If you need to call Customer Service

Please complete the following information for future reference:

Model Number: MFC-253CW, MFC-255CW, MFC-257CW and MFC-295CN
(Circle your model number)

Serial Number: 1

Date of Purchase:

Place of Purchase:

1 The serial number is on the back of the unit. Retain this User's Guide with your sales receipt as a permanent record of your purchase, in the event of theft, fire or warranty service.

Register your product on-line at

http://www.brother.com/registration/

By registering your product with Brother, you will be recorded as the original owner of the product. Your registration with Brother:

■ may serve as confirmation of the purchase date of your product should you lose your receipt; and

■ may support an insurance claim by you in the event of product loss covered by insurance.
Approval Information and Compilation and Publication Notice

THIS EQUIPMENT IS DESIGNED TO WORK WITH A TWO WIRE ANALOGUE PSTN LINE FITTED WITH THE APPROPRIATE CONNECTOR.

APPROVAL INFORMATION

Brother advises that this product may not function correctly in a country other than where it was originally purchased, and does not offer any warranty in the event that this product is used on public telecommunication lines in another country.

Compilation and Publication Notice

Under the supervision of Brother Industries, Ltd., this manual has been compiled and published, covering the latest product descriptions and specifications.

The contents of this manual and the specifications of this product are subject to change without notice.

Brother reserves the right to make changes without notice in the specifications and materials contained herein and shall not be responsible for any damages (including consequential) caused by reliance on the materials presented, including but not limited to typographical and other errors relating to the publication.
EC Declaration of Conformity

Manufacturer
Brother Industries, Ltd.
15-1, Naeshiro-cho, Mizuho-ku, Nagoya 467-8561, Japan

Plant
Brother Industries (Shenzhen) Ltd.
G02414-1, Baochangli Bonded Transportation Industrial Park,
Bao Long Industrial Estate, Longgang District, Shenzhen 518116, Gung Dong, China

Herewith declare that:

Products description : Facsimile Machine
Model Name : MFC-253CW, MFC-255CW, MFC-257CW, MFC-295CN

are in conformity with provisions of the R & TTE Directive (1999/5/EC) and we declare compliance with the following standards:

Standards applied :
Harmonized : Safety EN60950-1:2006
     EN61000-3-2: 2006

Radio EN301 489-1 V1.8.1
       EN301 489-17 V1.3.2
       EN300 328 V1.7.1

※ Radio applies to MFC-253CW, MFC-255CW, MFC-257CW only.

Year in which CE marking was first affixed : 2009

Issued by : Brother Industries, Ltd.

- General setup: 21
- Security features: 25
Using the documentation

Thank you for buying a Brother machine! Reading the documentation will help you make the most of your machine.

Symbols and conventions used in the documentation

The following symbols and conventions are used throughout the documentation.

**Bold** | Bold typeface identifies specific buttons on the machine’s control panel or on the computer screen.

*Italics* | Italicized typeface emphasizes an important point or refers you to a related topic.

Courier New | Text in Courier New font identifies messages on the LCD of the machine.

---

**WARNING**

Warnings tell you what to do to prevent possible personal injury.

**CAUTION**

Cautions specify procedures you must follow or avoid to prevent possible minor injuries.

**IMPORTANT**

IMPORTANT describes procedures you must follow or avoid to prevent possible machine problems or damage to other objects.

- Electrical Hazard icons alert you to a possible electrical shock.
- Hot Surface icons warn you not to touch machine parts that are hot.
- Notes tell you how you should respond to a situation that may arise or give tips about how the current operation works with other features.

This User’s Guide does not contain all the information about the machine such as how to use the advanced features of the Printer, Scanner, PC Fax and Network. When you are ready to learn detailed information about these operations, read Software User’s Guide and Network User’s Guide that are on the CD-ROM.

Viewing Documentation

Viewing Documentation (Windows®)

To view the documentation, from the Start menu, point to Brother, MFC-XXXX (where XXXX is your model name) from the programs group, and then choose User’s Guides in HTML format.

If you have not installed the software, you can find the documentation by following the instructions below:

1. Turn on your PC. Insert the Brother CD-ROM into your CD-ROM drive.

   **Note**
   If the Brother screen does not appear automatically, go to My Computer (Computer), double-click the CD-ROM icon, and then double-click start.exe.

2. If the model name screen appears, click your model name.

3. If the language screen appears, click your language. The CD-ROM Top Menu will appear.

   ![CD-ROM Top Menu](image)

4. Click Documentation.

5. Click the documentation you want to read.

     
     This format is recommended for viewing on your computer.
   
     
     This format is recommended for printing the manuals. Click to go to the Brother Solutions Center, where you can view or download the PDF documents. (Internet access and PDF Reader software are required.)
How to find Scanning instructions

There are several ways you can scan documents. You can find the instructions as follows:

**Software User’s Guide**
- **Scanning**
  (Windows® 2000 Professional/Windows® XP and Windows Vista®)
- **ControlCenter3**
  (Windows® 2000 Professional/Windows® XP and Windows Vista®)
- **Network Scanning**
  (Windows® 2000 Professional/Windows® XP and Windows Vista®)

**ScanSoft™ PaperPort™ 11SE with OCR How-to-Guides**
- The complete ScanSoft™ PaperPort™ 11SE with OCR How-to-Guides can be viewed from the Help selection in the ScanSoft™ PaperPort™ 11SE application.

How to find Network setup instructions (MFC-253CW/255CW/257CW)

Your machine can be connected to a wireless or wired network. You can find basic setup instructions in the Quick Setup Guide. If your wireless access point or router supports SecureEasySetup™, Wi-Fi Protected Setup or AOSS™, follow the steps in the Quick Setup Guide. For more information about network setup please see the Network User's Guide.

Viewing Documentation (Macintosh)

1. Turn on your Macintosh. Insert the Brother CD-ROM into your CD-ROM drive. The following window will appear.

2. Double-click the Documentation icon.

3. Double-click your language folder.

5. Click the documentation you want to read.
   - Software User’s Guide
   - Network User’s Guide
How to find Scanning instructions
There are several ways you can scan documents. You can find the instructions as follows:

Software User’s Guide
- Scanning
  (Mac OS X 10.3.9 - 10.5.x)
- ControlCenter2
  (Mac OS X 10.3.9 - 10.5.x)
- Network Scanning
  (Mac OS X 10.3.9 - 10.5.x)

Presto! PageManager User’s Guide
- Instructions for scanning directly from Presto! PageManager. The complete Presto! PageManager User’s Guide can be viewed from the Help selection in the Presto! PageManager application.

How to find Network setup instructions (MFC-253CW/255CW/257CW)
Your machine can be connected to a wireless or wired network. You can find basic setup instructions in the Quick Setup Guide. If your wireless access point or router supports SecureEasySetup™, Wi-Fi Protected Setup or AOSS™, follow the steps in the Quick Setup Guide. For more information about network setup please see the Network User’s Guide.

Accessing Brother Support (Windows®)
You can find all the contacts you will need, such as Web support (Brother Solutions Center) on the Brother CD-ROM.

- Click Brother Support on the Top Menu. The following screen will appear:

  ![Brother Support Screen]

- To access our website (http://www.brother.com), click Brother Home Page.
- For the latest news and product support information (http://solutions.brother.com), click Brother Solutions Center.
- To visit our website for original Brother supplies (http://www.brother.com/original/), click Supplies Information.
- To access the Brother CreativeCenter (http://www.brother.com/creativecenter/) for FREE photo projects and printable downloads, click Brother CreativeCenter.
- To return to the Top Menu, click Back or if you have finished, click Exit.
Control panel overview

The MFC-253CW, MFC-255CW, MFC-257CW and MFC-295CN have the same control panel keys.

1 Fax and telephone keys:
   - **Redial/Pause**
     Redials the last number called. It also inserts a pause when programming quick dial numbers.
   - **Tel/R**
     This key is used to have a telephone conversation after picking up the external handset during the F/T Ring (fast double-ring). Also, when connected to a PBX, you can use this key to gain access to an outside line or transfer a call to another extension.

2 Dial Pad
Use these keys to dial telephone and fax numbers and as a keyboard for entering information into the machine.

The # key lets you temporarily switch the dialling mode during a telephone call from Pulse to Tone.

