### Consumables and Options

- Consumables ............................................................................................................. 47
Carton components

Carton components may vary from one country to another.
Save all packing materials and the carton in case for any reason you must ship your machine.

**Warning**

Plastic bags are used in the packaging of your machine. To avoid danger of suffocation, keep these bags away from babies and children.

1. Automatic Document Feeder (ADF)
2. Control Panel
3. Face-down Output Tray Support
4. Manual Feed Slot
5. Paper Tray
6. Front Cover
7. Power Switch
8. ADF Document Output Support Flap
9. Document Cover

The interface cable is not a standard accessory. Please purchase the appropriate interface cable for the interface you intend to use (USB or Network). Do NOT connect the interface cable at this time. Connecting the interface cable is done during the software installation process.

- **USB interface cable**
  Please make sure you use a USB 2.0 interface cable that is no longer than 6 feet (2 meters). When you use a USB cable, make sure you connect it to the USB port of your computer and not to a USB port on a keyboard or non-powered USB hub.

- **Network cable**
  Use a straight-through Category5 (or greater) twisted-pair cable for 10BASE-T or 100BASE-TX Fast Ethernet Network.

- **CD-ROMs**
  - For Windows®
  - For Macintosh®

2  Print keys
3  One Touch keys
4  Shift key
5  Mode keys
6  Menu keys
7  Dial Pad
8  Start key
9  Stop/Exit key
10 LCD (Liquid Crystal Display)
11 Fax and Telephone keys

For the details of the control panel, see Control panel overview in Chapter 1 of the User’s Guide.

Note

When you move the machine, grasp the side handholds that are under the scanner. Do NOT carry the MFC by holding it at the bottom.
STEP 1 Setting Up the Machine

1 Installing the drum unit and toner cartridge assembly

- Improper Setup
  DO NOT connect the interface cable. Connecting the interface cable is done when installing the driver.

1 Open the front cover.

2 Unpack the drum unit and toner cartridge assembly.

3 Rock it from side to side several times to distribute the toner evenly inside the assembly.

4 Put the drum unit and toner cartridge assembly into the machine.

5 Close the front cover of the machine.
2 Loading paper in the paper tray

1 Pull the paper tray completely out of the machine.

2 While pressing the green paper-guide release lever, slide the paper guides to fit the paper size you are using. Make sure that the guides are firmly in the slots.

3 Fan the stack of paper well to avoid paper jams and misfeeds.

4 Put paper in the paper tray. Make sure that the paper is flat in the tray and below the maximum paper mark (1).

Caution

Make sure the paper guides touch the sides of the paper so it will feed properly. If you do not this, it may cause damage to your machine.

5 Put the paper tray firmly back into the machine. Make sure that it is completely inserted into the machine.

Note

For Legal size paper, press the release button in the bottom of paper tray and pull out the back of the paper tray. (Legal size paper is not available in some regions.)
## Setting Up the Machine

### STEP 1

#### Install the power cord and phone line

1. Make sure that the machine power switch is off. Connect the AC power cord to the machine.

2. Plug the AC power cord into an AC outlet. Turn the power switch on.

3. Connect one end of the telephone line cord to the jack on the machine marked **LINE** and the other end to a modular wall jack.

   - **Warning**
     - The machine must be grounded using a 3-prong plug.
     - Since the machine is grounded through the power outlet, you can protect yourself from potentially hazardous electrical conditions on the telephone network by keeping the power cord connected to your machine when you connect it to a telephone line. Similarly, you can protect yourself when you want to move your machine by disconnecting the telephone line first and then the power cord.

   - **Note**
     - If you are sharing one phone line with an external telephone, connect it as shown below.

   - **Note**
     - If you are sharing one phone line with an external telephone answering device, connect it as shown below.

   - **Note**
     - Make sure the telephone line cord is connected to the jack labeled **LINE** and not the **EXT.** jack.

   - Please set the receive mode to **External TAD**. For more details, see Choosing the correct Receive Mode on page 9 and Connecting an external TAD in Chapter 7 of the User’s Guide.
4 **Selecting your language**

1. Press Menu.
2. Press 0.
3. Press 0.
4. Select your language by using ▲ or ▼ and then press OK.
5. Press Stop/Exit.

5 **Setting the LCD contrast**

You can change the contrast to help the LCD look lighter or darker.

1. Press Menu.
2. Press 1.
4. Press ▲ to increase the contrast.
   —OR—
   Press ▼ to decrease the contrast.
   Press OK.
5. Press Stop/Exit.

6 **Setting the date and time**

The machine displays the date and time, and if you setup the station ID, it will add it to each fax you send.

1. Press Menu.
2. Press 0.
4. Enter the last two digits of the year on the dial pad, and then press OK.
   ![Date&Time](image)
   (e.g. Enter 0, 8 for 2008.)
5. Enter the two digits for the month on the dial pad, and then press OK.
   ![Date&Time](image)
   (e.g. Enter 0, 3 for March.)
6. Enter the two digits for the day on the dial pad, and then press OK.
   ![Date&Time](image)
   (e.g. Enter 2, 5.)
7. Enter the time in 24-hour format on the dial pad, and then press OK.
   ![Date&Time](image)
   (e.g. Enter 1, 5, 2, 5 for 3:25 P.M.)
8. Press Stop/Exit.

✏ **Note**

If you make a mistake and want to start again, press Stop/Exit and go back to step 1.
Setting your station ID

You should store your name and fax number to be printed on all fax pages that you send.

1. Press Menu.
2. Press 0.
4. Enter your fax number (up to 20 digits) on the dial pad, and then press OK.

**Station ID**
Fax:

5. Enter your telephone number (up to 20 digits) on the dial pad, and then press OK. (If your telephone number and fax number are the same, enter the same number again.)

**Station ID**
Tel:

6. Use the dial pad to enter your name (up to 20 characters), and then press OK.

**Station ID**
Name:

**Note**
- Refer to the following chart for entering your name.
- If you need to enter a character that is on the same key as the previous character, press \( \rightarrow \) to move the cursor to the right.
- If you entered a letter incorrectly and want to change it, press \( \leftarrow \) or \( \rightarrow \) to move the cursor to the incorrect character, press Clear/Back.

(USA only) The Telephone Consumer Protection Act of 1991 makes it unlawful for any person to use a computer or electronic device to send any message via a telephone fax machine unless such messages clearly contain, in a margin at the top or bottom of each transmitted page, or on the first page of the transmission, the date and time it is sent and an identification of the business or other entity or other individual sending the message and the telephone number of the sending machines or such business, other entity or individual. To program this information into your machine, see Setting the date and time on page 7 and Setting your station ID on page 8.

7. Press Stop/Exit.

For more details, see “Entering Text” in the User’s Guide.
## Choosing the correct Receive Mode

The correct Receive mode is determined by the external devices and telephone subscriber services (Voice Mail, Distinctive Ring, etc.) you have (or will be using) on the same line as the Brother machine.

### Will you be using a Distinctive Ring number for receiving faxes?

Brother uses the term "Distinctive Ring" but telephone companies have other names for this service such as Custom Ringing, RingMaster, Personalized Ring, Teen Ring, Ident-A-Call, and Smart Ring. See Distinctive Ring in Chapter 7 of the User's Guide for instruction on setting up your machine using this feature.

### Will you be using Voice Mail on the same telephone line as your Brother machine?

If you have Voice Mail on the same telephone line as your Brother machine, there is a strong possibility that Voice Mail and the Brother machine will conflict with each other when receiving incoming calls. See Voice Mail in Chapter 7 of the User's Guide for instructions on setting up your machine using this service.

