.
The picture inside the circle indicates the nature of the thing that must be done. (For example, the symbol at left means “you must make the ground connection”.)
# Notes on safety

## Notes during use

### DANGER

- Wait at least 5 minutes after turning off the power switch and disconnecting the power cord from the wall outlet before opening the control box cover. Touching areas where high voltages are present can result in severe injury.

### WARNING

- Do not allow the machine to come into contact with liquids. Otherwise it may cause fire, electric shocks, or operating problems.
- If any liquid gets inside the sewing machine (machine head or control box), immediately turn off the power and disconnect the power plug from the electrical outlet, and then contact the place of purchase or a qualified technician.

## Notes on the operating environment

### CAUTION

- Do not connect anything to the USB port other than the USB media. Otherwise, problems with operation may result.
- Use the sewing machine in an area which is free from sources of strong electrical noise such as electrical line noise or static electric noise. Sources of strong electrical noise may cause problems with correct operation.
- Any fluctuations in the power supply voltage should be within ±10% of the rated voltage for the machine. Voltage fluctuations which are greater than this may cause problems with correct operation.
- The power supply capacity should be greater than the requirements for the sewing machine's power consumption. Insufficient power supply capacity may cause problems with correct operation.
- The ambient temperature should be within the range of 5°C to 35°C during use. Temperatures which are lower or higher than this may cause problems with correct operation.
- The relative humidity should be within the range of 45% to 85% during use, and no dew formation should occur in any devices. Excessively dry or humid environments and dew formation may cause problems with correct operation.
- In the event of an electrical storm, turn off the power and disconnect the power cord from the wall outlet. Lightning may cause problems with correct operation.

## Notes during installation

### CAUTION

- Do not connect the power cord plug until installation is complete. The machine may operate if the treadle is depressed by mistake, which could result in injury.
- Secure the table so that it will not move when tilting back the machine head. If the table moves, it may crush your feet or cause other injuries.
- Use both hands to hold the machine head when tilting it back or returning it to its original position. If only one hand is used, the weight of the machine head may cause your hand to slip, and your hand may get caught.
- Machine installation should only be carried out by a qualified technician.
- When securing the cords, do not bend the cords excessively or fasten them too hard with staples. Otherwise, fire or electric shocks may occur.
• Be sure to wear protective goggles and gloves when handling the lubricating oil and grease so that they do not get into your eyes or onto your skin. Otherwise inflammation can result. Furthermore, do not drink the oil or eat the grease under any circumstances. Diarrhea or vomiting may result. Keep the oil and grease out of the reach of children.

• Contact your Brother dealer or a qualified electrician for any electrical work that may need to be done.
  • The sewing machine weighs approximately 45 kg (99 lb). The installation should be carried out by two or more people.
  • Turn off the power switch before inserting or removing the plug. Otherwise damage to the control box may result.
  • If using a work table which has casters, the casters should be secured in such a way so that they cannot move.

• Be sure to connect the ground. If the ground connection is not secure, you run a high risk of receiving a serious electric shock, and problems with correct operation may also occur.

---

**Notes during sewing**

---

**CAUTION**

• Turn off the power switch while threading and replacing the bobbin, and when not using or going away from the sewing machine. The machine may operate if the treadle is depressed by mistake, which could result in injury.
  • Attach all safety devices before using the sewing machine. If the machine is used without these devices attached, injury may result.
  • Do not touch any of the moving parts or press any objects against the sewing machine while sewing. Otherwise, it may result in injury or damage to the sewing machine.
  • Secure the table so that it will not move when tilting back the machine head. If the table moves, it may crush your feet or cause other injuries.
  • Use both hands to hold the machine head when tilting it back or returning it to its original position. If only one hand is used, the weight of the machine head may cause your hand to slip, and your hand may get caught.
  • Do not hold the machine head by the panel when tilting it back or returning it to its original position. Otherwise, it may result in injury or damage to the sewing machine.

• To prevent problems, do not use objects with sharp points to operate the operation panel.
  • This sewing machine should only be used by operators who have received the necessary training in safe use beforehand.
  • The sewing machine should not be used for any applications other than sewing.

• Be sure to wear protective goggles when using the machine. If goggles are not worn, there is the danger that if a needle breaks, parts of the broken needle may enter your eyes and injury may result.
  • If using a work table which has casters, the casters should be secured in such a way so that they cannot move.
  • If an error occurs in machine operation, or if abnormal noises or smells are noticed, immediately turn off the power switch. Then contact your nearest Brother dealer or a qualified technician.
  • If the machine develops a problem, contact your nearest Brother dealer or a qualified technician.
Notes during cleaning

**CAUTION**

- Turn off the power switch and disconnect the power cord before carrying out these operations. The machine may operate if the treadle is depressed by mistake, which could result in injury.
- Secure the table so that it will not move when tilting back the machine head. If the table moves, it may crush your feet or cause other injuries.
- Use both hands to hold the machine head when tilting it back or returning it to its original position. If only one hand is used, the weight of the machine head may cause your hand to slip, and your hand may get caught.
- Do not hold the machine head by the panel when tilting it back or returning it to its original position. Otherwise, it may result in injury or damage to the sewing machine.
- Be sure to wear protective goggles and gloves when handling the lubricating oil and grease so that they do not get into your eyes or onto your skin. Otherwise inflammation can result. Furthermore, do not drink the oil or eat the grease under any circumstances. Diarrhea or vomiting may result. Keep the oil and grease out of the reach of children.

Notes during maintenance and inspection

**CAUTION**

- Turn off the power switch and disconnect the power cord plug before carrying out inspection, adjustment or repairs, or when replacing consumable parts such as the rotary hook or knives. The machine may operate if the treadle is depressed by mistake, which could result in injury.
- If the power switch needs to be left on when carrying out some adjustment, be extremely careful to observe all safety precautions.
- Secure the table so that it will not move when tilting back the machine head. If the table moves, it may crush your feet or cause other injuries.
- Use both hands to hold the machine head when tilting it back or returning it to its original position. If only one hand is used, the weight of the machine head may cause your hand to slip, and your hand may get caught.
- Do not hold the machine head by the panel when tilting it back or returning it to its original position. Otherwise, it may result in injury or damage to the sewing machine.
- Maintenance and inspection of the sewing machine should only be carried out by a qualified technician.
- Always be sure to turn off the power switch and then wait one minute before opening the motor cover. If you touch the surface of the motor, it may cause burns.
- Ask your Brother dealer or a qualified electrician to carry out any maintenance and inspection of the electrical system.
- When replacing parts and installing optional parts, be sure to use only genuine Brother parts. Brother will not be held responsible for any accidents or problems resulting from the use of non-genuine parts.
- If any safety devices have been removed, be absolutely sure to re-install them to their original positions and check that they operate correctly before using the machine.

Note regarding modification

**CAUTION**

- To prevent accidents and problems, do not modify the sewing machine (including control devices) by yourself. Brother will not be held responsible for any accidents or problems resulting from modifications made to the sewing machine.
The following warning labels appear on the sewing machine. Please follow the instructions on the labels at all times when using the machine. If the labels have been removed or are difficult to read, please contact your nearest Brother dealer.
1 Moving parts may cause injury.

2 Operate with safety devices installed. ¹

3 Turn off the power before carrying out operations such as threading, changing the needle, bobbin, knives or hook, cleaning and adjusting.

(3)

Be careful not to get your hands caught when returning the machine head to its original position after it has been tilted.

(4)

Be careful to avoid injury from the moving thread take-up.

(5)

Be sure to connect the ground. If the ground connection is not secure, you run a high risk of receiving a serious electric shock, and problems with correct operation may also occur.

(6)

Direction of operation

¹ Safety devices:
(A)Finger guard
(B)Thread take-up cover

Lubricating Oil for Machining

CAUTION

Lubricating oil may cause inflammation to eye and skin.
Wear protective glasses and gloves.
Swallowing oil can cause diarrhoea and vomiting.
Do not swallow.
Keep away from children.

FIRST AID
Eye contact:
- Rinse with plenty of cold water.
- Seek medical help.
Skin contact:
- Wash with soap and water.
If swallowed:
- Seek medical help immediately.
- Do not induce vomiting.

Points to note before installation

**CAUTION**

- Do not connect the power cord plug until installation is complete. The machine may operate if the treadle is depressed by mistake, which could result in injury.
- Secure the table so that it will not move when tilting back the machine head. If the table moves, it may crush your feet or cause other injuries.
- Use both hands to hold the machine head when tilting it back or returning it to its original position. If only one hand is used, the weight of the machine head may cause your hand to slip, and your hand may get caught.