3 Mode keys:
   - **Fax**
     Lets you access Fax mode.

4 Menu keys:
   - **Scan**
     Lets you access Scan mode.
   - **Copy**
     Lets you access Copy mode.
   - **Photo Capture**
     Lets you access PhotoCapture Center™ mode.

   - **Menu**
     Lets you access the main menu to program the machine.

   - **Speed Dial key**
     Lets you store, look up, and dial numbers in the memory.

   - **Volume keys**
     While the machine is idle, you can press these keys to adjust the ring volume.
1 Press to scroll backward to a menu selection.

2 or 
Press to scroll through the menus and options.

3 Clear/Back
Press to delete characters or to go back to the previous menu level.

4 OK
Lets you choose a setting.

5 Start keys:

1 Colour Start
Lets you start sending faxes or making copies in full colour. Also lets you start a scanning operation (in colour or mono, depending on the scanning setting in the ControlCenter software).

2 Mono Start
Lets you start sending faxes or making copies in monochrome. Also lets you start a scanning operation (in colour or mono, depending on the scanning setting in the ControlCenter software).

6 Stop/Exit
Stops an operation or exits from a menu.

7 Copy Options
Lets you temporarily change the copy settings when in copy mode.

8 LCD (liquid crystal display)
Displays messages on the LCD to help you set up and use your machine.

9 On/Off
You can turn the machine on and off. If you turn the machine off, it will still periodically clean the print head to maintain print quality. To maintain print quality, prolong print head life, and provide the best ink cartridge economy, you should keep your machine connected to the power at all times.

10 Fax Resolution
Lets you temporarily change the resolution when sending a fax.
Loading paper and other print media

1. If the paper support flap is open, close it, and then close the paper support. Pull the paper tray completely out of the machine.

2. Lift the output paper tray cover (1).

3. With both hands, gently press and slide the paper side guides (1) and then the paper length guide (2) to fit the paper size. Make sure that the triangular marks (3) on the paper side guides (1) and paper length guide (2) line up with the marks for the paper size you are using.
Note
When you use Legal size paper, press and hold the universal guide release button (1) as you slide out the front of the paper tray.

4 Fan the stack of paper well to avoid paper jams and misfeeds.

5 Gently put the paper into the paper tray print side down and top edge in first. Check that the paper is flat in the tray.

1 IMPORTANT
Be careful that you do not push the paper in too far; it may lift at the back of the tray and cause feed problems.

6 Gently adjust the paper side guides (1) to fit the paper using both hands. Make sure the paper side guides touch the sides of the paper.

1 IMPORTANT
Always make sure the paper is not curled.
7 Close the output paper tray cover.

8 Slowly push the paper tray completely into the machine.

9 While holding the paper tray in place, pull out the paper support (1) until it clicks and then unfold the paper support flap (2).

Loading envelopes and postcards

About envelopes

- Use envelopes that weigh between 80 to 95 g/m².
- Some envelopes need margin settings to be set in the application. Make sure you do a test print first before printing many envelopes.

**IMPORTANT**

DO NOT use any of the following types of envelopes, as they will cause paper feed problems:

- That are of a baggy construction.
- That are embossed (have raised writing on them).
- That have clasps or staples.
- That are pre-printed on the inside.

![Glue and Double flap](image)

Occasionally you may experience paper feed problems caused by the thickness, size and flap shape of the envelopes you are using.

**IMPORTANT**

DO NOT use the paper support flap for Legal size paper.
Loading envelopes and postcards

1. Before loading, press the corners and sides of envelopes or postcards to make them as flat as possible.

IMPORTANT

If envelopes or postcards are ‘double-feeding’, put one envelope or postcard in the paper tray at a time.

2. Put envelopes or postcards into the paper tray with the side to be printed on face down, and the shortest edge in first as shown in the illustration. With both hands, gently press and slide the paper side guides (1) and paper length guide (2) to fit the size of the envelopes or postcards.
If you have problems printing on envelopes with the flap on the short edge, try the following:

1. Open the envelope flap.

2. Put the envelope into the paper tray with the address side down and the flap positioned as shown in the illustration.

3. Adjust the size and margin in your application.

Removing small printouts from the machine

When the machine ejects small paper onto the output paper tray you may not be able to reach it. Make sure printing has finished, and then pull the tray completely out of the machine.
Printable area

The printable area depends on the settings in the application you are using. The figures below show the unprintable areas on cut sheet paper and envelopes. The machine can print in the shaded areas of cut sheet paper when the Borderless print feature is available and turned on. (See Printing for Windows® or Printing and Faxing for Macintosh in the Software User's Guide on the CD-ROM.)

Cut Sheet Paper

<td>24 mm</td>
<td>3 mm</td>
<td>3 mm</td>
</tr>
</tbody>
</table>

Note

The Borderless feature is not available for envelopes.
Acceptable paper and other print media

The print quality can be affected by the type of paper you use in the machine.

To get the best print quality for the settings you have chosen, always set the Paper Type to match the type of paper you load.

You can use plain paper, inkjet paper (coated paper), glossy paper, transparencies and envelopes.

We recommend testing various paper types before buying large quantities.

For best results, use Brother paper.

- When you print on inkjet paper (coated paper), transparencies and photo paper, be sure to choose the correct print media in the 'Basic' tab of the printer driver or in the Paper Type setting of the menu. (See Paper Type on page 22.)

- When you print on Brother Photo paper, load one extra sheet of the same photo paper in the paper tray. An extra sheet has been included in the paper package for this purpose.

- When you use transparencies or photo paper, remove each sheet at once to prevent smudging or paper jams.

- Avoid touching the printed surface of the paper immediately after printing; the surface may not be completely dry and may stain your fingers.

Recommended print media

To get the best print quality, we suggest using Brother paper. (See the table below.)

If Brother paper is not available in your country, we recommend testing various papers before purchasing large quantities.

We recommend using '3M Transparency Film' when you print on transparencies.

</table>
Handling and using print media

- Store paper in its original packaging, and keep it sealed. Keep the paper flat and away from moisture, direct sunlight and heat.

- Avoid touching the shiny (coated) side of photo paper. Load photo paper with the shiny side facing down.

- Avoid touching either side of transparencies because they absorb water and perspiration easily, and this may cause decreased output quality. Transparencies designed for laser printers/copiers may stain your next document. Use only transparencies recommended for inkjet printing.

**IMPORTANT**

DO NOT use the following kinds of paper:
- Damaged, curled, wrinkled, or irregularly shaped paper
- 2 mm or greater curl may cause jams to occur
- Extremely shiny and highly textured paper
- Paper that cannot be arranged uniformly when stacked
- Paper made with a Short grain paper

Paper capacity of the output paper tray cover

Up to 50 sheets of 80 g/m² or 20 lb A4 paper.

- Transparencies and photo paper must be picked up from the output paper tray cover one page at a time to avoid smudging.
## Choosing the right print media

### Paper type and size for each operation

</tbody>
</table>

1. Up to 100 sheets of 80 g/m² paper.
2. BP71 69 lb (260 g/m²) paper is especially designed for Brother inkjet machines.
Loading documents

You can send a fax, make copies, and scan from the ADF (automatic document feeder) and from the scanner glass.

Using the ADF (MFC-295CN only)

The ADF can hold up to 15 pages and feeds each sheet individually. Use standard 80 g/m² paper and always fan the pages before putting them in the ADF.

Recommended environment

| Temperature: | 20 to 30 °C |
| Humidity:    | 50 to 70%   |
| Paper:       | 80 g/m²     |

Document Sizes Supported

| Length:         | 148 to 355.6 mm |
| Width:          | 148 to 215.9 mm |
| Weight:         | 64 to 90 g/m²   |

How to load documents

1. Unfold the ADF Document Output Support Flap (1).
2. Fan the pages well.
3. Adjust the paper guides (2) to fit the width of your documents.
4. Make sure you place the documents face down, top edge first in the ADF until the LCD says ADF Ready and you feel them touch the feed roller.

IMPORTANT

- DO NOT pull on the document while it is feeding.
- DO NOT use paper that is curled, wrinkled, folded, ripped, stapled, paper clipped, pasted or taped.
- DO NOT use cardboard, newspaper or fabric.

Make sure documents with ink or liquid correction fluid are completely dry.

IMPORTANT

DO NOT leave thick documents on the scanner glass. If you do this, the ADF may jam.
Using the scanner glass

You can use the scanner glass to fax, copy or scan pages of a book or one page at a time.