### Will you be using a Telephone Answering Device on the same telephone line as your Brother machine?

Your external telephone answering device (TAD) will automatically answer every call. Voice messages are stored on the external TAD and fax messages are printed. Choose External TAD as your receive mode. See the instructions below.

### Will you be using your Brother machine on a dedicated fax line?

Your machine automatically answers every call as a fax. Choose Fax Only as your receive mode. See the instructions below.

### Will you be using your Brother machine on the same line as your telephone?

**Do you want to receive voice calls and faxes automatically**

The Fax/Tel receive mode is used when sharing the Brother machine and your telephone on the same line. Choose Fax/Tel as your receive mode. See the instructions below.

**Important Note:** You can not receive voice messages on either Voice Mail or an answering machine when choosing the Fax/Tel mode.

**Do you expect to receive very few faxes?**

Choose Manual as your receive mode. You control the phone line and must answer every call yourself. See the instructions below.

1. Press Menu.
2. Press 0.
4. Press 🗞️ or 📷 to select the mode.
5. Press OK.
6. Press Stop/Exit.
Setting Up the Machine

9 Tone and pulse dialing mode (Canada only)

Your machine comes set for Tone dialing service. If you have Pulse dialing service (rotary), you need to change the dialing mode.

1 Press Menu.
2 Press 0.
3 Press 4.
4 Press  or   to select Pulse (or Tone).
   Press OK.
5 Press Stop/Exit.

10 Dial Prefix

The dial prefix setting will automatically dial a predefined number before every fax number you dial. For example: If your phone system requires a 9 to dial an outside number this setting will automatically dial 9 for every fax you send.

1 Press Menu.
2 Press 0.
3 Press 5 (For Canada, press 6).
4 Enter the prefix number (up to 5 digits) on the dial pad, and then press OK.

Note

- You can use the number 0 to 9, #, *, and !. (Press Hook to display “!”.)
  You cannot use ! with any other numbers or characters.
  If your telephone system requires a timed break recall (hookflash), press Hook to enter the break.
- If the pulse dialing mode is on, # and * are not available to use. (Canada only)

5 Press Stop/Exit.
11 Sending in the product registration and test sheet (USA only)

1 Fill out the Product Registration and Test Sheet.

2 Place the sheet face up in the Automatic Document Feeder.

Note

Make sure (Fax) is illuminated in Green.

3 Enter the toll-free fax number:
1-877-268-9575.

4 Press Start.

Note

• You will receive a confirmation fax of your Product Registration.
• You can also register your product online using the On-Line Registration link from the installation CD-ROM or go to www.brother.com/registration/

Now go to

the next page to install the driver and software.
Supplied CD-ROM ‘MFL-Pro Suite’

Windows®

Install MFL-Pro Suite
You can install the MFL-Pro Suite software and multifunction drivers.

Install Other Drivers or Utilities
You can install additional MFL-Pro Suite software utilities.

Documentation
View the Software User’s Guide and Network User’s Guide in HTML format. You can also view the manuals in PDF format by accessing the Brother Solutions Center. (Internet access required) The Software User’s Guide and Network User’s Guide include instructions for features available when connected to a computer. (e.g. printing, scanning and networking details)

On-Line Registration
Register your machine on the Brother product Registration Page.

Brother Support
View contact information for Brother Customer Service and how to find a Brother Authorized Service Center. For Supplies Information, visit our site for original/genuine Brother supplies at http://www.brother.com/original/.

Repair MFL-Pro Suite (For USB users only)
If an error occurred during the installation of the MFL-Pro Suite, use this selection to automatically repair and re-install the MFL-Pro Suite.

Note
MFL-Pro Suite includes the Printer Driver, Scanner Driver, Brother ControlCenter3, ScanSoft™ PaperPort™ 11SE with OCR by NUANCE™. ScanSoft™ PaperPort™ 11SE is a document management application for scanning and viewing documents.

Macintosh®

Start Here OSX
You can install the MFL-Pro Suite that includes the printer driver, scanner driver, the Brother ControlCenter2 and BRAdmin Light for Mac OS® X 10.2.4 or greater.

Documentation
View the Software User’s Guide and Network User’s Guide in HTML format. You can also view the manuals in PDF format by accessing the Brother Solutions Center. (Internet access required) The Software User’s Guide and Network User’s Guide include instructions for features available when connected to a computer. (e.g. printing, scanning and networking details)

Brother Solutions Center
Access the Brother Solutions Center for FAQs, User’s Guide, driver updates and tips for using your machine. (Internet access required)

Presto! PageManager
You can install Presto!® PageManager® to add OCR capability to the Brother ControlCenter2 and easily scan, share and organize photos and documents.

On-Line Registration
Register your machine on the Brother product Registration Page.

Utilities
You can find the following additional Utilities from this folder.
- Wireless LAN Setup Wizard
- Presto!® PageManager® Uninstaller
- BRAdmin Light
Follow the instructions on this page for your operating system and interface.
For the latest drivers, documentation, and to find the best solution for your problem, access the Brother Solution Center directly from the CD-ROM / Driver or visit http://solutions.brother.com/.

The screens for Mac OS® X in this Quick Setup Guide are based on Mac OS® X 10.4.
STEP 2  Installing the Driver & Software

For USB Interface Cable Users  (For Windows® 2000 Professional/XP/XP Professional x64 Edition/Windows Vista®)

Important

Make sure that you have finished the instructions from step 1 Setting Up the Machine on pages 4 through 11.

Note

• Please close any applications running before installing the MFL-Pro Suite.
• The supplied CD-ROM includes ScanSoft™ PaperPort™ 11SE. This software supports Windows® 2000 (SP4 or greater), XP (SP2 or greater), XP Professional x64 Edition and Windows Vista® only. Please update to the latest Windows® Service Pack before installing MFL-Pro Suite.

1 Turn off and unplug the machine from the AC outlet and disconnect it from your computer, if you already connected an interface cable.

2 Turn on your computer. (You must be logged on with administrator rights.)

3 Put the supplied CD-ROM for Windows® into your CD-ROM drive. If the model name screen appears, choose your machine. If the language screen appears, choose your language.

4 The CD-ROM main menu will appear. Click Install MFL-Pro Suite.

5 Choose Local Connection (USB), and then click Next. The installation will continue.

Note

• If this window does not appear, use Windows® Explorer to run the start.exe program from the root folder of the Brother CD-ROM.
• For Windows Vista®, when the User Account Control screen appears, click Allow.

Note

If you want to install the PS driver (Brother’s BR-Script Driver), choose Custom Install and then follow the on-screen instructions. When the Select Features screen appears, check PS Printer Driver, and then continue following the on-screen instructions.
After reading and accepting the ScanSoft™ PaperPort™ 11SE License Agreement, click Yes.

The installation of ScanSoft™ PaperPort™ 11SE will automatically start and is followed by the installation of MFL-Pro Suite.

When the Brother MFL-Pro Suite Software License Agreement window appears, click Yes if you agree to the Software Licence Agreement.

Note

For Windows Vista®, when this screen appears, click the check box and click Install.

When this screen appears, connect the USB interface cable to your PC, and then connect it to the machine.

Improper Setup

DO NOT connect the machine to a USB port on a keyboard or a non-powered USB hub. Brother recommends that you connect the machine directly to your computer.

Plug the AC power cord into an AC outlet. Turn the power switch on.

Improper Setup

DO NOT try to cancel any of the screens during this installation.
**STEP 2 Installing the Driver & Software**

**Windows® USB**

When the On-Line Registration screen is displayed, make your selection and follow the on-screen instructions. Once you have completed the registration process, close your web browser to return to this window. Then click **Next**.