- Machine installation should only be carried out by a qualified technician.
- Contact your Brother dealer or a qualified electrician for any electrical work that may need to be done.
- The sewing machine weighs approximately 45 kg (99 lb). The installation should be carried out by two or more people.

**About the machine set-up location**

- Do not set up this sewing machine near other equipment such as televisions, radios or cordless telephones. Such equipment may be affected by electronic interference from the sewing machine.
- The sewing machine should be plugged directly into an AC wall outlet. Operation problems may result if extension cords are used.

**Carrying the machine**

- The sewing machine should be carried by the arm and the motor cover by two people as shown in the illustration.
- Hold the motor cover (A) by hand also so that the pulley does not rotate.
- Do not hold the operation panel.
**Tilting back the machine head**

- Hold section (B) with your foot so that the table does not move, and then push the arm with both hands to tilt back the machine head.
- Do not hold the operation panel.

**Returning the machine head to its original position**

1. Clear away any tools, etc. which may be near the table holes.
2. While holding the face plate with your left hand, gently return the machine head to the upright position with your right hand.
- Do not hold the operation panel.

---

**Table processing diagram**

- The top of the table should be 40 mm in thickness and should be strong enough to hold the weight and withstand the vibration of the sewing machine.
- Drill holes as indicated in the illustration below.

---

(1) Control box mounting hole
(2) Head rest hole
(3) Cord hole
(4) Cotton stand hole
1 Install the control box and the connecting rod.
   (1) Control box
   (2) Bolt [4 pcs.]
   (3) Nut [8 pcs.]
   (4) Spring washer [4 pcs.]
   (5) Washer [4 pcs.]
   (6) Connecting rod
   (7) Nut

2 Install the oil pan.
   (1) Head cushion(left) [2 pcs]
   (2) Head cushion(right) [2 pcs]
   (3) Oil pan
3 Install the rubber cushions and the knee lifter complying bar.
   (1) Rubber cushion [2 pcs.]
   (2) Knee lifter complying bar

4 Install the machine head.
   (1) Hinge [2 pcs.]
   (2) Machine head
   (3) Head rest

CAUTION
Tap the head rest securely into the table as far as it will go. If the head rest is not tapped in as far as it will go, there is the danger that the machine head will not be sufficiently stable when it is tilted back.

5 Install the operation panel.
   (1) Operation panel
   (2) Screw [2 pcs.]
      (Use for tightening rear cover)
6 Remove the seal.
   (1) Sticker

7 Install the cotton stand.
   (1) Cotton stand
   (2) Rubber cushion [2 pcs.]
   (3) Washer
   (4) Nut

   Securely tighten the nut so that the two rubber cushions and the washer are securely clamped and so that the cotton stand does not move.

Adjusting the knee lifter

8 Turn the machine pulley so that the feed dog is below the top of the needle plate.

9 Lower the presser foot (2) by using the lifting lever (1).

10 Loosen the nut (3).

11 Turn the screw (5) to adjust so that the amount of movement (play) in the knee lifter (4) is approximately 2 mm when the knee lifter plate is gently pressed.
   After adjustment is completed, securely tighten the nut (3).

12 Loosen the nut (6).

13 Turn the screw (7) until the distance between the end of the screw (7) and the knee lifter (8) is approximately 3 mm.
14 Turn the adjusting screw (7) to adjust so that the presser foot (2) is at the desired position within a distance of 16mm from the needle plate when the knee lifter plate is fully pressed.

15 After adjustment is completed, securely tighten the nut (6).
Lubrication

The sewing machine should always be lubricated and the oil supply replenished before it is used for the first time, and also after long periods of non-use.

Use only the lubricating oil <JXTG Energy Sewing Lube 10N; VG10> specified by Brother. If this type of lubricating oil is difficult to obtain, the recommended oil to use is <Exxon Mobil Essotex SM10; VG10>.

<table>
<thead>
<tr>
<th>CAUTION</th>
</tr>
</thead>
<tbody>
<tr>
<td>• When cutting the nozzle of the oil tank, hold the base of the nozzle securely. If you hold the end of the nozzle, injury from the scissors may result.</td>
</tr>
<tr>
<td>• Do not connect the power cord plug until adding lubricating oil is complete. The machine may operate if the treadle is depressed by mistake, which could result in injury.</td>
</tr>
<tr>
<td>• Be sure to wear protective goggles and gloves when handling the lubricating oil and grease so that they do not get into your eyes or onto your skin. Otherwise inflammation can result. Furthermore, do not drink the oil or eat the grease under any circumstances. Diarrhea or vomiting may result. Keep the oil and grease out of the reach of children.</td>
</tr>
</tbody>
</table>

1 Hold the base of the nozzle of the accessory oil tank (1), and use scissors to cut about half-way along the straight section (A) of the nozzle.

2 Loosen and remove the nozzle, and then remove the seal (2).

3 Tighten the nozzle.
Lubricating the oil cover

4 Tilt back the machine head.

5 Remove the rubber cap (1).

6 Pour 120 ml of lubricating oil into the oil tank (2).

NOTE
Use the upper reference line (3) as a guide when pouring.

7 Replace the rubber cap (1).

8 Return the machine head to its original position.

9 Check that the oil gauge (5) comes to the upper reference line in the oil gauge window (4).

NOTE
If the oil gauge drops below the lower reference line (or if the oil level drops below the lower reference line (6) on the oil tank), be sure to replenish the oil.
## Connecting the cords

### Danger

- Wait at least 5 minutes after turning off the power switch and disconnecting the power cord from the wall outlet before opening the control box cover. Touching areas where high voltages are present can result in severe injury.

### Caution

- Do not connect the power cord until all cords have been connected. The machine may operate if the treadle is depressed by mistake, which could result in injury.
- When securing the cords, do not bend the cords excessively or fasten them too hard with staples. Otherwise, fire or electric shocks may occur.
- Contact your Brother dealer or a qualified electrician for any electrical work that may need to be done.
- Be sure to connect the ground. If the ground connection is not secure, you run a high risk of receiving a serious electric shock, and problems with correct operation may also occur.

### Opening the control box cover

1. Remove the top four of the six screws with washer (1), and loosen the bottom two.
   - (1) Screw with washer [6 pcs.]
   - (2) Cover
2. Open the control box cover.

### Securing the cords

3. Use the cable tie (1) to secure the cords.
   - (1) Repeat cable tie
   - (2) Tab
Connecting the cords

4 Connect the ground wire (8).

5 Connect the cords.

</tr>
</tbody>
</table>

**NOTE**

Bind the cords in such a way that the connector does not get pulled out.

If an open circuit occurs in the cords due to vibration of the sewing machine, damage to the control box may result.
Closing the cord presser plate

6 Loosen the cables outside the control box without stretching them too much inside the control box.

7 Close the cord presser plate (1).

NOTE
If the cord presser plate (1) is not closed firmly, dust will get inside the control box and may cause problems.

8 Connect cords that match the voltage specifications.

<EU specifications>
(1) Filter box
(2) Screws [4 pcs]
(3) Staples [3 pcs]
(4) Power cord

1. Attach an appropriate switch and cable to the power cord (4).
   (The green and yellow wire is the ground wire.)

2. Insert the power plug into a properly-grounded electrical outlet.

NOTE
• Take care when tapping in the five staples (3) to make sure that they do not pierce the cords.
• Do not use extension cords, otherwise machine operation problems may result.
9 Connect the power cord.
   1. Install the power switch (1).
   2. Attach an appropriate plug to the power cord (3).
   3. Insert the plug into a properly-grounded AC power supply.

(1) Power switch
(2) Screw[2 pcs]
(3) Power cord
(4) Ground wire(green/yellow cord)
(5) Power supply connector 3-pin
(6) Staple[5 pcs.]

Secure the power cord in a suitable place depending on the position of the wall outlet.

**CAUTION**

- Take care when tapping in the staples to make sure that they do not pierce the cords.
- Do not use extension cords. They may cause problems with correct operation of the sewing machine.

Closing the cover

10 Tighten the screws with washer (1).

(1) Screw with washer[6 pcs.]
(2) Cover
Ground wire

11 Connect the ground wires.
   (1) Ground wire
   (2) Screw with washer [2 pcs.]
   (3) Ground symbol [2 places]
   (4) Oil pan
Name and function of each operation panel item

(1) Menu key
This key is used to move to the menu screen.