Document Sizes Supported

<p>| | |</p>
<table>
<thead>
<tr>
<th></th>

<tr>
<td>Weight:</td>
<td>Up to 2 kg</td>
</tr>
</tbody>
</table>

How to load documents

Note

To use the scanner glass, the ADF must be empty.

1. Lift the document cover.
2. Using the document guidelines on the left and top, place the document face down in the upper left corner of the scanner glass.
3. Close the document cover.

IMPORTANT

If you are scanning a book or thick document, DO NOT slam the cover or press on it.
The scannable area depends on the settings in the application you are using. The figures below show the unscannable areas.

On/Off key

You can turn the machine on and off by pressing the On/Off key. If you press the On/Off key while the machine is in use it will finish the operation before going into the Off mode.

Note

If you have connected an external telephone or TAD, it is always available.

Turning the machine off

1. Press and hold down the On/Off key. The LCD will show Shutting Down. The LCD will stay on for a few seconds before going off.

Turning the machine on

1. Press the On/Off key.

Mode Timer

The machine has four temporary mode keys on the control panel: Fax, Scan, Copy and Photo Capture. You can change the amount of time the machine takes after the last Scan, Copy or PhotoCapture operation before it returns to Fax mode. If you choose Off, the machine stays in the mode you used last.

1. Press Menu, 1, 1.
2. Press ▲ or ▼ to choose 0 Sec, 30 Secs, 1 Min, 2 Mins, 5 Mins or Off. Press OK.
3. Press Stop/Exit.
**Paper settings**

**Paper Type**

To get the best print quality, set the machine for the type of paper you are using.

1. Press Menu, 1, 2.
2. Press ▲ or ▼ to choose Plain Paper, Inkjet Paper, Brother BP71, Other Glossy or Transparency. Press OK.
3. Press Stop/Exit.

**Note**

The machine ejects paper with printed surfaces face up onto the paper tray in front of the machine. When you use transparencies or glossy paper, remove each sheet at once to prevent smudging or paper jams.

**Paper Size**

You can use five sizes of paper for printing copies: A4, A5, Letter, Legal and 10 × 15 cm and three sizes for printing faxes: Letter, Legal and A4. When you change the size of paper you load in the machine, you will need to change the paper size setting at the same time so your machine can fit an incoming fax on the page.

1. Press Menu, 1, 3.
2. Press ▲ or ▼ to choose A4, A5, 10x15cm, Letter or Legal. Press OK.
3. Press Stop/Exit.

**Volume Settings**

**Ring Volume**

You can choose a range of ring volume levels, from High to Off.

While the machine is idle, press ▼ or ▼ to adjust the volume level. The LCD shows the current setting, and each key press will change the volume to the next level. The machine will keep the new setting until you change it.

You can also change the volume through the menu, by following the instructions below:

**Setting the Ring Volume from the menu**

1. Press Menu, 1, 4, 1.
2. Press ▲ or ▼ to choose Low, Med, High or Off. Press OK.
3. Press Stop/Exit.

**Beeper Volume**

When the beeper is on, the machine will beep when you press a key, make a mistake or after you send or receive a fax.

You can choose a range of volume levels, from High to Off.

1. Press Menu, 1, 4, 2.
2. Press ▲ or ▼ to choose Low, Med, High or Off. Press OK.
3. Press Stop/Exit.
**Speaker Volume**

You can choose a range of speaker volume levels, from High to Off.

1. Press **Menu, 1, 4, 3.**
2. Press ▲ or ▼ to choose Low, Med, High or Off. Press **OK.**
3. Press **Stop/Exit.**

**Automatic Daylight Saving Time**

You can set the machine to change automatically for daylight saving time. It will reset itself forward one hour in the Spring and backward one hour in the Autumn. Make sure you have set the correct date and time in the **Date&Time setting.**

1. Press **Menu, 1, 5.**
2. Press ▲ or ▼ to choose On or Off. Press **OK.**
3. Press **Stop/Exit.**
LCD display

LCD Contrast

You can adjust the LCD contrast for a sharper and more vivid display. If you are having difficulty reading the LCD, try changing the contrast setting.

1. Press Menu, 1, 6.
2. Press ▲ or ▼ to choose Light or Dark. Press OK.
3. Press Stop/Exit.

Sleep Mode

You can choose how long the machine will remain idle (from 1 to 60 minutes) before it goes into sleep mode. The timer will restart if any operation is carried out on the machine.

1. Press Menu, 1, 7.
2. Press ▲ or ▼ to choose 1 Min, 2 Mins, 3 Mins, 5 Mins, 10 Mins, 30 Mins or 60 Mins. Press OK.
3. Press Stop/Exit.
TX Lock

TX Lock lets you prevent unauthorized access to the machine.
While TX Lock is On, the following operations are available:
- Receiving faxes

While TX Lock is On, the following operations are NOT available:
- Sending faxes
- Copying
- PC printing
- Scanning
- PhotoCapture
- Operation from the Control panel

Note
If you forget the TX Lock password, please call your Brother dealer for service.

Setting and changing the TX Lock password

Note
If you have already set the password, you will not need to set it again.

Setting up the password

1. Press Menu, 2, 0, 1.
2. Enter a 4-digit number for the password. Press OK.
3. When the LCD shows Verify:, re-enter the password. Press OK.
4. Press Stop/Exit.

Changing the password

1. Press Menu, 2, 0, 1.
2. Press ▲ or ▼ to choose Set Password. Press OK.
3. Enter a 4-digit number for the current password. Press OK.
4. Enter a 4-digit number for a new password. Press OK.
5. When the LCD shows Verify:, re-enter the password. Press OK.
6. Press Stop/Exit.
Chapter 4

Turning TX Lock on/off

Turning TX Lock on

1. Press Menu, 2, 0, 1.

2. Press ▲ or ▼ to choose Set TX Lock. Press OK.

3. Enter the registered 4-digit password. Press OK.
   The machine goes offline and the LCD shows TX Lock Mode.

Turning TX Lock off

1. Press Menu.

2. Enter the registered 4-digit password. Press OK.
   TX Lock is automatically turned off.

Note

If you enter the wrong password, the LCD shows Wrong Password and stays offline. The machine will stay in TX Lock mode until the registered password is entered.
Fax

Sending a Fax 28
Receiving a Fax 34
Telephone and External devices 38
Dialling and storing numbers 45
Printing Reports 48
5 Sending a Fax

Entering Fax mode

Press Fax to enter fax mode.

Faxing from the ADF
(MFC-295CN only)

1. Make sure you are in Fax mode.
2. Place the document face down in the ADF. (See Using the ADF (MFC-295CN only) on page 18.)
3. Enter the fax number using the dial pad, Speed Dial or Search.
4. Press Mono Start or Colour Start.

Note
- To cancel, press Stop/Exit.
- If you send a mono fax while the memory is full it will be sent in real time.

Faxing from the scanner glass

You can use the scanner glass to fax pages of a book one at a time. The documents can be up to Letter or A4 size.

You cannot send colour faxes with multiple pages.

Note
(MFC-295CN only)
Since you can only scan one page at a time, it is easier to use the ADF if you are sending a multiple page document.

1. Make sure you are in Fax mode.
2. Place your document face down on the scanner glass.
3. Enter the fax number using the dial pad, Speed Dial or Search.
4. Press Mono Start or Colour Start.

- If you press Mono Start, the machine starts scanning the first page. Go to step 5.
- If you press Colour Start, the machine starts sending the document.

5. When the LCD asks you Next Page? do one of the following:
- To send a single page, press 2 to choose No(Dial) (or press Mono Start again).
  The machine starts sending the document.
- To send more than one page, press 1 to choose Yes and go to step 6.
Sending a Fax

Faxing Letter size documents from the scanner glass

When documents are Letter size, you need to set scan size to Letter. If you do not, the side portion of the faxes will be missing.

1. Make sure you are in Fax mode.
2. Press Menu, 2, 2, 0.
3. Press ▲ or ▼ to choose Letter. Press OK.
4. Press Stop/Exit.

Colour fax transmission

Your machine can send a colour fax to machines that support this feature.

Colour faxes cannot be stored in the memory. When you send a colour fax, the machine will send it in real time (even if Real Time TX is set to Off).

Cancelling a fax in progress

If you want to cancel a fax while the machine is scanning, dialling or sending, press Stop/Exit.