![On-Line Registration Screen](image)

**Click Finish to restart your computer. (You must be logged on with Administrator rights.)**

![Finish Screen](image)

---

**Note**

After restarting the computer, the **Installation Diagnostics** will run automatically. If the installation is unsuccessful, the installation results window will be shown. If the **Installation Diagnostics** shows a failure, please follow the on-screen instruction or read the on-line help and FAQs in **Start/All Programs/ Brother/ MFC-XXXX**.

The MFL-Pro Suite (including printer driver and scanner driver) has been installed and the installation is now complete.

---

**Note**

**XML Paper Specification Printer Driver**
The XML Paper Specification Printer Driver is the most suitable driver when printing from the applications that use the XML Paper Specification documents. Please download the latest driver by accessing the Brother Solutions Center at http://solutions.brother.com/.
For Wired Network Interface Users  
(For Windows® 2000 Professional/XP/XP Professional x64 Edition/Windows Vista®)

**Important**

Make sure that you have finished the instructions from step 1 *Setting Up the Machine* on pages 4 through 11.

**Note**

The supplied CD-ROM includes ScanSoft™ PaperPort™ 11SE. This software supports Windows® 2000 (SP4 or greater), XP (SP2 or greater), XP Professional x64 Edition and Windows Vista® only. Please update to the latest Windows® Service Pack before installing MFL-Pro Suite.

1. Turn off and unplug the machine from the AC outlet.

2. Connect the network interface cable to the machine, and then connect it to your network.

3. Plug the AC power cord into an AC outlet. Turn the power switch on.

4. Turn on your computer. (You must be logged on with Administrator rights.) Close any applications running before installing the MFL-Pro Suite.

**Note**

Before installation, if you are using personal firewall software, disable it. After the installation, restart your personal firewall software.

5. Put the supplied CD-ROM into your CD-ROM drive. If the model name screen appears, choose your machine. If the language screen appears, choose your language.

6. The CD-ROM main menu will appear. Click Install MFL-Pro Suite.

**Note**

- If this window does not appear, use Windows® Explorer to run the *start.exe* program from the root folder of the Brother CD-ROM.
- For Windows Vista®, when the User Account Control screen appears, click Allow.
Choose **Wired Network Connection (Ethernet)**, and then click **Next**.

**Note**

If you want to install the PS driver (Brother's BR-Script Driver), choose **Custom Install** and then follow the on-screen instructions. When the **Select Features** screen appears, check **PS Printer Driver**, and then continue following the on-screen instructions.

After reading and accepting the ScanSoft™ PaperPort™ 11SE License Agreement, click **Yes**.

The installation of ScanSoft™ PaperPort™ 11SE will automatically start and is followed by the installation of MFL-Pro Suite.

When the Brother MFL-Pro Suite Software License Agreement window appears, click **Yes** if you agree to the Software License Agreement.

For Windows® XP SP2/XP Professional x64 Edition/Windows Vista® users, when this screen appears, choose **Change the Firewall port settings to enable network connection and continue with the installation.** (Recommended) and click **Next**.

If you are not using the Windows® Firewall, see the User's Guide for your software for information on how to add the following network ports.

- For network scanning, add UDP port 54925.
- For network PC-Fax receiving, add UDP port 54926.
- If you still have trouble with your network connection, add UDP port 137.

If the machine is configured for your network, choose the machine from the list, and then click **Next**.

If your machine shows **APIPA** in the **IP Address** field, click **Configure IP Address** and enter an **IP address** for your machine that is suitable for your network.

**Note**

- **You can find your machine’s IP address and the node name by printing out the Network Configuration List.** See Print the Network Configuration List on page 45
- **If the machine is not yet configured for use on your network, the following screen appears.**
Click OK. The Configure IP Address window will appear. Enter an IP address for your machine that is suitable for your network by following the on-screen instructions.

12 The installation of the Brother drivers will automatically start. The installation screens appear one after another, please wait for a while.

⚠️ Improper Setup

DO NOT try to cancel any of the screens during this installation.

📝 Note

For Windows Vista®, when this screen appears, click the check box and click Install.

13 When the On-Line Registration screen is displayed, make your selection and follow the on-screen instructions. Once you have completed the registration process, close your web browser to return to this window. Then click Next.

14 Click Finish to restart your computer. (You must be logged on with Administrator rights.)

The MFL-Pro Suite has been installed and the installation is now complete.

📝 Note

- **XML Paper Specification Printer Driver**
  The XML Paper Specification Printer Driver is the most suitable driver when printing from applications that use XML Paper Specification documents. Please download the latest driver by accessing the Brother Solutions Center at http://solutions.brother.com/.

- **MFL-Pro Suite** includes the Network Printer Driver, Network Scanner Driver, Brother ControlCenter3 and ScanSoft™ PaperPort™ 11SE.
  ScanSoft™ PaperPort™ 11SE is a document management application for viewing scanned documents.

  - After restarting the computer, the Installation Diagnostics will run automatically. If the installation is unsuccessful, the installation results window will be shown. If the Diagnostics shows a failure, please follow the on-screen instructions or read the on-line help and FAQs in Start/All Programs/Brother/MFC-XXXX LAN.
For Wireless Network Interface Users (For Windows® 2000 Professional/XP/XP Professional x64 Edition/Windows Vista®) in infrastructure mode

Connecting your wireless machine and wireless network together and installing the printer driver in infrastructure mode

First you must configure the wireless network settings of your machine to communicate with your network access point (router). After the machine is configured to communicate with your access point (router) computers on your network will have access to the machine. To use the machine from these computers, you will need to install the MFL-Pro Suite. The following steps will guide you through the configuration and installation process.

To achieve optimum results with normal every day document printing, place the Brother machine as close to the network access point (router) as possible with minimal obstructions. Large objects and walls between the two devices as well as interference from other electronic devices can affect the data transfer speed of your documents.

Due to these factors, wireless may not be the best method of connection for all types of documents and applications. If you are printing large files, such as multi-page documents with mixed text and large graphics, you may want to consider choosing wired Ethernet for a faster data transfer, or USB for the fastest throughput speed.

Although the MFC can be used in both a wired and wireless network, only one of the connection methods can be used at a time.

Important

The following instructions will offer two methods for installing your Brother machine in a wireless network environment. Both methods are for infrastructure mode, using a wireless router or access point that uses DHCP to assign IP addresses. If your wireless router/access point supports SecureEasySetup™, Wi-Fi Protected Setup™ or AOSS™ follow the steps on page 25 Using the SecureEasySetup™, Wi-Fi Protected Setup™ or AOSS™ software to configure your machine for a wireless network (one-push method). If your wireless router/access point does not support SecureEasySetup™, Wi-Fi Protected Setup™ or AOSS™ follow the steps on page 22 Using the Setup Wizard from the control panel LAN menu for wireless network configuration (Infrastructure Mode). To set up your machine in any other wireless environment (Ad-hoc mode) you can find instructions in the Network User’s Guide on the CD-ROM.

You can view the Network User’s Guide by following the instructions below.
1 Turn on your computer. Insert the Brother CD-ROM into your CD-ROM drive.
2 If the language screen appears, click your language. The CD-ROM main menu will appear.
3 Click the Documentation.
4 Click the HTML documents.
5 Click the NETWORK USER’S GUIDE.

Note

• If you are going to connect the printer to your network, we recommend that you contact your system administrator prior to installation.
• If you are using personal firewall software (e.g. Windows® Firewall), disable it. Once you are sure that you can print, restart your personal firewall software.
Confirm your network environment
The setup process will be different depending on your network environment.