(2) Home key
This key is used to return to the home screen.

(3) Half stitch key
When the sewing machine is stopped, the needle bar can be moved up and down by pressing this key.

(4) Touch panel (display)
This displays messages and touch keys (icons).

About the home screens
• The home screen is displayed when the power is turned on.
• Sewing operations are normally carried out while the home screen is displayed.
• The home screen can be switched between the detailed home screen, the basic home screen and the quick home screen.
  * At the time of shipment from the factory, the detailed home screen is set to be displayed.
• If you keep pressing while the home screen is displayed, you can switch between the detailed home screen, the basic home screen and the quick home screen. Furthermore, you can return to the home screen from any other screen by pressing .

Detailed home screen

Basic home screen

Quick home screen
About the detailed home screen

1. Screen lock key
   Screen unlock key
   Press this key to switch the home screen between locked and unlocked.

2. Program No. UP key
   Program No. DOWN key
   Press this key to increase (or decrease) the program number.

3. Main sewing speed key
   Press and hold this key to set the sewing speed for the main sewing.

4. Production counter key
   Lower thread counter key
   The display switches between the production counter and the lower thread counter each time the icon is pressed.
   If you keep pressing this key while the production counter is displayed, the display switches to the production counter setting screen.
   If you keep pressing this key while the production counter is displayed, the display switches to the production counter setting screen.

5. Start backtack key
   Press this key to switch the start backtack sewing operation (off/on). If you keep pressing this key, the display switches to the start backtack setting screen.

6. Main sewing key
   If you keep pressing this key, the display switches to the main sewing method setting screen.

7. End backtack key
   Press this key to switch the end backtack sewing operation (off/on). If you keep pressing this key, the display switches to the end backtack setting screen.

8. Needle up/down key
   Press this key to switch the stop position after sewing (needle up/needle down).

9. Thread trimming lock key
   Press this key to switch thread trimming locking (disabled/enabled) when the treadle is depressed backward.

10. Thread wiper key
    Press this key to switch the thread wiper operation (off/on).

11. Correction key
    Press this key to switch correction sewing operation (off/on) by using the hand switch.

12. AUTO key
    Press this key to switch between different sewing operations (normal sewing/automatic sewing/automatic sewing with thread trimming).

13. Slow start key
    Press this key to switch slow start operation at the sewing start (off/1/2/3/4).
About the quick home screen

(1) Screen lock key

Screen unlock key

Press this key to switch the home screen between locked and unlocked.

At the time of shipment from the factory, the screen is set to lock automatically if no operations are carried out for three minutes. (Refer to memory switch No. 310.)

(2) Program No. UP key

Program No. DOWN key

Press this key to increase (or decrease) the program number.

(3) Main sewing speed key

Press this key to set the sewing speed for the main sewing.

(4) +/- keys

The currently-selected value is increased or decreased each time one of these keys is pressed. If you keep pressing this key, the value increases or decreases more quickly.

(5) Production counter key

Lower thread counter key

The display switches between the production counter and the lower thread counter each time the icon is pressed.

You can change the value which is displayed by pressing it.

If you keep pressing this key while the production counter is displayed, the display switches to the production counter setting screen.

If you keep pressing this key while the production counter is displayed, the display switches to the production counter setting screen.

(6) Start backtack key

Press this key to switch the start backtack sewing operation (off/on). If you keep pressing this key, the display switches to the start backtack setting screen.

(7) End backtack key

Press this key to switch the end backtack sewing operation (off/on). If you keep pressing this key, the display switches to the end backtack setting screen.

(8) RESET key

Press this key to reset the currently-displayed counter value.

(9) No. of start backtack stitches A/B key

Press this key to set the number of start backtack stitches.

(10) No. of end backtack stitches C/D key

Press this key to set the number of end backtack stitches.
## Types of icons

The icons which appear in the display can be broadly classified into the following three types.

### Type A: Simple symbols

**Example**

<table>
<thead>
<tr>
<th>Warning symbol</th>
<th>USB media</th>
<th>Current program No.</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="image" alt="Warning symbol" /></td>
<td><img src="image" alt="USB media" /></td>
<td><img src="image" alt="P-1" /></td>
</tr>
</tbody>
</table>

### Type B: Plain touch keys (symbol is always fixed)

**Example**

<table>
<thead>
<tr>
<th>Return key (Returns to the previous screen)</th>
<th>+ key ( Increases a value)</th>
<th>OK key (Confirm the value)</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="image" alt="Return key" /></td>
<td><img src="image" alt="+ key" /></td>
<td><img src="image" alt="OK key" /></td>
</tr>
</tbody>
</table>

### Type C: Touch keys which change their setting status (symbol) each time they are pressed

**Example**

<table>
<thead>
<tr>
<th>Lock key</th>
<th>Unlocked</th>
<th>Locked</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="image" alt="Lock key" /></td>
<td><img src="image" alt="Unlocked" /></td>
<td><img src="image" alt="Locked" /></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Thread wiper key</th>
<th>Thread wiping enabled</th>
<th>Thread wiping disabled</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="image" alt="Thread wiper key" /></td>
<td><img src="image" alt="Thread wiping enabled" /></td>
<td><img src="image" alt="Thread wiping disabled" /></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Start backtack key</th>
<th>Start backtack enabled</th>
<th>Start backtack disabled</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="image" alt="Start backtack key" /></td>
<td><img src="image" alt="Start backtack enabled" /></td>
<td><img src="image" alt="Start backtack disabled" /></td>
</tr>
</tbody>
</table>

### Menu screen

- Press ![Menu](image) at any screen to return to the menu screen.
- Press ![Up](image) or ![Down](image) at a menu screen to change the screen.
Program setting method

It is recommended that you register patterns that are sewn frequently as programs. After programs have been registered, you can retrieve the desired sewing patterns simply by selecting a program number, which eliminates the need to set the pattern each time.

- Settings such as sewing pattern, number of stitches, sewing speed and slow start can be made separately for each program number.
- Up to nine programs from P1 to P9 can be registered.

At the time of shipment from the factory, P1 to P8 have normal sewing programs registered, and P9 has a 4-step fixed stitch sewing (name label sewing) program registered.

Program structure

A single program consists of start backtack parameters, main sewing parameters, end backtack parameters and individual functions for that program.

Stitch type (overall view)

### Setting start backtacking

1. Press [Home] > [Front BT setting].

   ![Setting start backtacking](image)

2. Set the start backtack sewing parameters.
   1. Press ◀ or ▶ to select the sewing pattern. Press + or − to change the value.
   2. Press ◐ to select the start backtack sewing speed. Press + or − to change the value.

3. Press [Home].
   Press this to return to the Home screen.

   The settings which are made here are applied to (Start backtack key) in the home screen.

### Start backtack sewing parameter settings

<table>
<thead>
<tr>
<th>Setting value</th>
<th>Setting unit</th>
<th>Default value</th>
</tr>
</thead>
<tbody>
<tr>
<td>Start backtack sewing pattern</td>
<td>100 sti/min</td>
<td>1 stitch</td>

<tr>
<td>Sewing speed</td>
<td>220 to 3000 sti/min</td>
<td>1200 sti/min</td>
</tr>
<tr>
<td>No. of stitches A</td>
<td>1 stitch</td>
<td>1 stitch</td>
</tr>
<tr>
<td>No. of stitches B</td>
<td>1 stitch</td>
<td>1 stitch</td>
</tr>
</tbody>
</table>

### Main sewing settings

1. Press [Home] > [Main portion setting].

   ![Main sewing settings](image)

2. Set the start backtack sewing parameters.
   1. Press ◀ or ▶ to select the sewing pattern. Press + or − to change the value.
   2. Press ◐ to select the start backtack sewing speed. Press + or − to change the value.
   3. Press ◀ or ▶ to select the number of stitches. Press + or − to change the value.

3. Press [Home].
   Press this to return to the Home screen.

   The settings which are made here are applied to (Main sewing key) in the home screen.

### Setting main sewing parameters

<table>
<thead>
<tr>
<th>Setting value</th>
<th>Setting unit</th>
<th>Default value</th>
</tr>
</thead>
<tbody>
<tr>
<td>Main sewing pattern</td>
<td>100 sti/min</td>

</tr>
<tr>
<td>No. of stitches F</td>
<td>1 stitch</td>
<td>1 stitch</td>
</tr>
</tbody>
</table>
### Setting end backtacking

1. Press \[
\text{[End BT setting]}
\] to enter the \[End BT setting\] screen.

2. Set the start backtack sewing parameters.
   1. Press \[\text{< or >} \] to select the sewing pattern.
      
      Press \[\text{+ or -} \] to change the value.
   2. Press \[\text{\rotateleft} \] to select the start backtack sewing speed.
      