Broadcasting (Monochrome only)

Broadcasting is when the same fax message is automatically sent to more than one fax number. You can include Groups, Speed Dial numbers and up to 50 manually dialled numbers in the same broadcast.

After the broadcast is finished, a Broadcast Report will be printed.

1. Make sure you are in Fax mode.
2. Load your document.
3. Enter a number. Press OK.
   You can use either a Speed Dial, a Group or a manually entered number using the dial pad.
4. Repeat step 3 until you have entered all the fax numbers to be included in the broadcast.
5. Press Mono Start.

Note

- If you did not use up any of the numbers for Groups, you can 'broadcast' faxes to as many as 90 different numbers.
- The available memory will vary depending on the types of jobs in the memory and the number of locations used for broadcasting. If you broadcast to the maximum numbers available, you will not be able to use dual access.
- If the Out of Memory message appears, press Stop/Exit to cancel or Mono Start to send the pages scanned so far.
Cancelling a Broadcast in progress

1. Press Menu, 2, 4.
   The LCD will show the fax number being dialled.
   XXXXXXXXX

2. Press OK.
   The LCD will show the job number together with the number being dialled and then:
   1.Clear  2.Exit

3. Press 1 to cancel the fax number being dialled.

4. The LCD will then show the Broadcast job number and 1.Clear  2.Exit. Press 1 to cancel.

5. Press Stop/Exit.

Additional sending operations

Sending faxes using multiple settings

When you send a fax you can choose any combination of these settings: resolution, contrast, scan size, overseas mode and real time transmission.

1. Make sure you are in Fax mode.

2. Load your document.

3. Choose a setting you want to change in the Setup Send menu (Menu, 2, 2). Press OK.

4. Choose the option you want for the setting. Press OK.

5. Do one of the following:

   Next

   1.Yes  2.No

   - Press 1 to change another setting.
   - Press 2 when you have finished choosing your settings.

6. Send the fax as normal.
Contrast

If your document is very light or very dark, you may want to change the contrast. For most documents the default setting Auto can be used. It automatically chooses the suitable contrast for your document.

Use Light when sending a light document.
Use Dark when sending a dark document.

1. Make sure you are in Fax mode.
2. Load your document.
3. Press Menu, 2, 2, 1.
4. Press ▲ or ▼ to choose Auto, Light or Dark.
   Press OK.

Note

Even if you choose Light or Dark, the machine will send the fax using the Auto setting in any of the following conditions:

- When you send a colour fax.
- When you choose Photo as the Fax Resolution.

Changing fax resolution

The quality of a fax can be improved by changing the fax resolution. Resolution can be changed for the next fax or for all faxes.

To change the fax resolution for the next fax

1. Make sure you are in Fax mode.
2. Load your document.
3. Press Fax Resolution then ▲ or ▼ to choose the resolution.
   Press OK.

To change the default fax resolution

1. Make sure you are in Fax mode.
2. Press Menu, 2, 2.
3. Press ▲ or ▼ to choose the resolution you want. Press OK.

Note

You can choose four different resolution settings for monochrome faxes and two for colour.

### Monochrome

<table>
<thead>
<tr>
<th>Setting</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Standard</td>
<td>Suitable for most typed documents.</td>
</tr>
<tr>
<td>Fine</td>
<td>Good for small print and transmits a little slower than Standard resolution.</td>
</tr>
<tr>
<td>S.Fine</td>
<td>Good for small print or artwork and transmits slower than Fine resolution.</td>
</tr>
<tr>
<td>Photo</td>
<td>Use when the document has varying shades of grey or is a photograph. This has the slowest transmission.</td>
</tr>
</tbody>
</table>

### Colour

<table>
<thead>
<tr>
<th>Setting</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Standard</td>
<td>Suitable for most typed documents.</td>
</tr>
<tr>
<td>Fine</td>
<td>Use when the document is a photograph. The transmission time is slower than Standard resolution.</td>
</tr>
</tbody>
</table>

If you choose S.Fine or Photo and then use the Colour Start key to send a fax, the machine will send the fax using the Fine setting.
Dual Access (Monochrome only)

You can dial a number and start scanning the fax into memory—even when the machine is sending from memory, receiving faxes or printing PC data. The LCD shows the new job number and available memory.

The number of pages you can scan into the memory will vary depending on the data that is printed on them.

Note

If the Out of Memory message appears, press Stop/Exit to cancel or Mono Start to send the pages scanned so far.

Real Time Transmission

When you are sending a fax, the machine will scan the documents into the memory before sending. Then, as soon as the telephone line is free, the machine will start dialling and sending.

Sometimes, you may want to send an important document immediately, without waiting for memory transmission. You can set Real Time TX to On for all documents or Next Fax Only for the next fax only.

Note

• In Real Time Transmission, the automatic redial feature does not work when using the scanner glass.

• If the memory is full, faxes from the scanner glass cannot be sent until you clear some of the memory.

• (MFC-295CN)
  If the memory is full and you are sending a black and white fax from the ADF, the machine will send the document in real time (even if Real Time TX is set to Off).

Sending in real time for all faxes

1. Make sure you are in Fax mode.
2. Press Menu, 2, 2, 3.
3. Real Time TX
   Realtime TX:On
4. Press ▲ or ▼ to choose On (or Off). Press OK.

Sending in real time for the next fax only

1. Make sure you are in Fax mode.
2. Press Menu, 2, 2, 3.
3. Press ▲ or ▼ to choose Next Fax Only. Press OK.
4. Press ▲ or ▼ to choose Next Fax:Off or Next Fax:On.
5. Press OK.

Note

In real time transmission, the automatic redial feature does not work when using the scanner glass.
Sending a Fax

Overseas Mode

If you are having difficulty sending a fax overseas due to possible interference on the telephone line, we recommend that you turn on the Overseas mode. After you send a fax using this feature, the feature will turn itself off.

1. Make sure you are in Fax mode.
2. Load your document.
3. Press Menu, 2, 2, 4.
4. Press ▲ or ▼ to choose On (or Off). Press OK.

Checking and cancelling waiting jobs

You can check which jobs are still waiting in the memory to be sent and cancel a job. (If there are no jobs, the LCD shows No Jobs Waiting.)

1. Press Menu, 2, 4.
   Any waiting jobs appear on the LCD.
2. Do one of the following:
   ▲ Press ▲ or ▼ to scroll through the jobs and choose the job you want to cancel.
   Press OK and then press 1 to cancel the job.
   ▼ Press 2 to exit without cancelling.
3. When you have finished, press Stop/Exit.

Sending a fax manually

Manual transmission lets you hear the dialling, ringing and fax-receiving tones while sending a fax.

1. Make sure you are in Fax mode.
2. Load your document.
3. Pick up the handset of an external telephone and listen for a dial tone.
4. Dial the fax number you want to call.
5. When you hear the fax tone, press Mono Start or Colour Start.
   If you load the document on the scanner glass, press 1 to send the fax.
6. Replace the handset.

Out of Memory message

If you get an Out of Memory message while scanning the first page of a fax, press Stop/Exit to cancel the fax.

If you get an Out of Memory message while scanning a subsequent page, you will have the option to press Mono Start or Colour Start to send the pages scanned so far, or to press Stop/Exit to cancel the operation.

Note

To free up space, wait until any jobs stored in the memory have been sent, cancel any waiting jobs (see Checking and cancelling waiting jobs on page 33), or send the fax in real time (see Real Time Transmission on page 32).
Receive modes

Choosing the Receive Mode

By default, your machine will automatically receive any faxes that are sent to it. The diagram below will help you choose the correct Mode. For more detailed information on the receive modes see Using Receive Modes on page 35 and Receive Mode settings on page 36.

Do you want to use the telephone features of your machine (if available) or an external telephone or external telephone answering device connected on the same line as the machine?

Yes

Are you using the voice message function of an external telephone answering device?

No

Fax Only

No

Manual

Yes

Fax/Tel

Yes

External TAD

To set a receive mode follow the instructions below:

1. Press Menu, 0, 1.
2. Press ▲ or ▼ to choose Fax Only, Fax/Tel, External TAD or Manual. Press OK.
3. Press Stop/Exit.

The LCD will show the current receive mode.

12/10 11:53 Fax

1

Current receive mode

Fax: Fax Only
Using Receive Modes

Some receive modes answer automatically (Fax Only and Fax/Tel). You may want to change the ring delay before using these modes. (See Ring Delay on page 36.)