- **Infrastructure Mode**

If your wireless access point (A) does not support SecureEasySetup™, Wi-Fi Protected Setup™ or AOSS™, follow the instructions, on page 22.

- **Installation using SecureEasySetup™, Wi-Fi Protected Setup™ or AOSS™.**

If your wireless access point (A) supports SecureEasySetup™, Wi-Fi Protected Setup™ or AOSS™, you do not need to use a computer to configure the machine. The access point (router) and your machine can automatically negotiate using the SecureEasySetup™ procedure. For instructions, go to page 25.

- **Configuration using the PIN Method of Wi-Fi Protected Setup™**

If your wireless access point (A) supports Wi-Fi Protected Setup™, you can also configure using the PIN Method of Wi-Fi Protected Setup™. For instructions, see the Network User’s Guide on the CD-ROM.
Using the Setup Wizard from the control panel LAN menu for wireless network configuration (Infrastructure Mode)

**Important**

Make sure that you have finished the instructions from step 1 Setting Up the Machine on pages 4 through 11.

These instructions will install your Brother machine in a typical small office or home wireless network environment in infrastructure mode, using a wireless router or access point that uses DHCP to assign IP addresses.

If you want to setup your machine in any other wireless environment you can find instructions in the Network User’s Guide on the CD-ROM. You can view the Network User’s Guide by following the instructions below.

1. Turn on your PC. Insert the Brother CD-ROM labeled Windows® into your CD-ROM drive.
2. If the language screen appears, click your language. The CD-ROM main menu will appear.
3. Click Documentation.
4. Click the HTML document.
5. Click the Network User’s Guide.

---

**Note**

If the window does not appear, use Windows® Explorer to run the setup.exe program from the root directory of the Brother CD-ROM.

---

Before you begin you must know your wireless network settings.

1. Write down the wireless network settings of your access point or wireless router.
   - **SSID** (Service Set ID or Network name)
   - **WEP Key** (if needed)
   - **WPA-PSK Password** (if needed)
   - **Encryption** (TKIP or AES)
   - **LEAP user name** (if needed)
   - **LEAP password**

   The WEP key is for 64-bit encrypted networks or 128-bit encrypted networks and can contain both numbers and letters. If you do not know this information you should see the documentation provided with your access point or wireless router. This key is a 64-bit or 128-bit value that must be entered in an ASCII or HEXADECIMAL format.

   For example:

   - **64-bit ASCII**: Uses 5 text characters.
     - e.g. “Hello” (this is case sensitive)
   - **64-bit Hexadecimal**: Uses 10 digits of hexadecimal data.
     - e.g. “71f2234aba”
   - **128-bit ASCII**: Uses 13 text characters.
     - e.g. “Wirelesscomms” (this is case sensitive)
   - **128-bit Hexadecimal**: Uses 26 digits of hexadecimal data.
     - e.g. “71f2234ab56cd709e5412aa3ba”

   WPA-PSK enables a Protected Access Pre-shared key that allows the Brother wireless machine to associate with access points using TKIP and AES encryption. WPA-PSK uses a Pre-Shared Key that is 8 or more characters in length, up to a maximum of 63 characters.

   Cisco® LEAP has been developed by Cisco Systems, Inc. which uses user ID and password for authentication. The LEAP User ID is up to a maximum of 63 characters in length, and the Password is up to a maximum of 31 characters in length.

   See Chapter 3 of the Network User’s Guide for more details.
Installing the Driver & Software

2 Plug the AC power cord into an AC outlet. Turn the power switch on.

3 On your machine, press Menu, 5, 2, 2.

   WLAN Enable?
   1. On 2. Off

   Press 1 to choose On. The wired network interface will become inactive with this setting.

4 The machine will search for your network and display a list of available SSIDs. You should see the SSID you wrote down earlier. If the machine finds more than one network use the 
   or   to choose your network, then press OK. Go to step 8.

   Select ▲▼ or OK salesgroup

6 Enter a new SSID and press OK. For information how to type text, see Entering text on page 46.

   SSID:

7 Press the   or   to choose Infrastructure, then press OK.

   Mode Select
   Infrastructure

8 Use the   or   and OK keys to choose one of the options below: If your network is configured for Authentication and Encryption you must match the settings used for your network.

   No Authentication or Encryption: Choose Open System, press OK then choose None for Encryption Type and press OK. Then press 1 to apply your settings. Go to step 12.

   No Authentication with WEP Encryption: Choose Open System, press OK then use the 
   or   to choose WEP for the Encryption Type and press OK. Go to step 9.

   Authentication with WEP Encryption: Choose Shared Key, press OK. Go to step 9.

   Authentication with WPA-PSK (TKIP or AES Encryption): Choose WPA/WPA2-PSK, press OK. Go to step 10.

   Authentication with LEAP: Choose LEAP, press OK. Go to step 11.

5 Select <New SSID> using the   or   and press OK. Go to step 6.

   Select SSID&Set <New SSID>
Choose the appropriate key number and press OK.

<table>
<thead>
<tr>
<th>Set WEP KEY</th>
</tr>
</thead>
<tbody>
<tr>
<td>KEY1:</td>
</tr>
</tbody>
</table>

Enter the WEP key you wrote down in step 1 using the dial pad. You can use the ← or → to move the cursor. For example, to enter the letter a, press the 2 key on the dial pad once. To enter the number 3, press the 3 key on the dial pad seven times.

The letters appear in this order: lower case, upper case and numbers.

Press OK when you have entered all the characters, then press 1 to apply your settings. Go to step 12.

Most access points and routers can store more than one key, but they will only use one at any time for authentication and encryption.

Press the ↑ or ↓ to choose TKIP or AES for Encryption Type and press OK.

Enter the WPA-PSK Password you wrote down in step 1 using the dial pad. You can use the ← or → to move the cursor. For example, to enter the letter a, press the 2 key on the dial pad once. To enter the number 3, press the 3 key on your dial pad seven times.

Press OK when you have entered all the characters, then press 1 to apply your settings. Go to step 12.

Enter the user name and press OK. You can use the ← or → to move the cursor. For example, to enter the letter a, press the 2 key on the dial pad once.

Enter the password and press OK, and then press 1 to apply your settings. Go to step 12. (Use the chart on Entering text on page 46.)

Your machine will now try to connect to your wireless network using the information you have entered. If successful, Connected will appear briefly on the LCD.

Connection NG is displayed when the print server has not successfully connected to your router or access point. Try starting from step 3 again. If the same message is displayed again, reset the print server back to the default factory settings and try again. (See Restoring the network settings to factory default on page 45.)

The machine will automatically acquire the correct TCP/IP address information from your access point (router) if DHCP is enabled (DHCP is normally enabled as default for most access point routers).

If your access point does not have DHCP enabled you will need to manually configure the IP address, subnet mask and gateway of the machine to suit your network. See the Network User’s Guide for details.

Wireless setup is now complete. To install the MFL-Pro suite, continue to step 7 on page 26.

**Note**

The supplied CD-ROM includes the ScanSoft™ PaperPort™ 11SE. This software supports Windows® 2000 (SP4 or greater), XP (SP2 or greater), XP Professional x64 Edition and Windows Vista® only. Please update to the latest Windows® Service Pack before installing MFL-Pro Suite.
Using the SecureEasySetup™, Wi-Fi Protected Setup™ or AOSS™ software to configure your machine for a wireless network (one-push method)

If your wireless access point supports either SecureEasySetup™, Wi-Fi Protected Setup™ (PBC 1) or AOSS™, you can configure the machine easily without a computer. By pushing a button on the wireless router or access point, you can setup the wireless network and security settings. See the user's guide for your wireless LAN router or access point for instructions on how to access one-push mode. If your wireless router or access point does not support SecureEasySetup™, Wi-Fi Protected Setup™ or AOSS™ go to the page 22 for installation instructions.