      Press \[\text{+ or -} \] to change the value.

3. Press \[\text{\rotateleft} \].

   Press this to return to the Home screen.

*The settings which are made here are applied to \[\text{End backtack key} \] in the home screen.

### End backtack sewing parameter settings

<table>
<thead>
<tr>

<td>1 to 19 stitches</td>
<td>1 stitch 1 stitch</td>
</tr>
<tr>
<td>No. of stitches D</td>
<td>1 to 19 stitches</td>
<td>1 stitch 1 stitch</td>
</tr>
</tbody>
</table>
Using program individual functions and program common functions

- In addition to start backtack sewing, main sewing and end backtack sewing, the following 6 types of functions are also included in the parameters which are necessary for sewing.
  Needle up/down, thread trimming lock, thread wiping, correction sewing, AUTO, slow start.
- Of these 6 types of functions, the functions which can be set separately for each program are called "program individual" functions.
  When an assignment is made to a program individual function, a "P" symbol appears in the top-left corner of the icon.
- On the other hand, the functions which can be set in common for all programs (P1 to P9) are called "program common" functions.

  Each of the 6 types of functions can be set to be used as either a program individual function or a program common function. (Memory switch No. 301 to No. 306)

At the time of shipment from the factory, the settings are as follows.

<table>
<thead>
<tr>
<th></th>
<th>Program individual functions</th>
<th>Program common functions</th>
</tr>
</thead>
<tbody>
<tr>
<td>Needle up/down</td>
<td>×</td>
<td>○</td>
</tr>
<tr>

Using the production counter

The production counter can be used to let you know how many items have been sewn.

The production counter increases by 1 each time thread trimming is carried out.

1 Press [ ] > [Production counter editing].

<table>
<thead>
<tr>
<th>Production counter editing</th>
<th>←</th>
<th>+</th>
<th>←</th>
<th>Clear</th>
<th>OK</th>
</tr>
</thead>
<tbody>
<tr>
<td>← 3333:3333</td>
<td>←</td>
<td>+</td>
<td>←</td>
<td>Clear</td>
<td>OK</td>
</tr>
</tbody>
</table>

2 Press + or ← to change the production counter value.

When the value is changed, the production counter will flash.

- If you would like to return the setting to "0000", press Clear.

3 Press OK.

The value will be confirmed and the display will return to the home screen.

Using the lower thread counter

The lower thread counter can be used to let you know approximately how much lower thread is remaining.

- The lower thread counter should be used as a guide only.
- The value displayed by the lower thread counter display is reduced by 1 from the initial setting value each time the sewing machine sews 10 stitches, and a warning is given when the counter reaches "-1".

1 Press [ ] > [Bobbin thread counter setting].

<table>
<thead>
<tr>
<th>Bobbin thread counter setting</th>
<th>←</th>
<th>+</th>
<th>←</th>
<th>OK</th>
</tr>
</thead>
<tbody>
<tr>
<td>← 2000</td>
<td>←</td>
<td>+</td>
<td>←</td>
<td>OK</td>
</tr>
</tbody>
</table>

2 Press + or ← to change the lower thread counter value.

When the value is changed, the production counter will flash.

- The setting range is from 1 to 9999.
- Touch ON/OFF to switch the setting between on and off.
- When set to [OFF], the counter will stop operating.
- You can press Reset to provisionally reset the value to the one which was set previously, but only if the counter function is [ON].

3 Press OK.

The value will be confirmed and the display will return to the home screen.
Lower thread counter operation

When sewing is carried out, the value shown in the lower thread counter display is reduced by 1 for every 10 stitches sewn. However, the display is only updated when the treadle is returned to the neutral position.

Lower thread out warning when sewing stops (before thread trimming)

If the lower thread counter has dropped to below -1 when the sewing machine stops sewing, the warning buzzer sounds 5 times (1 second on/1 second off), and a lower thread counter warning message is displayed. Sewing will not be possible at this time, even if the treadle is depressed forward.

1 Replace the bobbin.
2 Press . The lower thread counter value will return to the value which was previously set.

The display will return to the screen which was being displayed before the lower thread counter out warning appeared, and sewing will be possible.

Lower thread out warning when sewing is complete (after thread trimming)

If the lower thread counter has dropped to below "-1" after sewing is finished, the warning buzzer sounds 5 times (1 second on/1 second off), and a lower thread counter warning message is displayed. Sewing will not be possible at this time, even if the treadle is depressed forward.

1 Replace the bobbin.
2 Press . The lower thread counter value will return to the value which was previously set.

The display will return to the screen which was being displayed before the lower thread counter out warning appeared, and sewing will be possible.

Setting the home screen mode

You can select from three different types of home screen display: the detailed home screen, the basic home screen and the quick home screen.
1. Press \( \text{[Home screen mode setting]} \).

   - **Home screen mode setting**
     - Home screen Mode
       - (0: Detailed, 1: Basic, 2: Quick)

2. Press \( \begin{cases} + \end{cases} \) or \( \begin{cases} - \end{cases} \) to change the value.

3. Press \( \begin{cases} \text{Home screen} \end{cases} \).
   - Press this to return to the Home screen.

Adjusting the needle up stop position

1. Press \( \begin{cases} \text{Memory switch setting} \end{cases} \).

   - **Memory switch setting**
     - (1)

2. Press \( \begin{cases} < \end{cases} \) or \( \begin{cases} > \end{cases} \) to select memory switch number (No. 102).

3. Press \( \begin{cases} \text{Up} \end{cases} \) or \( \begin{cases} \text{Down} \end{cases} \) (3) to change the setting value (4) for the needle up stop position.
   - If you press \( \begin{cases} \text{Up} \end{cases} \), the setting value will increase up to 10 and the needle up stop position will become higher.
   - If you press \( \begin{cases} \text{Down} \end{cases} \), the setting value will decrease down to -10 and the needle up stop position will become lower.
   - The default setting value is "0".
   - If the value that is displayed is different from the value that is currently set, the value in the display will flash.
   - If you would like to return the setting to the initial value, press \( \begin{cases} \text{Reset} \end{cases} \).

4. Press \( \begin{cases} \text{OK} \end{cases} \) (5).
   - The setting for the needle up stop position will be stored.
   - If the needle bar is not at the needle up stop position, the needle up warning screen will be displayed.

   - A setting value of “10” corresponds to an angle of rotation of approximately 10° for the upper shaft.
   - If the needle bar is not at the needle up stop position, the needle up warning screen will be displayed.
Adding and deleting steps

You can put together programs, such as the one shown in the illustration for pocket sewing or name label sewing, by registering multiple steps in the main sewing section.

• Steps can be added (up to a maximum of 20 steps) to or deleted (to a minimum of 1 step) from the currently-selected program.
• However, if fixed stitch sewing or reverse fixed stitch sewing is not selected, it will not be possible to switch to this mode.

1. Press \[ Program setting \] > [Add/Delete step].

The program number, step number, sewing pattern and cursor for the currently-selected program are displayed.

2. Press ▲ or ▼ to change the cursor position.

When adding a step

3. Press +.

A step will be added after the cursor position.

- The sewing pattern for the added step will be the fixed stitch sewing pattern.
- If the number of steps has already reached 20, no further steps can be added.

When deleting a step

4. Press .

The step at the cursor position will be deleted.

However, if only one step is remaining, the delete key will be disabled.

5. Press .

Press this to return to the Home screen.

When more than one step had been added for sewing, the number of stitches in the step which is currently being sewn will be completed, and then sewing will continue on to the next step.
**Editing steps**

The number of stitches can be changed separately for each step.

The setting is made from the detail home screen.

1. Press ▲ or ▼ to select the step number to be edited.

2. Press and hold (Main sewing key).
   The sewing machine will switch to main sewing setting mode.

   ![Main portion setting P-9 / S-01](image)

   ![4000](image)

3. Set the start backtack sewing parameters.
   1. Press ▼ or ▲ to select the sewing pattern.
      Press + or - to change the value.