**Fax Only**

Fax Only mode will automatically answer every call. If the call is a fax your machine will receive it.

**Fax/Tel**

Fax/Tel mode helps you automatically manage incoming calls, by recognising whether they are fax or voice calls and dealing with them in one of the following ways:

- Faxes will be automatically received.
- Voice calls will start the F/T Ring to tell you to pick up the line. The F/T Ring is a fast double-ring made by your machine.

(Also see F/T Ring Time (Fax/Tel mode only) on page 36 and Ring Delay on page 36.)

**External TAD**

External TAD mode lets an external answering device manage your incoming calls. Incoming calls will be dealt with in one of the following ways:

- Faxes will be automatically received.
- Voice callers can record a message on the external TAD.

(For more information see Connecting an external TAD (telephone answering device) on page 41.)

**Manual**

Manual mode turns off all automatic answering functions unless you are using the BT Call sign feature.

To receive a fax in manual mode lift the handset of an external telephone. When you hear fax tones (short repeating beeps), press Mono Start or Colour Start, and choose 2.Receive. You can also use the Fax Detect feature to receive faxes by lifting a handset on the same line as the machine.

(Also see Fax Detect on page 37.)
Receive Mode settings

Ring Delay

The Ring Delay sets the number of times the machine rings before it answers in Fax Only or Fax/Tel mode. If you have external or extension telephones on the same line as the machine choose the maximum number of rings.

(See Operation from extension telephones on page 42 and Fax Detect on page 37.)

1 Press Menu, 2, 1, 1.
2 Press ▲ or ▼ to choose how many times the line rings before the machine answers. Press OK.
   If you choose 00, the line will not ring at all.
3 Press Stop/Exit.

F/T Ring Time
(Fax/Tel mode only)

When somebody calls your machine, you and your caller will hear the normal telephone ring sound. The number of rings is set by the ring delay setting.

If the call is a fax, then your machine will receive it; however, if it is a voice call the machine will sound the F/T Ring (fast double-ring) for the time you have set in the F/T Ring Time setting. If you hear the F/T Ring it means that you have a voice caller on the line.

Because the F/T Ring is made by the machine, extension and external telephones will not ring; however, you can still answer the call on any telephone. (For more information see Using remote codes on page 44.)

1 Press Menu, 2, 1, 2.
2 Press ▲ or ▼ to choose how long the machine will ring to alert you that you have a voice call (20, 30, 40 or 70 seconds). Press OK.
3 Press Stop/Exit.

Note

Even if the caller hangs up during the F/T Ring, the machine will continue to ring for the set time.
Fax Detect

If Fax Detect is On:

The machine receives a fax call automatically, even if you answer the call. When you see Receiving on the LCD or when you hear ‘chirps’ through the handset you are using, just replace the handset. Your machine will do the rest.

If Fax Detect is Off:

If you are at the machine and answer a fax call by lifting the handset, press Mono Start or Colour Start, then press 2 to receive the fax.

If you answered at an extension telephone, press *51. (See Operation from extension telephones on page 42.)

Note

• If this feature is set to On, but your machine does not connect a fax call when you lift an extension or external telephone handset, press the Remote Activation Code *51.

• If you send faxes from a computer on the same telephone line and the machine intercepts them, set Fax Detect to Off.

Additional receiving operations

Printing a reduced incoming fax

If you choose On, the machine automatically reduces each page of an incoming fax to fit on one page of A4, Letter or Legal size paper.

The machine calculates the reduction ratio by using the page size of the fax and your Paper Size setting (Menu, 1, 3).

1. Make sure you are in Fax mode.
2. Press Menu, 2, 1, 5.  
   S.Auto Reduction
3. Press ▲ or ▼ to choose On (or Off). Press OK.
4. Press Stop/Exit.

Out of Paper Reception

As soon as the paper tray becomes empty during fax reception, the LCD will display No Paper Fed, asking you to put paper in the paper tray. (See Loading paper and other print media on page 8.)

The machine will carry on receiving the fax, with the remaining pages being stored in memory, if enough memory is available.

Further incoming faxes will also be stored into memory until the memory is full. When the memory is full the machine will stop automatically answering calls. To print the faxes, put fresh paper in the tray.
Voice Operations

Voice calls can be made either with an extension or external telephone, by dialling manually, or by using Speed Dial numbers.

Tone or pulse

If you are using an external telephone and have a pulse dialling service, but need to send tone signals (for example, for telephone banking), follow the instructions below:

1. Lift the handset of the external telephone.
2. Press # on the control panel of your machine. Any digits dialled after this will send tone signals. When you hang up, the machine will return to the pulse dialling service.

Fax/Tel mode

When the machine is in Fax/Tel mode, it will use the F/T Ring (fast double-ring) to alert you to pick up a voice call.

If you are at an external telephone, lift the handset of the external telephone, and then press Tel/R to answer.

If you are at an extension telephone, you'll need to lift the handset during the F/T Ring Time and then press # 5 1 between the fast double-rings. If no one is on the line, or if someone wants to send you a fax, send the call back to the machine by pressing * 5 1.

Telephone services

Setting the Telephone Line Type

If you are connecting the machine to a line that features PBX or ISDN to send and receive faxes, it is necessary to change the Telephone Line Type accordingly by completing the following steps.

1. Press Menu, 0, 6. [0.Initial Setup]
2. Press # to choose PBX, ISDN (or Normal). Press OK.
3. Press Stop/Exit.

PBX and TRANSFER

The machine is initially set to Normal, which lets the machine connect to a standard PSTN (Public Switched Telephone Network) line. However, many offices use a central telephone system or Private Branch Exchange (PBX). Your machine can be connected to most types of PBX. The machine’s recall feature supports timed break recall only (TBR). TBR will work with most PBX systems allowing you to gain access to an outside line, or transfer calls to another extension. The feature works when Tel/R is pressed.
Note
You can program a Tel/R key press as part of a number stored in a Speed Dial location. When programming the Speed Dial number press Tel/R first (the screen displays “!”), then enter the telephone number. If you do this, you do not need to press Tel/R each time before you dial using a Speed Dial location. (See Storing Speed Dial numbers on page 46.) However, if PBX is not chosen in the Telephone Line Type setting, you cannot use the Speed Dial number that Tel/R press is programmed into.

BT Call Sign (U.K. only)
This machine feature lets you use the BT Call Sign subscriber service which allows you to have at least two separate telephone numbers on one telephone line. Each telephone number has its own distinctive ringing pattern, so you know which telephone number is ringing. This is one way you can have a separate telephone number for your machine.

Your machine has a BT Call Sign compatible distinctive ringing function, allowing you to dedicate a second telephone number (on the same telephone line) just for receiving faxes.

Note
• You can switch BT Call Sign off temporarily, then turn it back on. When you get a new fax number, make sure you reset this function. This machine will automatically answer incoming calls that use your new fax number.
• When you set the BT Call Sign feature to On, the receive mode is set to Manual automatically. Manual mode will not respond to incoming telephone calls, since the number you use for telephone calls will use the normal ring pattern.

To enable the machine to work with BT Call Sign (with your external telephone only)

1. Press Menu, 2, 0, 2.
   0.Misellaneous
   2.BT Call Sign

2. Press ▲ or ▼ to choose On (or Off). Press OK.

3. Press Stop/Exit.

Note
If you turn off BT Call Sign, the receive mode stays in Manual. You will need to set the receive mode again. (See Choosing the Receive Mode on page 34.)
Chapter 7

Caller ID
(U.K. and Ireland only)

The Caller ID feature lets you use the Caller ID subscriber service offered by many local telephone companies. Call your telephone company for details. This service shows the telephone number, or name if it is available, of your caller as the line rings.

After a few rings, the LCD shows the telephone number of your caller (or name, if available). Once you answer a call, the Caller ID information disappears from the LCD, but the call information stays stored in the Caller ID memory.

- You can see the first 16 characters of the number (and name).
- The ID Unknown message means the call originated outside your Caller ID service area.
- The ID Withheld message means the caller has intentionally blocked transmission of information.

You can print a list of the Caller ID information received by your machine. (See Printing the Caller ID List on page 40.)

Note
The Caller ID service varies with different carriers. Call your local telephone company to find out about the kind of service available in your area.