1 Push Button Configuration

1 Plugging the AC power cord into an AC outlet. Turn the power switch on.

Improper Setup

If you have previously configured the wireless settings of the machine you must reset the network (LAN) settings before you can configure the wireless settings again. Press Menu, 5, 2, 6 (or Menu, 5, 0, 1) and then press 1 to accept the change.

2 Place the Brother machine close to the SecureEasySetup™, Wi-Fi Protected Setup™ or AOSS™ router or access point.

3 Push the SecureEasySetup™, Wi-Fi Protected Setup™ or AOSS™ button on your wireless router or access point. See the user's guide for your wireless router or access point for instructions.

4 Press Menu, 5, 2, 3 on the control panel of the Brother machine.

Press 1 to choose On. The wired network interface will become inactive with this setting.

This feature will automatically detect which mode (SecureEasySetup™, Wi-Fi Protected Setup™ or AOSS™) your access point uses to configure your machine.

Note

If your wireless access point supports Wi-Fi Protected Setup™ (PIN Method) and you want to configure your machine using the PIN (Personal Identification Number) Method, see Using the PIN Method of Wi-Fi Protected Setup™ in the Network User's Guide.
5 The machine searches for an access point that supports SecureEasySetup™, Wi-Fi Protected Setup™ or AOSS™ for 2 minutes.

6 If the LCD shows Connected, the machine has successfully connected to your router or access point. You can now use your machine in a wireless network.

If the LCD shows Setting WLAN, Connecting SES (Connecting WPS or Connecting AOSS), then Connection NG, the machine has not successfully connected to your router or access point. Try starting from 4 again. If the same message is indicated again, reset the machine back to the default factory settings and try again. For resetting, see Restoring the network settings to factory default on page 45.

If the LCD shows Setting WLAN, then Connection NG or Incorrect Mode, a session overlap or connection failure has been detected (See the Note below). The machine has detected more than 2 routers or access points on your network that have the SecureEasySetup™, Wi-Fi Protected Setup™ mode or the AOSS™ mode enabled. Make sure that only one router or access point has the SecureEasySetup™ mode, Wi-Fi Protected Setup™ mode or the AOSS™ mode enabled and try starting from 4 again.

7 Turn on your computer. (You must be logged on with Administrator rights.) Close any applications running before installing the MFL-Pro Suite.

8 Put the supplied CD-ROM into your CD-ROM drive. If the model name screen appears, choose your machine. If the language screen appears, choose your language.

9 The CD-ROM main menu will appear. Click Install MFL-Pro Suite.

**Note**
- If this window does not appear, use Windows® Explorer to run the start.exe program from the root folder of the Brother CD-ROM.
- For Windows Vista®, when the User Account Control screen appears, click Allow.

**Note**
- Before installation, if you are using personal firewall software, disable it. After the installation, restart your personal firewall software.

**LCD messages when using the SES/WPS/AOSS control panel menu**

| Setting WLAN | Searching or accessing the access point and downloading settings from the access point. |
| Connecting SES/WPS/AOSS | Connecting to the access point. |
| Connection NG | Connection failed. (If it is shown after the LCD shows Connecting SES/WPS/AOSS.) |
| Incorrect Mode | Session overlap is detected. |

**OK!** Wireless setup is now complete. To install the MFL-Pro Software suite, continue to step 7.
10 Choose **Wireless Network Connection**, and then click **Next**.

**Note**

If you want to install the PS driver (Brother’s BR-Script Driver), choose **Custom Install** and then follow the on-screen instructions. When the **Select Features** screen appears, check **PS Printer Driver**, and then continue following the on-screen instructions.

11 Click on the **Checked and confirmed** check box, and then click **Next**. Follow the on-screen instructions.

12 After reading and accepting the ScanSoft™ PaperPort™ 11SE License Agreement, click **Yes**.

The installation of ScanSoft™ PaperPort™ 11SE will automatically start and is followed by the installation of MFL-Pro Suite.

13 When the Brother MFL-Pro Suite Software License Agreement window appears, click **Yes** if you agree to the Software License Agreement.

14 For Windows® XP SP2/XP Professional x64 Edition/Windows Vista® users, when this screen appears, choose **Change the Firewall port settings to enable network connection and continue with the installation.** *(Recommended)* and click **Next**.

If you are not using the Windows® Firewall, see the User’s Guide for your software for information on how to add the following network ports.

- For network scanning, add UDP port 54925.
- For network PC-Fax receiving, add UDP port 54926.
- If you still have trouble with your network connection, add UDP port 137.

15 If the machine is configured for your network, choose the machine from the list, and then click **Next**.

If your machine shows APIPA in the **IP Address** field, click **Configure IP Address** and enter an **IP address** for your machine that is suitable for your network.
STEP 2  Installing the Driver & Software

28

Windows®

Wireless Network

Installing the Driver & Software

Note

• You can find your machine’s IP address and the node name by printing out the Network Configuration List. See Print the Network Configuration List on page 45
• If the machine is not yet configured for use on your network, the following screen appears.

Note

• XML Paper Specification Printer Driver
  The XML Paper Specification Printer Driver is the most suitable driver when printing from applications that use XML Paper Specification documents. Please download the latest driver by accessing the Brother Solutions Center at http://solutions.brother.com/.
• MFL-Pro Suite includes the Network Printer Driver, Network Scanner Driver, Brother ControlCenter3 and ScanSoft™ PaperPort™ 11SE.
  ScanSoft™ PaperPort™ 11SE is a document management application for viewing scanned documents.

Improper Setup

DO NOT try to cancel any of the screens during this installation.

Note

For Windows Vista®, when this screen appears, click the check box and click Install.

18 Click Finish to restart your computer.
(You must be logged on with Administrator rights.)

The MFL-Pro Suite has been installed and the installation is now complete.

Note

• After restarting the computer, the Installation Diagnostics will run automatically. If the installation is unsuccessful, the installation results window will be shown. If the Diagnostics shows a failure, please follow the on-screen instructions or read the on-line help and FAQ’s in Start/All Programs/Brother/MFC-XXXX LAN.

Click OK.
The Configure IP Address window will appear. Enter an IP address for your machine that is suitable for your network by following the on-screen instructions.

16 The installation of the Brother drivers will automatically start. The installation screens appear one after another, please wait for a while.

17 When the On-Line Registration screen is displayed, make your selection and follow the on-screen instructions. Once you have completed the registration process, close your web browser to return to this window. Then click Next.
For USB Interface Cable Users

For Mac OS® X 10.2.4 or greater

**Important**
Make sure that you have finished the instructions from step 1 *Setting Up the Machine* on pages 4 through 11.

**Note**
*For Mac OS® X 10.2.0 to 10.2.3 users, upgrade to Mac OS® X 10.2.4 or greater. (For the latest information for Mac OS® X, visit http://solutions.brother.com/)*

1. Plug the AC power cord into an AC outlet. Turn the power switch on.

2. Connect the USB interface cable to your computer, and then connect it to the machine.

**Improper Setup**
DO NOT connect the machine to a USB port on a keyboard or a non-powered USB hub. Brother recommends that you connect the machine directly to your computer.