4. Set the start backtack sewing parameters.
   1. Press ◼ to select the start backtack sewing speed.
      Press + or - to change the value.
   2. Press .
      Press the key to switch linking between enabled and disabled.

   ![No linking with next step](image)
   ![Linking with next step](image)

5. Press .
   The display will return to the previous screen.

---

### Setting main sewing parameters when several steps exist

<table>
<thead>
<tr>
<th></th>
<th>Setting value</th>
<th>Setting unit</th>
<th>Default value</th>
</tr>
</thead>
<tbody>
<tr>
<td>Main sewing pattern</td>
<td>▼ ▲</td>
<td>–</td>
<td>▼</td>
</tr>
<tr>
<td>Sewing speed</td>
<td>220 to 5000 sti/min</td>
<td>100 sti/min</td>
<td>4000 sti/min</td>
</tr>
<tr>
<td>No. of stitches E</td>
<td>1 to 255 stitches</td>
<td>1 stitch</td>
<td>1 stitch</td>
</tr>
<tr>
<td>Linking</td>
<td>–</td>
<td>–</td>
<td>–</td>
</tr>
</tbody>
</table>
## Setting the sewing start step

If sewing is interrupted by a problem such as a thread breakage occurring and you need to resume sewing from the point where sewing was interrupted, you can start sewing from the middle of a step.

### Carry out this operation from the detailed home screen.

1. Select [ ] > [Program setting] > [Step setting for start].

### Step setting for start

<table>
<thead>
<tr>
<th>S-01</th>
<th>P-9</th>
</tr>
</thead>
<tbody>
<tr>
<td>S-02</td>
<td></td>
</tr>
<tr>
<td>S-03</td>
<td></td>
</tr>
</tbody>
</table>

2. Select the desired step number.

   The step number (1) for starting sewing will be displayed.

   - Depress the treadle to start sewing from that step.
   - When sewing is finished, the sewing start step number (1) is cleared and the display returns to the normal detailed home screen.
   - If the program number is changed or the power is turned off and back on, the sewing start step number (1) will be cleared even if sewing is not carried out.

## Copying programs

To create a program with parameters that are almost exactly the same as those of another program, you can copy the original program and change just the parts which need to be changed.

1. Press [ ] > [Program setting] > [Program copy].

2. Press or (3) to select the copying source program number (1).

3. Press or (4) to select the copying destination program number (2).

4. Press .

   The program will be copied.

   At this time, the copy destination program number will be the program number which is currently selected.

5. Press .

   Press this to return to the Home screen.
Initializing the currently-selected program

If you would like to recreate the program which is currently selected from the beginning, you can reinitialize the program instead of deleting each step one by one.

1 Press [ ] > [Program setting] > [Selected program Reset].

Are you sure you want to initialize?

2 Press [OK].

The program will be initialized.

3 Press [ON/OFF].

The display will return to the program setting screen.

Setting the working pace

The target counter can be used to let you know the state of work progress.

The target counter increases by 1 each time the time set as the working pace has elapsed.

However, counting is not carried out during the period from when the power is turned on until sewing starts.

1 Press [ ] > [Production counter editing].

2 Press [ON/OFF].

The sewing machine will switch to working pace setting mode.

• If the operating status (1) for the target counter is set to OFF, the target counter function will not operate. It will not be possible to set the working pace at this time either.

• Press [ON/OFF] to set the operating status to [ON/OFF], so that the working pace can be set.

3 Press [+] or [−] to change the working pace value.

• The working pace can be set to between 00'01" and 59'59".

• If you would like to return the setting to the value which was set previously, press [Reset].
4 Press OK.

The value will be confirmed and the mode will return to production counter editing mode.

---

**Setting memory switches (standard)**

The settings for the memory switches are valid for all programs.

1. Press [Settings] > [Memory switch setting].

<table>
<thead>
<tr>
<th>Memory switch setting</th>
<th>(1) MSW-001 (1)</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>When thread is returned to neutral after thread trimming, presser foot is raised up</td>
</tr>
</tbody>
</table>

2. Press or to select the memory switch number (1).

At this time, keep pressing and then press or at the same time to select only the memory switches with current values that are different from their initial values.

3. Press or to change the memory switch value (2).

If the value that is displayed is different from the value that is currently set, the value in the display will flash.

- If you would like to return the setting to the initial value, press .

- is only displayed when the setting value (the value being displayed) is different from the initial value.

4. Press OK.

The memory switch setting will be stored.

The setting display will change from flashing to illuminated.

5. Press .

The display will return to the previous screen.
## List of memory switches

### Presser foot lifter and treadle settings (001 to 099)

<table>
<thead>
<tr>
<th>No.</th>
<th>Setting range</th>
<th>Default value</th>
<th>Setting unit</th>
<th>Setting details</th>
</tr>
</thead>
</table>
| 001 | ON/OFF        | *1            | —            | When treadle is returned to neutral after thread trimming, presser foot is raised up  
ON: Presser foot is raised  
OFF: Presser foot is not raised  
* Rises when memory switch No. 851 is set to "OFF"  
(Refer to the Service Manual for details of memory switch No. 851.) |
| 002 | ON/OFF        | OFF           | —            | After treadle stops at neutral, presser foot is raised up  
ON: Presser foot is raised  
OFF: Presser foot is not raised |
| 003 | ON/OFF        | ON            | —            | After treadle stops at neutral, presser foot can be raised up when treadle depressed one step backward.  
ON: Enabled  
OFF: Disabled |
| 004 | ON/OFF        | ON            | —            | When treadle depressed backward, thread trimming and end backtack sewing is possible.  
ON: Thread trimming and end backtack sewing operations are enabled  
(However, if thread trimming operation is locked, needle up operations will be carried out without thread trimming.)  
OFF: Thread trimming and end backtack sewing operations are disabled (presser foot lifts when the treadle is depressed backward) |
| 010 | ON/OFF        | OFF           | —            | After standing operation pedal is used, treadle operation is possible.  
(Alternating operation is possible)  
* Does not include operation of presser foot lifter pedal. |
| 011 | 0 to 1        | 0             | 1            | Operation when standing up variable speed pedal is ON  
0: Sewing speed corresponds to treadle depression amount  
1: Sewing speed corresponds to sewing speed set for main sewing (constant speed) |

Hand switch

The following functions can be assigned to the hand switch.
(The operation of the hand switches will vary depending on the status of the correction sewing icon.)

Settings when using as correction sewing switch

<table>
<thead>
<tr>
<th>Settings (Initial setting is “1”.)</th>
<th>Operation when hand switch is pressed</th>
</tr>
</thead>
<tbody>
<tr>
<td>OFF: &lt;Disabled&gt;</td>
<td>Correction sewing operation is not carried out even when the hand switch is pressed</td>
</tr>
<tr>
<td>1: &lt;Single correction sewing&gt;</td>
<td>Stops after sewing a single stitch</td>
</tr>
<tr>
<td>2: &lt;Continuous correction sewing&gt;</td>
<td>If the switch is kept pressed, sewing continues.</td>
</tr>
<tr>
<td>3: &lt;Reverse single correction sewing&gt;</td>
<td>The feed stops after sewing a single reverse stitch</td>
</tr>
<tr>
<td>4: &lt;Reverse continuous correction sewing&gt;</td>
<td>If the switch is kept pressed, reverse sewing continues.</td>
</tr>
<tr>
<td>5: &lt;Single correction sewing&gt;</td>
<td>Stops after half stitch sewing</td>
</tr>
</tbody>
</table>

These settings are enabled when the correction sewing icon is illuminated (نبيجة).