Setting the Caller ID to On

If you have Caller ID on your line, then this function should be set to On to display the caller’s phone number on the LCD as the telephone rings.

1. Press Menu, 2, 0, 3.
2. Press ▲ or ▼ to choose On (or Off). Press OK.
3. Press Stop/Exit.

Viewing the Caller ID List

Your machine stores information for the last thirty calls in the Caller ID list. You can view or print this list. When the thirty-first call comes in to the machine, it replaces information about the first call.

1. Press Menu, 2, 0, 3.
2. Press ▲ or ▼ to choose Display ID. Press OK.

The Caller ID of the last call will appear on the LCD. If no ID is stored, the beeper will sound and No Caller ID will appear on the LCD.

3. Press ▲ or ▼ to scroll through the Caller ID memory to choose the Caller ID you want to view, and then press OK. The LCD shows the caller’s number or name and the date and time of the call.

4. To finish viewing, press Stop/Exit.

Printing the Caller ID List

1. Press Menu, 2, 0, 3.
2. Press ▲ or ▼ to choose Print Report. Press OK.

If no ID is stored, the beeper will sound and No Caller ID will appear on the LCD.

3. Press Mono Start or Colour Start.

4. After printing has finished, press Stop/Exit.
Connecting an external TAD (telephone answering device)

You may choose to connect an external answering device. However, when you have an external TAD on the same telephone line as the machine, the TAD answers all calls and the machine 'listens' for fax calling (CNG) tones. If it hears them, the machine takes over the call and receives the fax. If it does not hear CNG tones, the machine lets the TAD continue playing your outgoing message so your caller can leave you a voice message.

The TAD must answer within four rings (the recommended setting is two rings). The machine cannot hear CNG tones until the TAD has answered the call, and with four rings there are only 8 to 10 seconds of CNG tones left for the fax 'handshake'. Make sure you carefully follow the instructions in this guide for recording your outgoing message. We do not recommend using the toll saver feature on your external answering machine if it exceeds five rings.

**Note**

If you do not receive all your faxes, cut the Ring Delay setting on your external TAD.

1 TAD

When the TAD answers a call, the LCD shows **Telephone**.

---

**IMPORTANT**

DO NOT connect a TAD elsewhere on the same telephone line.

**Connections**

The external TAD must be connected as shown in the previous illustration.

1. Set your external TAD to one or two rings. (The machine's Ring Delay setting does not apply.)

2. Record the outgoing message on your external TAD.

3. Set the TAD to answer calls.

4. Set the Receive Mode to **External TAD**. (See Choosing the Receive Mode on page 34.)

**Recording an outgoing message (OGM) on an external TAD**

Timing is important in recording this message.

1. Record 5 seconds of silence at the beginning of your message. (This allows your machine time to listen for the fax CNG tones of automatic transmissions before they stop.)

2. Limit your speaking to 20 seconds.

**Note**

We recommend beginning your OGM with an initial 5-second silence because the machine cannot hear fax tones over a resonant or loud voice. You may try omitting this pause, but if your machine has trouble receiving, then you must re-record the OGM to include it.
Multi-line connections (PBX)

We suggest you ask the company who installed your PBX to connect your machine. If you have a multi line system we suggest you ask the installer to connect the unit to the last line on the system. This prevents the machine being activated each time the system receives telephone calls. If all incoming calls will be answered by a switchboard operator we recommend that you set the Receive Mode to Manual.

We cannot guarantee that your machine will operate properly under all circumstances when connected to a PBX. Any difficulties with sending or receiving faxes should be reported first to the company who handles your PBX.

Note
Make sure the Telephone Line Type is set to PBX. (See Setting the Telephone Line Type on page 38.)

External and extension telephones

Connecting an external or extension telephone

You can connect a separate telephone as shown in the diagram below.

1 Extension telephone
2 External telephone

When you are using a telephone on the same phone line, the LCD shows Telephone.

Note
Please make sure you use an external telephone with a cable no more than 3 metres long.

Operation from extension telephones

If you answer a fax call on an extension or an external telephone plugged into the correct socket on the machine, you can make your machine take the call by using the Remote Activation Code. When you press the Remote Activation Code * 5 1, the machine starts to receive the fax.

If the machine answers a voice call and fast double-rings for you to take over, use the Remote Deactivation Code # 5 1 to take the call at an extension telephone. (See F/T Ring Time (Fax/Tel mode only) on page 36.)
If you answer a call and no one is on the line:

You should assume that you’re receiving a manual fax.

Press \texttt{\textgreater{}51} and wait for the chirp or until the LCD shows 	extit{Receiving}, and then hang up.

\textbf{Note} 

You can also use the Fax Detect feature to make your machine automatically take the call. (See \textit{Fax Detect} on page 37.)

\section*{Using extension telephones (For U.K. only)}

Your premises may already be wired with parallel extension telephones, or you may plan to add extension telephones to your line, as well as your machine. While the simplest arrangement is a straightforward parallel connection, there are some problems with this arrangement, the most obvious of which is inadvertent interruption of a facsimile transmission caused by someone picking up an extension telephone to make an outgoing call. Also, Remote Activation Code may not operate reliably in such a simple configuration.

This machine may also be set to make a delayed transmission (i.e. a transmission at a pre-set time). This pre-set job may coincide with someone picking up an extension handset.

These problems can easily be eliminated, if you arrange modification of your extension wiring circuit, such that extension devices are connected ‘downstream’ of your machine in a master/slave configuration (see fig. 2). In this configuration the machine can always detect whether a telephone is in use. Thus it will not attempt to seize the line during that time. This is known as ‘telephone off-hook detection’.

The inadvisable configuration is shown in figure 1, and the recommended master/slave configuration is shown in figure 2.

This new connection configuration can be arranged by contacting BT, Kingston upon Hull Telecommunications, your PBX maintainer or a qualified telephone installation company as appropriate. Simply explained, the extension telephone circuit should be terminated on a normal modular plug (BT 431A style), which in turn should be put into the modular socket of the white ‘\textit{T}\textsuperscript{'}-shaped connector provided as part of the line cord assembly.

\textbf{Inadvisable connection of extension sockets (Fig. 1.)}

\begin{center}
\begin{tikzpicture}
\node (1) at (0,0) {\textbf{1} Extension socket};
\node (2) at (2,0) {\textbf{2} Master socket};
\node (3) at (4,0) {\textbf{3} Incoming line};
\node (0) at (0,1) {1 Extension socket};
\node (1) at (2,1) {2 Master socket};
\node (2) at (4,1) {3 Incoming line};
\draw (0) -- (1) -- (2) -- (3);
\end{tikzpicture}
\end{center}

\textbf{Recommended connection of extension sockets (Fig. 2.)}

\begin{center}
\begin{tikzpicture}
\node (1) at (0,0) {\textbf{1} Extension socket};
\node (2) at (2,0) {\textbf{2} Master socket};
\node (3) at (4,0) {\textbf{3} Incoming line};
\node (0) at (0,1) {1 Extension socket};
\node (1) at (2,1) {2 Master socket};
\node (2) at (4,1) {3 Incoming line};
\draw (0) -- (1) -- (2) -- (3);
\end{tikzpicture}
\end{center}

\textbf{Note} 

These telephones are now connected as external devices (see \textit{Connecting an external or extension telephone} on page 42), because they are connected to the fax machine via the T-connector.
Using a cordless external telephone

Once the base unit of the cordless telephone has been connected to the same telephone line as the machine (see External and extension telephones on page 42), it is easier to answer calls during the Ring Delay if you carry the cordless handset around with you.

If you let the machine answer first, you will have to go to the machine so you can press Tel/R to send the call to the cordless handset.

Using remote codes

Remote Activation Code

If you answer a fax call on an extension telephone, you can tell your machine to receive it by dialling the Remote Activation Code *51. Wait for the chirping sounds then replace the handset. (See Fax Detect on page 37.)

If you answer a fax call at the external telephone, you can make the machine receive the fax by pressing Mono Start and choose 2.Receive.

Remote Deactivation Code

If you receive a voice call and the machine is in F/T mode, it will start to sound the F/T Ring (fast double-ring) after the initial ring delay. If you pick up the call on an extension telephone you can turn the F/T Ring off by pressing #51 (make sure you press this between the rings).

If the machine answers a voice call and fast double-rings for you to take over, you can take the call at the external telephone by pressing Tel/R.