3. Turn on your Macintosh®.

4. Put the supplied CD-ROM into your CD-ROM drive.

5. Double-click the **Start Here OSX** icon to install. Follow the on-screen instructions.

**Note**
Please see the Software User’s Guide on the CD-ROM if you want to install the PS driver.

6. Choose **Local Connection (USB)**, and then click **Next**. The installation will continue.

**Note**
Please wait, it will take a few seconds for the software to install. After the installation, click **Restart** to finish installing the software.
**STEP 2 Installing the Driver & Software**

7. The Brother software will search for the Brother device. During this time the following screen will appear.

8. When this screen appears, click **OK**.

9. For Mac OS® X 10.2.4 to 10.2.8 users: Click **Add**.

10. Choose **USB**.

11. Choose your model name, and then click **Add**.

12. Click **Print Center**, then **Quit Print Center**.

13. To install Presto!® PageManager®, double-click the **Presto! PageManager** icon and follow the on-screen instructions.

**Note**

*When Presto!® PageManager® is installed OCR capability is added to the Brother ControlCenter2. You can also easily scan, share and organize photos and documents using Presto!® PageManager®.*

**OK!**

*Presto!® PageManager® has been installed and the installation is now complete.*
For Wired Network Interface Users

For Mac OS® X 10.2.4 or greater

Important
Make sure that you have finished the instructions from step 1 Setting Up the Machine on pages 4 through 11.

1. Plug the AC power cord into an AC outlet. Turn the power switch on.

2. Connect the network interface cable to the machine, and then connect it to your network.

3. Turn on your Macintosh®.

4. Put the supplied CD-ROM into your CD-ROM drive.

5. Double-click the Start Here OSX icon to install. Follow the on-screen instructions.

Note
Please see the Network User’s Guide on the CD-ROM if you want to install the PS driver.

6. Choose Wired Network Connection (Ethernet), and then click Next. The installation will continue.

Note
Please wait, it will take a few seconds for the software to install. After the installation, click Restart to finish installing the software.
The Brother software will search for the Brother device. During this time the following screen will appear.

**Note**

- If the machine is configured for your network, choose the machine from the list, and then click OK. This window will not appear if there is only one machine connected on the network, it will be chosen automatically. Go to step 8.

- If this screen appears click OK.

- Enter a name for your Macintosh® in **Display Name** up to 15 characters long and click OK. Go to step 8.

- If you want to use the machine’s Scan key to scan over the network you must check the Register your computer with the “Scan To” function on the machine box.
- The name you enter will appear on the machine’s LCD when you press the Scan key and choose a scan option. (For more information, see Network Scanning in the Software User’s Guide on the CD-ROM.)

When this screen appears, click OK.

For Mac OS® X 10.3.x or greater users: The MFL-Pro Suite, Brother printer driver, scanner driver and Brother ControlCenter2 have been installed and the installation is now complete. Go to step 13.

For Mac OS® X 10.2.4 to 10.2.8 users: Click Add.

Make the selection shown below.

Choose your model name, and then click Add.
12 Click Print Center, then Quit Print Center.

The MFL-Pro Suite, Brother printer driver, scanner driver and Brother ControlCenter2 have been installed and the installation is now complete.

13 To install Presto!® PageManager®, double-click the Presto! PageManager icon and follow the on-screen instructions.

Note

When Presto!® PageManager® is installed OCR capability is added to the Brother ControlCenter2. You can also easily scan, share and organize photos and documents using Presto!® PageManager®.

Presto!® PageManager® has been installed and the installation is now complete.
Connecting your wireless machine and wireless network together and installing the printer driver in infrastructure mode

First you must configure the wireless network settings of your machine to communicate with your network access point (router). After the machine is configured to communicate with your access point (router) computers on your network will have access to the machine. To use the machine from these computers, you will need to install the MFL-Pro Suite. The following steps will guide you through the configuration and installation process.

To achieve optimum results with normal every day document printing, place the Brother machine as close to the network access point (router) as possible with minimal obstructions. Large objects and walls between the two devices as well as interference from other electronic devices can affect the data transfer speed of your documents.

Due to these factors, wireless may not be the best method of connection for all types of documents and applications. If you are printing large files, such as multi-page documents with mixed text and large graphics, you may want to consider choosing wired Ethernet for a faster data transfer, or USB for the fastest throughput speed.

Although the MFC can be used in both a wired and wireless network, only one of the connection methods can be used at a time.

**Important**

The following instructions will offer two methods for installing your Brother machine in a wireless network environment. Both methods are for infrastructure mode, using a wireless router or access point that uses DHCP to assign IP addresses. If your wireless router/access point supports SecureEasySetup™, Wi-Fi Protected Setup™ or AOSS™ follow the steps on page 39 Using the SecureEasySetup™, Wi-Fi Protected Setup™ or AOSS™ software to configure your machine for a wireless network (one-push method). If your wireless router/access point does not support SecureEasySetup™, Wi-Fi Protected Setup™ or AOSS™ follow the steps on page 36 Using the Setup Wizard from the control panel LAN menu for wireless network configuration (Infrastructure Mode). To set up your machine in any other wireless environment (Ad-hoc mode) you can find instructions in the Network User’s Guide on the CD-ROM.

You can view the Network User’s Guide by following the instructions below.

1. Turn on your Macintosh®. Insert the Brother CD-ROM into your CD-ROM drive.
2. If the language screen appears, click your language. The CD-ROM main menu will appear.
3. Double-click the Documentation.
4. Double-click the top page file in HTML format.
5. Double-click the NETWORK USER’S GUIDE.

**Note**

- If you are going to connect the printer to your network, we recommend that you contact your system administrator prior to installation.
- If you are using personal firewall software (e.g. Windows® Firewall), disable it. Once you are sure that you can print, restart your personal firewall software.
Confirm your network environment
The setup process will be different depending on your network environment.

- **Infrastructure Mode**

If your wireless access point (A) does not support SecureEasySetup™, Wi-Fi Protected Setup™ or AOSS™, follow the instructions, on page 36.

- **Installation using SecureEasySetup™, Wi-Fi Protected Setup™ or AOSS™.**

If your wireless access point (A) supports SecureEasySetup™, Wi-Fi Protected Setup™ or AOSS™, you do not need to use a computer to configure the machine. The access point (router) and your machine can automatically negotiate using the SecureEasySetup™ procedure. For instructions, go to page 39.

- **Configuration using the PIN Method of Wi-Fi Protected Setup™**

If your wireless access point (A) supports Wi-Fi Protected Setup™, you can also configure using the PIN Method of Wi-Fi Protected Setup™. For instructions, see the Network User’s Guide on the CD-ROM.
Using the Setup Wizard from the control panel LAN menu for wireless network configuration (Infrastructure Mode)

**Important**

Make sure that you have finished the instructions from step 1 Setting Up the Machine on pages 4 through 11.

These instructions will install your Brother machine in a typical small office or home wireless network environment in infrastructure mode, using a wireless router or access point that uses DHCP to assign IP addresses.

If you want to setup your machine in any other wireless environment you can find instructions in the Network User’s Guide on the CD-ROM.

You can view the Network User’s Guide by following the instructions below.

1. Turn on your Macintosh®. Insert the Brother CD-ROM into your CD-ROM drive.
2. Double-click **Documentation**.
3. Double-click your language folder.
4. Double-click the **HTML document**.
5. Double-click the **Network User’s Guide**.

Before you begin you must know your wireless network settings.