Settings for other than correction sewing switch

<table>
<thead>
<tr>
<th>Settings (Initial setting is “4”.)</th>
<th>Operation when hand switch is pressed</th>
</tr>
</thead>
<tbody>
<tr>
<td>OFF: &lt;Disabled&gt;</td>
<td>Feed moves in reverse while the switch is being pressed.</td>
</tr>
<tr>
<td>1: &lt;Reverse&gt;</td>
<td>When the switch is pressed, thread trimming is carried out.</td>
</tr>
<tr>
<td>2: &lt;Thread trimming&gt;</td>
<td>When this function is selected, the hand switch operates as a thread trimming switch even if the correction sewing icon is turned on.</td>
</tr>
<tr>
<td>3: &lt;Presser foot raising&gt;</td>
<td>If the switch is pressed while thread trimming is stopped, the presser foot is raised.</td>
</tr>
<tr>
<td>4: &lt;Presser foot raising (switching)&gt;</td>
<td>While tread trimming is stopped, the presser foot is raised and lowered each time the switch is pressed.</td>
</tr>
<tr>
<td>5: &lt;Production counter manual count increase&gt;</td>
<td>The production counter increases by 1 each time the switch is pressed while sewing is stopped.</td>
</tr>
<tr>
<td>6: &lt;Single end backtack cycle cancel&gt;</td>
<td>When the switch is pressed, end backtacking is canceled once for that sewing pattern, and end backtacking is now sewn even when the treadle is depressed backward.</td>
</tr>
<tr>
<td>Settings (Initial setting is “4”.)</td>
<td>Operation when hand switch is pressed</td>
</tr>
<tr>
<td>-----------------------------------</td>
<td>---------------------------------------</td>
</tr>
<tr>
<td>7: &lt;Move to next program&gt;</td>
<td>When cycle sewing is selected, sewing moves to the next program each time the switch is pressed.</td>
</tr>
<tr>
<td></td>
<td>Refer to the Service Manual for details on cycle sewing.</td>
</tr>
</tbody>
</table>

* These settings are enabled when the correction sewing icon is turned off (프로그램).
Setting hand switch functions

1. Press [手柄] > [Hand switch setting].

<table>
<thead>
<tr>
<th>Hand switch setting</th>
</tr>
</thead>
<tbody>
<tr>
<td>Correction sewing function</td>
</tr>
<tr>
<td>Other function of Correction sewing</td>
</tr>
</tbody>
</table>

2. Select the desired menu.
   Example: Setting the hand switch so that it functions as a correction sewing switch

   1. Press [Correction sewing function].

<table>
<thead>
<tr>
<th>Correction sewing function</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
</tr>
<tr>
<td>[Single correction sewing]</td>
</tr>
<tr>
<td>Stop after one pitch sewing</td>
</tr>
</tbody>
</table>

3. Press 或 to select the desired setting item.

4. Press .
   Press this to return to the Home screen.
Reading and writing data using USB media

Programs and memory switch data can be copied between sewing machines by means of USB media.

**CAUTION**

- Do not connect anything to the USB port other than the USB media. Otherwise, problems with operation may result.

Switching to USB media read/write mode

1. Connect the USB media to the sewing machine.
2. Press \[ > [USB media read/write].
   The currently-selected read/write item and illustration will be displayed.
   - Multi card readers may not be recognized correctly.

3. Use the \[ or \] keys to change the read/write item.
4. Press \[OK\].
   The selected read/write item will be run. The read/write in progress screen will be displayed.
   - If no USB media is connected at this time, the message "USB media can not be detected." will be displayed.
5. Press \[Esc\].
   The display will return to the previous screen.

Data read/write items in USB media mode and media folder structure

Initialization

If the sewing machine stops operating normally, the cause may be that an incorrect setting may have been made for the memory data by means of memory switches, for instance. In such cases, it may be possible to restore normal operation by initializing the stored data.

1 While pressing \[ \text{key} \], turn on the power switch.
   The display will switch to the initialization menu screen.

   ![Initialization Menu](image)

   **Initialization**
   - All clear
   - Memory switch initialization
   - Speed initialization

2 Select the item to be initialized.

   ![All Clear](image)

   **All clear**
   - Are you sure you want to initialize?
   - OK

3 Select **OK**.

   Initialization will then be carried out. When initialization is complete, the display will return to the initialization menu screen.

4 Press \[ \text{key} \].

   Press this to return to the Home screen.
Points to note before sewing

CAUTION

• Attach all safety devices before using the sewing machine. If the machine is used without these devices attached, injury may result.
• Turn off the power switch while threading and replacing the bobbin, and when not using or going away from the sewing machine. The machine may operate if the treadle is depressed by mistake, which could result in injury.
• Do not touch any of the moving parts or press any objects against the sewing machine while sewing. Otherwise, it may result in injury or damage to the sewing machine.
• Secure the table so that it will not move when tilting back the machine head. If the table moves, it may crush your feet or cause other injuries.
• Use both hands to hold the machine head when tilting it back or returning it to its original position. If only one hand is used, the weight of the machine head may cause your hand to slip, and your hand may get caught.

Adjusting the presser foot floating amount (minute lifting amount)

When sewing stretch materials and materials with long pile, you can make minute adjustments to the floating amount for the presser foot (1) in accordance with the material.

1 Turn the sewing machine pulley by hand to move the feed dog (2) below the needle plate (3).

2 Use the lifting lever to lower the presser foot (1).

3 Loosen the nut (4).

4 Use a screwdriver to turn the adjustment screw (5) to adjust the floating amount.
   - To raise the presser foot (1), turn the adjustment screw (5) clockwise.
   - To lower the presser foot (1), turn the adjustment screw (5) counterclockwise.

5 Tighten the nut (4).

After making the adjustment, sew a piece of material to check the floating amount.
Sewing condensed stitches

- If you press the hand switch (1) or the reverse lever (2) while sewing is in progress, you can sew stitches (forward direction) with small stitch lengths.
- Before carrying out sewing, set the stitch length for condensed stitches.

Setting condensed stitches

1. Lift up the dial lock lever (3) to release the lock.
2. Turn the stitch length dial (4) to the stitch length to be used for condensed stitches.
3. Tilt back the machine head.
4. Loosen the nut (5) and then turn the bolt (6) until its head is touching the solenoid lever (7).
5. Tighten the nut (5) to secure the bolt (6).
6. Return the machine head to its original position.
7. Return the stitch length dial (4) to the stitch length for normal sewing.
8. Push down the dial lock lever (3) to engage the lock.
10. At the position where you would like to start sewing condensed stitches, press the hand switch (1) or the reverse lever (2).

Condensed stitches are sewn while the hand switch (1) or reverse lever (2) is being pressed.

NOTE

To stop sewing condensed stitches, tighten the bolt (6) so that its head is not touching the solenoid lever (7).
The following cleaning operations should be carried out each day in order to maintain the performance of this machine and to ensure a long service life. Furthermore, if the sewing machine has not been used for a long period of time, carry out the following cleaning procedures before using it again.

**Points to note when cleaning**

<table>
<thead>
<tr>
<th>CAUTION</th>
</tr>
</thead>
</table>
| • Turn off the power switch and disconnect the power cord before carrying out these operations. The machine may operate if the treadle is depressed by mistake, which could result in injury.  
• Secure the table so that it will not move when tilting back the machine head. If the table moves, it may crush your feet or cause other injuries.  
• Use both hands to hold the machine head when tilting it back or returning it to its original position. If only one hand is used, the weight of the machine head may cause your hand to slip, and your hand may get caught.  
• Be sure to wear protective goggles and gloves when handling the lubricating oil and grease so that they do not get into your eyes or onto your skin. Otherwise inflammation can result. Furthermore, do not drink the oil or eat the grease under any circumstances. Diarrhea or vomiting may result. Keep the oil and grease out of the reach of children. |

**Adding oil to the oil tank**

Use only the lubricating oil <JXTG Energy Sewing Lube 10N; VG10> specified by Brother.

If this type of lubricating oil is difficult to obtain, the recommended oil to use is <Exxon Mobil Essotex SM10; VG10>.

• If the lubricating oil level drops below the bottom reference line (2) of the oil gauge window (1), add more oil.

**Related Information**

- Lubrication on page 7
Adjusting the quantity of oil in the gear box

**CAUTION**

- Check the quantity of oil in the gearbox immediately after tilting back the machine head. When the machine head is left for long periods in the tilted-back position, the amount of oil in the felt inside the gearbox drops and the oil level seen from the oil window (1) rises, so that it becomes impossible to measure the actual oil level accurately.

- The position of the oil level in the oil window (1) will vary depending on the angle of the machine head. Tilt back the machine head while the head rest (2) is installed in the correct position.

Checking the lubricating oil amount

The oil level should normally be approximately 2mm above the center reference line in the oil window (1). (70 ml of lubricating oil is added to the gearbox at the time of shipment from the factory.)

1. Look at the oil window (1) from directly in front.

2. If the oil level is below the normal level, add more lubricating oil.

Lubrication

1. Remove the rubber cap (3).

2. Add lubricating oil until the oil level is approximately 2mm above the center reference line in the oil window (1).

**CAUTION**

- Pour the lubricating oil 10 ml at a time while checking the oil window.
- Do not pour too much lubricating oil into the specified location. If too much oil is added, oil leaks may result.