Changing the remote codes

If you want to use Remote Activation, you have to turn on the remote codes. The preset Remote Activation Code is *51. The preset Remote Deactivation Code is #51. If you want to, you can replace them with your own codes.

1. Press Menu, 2, 1, 4.
   1. Setup Receive
   4. Remote Codes

2. Press ▲ or ▼ to choose On (or Off). Press OK.

3. Enter the new Remote Activation Code. Press OK.

4. Enter the new Remote Deactivation Code. Press OK.

5. Press Stop/Exit.

Note

- If you are always disconnected when accessing your external TAD remotely, try changing the Remote Activation Code and Remote Deactivation Code to another three-digit code using the numbers 0-9, *, #.
- Remote Codes might not work with some telephone systems.
How to Dial

Manual dialling

Press all of the digits of the fax or telephone number.

Speed Dialling

1  Press (Speed Dial).

2  Press OK and the # (hash) key, and then the two digit Speed Dial number using the dial pad.

Note

If the LCD shows Not Registered when you enter a Speed Dial number, a number has not been stored at this location.

Search

You can search for names you have stored in the Speed Dial memory.

1  Press (Speed Dial).

2  Press ▲ or ▼ to choose Search. Press OK.

3  Do one of the following:
   - To search numerically, press ▲ or ▼ to choose the number, and then press OK.
   - To search alphabetically, enter the first letter of the name using the dial pad, then press ▼ or ▲ to choose the name, and then press OK.

Fax Redial

If you are sending a fax manually and the line is busy, press Redial/Pause, and then press Mono Start or Colour Start to try again. If you want to make a second call to the last number dialled, you can save time by pressing Redial/Pause and Mono Start or Colour Start.

Redial/Pause only works if you dialled from the control panel.

If you are sending a fax automatically and the line is busy, the machine will automatically redial up to three times at five minute intervals.

Note

In Real Time Transmission the automatic redial feature does not work when using the scanner glass.
Storing numbers

You can set up your machine to do the following types of easy dialling: Speed Dial and Groups for broadcasting faxes. When you dial a Quick Dial number, the LCD shows the name, if you stored it, or the number.

Note
If you lose electrical power, the Quick Dial numbers that are in the memory will not be lost.

Storing a pause

Press Redial/Pause to put a 3.5-second pause between numbers. If you are dialling overseas, you can press Redial/Pause as many times as needed to increase the length of the pause.

Storing Speed Dial numbers

Names and numbers can be stored as two-digit Speed Dial locations. You can store up to 40 different Speed Dial locations. When you dial you will only have to press a few keys (for example: ▲ (Speed Dial), OK, #, the two-digit number, and Mono Start or Colour Start).

1. Press ▲ (Speed Dial) and ▲ or ▼ to choose Set Speed Dial. Press OK.
2. Use the dial pad to enter a two-digit Speed Dial location number (01-40). Press OK.
3. Enter the fax or telephone number (up to 20 digits). Press OK.

Do one of the following:
- Enter the name (up to 16 characters) using the dial pad.
  Press OK. (To help you enter letters, see Entering Text on page 129.)
- To store the number without a name, press OK.

Do one of the following:
- To store another Speed Dial number, go to step 2.
- To finish the setting, press Stop/Exit.

Changing Speed Dial numbers

If you try to store a Speed Dial number where a number has already been stored, the LCD will show the name or number that has been stored there, and will ask you to do one of the following:

1. Press 1 to change the stored number.
2. Press 2 to exit without making a change.

If you chose 1, you will be able to change the stored number and name, or enter a new one. Follow the instructions below:

1. Enter a new number. Press OK.
2. Enter a new name. Press OK.
   To change a character, use ▼ or ▲ to position the cursor under the character you want to change, then press Clear/Back. Re-enter the character.
3. Press Stop/Exit to finish the setting.
Setting up groups for broadcasting

Groups, which can be stored in a Speed Dial location, allow you to send the same fax message to many fax numbers by pressing only \( \text{Speed Dial} \), \( \text{OK} \), \#, the two-digit location and \( \text{Mono Start} \). First, you’ll need to store each fax number in a Speed Dial location. Then you can include them as numbers in the Group. Each Group uses up a Speed Dial location. You can have up to six Groups, or you can assign up to 39 numbers in a large Group.

(See Storing Speed Dial numbers on page 46 and Broadcasting (Monochrome only) on page 29.)

1. Press \( \text{Speed Dial} \) and \( \uparrow \) or \( \downarrow \) to choose Setup Groups. Press \( \text{OK} \).

2. Use the dial pad to enter the two-digit Speed Dial number where you want to store the Group. Press \( \text{OK} \).

3. Use the dial pad to enter a Group number (1 to 6). Press \( \text{OK} \).

4. To add Speed Dial numbers follow the instructions below:
   For example, for Speed Dial numbers 05 and 09. Press \( \text{Speed Dial} \), 05, \( \text{Speed Dial} \), 09.
   The LCD shows:
   \[ \text{Group:G0} \]

5. Press \( \text{OK} \) when you have finished adding numbers.

6. Use the dial pad to enter a name for the Group. Press \( \text{OK} \).

\( \text{Note} \)

You can easily print a list of all your Speed Dial numbers. Numbers that are part of a group will be marked in the GROUP column. (See How to print a report on page 49.)

Combining Quick Dial numbers

Sometimes you may want to choose from several long distance carriers when you send a fax. Rates may vary depending on the time and destination. To take advantage of low rates, you can store the access codes of long-distance carriers and credit card numbers as Speed Dial numbers. You can store these long dialling sequences by dividing them and setting them up as separate Speed Dial numbers in any combination. You can even include manual dialling using the dial pad. (See Storing Speed Dial numbers on page 46.)

For example, you might have stored ‘555’ on Speed Dial #03 and ‘7000’ on Speed Dial #02. You can use them both to dial ‘555-7000’ if you press the following keys:

\( \text{Speed Dial} \), \( \text{OK} \), #03, \( \text{Speed Dial} \), #02, and \( \text{Mono Start} \).

To temporarily change a number, you can substitute part of the number with manual dialling using the dial pad. For example, to change the number to 555-7001 you could press the following keys:

\( \text{Speed Dial} \), \( \text{OK} \), #03, 7, 0, 0, 1 (on the dial pad), and \( \text{Mono Start} \).

You can also add a pause by pressing the \( \text{Redial/Pause} \) key.
Fax reports

You need to set up the Transmission Verification Report and Journal Period using the Menu key.

Transmission Verification Report

You can use the Transmission Verification Report as proof that you sent a fax. This report lists the receiving party’s name or fax number, the time and date of transmission, duration of transmission, number of pages sent, and whether or not the transmission was successful.

There are several settings available for the Transmission Verification Report:

- **On**: Prints a report after every fax you send.
- **On+Image**: Prints a report after every fax you send. A portion of the fax’s first page appears on the report.
- **Off**: Prints a report if your fax is unsuccessful due to a transmission error. Off is the default setting.
- **Off+Image**: Prints a report if your fax is unsuccessful due to a transmission error. A portion of the fax’s first page appears on the report.

### Note

- If you choose On+Image or Off+Image, the image will only appear on the Transmission Verification Report if Real Time Transmission is set to Off. (See Real Time Transmission on page 32.)
- If your transmission is successful, "OK" will appear next to "RESULT" on the Transmission Verification Report. If transmission is not successful, "ERROR" will appear next to "RESULT".

1. Press Menu, 2, 3, 1.
2. Press ▲ or ▼ to choose Off+Image, On, On+Image or Off. Press OK.
3. Press Stop/Exit.
Fax Journal (activity report)

You can set the machine to print a journal at specific intervals (every 50 faxes, 6, 12 or 24 hours, 2 or 7 days). If you set the interval to Off, you can still print the report by following the steps in Reports on page 49. The default setting is Every 50 Faxes.

1. Press Menu, 2, 3, 2.

2. Press ▲ or ▼ to choose an interval. Press OK.
   (If you choose 7 days, the LCD will ask you to choose the first day for the 7-day countdown.)
   If you choose Every 50 Faxes, go to step 4.

   a. 6, 12, 24 hours, 2 or 7 days
   The machine will print the report at the chosen time and then erase all jobs from its memory. If the machine's memory is filled with the maximum 200 jobs before the time you chose has passed, the machine will print the Journal early and then erase all jobs from the memory. If you want an extra report before it is due to print, you can print it without erasing the jobs from the memory.

   b. Every 50 Faxes
   The machine will print the Journal when the machine has stored 50 jobs.