1. Write down the wireless network settings of your access point or wireless router.
   - **SSID** (Service Set ID or Network name)
   - **WEP Key** (if needed)
   - **WPA-PSK Password** (if needed)
   - **Encryption** (TKIP or AES)
   - **LEAP user name** (if needed)
   - **LEAP password**

   *The WEP key is for 64-bit encrypted networks or 128-bit encrypted networks and can contain both numbers and letters. If you do not know this information you should see the documentation provided with your access point or wireless router. This key is a 64-bit or 128-bit value that must be entered in an ASCII or HEXADECIMAL format.*

   **For example:**
   - **64-bit**  
     - **ASCII:** Uses 5 text characters.  
     - **e.g.** “Hello” (this is case sensitive)
   - **Hexadecimal:** Uses 10 digits of hexadecimal data.  
     - **e.g.** “71f2234aba”
   - **128-bit**  
     - **ASCII:** Uses 13 text characters.  
     - **e.g.** “Wirelesscomms”  
     - (this is case sensitive)
   - **Hexadecimal:** Uses 26 digits of hexadecimal data.  
     - **e.g.** “71f2234ab56cd709e5412aa3ba”

WPA-PSK enables a Protected Access Pre-shared key that allows the Brother wireless machine to associate with access points using TKIP and AES encryption. WPA-PSK uses a Pre-Shared Key that is 8 or more characters in length, up to a maximum of 63 characters.

Cisco® LEAP has been developed by Cisco Systems, Inc. which uses user ID and password for authentication. The LEAP User ID is up to a maximum of 63 characters in length, and the Password is up to a maximum of 31 characters in length. See Chapter 3 of the Network User’s Guide for more details.
Installing the Driver & Software

Macintosh®

Wireless Network

2 Plug the AC power cord into an AC outlet. Turn the power switch on.

Improper Setup

If you have previously configured the wireless settings of the machine you must reset the network (LAN) settings before you can configure the wireless settings again. Press Menu, 5, 2, 6 (or Menu, 5, 0, 1) and then press 1 to accept the change.

3 On your machine, press Menu, 5, 2, 2.

WLAN Enable?
1.On 2.Off

Press 1 to choose On. The wired network interface will become inactive with this setting.

4 The machine will search for your network and display a list of available SSIDs. You should see the SSID you wrote down earlier. If the machine finds more than one network use the or to choose your network, then press OK. Go to step 8.

Select ▲▼ or OK salesgroup

Note

It will take several seconds to display a list of available SSIDs.

If your access point is set to not broadcast the SSID you will have to manually add the SSID name. Go to step 5.

5 Select <New SSID> using the or and press OK. Go to step 6.

Select SSID&Set <New SSID>

6 Enter a new SSID and press OK. For information how to type text, see Entering text on page 46.

SSID:

7 Press the or to choose Infrastructure, then press OK.

Mode Select Infrastructure

8 Use the or and OK keys to choose one of the options below: If your network is configured for Authentication and Encryption you must match the settings used for your network.

No Authentication or Encryption: Choose Open System, press OK then choose None for Encryption Type and press OK. Then press 1 to apply your settings. Go to step 12.

No Authentication with WEP Encryption: Choose Open System, press OK then use the or to choose WEP for the Encryption Type and press OK. Go to step 9.

Authentication with WEP Encryption: Choose Shared Key, press OK. Go to step 9.

Authentication with WPA/WPA2-PSK (TKIP or AES Encryption): Choose WPA/WPA2-PSK, press OK. Go to step 10.

Authentication with LEAP: Choose LEAP, press OK. Go to step 11.
STEP 2 Installing the Driver & Software

9 Choose the appropriate key number and press OK.

Set WEP KEY

Enter the WEP key you wrote down in step 1 using the dial pad. You can use the ← or → to move the cursor. For example, to enter the letter a, press the 2 key on the dial pad once. To enter the number 3, press the 3 key on the dial pad seven times.

The letters appear in this order: lower case, upper case, numbers and then special letters.

Press OK when you have entered all the characters, then press 1 to apply your settings. Go to step 12.

Most access points and routers can store more than one key, but they will only use one at any time for authentication and encryption.

10 Press the ↑ or ↓ to choose TKIP or AES for Encryption Type and press OK.

Enter the WPA-PSK Password you wrote down in step 1 using the dial pad. You can use the ← or → to move the cursor. For example, to enter the letter a, press the 2 key on the dial pad once. To enter the number 3, press the 3 key on your dial pad seven times.

Press OK when you have entered all the characters, then press 1 to apply your settings. Go to step 12.

11 Enter the user name and press OK. You can use the ← or → to move the cursor. For example, to enter the letter a, press the 2 key on the dial pad once.

Enter the password and press OK, and then press 1 to apply your settings. Go to step 12. (Use the chart on Entering text on page 46.)

12 Your machine will now try to connect to your wireless network using the information you have entered. If successful, Connected will appear briefly on the LCD.

Connection NG is displayed when the print server has not successfully connected to your router or access point. Try starting from step 3 again. If the same message is displayed again, reset the print server back to the default factory settings and try again. (See Restoring the network settings to factory default on page 45.)

13 The machine will automatically acquire the correct TCP/IP address information from your access point (router) if DHCP is enabled (DHCP is normally enabled as default for most access point routers).

If your access point does not have DHCP enabled you will need to manually configure the IP address, subnet mask and gateway of the machine to suit your network. See the Network User’s Guide for details.

Wireless setup is now complete. To install the MFL-Pro suite, continue to step 7 on page 40.
Using the SecureEasySetup™, Wi-Fi Protected Setup™ or AOSS™ software to configure your machine for a wireless network (one-push method)

If your wireless access point supports either SecureEasySetup™, Wi-Fi Protected Setup™ (PBC ¹) or AOSS™, you can configure the machine easily without a computer. By pushing a button on the wireless router or access point, you can setup the wireless network and security settings. See the user’s guide for your wireless LAN router or access point for instructions on how to access one-push mode. If your wireless router or access point does not support SecureEasySetup™, Wi-Fi Protected Setup™ or AOSS™ go to the page 36 for installation instructions.

1 Plug the AC power cord into an AC outlet. Turn the power switch on.

2 Place the Brother machine close to the SecureEasySetup™, Wi-Fi Protected Setup™ or AOSS™ router or access point.

3 Push the SecureEasySetup™, Wi-Fi Protected Setup™ or AOSS™ button on your wireless router or access point. See the user’s guide for your wireless router or access point for instructions.

4 Press Menu, 5, 2, 3 on the control panel of the Brother machine.

   WLAN Enable?
   1.On 2.Off

Press 1 to choose On. The wired network interface will become inactive with this setting.

This feature will automatically detect which mode (SecureEasySetup™, Wi-Fi Protected Setup™ or AOSS™) your access point uses to configure your machine.

Note

Routers or access points that support SecureEasySetup™, Wi-Fi Protected Setup™ or AOSS™ have the symbols as shown below.

¹ Push Button Configuration

Improper Setup

If you have previously configured the wireless settings of the machine you must reset the network (LAN) settings before you can configure the wireless settings again. Press Menu, 5, 2, 6 (or Menu, 5, 0, 1) and then press 1 to accept the change.

If your wireless access point supports Wi-Fi Protected Setup™ (PIN Method) and you want to configure your machine using the PIN (Personal Identification Number) Method, see Using the PIN Method of Wi-Fi Protected Setup™ in the Network User’s Guide.
The machine searches for an access point that supports SecureEasySetup™, Wi-Fi Protected Setup™ or AOSS™ for 2 minutes.

If the LCD shows Connected, the machine has successfully connected to your router or access point. You can now use your machine in a wireless network.

If the LCD shows Setting WLAN, Connecting SES (Connecting WPS or Connecting AOSS), then Connection NG, the machine has not successfully connected to your router or access point. Try starting from 4 again. If the same message is indicated again, reset the machine back to the default factory settings and try again. For resetting, see Restoring the network settings to factory default on page 45.