3. Insert the rubber cap (3) securely.

4. Return the machine head to its original position.

**NOTE**

The rubber cap (3) has a hole in it for adjusting the air pressure. When replacing the rubber cap (3) use only the replacement part specified by Brother.
Checking the condition of the needle and upper thread

1 Replace the needle if it is bent or if the tip is broken.

2 Check that the upper thread has been threaded correctly.

3 Carry out a test sewing.
Adding grease (when the grease up warning screen is displayed)

If the time for adding grease has been reached when the power switch is turned on, the warning buzzer sounds five times (1 second on/1 second off), and the panel display changes to the grease up warning screen. The sewing machine will not operate at this time, even if the treadle is depressed.

To continue sewing temporarily without applying grease

1. Press OK.
   The panel display will change to the home screen and sewing will be possible when the treadle is depressed.

CAUTION

- The grease up warning screen will be displayed each time the power is turned on until you apply grease and reset the notification.
- If you continue to use the sewing machine after the grease up warning screen is displayed without applying grease (or without carrying out the reset procedure), “E 100” will appear after a certain period of time and the sewing machine will be forcibly prevented from operating for safety reasons.
   If this happens, apply grease and carry out the reset procedure.
- If you continue to use the sewing machine after carrying out the reset procedure but without applying grease, problems with the sewing machine may result.

Applying grease

NOTE

Use Brother-specified “Grease unit (SB6659-101)”.

Using the tube

1. Make a hole in the tube and attach the nozzle according to the instructions shown in the illustration.

Applying grease

2. Follow the procedure below to apply grease to the places indicated by arrows.

S-7220D-433

1. Turn the power switch to “OFF”.
2. Remove the screw.
3. Apply grease to each of the holes until the grease overflows slightly.
4. Turn the machine pulley to raise the needle bar to a position where the slide block guide (1) can be seen, and then apply grease at the position shown in the illustration.
   (S-7220D-433)
5. Tighten the screw to push in the grease.
6. Turn the machine pulley by hand to move the needle bar up and down several times in order to disperse the grease.
7. Use a cloth to wipe away any excess grease from around the screws.

To learn more, see Related Information.

8. After applying grease in the places indicated by the arrows, reset the cumulative time.

NOTE

• Once the grease tube has been opened, remove the nozzle from the tube, attach the cap securely and store the tube in a cool dark place.

• The grease should be used as quickly as possible.

• When using the grease again, remove any old grease from inside the nozzle first.

• Store the tube away carefully once the tube has been opened, otherwise the grease remaining inside the tube may deteriorate, and this may affect its lubricating performance.

Clearing the cumulative time between grease applications

1. While pressing (1), turn on the power switch (2).

2. Select [Grease up].

Press "OK" key after grease up has been completed

3. Press OK

4. Press .

The display will switch to the home screen.

5. Depress the treadle to run the sewing machine for 1 second or more.

6. Turn the power switch to “OFF”.

This completes the reset operation.
Points to note when replacing parts

<table>
<thead>
<tr>
<th>CAUTION</th>
</tr>
</thead>
<tbody>
<tr>
<td>• Turn off the power switch and disconnect the power cord before carrying out these operations. The machine may operate if the treadle is depressed by mistake, which could result in injury.</td>
</tr>
<tr>
<td>• Secure the table so that it will not move when tilting back the machine head. If the table moves, it may crush your feet or cause other injuries.</td>
</tr>
<tr>
<td>• Use both hands to hold the machine head when tilting it back or returning it to its original position. If only one hand is used, the weight of the machine head may cause your hand to slip, and your hand may get caught.</td>
</tr>
</tbody>
</table>

| ● Replacement of parts should only be carried out by a qualified technician. |
| ● Use only the proper replacement parts as specified by Brother. |

Replacing the fixed knife and movable knife

Replacing the fixed knife

1 Tilt back the machine head.

2 Remove the screw (1), and then remove the hook stopper (2).

3 Remove the flat screw (3), and then remove the fixed knife (4).

4 Install the new fixed knife by following the removal procedure in reverse.

Sharpening the fixed knife

If the thread is not being cut cleanly, use a whetstone (5) to sharpen the fixed knife (4) as shown in the illustration.

Replacing the movable knife

5 Remove the needle, and then use the lifting lever to lift the presser foot.

6 Remove the two flat screws (6), and then remove the needle plate (7).

7 Turn the machine pulley to move the needle bar to its highest position.

8 Tilt back the machine head.

9 Push the thread trimmer lever (8) by hand in the direction of the arrow until the two flat screws (9) can be seen.
10 Remove the two flat screws (9), and then remove the movable knife (10).

11 Install the new movable knife by following the removal procedure in reverse.
Points to note when making adjustments

**CAUTION**

- Secure the table so that it will not move when tilting back the machine head. If the table moves, it may crush your feet or cause other injuries.
- Use both hands to hold the machine head when tilting it back or returning it to its original position. If only one hand is used, the weight of the machine head may cause your hand to slip, and your hand may get caught.
- Turn off the power switch and disconnect the power cord plug before carrying out inspection, adjustment or repairs, or when replacing consumable parts such as the rotary hook or knives. The machine may operate if the treadle is depressed by mistake, which could result in injury.
- If the power switch needs to be left on when carrying out some adjustment, be extremely careful to observe all safety precautions.

- Maintenance and inspection of the sewing machine should only be carried out by a qualified technician.
- Ask your Brother dealer or a qualified electrician to carry out any maintenance and inspection of the electrical system.
- If any safety devices have been removed, be absolutely sure to re-install them to their original positions and check that they operate correctly before using the machine.
- Always be sure to turn off the power switch and then wait one minute before opening the motor cover. If you touch the surface of the motor, it may cause burns.

**Adjusting the safety switch position**

The standard amount of clearance between the machine bed and the table hole is 1.5mm. If the processing method used for the table leaves too much space between the machine head and the table hole (3.5 mm or more), it may adversely affect the operation of the safety switch (1). In such cases, adjust the position of the safety switch (1).

- The safety switch (1) is normally installed as shown in figure [A].
- If the stroke of the spring is small, the operation of the safety switch (1) will become poorer, and so the sewing machine may not operate even when the treadle is depressed.
1 Remove the safety switch (1).

2 Change the position of the washer (2) to the machine bed side as shown in figure [B], and then install the safety switch (1).

If further adjustment is necessary, add another washer of the same thickness.

Adjusting the height of the needle bar

Adjust so that the distance from needle plate mounting surface A to the bottom edge of the needle bar (1) is the same as the height of surface B on the <1> side of the accessory timing gauge (2) when the needle bar (1) is at its lowest position as shown in the illustration.

1 Remove the presser foot (3), needle plate (4) and feed dog (5).

2 Turn the machine pulley to set the needle bar (1) to its lowest position.

3 Remove the rubber cap (6) from the face plate.

4 Loosen the screw (7).

5 Move the needle bar (1) up or down to adjust so that the distance from needle plate mounting surface A to the bottom edge of the needle bar (1) is the same as the height of surface B on the <1> side of the accessory timing gauge (2).

6 Securely tighten the screw (7).

7 Install the rubber cap (6).

8 Install the feed dog (5), needle plate (4) and presser foot (3).
Adjusting the needle and rotary hook timing

When the machine pulley is turned forward to raise the needle bar (1) 1.8 mm (2.2 mm for -405 specifications) from its lowest position, the rotary hook tip (3) should be aligned with the center of the needle (4) as shown in the illustration when the distance from needle plate mounting surface A to the bottom edge of the needle bar (1) is the same as the height of surface C on the <2> side of the accessory timing gauge (2). At this time, the gap between the upper edge of the needle hole and the rotary hook tip (3) will be 0.5 to 1.0 mm (0.8 to 1.3 mm for -405 specifications).

1. Remove the presser foot (5), needle plate (6) and feed dog (7).

2. Set the stitch length dial as follows.

   **Standard stitch length**

<table>
<thead>
<tr>
<th>Specifications</th>
<th>Stitch length dial</th>
</tr>
</thead>
<tbody>
<tr>
<td>-403</td>
<td>0</td>
</tr>
<tr>
<td>-405</td>
<td>3</td>
</tr>
</tbody>
</table>

3. Loosen two of the three set screws (9) which are securing the rotary hook (8).

4. Turn the machine pulley to raise the needle bar (1) from its lowest position until the distance from needle plate mounting surface A to the bottom edge of the needle bar (1) is the same as the height of surface C on the <2> side of the accessory timing gauge (2).

5. Loosen the remaining set screw (9) and align the rotary hook tip (3) with the center of the needle (4). The distance between the tip of the rotary hook (3) and the needle (4) should be approximately 0 to 0.1 mm at this time.

6. Securely tighten the three set screws (9).

7. Install the feed dog (7), needle plate (6) and presser foot (5).

### Adjusting the clearance between the rotary hook and the hook stopper

8. Check that the thread being used passes smoothly through the clearance between the rotary hook (8) and the hook stopper (10).

### Standard clearance

<table>
<thead>
<tr>
<th>Specifications</th>
<th>Clearance</th>
</tr>
</thead>
<tbody>
<tr>
<td>-403</td>
<td>0.4 to 0.7 mm</td>
</tr>
<tr>
<td>-405</td>
<td>0.8 to 1.2 mm</td>
</tr>
</tbody>
</table>
Adjusting the height of the feed dog

The standard height of the feed dog (1) when it is raised as far as possible above the surface of the needle plate is as given below.

<table>
<thead>
<tr>
<th>Specifications</th>
<th>Standard height</th>
</tr>
</thead>
<tbody>
<tr>
<td>-4[3]</td>
<td>1.0mm</td>
</tr>
<tr>
<td>-405</td>
<td>1.2mm</td>
</tr>
</tbody>
</table>

1. Turn the machine pulley to move the feed dog (1) to its highest position above the needle plate.
2. Tilt back the machine head.
3. Loosen the set screw (2).
4. Turn the feed lifting rocker shaft (3) within a range of 90° from the reference line (4) to adjust the vertical height of the feed bar (5). (Figure [A])
5. Tighten the set screw (2).

If you are worried about the angle of the feed dog (1), turn the feed bar shaft (6) while carrying out the above adjustment. (Figure [B]) To learn more, see Related Information.

Related Information
- Adjusting the feed dog angle on page 59
Adjusting the feed dog angle

The standard angle is for the feed dog (1) to be parallel to the needle plate when the machine pulley is turned forward to raise the feed dog (1) from its lowest position until it is flush with the top of the needle plate.

1. Turn the machine pulley forward to raise the feed dog (1) from its lowest position until it is flush with the top of the needle plate, and stop turning the machine pulley at that point.

2. Tilt back the machine head.

3. Loosen the two set screws (4).

4. Turn the feed base shaft (2) in the direction of the arrow within a range of 90° with respect to the standard position. (Figure [C])

5. Securely tighten the two set screws (4).

- If you would like to tilt the feed dog (1) further, turn the feed lifting rocker shaft (5) while carrying out the above adjustment. (Figure [D]) To learn more, see Related Information.

- In order to prevent puckering, lower the front of the feed dog (1).
- In order to prevent the material from slipping, raise the front of the feed dog (1).

Related Information

- Adjusting the height of the feed dog on page 58
### Adjusting the needle and feed timing

The standard timing is for the tip of the needle to be in the position given below when the machine pulley is turned forward to raise the feed dog (1) from its lowest position until it is flush with the top of the needle plate (2). (At this time, the “-” mark on the lower shaft will be aligned with the center of the scale (4) (0 mark) on the vertical cam (3).) (Figure [A])

#### Specifications

<table>
<thead>
<tr>
<th>Standard condition</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>-4[J3]</td>
<td>There is a gap of approximately 2 mm between the tip of the needle and the top of the needle plate (2).</td>
</tr>
<tr>
<td>-405</td>
<td>There is a gap of approximately 4 mm between the tip of the needle and the top of the needle plate (2).</td>
</tr>
</tbody>
</table>

1. Turn the stitch length dial to the maximum setting.

2. Tilt back the machine head.

3. Loosen the two set screws (5), and then turn the feed lifting eccentric cam (3) slightly to adjust the timing.

**CAUTION**

Use the standard needle and feed mechanism timing. If the timing is changed, broken needles may occur.

4. After adjusting, securely tighten the set screw (5).

### Adjust the position of arm thread guide R

The standard position of arm thread guide R (1) is the position where the screw (2) is in the center of the adjustable range for arm thread guide R (1).

1. Loosen the screw (2).

2. To adjust the position, move arm thread guide R (1).

   • When sewing heavy-weight material, move arm thread guide R (1) to the left. (The thread take-up amount will become greater.)
   • When sewing light-weight material, move arm thread guide R (1) to the right. (The thread take-up amount will become less.)
### Adjusting the height of the presser foot

The standard height of the presser foot (1) is 6 mm when the presser foot (1) is raised by means of the lifting lever (2).

1. Loosen the nut (3), and then loosen the adjustment screw (4) so that there is no pressure applied to the presser foot.
2. Raise the presser foot (1) by using the lifting lever (2).
3. Remove the rubber cap (5) from the face plate.
4. Loosen the bolt (6) and then move the presser bar (7) up or down until the presser foot (1) is at the standard height of 6 mm.
5. Tighten the bolt (6).
6. Install the rubber cap (5).
7. Adjust the presser foot pressure using the presser adjustment screw (4), and then tighten the nut (3).

---

**NOTE**

After adjusting, check that the needle moves down into the center of the groove in the presser foot.

---

[Diagram showing the presser foot components and their numbers:]

Adjusting the rotary hook lubrication amount

Use the following procedure to check the amount of oil being supplied to the rotary hook when replacing the rotary hook or when changing the sewing speed.

**CAUTION**

- Be careful not to touch your fingers or the lubrication amount check sheet against moving parts such as the rotary hook or the feed mechanism when checking the amount of oil supplied to the rotary hook. Otherwise injury may result.

Checking the lubrication amount

1. Remove the thread from all points from the thread take-up lever to the needle.
2. Use the lifting lever to lift the presser foot.
3. Run the machine at the normal sewing speed for approximately 1 minute without sewing any material (following the same start/stop pattern as when actually sewing).
4. Place the lubrication amount check sheet (1) to the left of the rotary hook (2) and hold it there. Then run the sewing machine at the normal sewing speed for 8 seconds.
5. Check the amount of oil which has spattered onto the sheet. If adjustment is necessary, adjust the lubrication amount.

Adjusting the lubrication amount

If the lubrication amount does not match the correct amount shown in the illustration (if the amount of spattered oil is too much or none at all), turn the oil adjustment screw (3) clockwise to fully tighten it, turn it back counterclockwise by 2 1/2 turns, and then carry out the adjustment.

6. Tilt back the machine head.
7. Turn the oil adjustment screw (3) to adjust the lubrication amount.
   - If the oil adjustment screw (3) is turned clockwise, the lubrication amount becomes greater.
   - If the oil adjustment screw (3) is turned counterclockwise, the lubrication amount becomes smaller.

8. Check the lubrication amount.
   - Turn the rotary hook adjusting screw (3) and check the lubrication amount repeatedly until the lubrication amount is correct.
Check the lubrication amount again after the sewing machine has been used for approximately two hours.
Troubleshooting

- Please check the following points before calling for repairs or service.
- Simplified details can be checked on the panel.
- If the following remedies do not fix the problem, turn off the power switch and consult a qualified technician or the place of purchase.

**DANGER**

- Wait at least 5 minutes after turning off the power switch and disconnecting the power cord from the wall outlet before opening the control box cover. Touching areas where high voltages are present can result in severe injury.

**CAUTION**

- Turn off the power switch and disconnect the power cord before carrying out these operations. The machine may operate if the treadle is depressed by mistake, which could result in injury.

Troubleshooting during sewing

Items with a *** in the "Page" column should only be checked by a qualified technician.

| Nothing appears on the operation panel display. | • Is the power supply connector disconnected from the control box?  
Insert the connector securely. | See Connecting the cords on page 9. |
| | • Is the 8-pin operation panel connector inside the control box disconnected?  
Insert the connectors securely. | See Connecting the cords on page 9. |
| The panel display switches to the grease-up warning screen when the power switch is turned on. | • This display is to notify you that it is time to apply grease.  
Apply grease. | See Adding grease (when the grease up warning screen is displayed) on page 51. |
| The illumination becomes momentarily darker or flickers. | • The illumination may become momentarily darker or flicker when the sewing machine starts or stops, depending on the power supply in the environment where the sewing machine is being used. This is not a sign of a malfunction. | * |
List of error codes

If an error code appears on the touch panel display

**E055**

Machine head is detected as being tilted back when turn on power.
Turn off power, return head to right portion.
Turn off power, check connection of connector CN8.