If the LCD shows Setting WLAN, then Connection NG or Incorrect Mode, a session overlap or connection failure has been detected (See the Note below). The machine has detected more than 2 routers or access points on your network that have the SecureEasySetup™, Wi-Fi Protected Setup™ mode or the AOSS™ mode enabled. Make sure that only one router or access point has the SecureEasySetup™ mode, Wi-Fi Protected Setup™ mode or the AOSS™ mode enabled and try starting from 4 again.

Note

LCD messages when using the SES/WPS/AOSS control panel menu

<table>
<thead>
<tr>
<th>Setting WLAN</th>
<th>Searching or accessing the access point and downloading settings from the access point.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Connecting SES/WPS/AOSS</td>
<td>Connecting to the access point.</td>
</tr>
<tr>
<td>Connection NG</td>
<td>Connection failed. (If it is shown after the LCD shows Connecting SES/WPS/AOSS.)</td>
</tr>
<tr>
<td>Incorrect Mode</td>
<td>Session overlap is detected.</td>
</tr>
</tbody>
</table>

Note

Please see the Software User’s Guide on the CD-ROM if you want to install the PS driver.

Choose Wireless Network Connection, and then click Next.

Click on the Checked and confirmed check box, and then click Next. Follow the on screen instructions.

Please wait, it will take a few seconds for the software to install. After the installation, click Restart to finish installing the software.

Wireless setup is now complete. To install the MFL-Pro Software suite, continue to step 7.
12 The Brother software will search for the Brother device. During this time the following screen will appear.

![MFL-Pro Suite](image)

**Note**

- If the machine is configured for your network, choose the machine from the list, and then click OK. This window will not appear if there is only one machine connected on the network, it will be chosen automatically. Go to step 13.

- If this screen appears click OK.

Enter a name for your Macintosh® in **Display Name** up to 15 characters long and click OK. Go to step 13.

- If you want to use the machine’s Scan key to scan over the network you must check the **Register your computer with the “Scan To” function on the machine** box.

- The name you enter will appear on the machine’s LCD when you press the Scan key and choose a scan option. (For more information, see Network Scanning in the Software User’s Guide on the CD-ROM.)

13 When this screen appears, click OK.

![OK!](image)

For Mac OS® X 10.3.x or greater users: The MFL-Pro Suite, Brother printer driver, scanner driver and Brother ControlCenter2 have been installed and the installation is now complete. Go to step 18.

14 For Mac OS® X 10.2.4 to 10.2.8 users: Click Add.

15 Make the selection shown below.

16 Choose your model name, and then click Add.
STEP 2

Installing the Driver & Software

17 Click **Print Center**, then Quit **Print Center**.

The MFL-Pro Suite, Brother printer driver, scanner driver and Brother ControlCenter2 have been installed and the installation is now complete.

18 To install Presto!® PageManager®, double-click the **Presto! PageManager** icon and follow the on-screen instructions.

---

**Note**

When Presto!® PageManager® is installed OCR capability is added to the Brother ControlCenter2. You can also easily scan, share and organize photos and documents using Presto!® PageManager®.

---

**OK!**

Presto!® PageManager® has been installed and the installation is now complete.
BRAdmin Light utility (For Windows® users)

BRAdmin Light is a utility for initial setup of Brother network connected devices. It also can search for Brother products on your network, view the status and configure basic network settings, such as IP address. For more information on BRAdmin Light, visit us at http://solutions.brother.com/.

Note

If you require more advanced printer management, use the latest Brother BRAdmin Professional utility version that is available as a download from http://solutions.brother.com/.

Installing the BRAdmin Light configuration utility

Note

The default password for the print server is 'access'. You can use BRAdmin Light to change this password.

1. Click Install Other Drivers or Utilities on the menu screen.

2. Click BRAdmin Light and follow the on-screen instructions.

Setting your IP address, Subnet Mask and Gateway using BRAdmin Light

Note

If you have a DHCP/BOOTP/RARP server in your network, you don’t have to do the following operation. The print server will automatically obtain its own IP address.

1. Start BRAdmin Light. It will search for new devices automatically.

2. Double-click the unconfigured device.

3. Choose STATIC for the Boot Method. Enter the IP Address, Subnet Mask and Gateway, and then click OK.

4. The address information will be saved to the machine.
For Network Users

BRAdmin Light utility (For Mac OS® X users)

BRAdmin Light is a utility for initial setup of Brother network connected devices. It also can search for Brother products on your network, view the status and configure basic network settings, such as IP address from a computer running Mac OS® X 10.2.4 or greater. The BRAdmin Light software will be installed automatically when you install the printer driver. If you have already installed the printer driver, you don’t have to install it again. For more information on BRAdmin Light, visit us at http://solutions.brother.com/.

Setting your IP address, Subnet Mask and Gateway using BRAdmin Light

Note
- If you have a DHCP/BOOTP/RARP server in your network, you don’t have to do the following operation. The print server will automatically obtain its own IP address.
- Make sure that version 1.4.1_07 or later of Java™ client software is installed on your computer.
- The default password for the print server is ‘access’. You can use BRAdmin Light to change this password.

1 Double-click the Macintosh HD icon on your desktop.

2 Choose Library, Printers, Brother and then Utilities.

3 Double-click the file BRAdmin Light.jar and run the software. BRAdmin Light will then search for new devices automatically.

4 Double-click the unconfigured device.

5 Choose STATIC for the Boot Method. Enter the IP Address, Subnet Mask and Gateway, and then click OK.

6 The address information will be saved to the machine.
Web Based Management (web browser)

The Brother print server is equipped with a web server that allows you to monitor its status or change some of its configuration settings, using HTTP (Hyper Text Transfer Protocol).

Note
• The User Name is ‘admin’ and the default password is ‘access’. You can use a web browser to change this password.
• We recommend Microsoft Internet Explorer 6.0® (or higher) or Firefox® 1.0 (or higher) for Windows® and Safari™ 1.0 for Macintosh®. Please also make sure that JavaScript and cookies are always enabled in whichever browser you use. We recommend you upgrade to Safari™ 1.2 or higher to enable JavaScript. To use a web browser, you will need to know the IP address of the print server.

1. Open your browser.
2. Type http://printer_ip_address/ into your browser (Where “printer_ip_address” is the IP address of the printer or the print server name).
   For example http://192.168.1.2/

See Chapter 2 of the Network User’s Guide.

Restoring the network settings to factory default

To restore all network settings of the internal Print/Scan server to factory default, please follow the steps below.
1. Make sure the machine is not in use, then disconnect all the cables from the machine (except power cable).
2. Press Menu, 5, 0.
3. Press 1 to select Reset.
4. Press 1 to select Yes.
5. The machine will restart. Re-connect cables once this is complete.

Print the Network Configuration List

You can print the Network Configuration List to confirm the current network settings. To print the Network Configuration List:
1. Make sure that the front cover is closed and the AC power cord is plugged in.
2. Turn on the machine and wait until the machine is in the Ready state.
3. Press Reports and or to select Network Configuration. Press OK. The machine will print the current network settings.
Entering text

When setting certain menu selections, such as the Station ID, you will need to type text characters. The dial pad keys have letters printed on them. The keys: 0, # and * do not have printed letters because they are used for special characters.

Press the appropriate dial pad key the required number of times to access the characters below:

<table>
<thead>
<tr>
<th>Press Key</th>
<th>one time</th>
<th>two times</th>
<th>three times</th>
<th>four times</th>
</tr>
</thead>
<tbody>
<tr>
<td>2</td>
<td>A</td>
<td>B</td>
<td>C</td>
<td>2</td>
</tr>
<tr>
<td>3</td>
<td>D</td>
<td>E</td>
<td>F</td>
<td>3</td>