3. Enter the time to start printing in 24-hour format. Press OK.
   (For example: enter 19:45 for 7:45 PM.)

4. Press Stop/Exit.

Reports

The following reports are available:

1. XMIT Verify
   Prints a Transmission Verification Report for your last transmission.

2. Help List
   A help list showing how to program your machine.

3. Quick Dial
   Lists names and numbers stored in the Speed Dial memory, in numerical order.

4. Fax Journal
   Lists information about the last incoming and outgoing faxes. (TX: Transmit.) (RX: Receive.)

5. User Settings
   Lists your settings.

6. Network Config
   Lists your Network settings.

How to print a report

1. Press Menu, 6.

2. Do one of the following:
   a. Press ▲ or ▼ to choose the report you want. Press OK.
   b. Enter the number of the report you want to print. For example, press 2 to print the help list.

3. Press Mono Start.

4. Press Stop/Exit.
Making copies

How to copy

Entering Copy mode

Press \( \text{(Copy)} \) to enter Copy mode. The default mode is Fax. You can change the number of seconds or minutes that the machine stays in Copy mode after the last copy operation. (See \textit{Mode Timer} on page 21.)

The LCD shows the default copy settings:

- \text{1} Copy Ratio
- \text{2} Quality
- \text{3} No. of Copies

Making multiple copies

You can make up to 99 copies in one print run.

1. Make sure you are in Copy mode \( \text{(Copy)} \).
2. Load your document. (See \textit{Loading documents} on page 18.)
3. Use the dial pad to enter the number of copies (up to 99).
4. Press \text{Mono Start} or \text{Colour Start}.

\textbf{Note} (MFC-295CN only)
To sort your copies, press the \textit{Copy Options} key. (See \textit{Sorting copies using the ADF (Monochrome only)} \textit{(MFC-295CN only)} on page 57.)

Stop copying

To stop copying, press \text{Stop/Exit}.

Making a single copy

1. Make sure you are in Copy mode \( \text{(Copy)} \).
2. Load your document. (See \textit{Loading documents} on page 18.)
3. Press \text{Mono Start} or \text{Colour Start}.
Copy Options

When you want to quickly change the copy settings temporarily for the next copy, use the Copy Options key.

The machine returns to its default settings 2 minutes after it finishes copying, or if the mode timer returns the machine to Fax mode. For more information see Mode Timer on page 21.

Press | Menu selection | Options | Page

(01 - 99)

Note
You can save some of the copy settings you use most often by setting them as default. You can find instructions on how to do this in the section for each feature.
Changing copy speed and quality

You can choose from a range of quality settings. The default setting is Normal.

To temporarily change the quality setting, follow the instructions below:

1. Make sure you are in Copy mode.
2. Load your document.
3. Use the dial pad to enter the number of copies (up to 99).
4. Press Copy Options and ▲ or ▼ to choose Quality. Press OK.
5. Press ▲ or ▼ to choose Fast, Normal or Best quality. Press OK.
6. Press Mono Start or Colour Start.

To change the default setting, follow the instructions below:

1. Press Menu, 3, 1.
2. Press ▲ or ▼ to choose Fast, Normal or Best quality. Press OK.
3. Press Stop/Exit.

Enlarging or reducing the image copied

You can choose an enlargement or reduction ratio. If you choose Fit to Page, your machine will adjust the size automatically to the paper size you set.

<table>
<thead>
<tr>
<th>Press Copy Options</th>
<th>Fit to Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>(MFC-253CW/255CW/257CW)</td>
<td>83%</td>
</tr>
<tr>
<td>(MFC-295CN)</td>
<td>83% LGL-A4</td>
</tr>
<tr>
<td>69% A4-A5</td>
<td>47% A4-10x15cm</td>
</tr>
</tbody>
</table>

Normal

Normal is the recommended mode for ordinary print outs. This produces good copy quality with good copy speed.

Fast

Fast copy speed and lowest ink consumption. Use to save time printing documents to be proof-read, large documents or many copies.

Best

Use best mode to copy precise images such as photographs. This provides the highest resolution and the slowest speed.
To enlarge or reduce the next copy follow the instruction below:

1. Make sure you are in Copy mode.
2. Load your document.
3. Use the dial pad to enter the number of copies (up to 99).
4. Press Copy Options and ▲ or ▼ to choose Enlarge/Reduce. Press OK.
5. Do one of the following:
   - Press ▲ or ▼ to choose the enlargement or reduction ratio you want. Press OK.
   - Press ▲ or ▼ to choose Custom(25-400%). Press OK. Use the dial pad to enter an enlargement or reduction ratio from 25% to 400%. (For example, press 5 3 to enter 53%). Press OK.
6. Press Mono Start or Colour Start.

Note
- Page Layout is not available with Enlarge/Reduce.
- Fit to Page does not work properly if the document on the scanner glass is skewed by more than 3 degrees. Using the document guide lines on the left and top, place your document in the upper left hand corner, with the document face down on the scanner glass.

Making N in 1 copies or a poster (Page Layout)

The N in 1 copy feature can help you save paper by letting you copy two or four pages onto one printed page.

You can also produce a poster. When you use the poster feature your machine divides your document into sections, then enlarges the sections so you can assemble them into a poster. If you want to print a poster, use the scanner glass.

IMPORTANT
- Make sure the paper size is set to Letter or A4.
- You cannot use the Enlarge/Reduce and Stack/Sort settings (MFC-295CN) with the N in 1 and Poster features.
- N in 1 colour copies are not available.
- (P) means Portrait and (L) means Landscape.
- You can only make one poster copy at a time.

1. Make sure you are in Copy mode.
2. Load your document.
3. Use the dial pad to enter the number of copies (up to 99).
4. Press Copy Options and ▲ or ▼ to choose Page Layout. Press OK.
5. Press ▲ or ▼ to choose Off(1 in 1), 2 in 1 (P), 2 in 1 (L), 4 in 1 (P), 4 in 1 (L) or Poster(3 x 3). Press OK.
Press **Mono Start** or **Colour Start** to scan the document. If you placed the document in the ADF (MFC-295CN) or are making a poster, the machine scans the document and starts printing.

**If you are using the scanner glass, go to step 7.**

7. After the machine scans the page, press 1 to scan the next page.

   Next Page?
   1.Yes 2.No

8. Place the next page on the scanner glass. Press **OK**.

   Set Next Page
   Then Press OK

9. Repeat steps 7 and 8 for each page of the layout.

10. After all the pages have been scanned, press 2 to finish.

---

### Place your document face down in the direction shown below:

- **2 in 1 (P)**

- **2 in 1 (L)**

- **4 in 1 (P)**

- **4 in 1 (L)**

- **Poster (3 x 3)**

You can make a poster size copy of a photograph.
Making copies

Sorting copies using the ADF (Monochrome only) (MFC-295CN only)

You can sort multiple copies. Pages will be sorted in the order 3 2 1, 3 2 1, 3 2 1, and so on.

1. Make sure you are in Copy mode. 
2. Load your document. 
3. Use the dial pad to enter the number of copies (up to 99). 
4. Press Copy Options and ▲ or ▼ to choose Stack/Sort. Press OK. 
5. Press ▲ or ▼ to choose Sort. Press OK. 
6. Press Mono Start.

Note

Fit to Page and Page Layout are not available with Sort.

Adjusting Brightness and Contrast

Brightness

To temporarily change the brightness setting, follow the instructions below:

1. Make sure you are in Copy mode. 
2. Load your document. 
3. Use the dial pad to enter the number of copies (up to 99). 
4. Press Copy Options and ▲ or ▼ to choose Brightness. Press OK. 
5. Press ▲ or ▼ to make a lighter or darker copy. Press OK. 
6. Press Mono Start or Colour Start.

To change the default setting follow the instructions below:

1. Press Menu, 3, 2. 
2. Press ▲ or ▼ to make a lighter or darker copy. Press OK. 
3. Press Stop/Exit.

Contrast

Adjust the contrast to help an image look sharper and more vivid.

1. Press Menu, 3, 3. 
2. Press ▲ or ▼ to change the contrast. Press OK. 
3. Press Stop/Exit.
Paper options

Paper Type
If you are copying on special paper, set the machine for the type of paper you are using to get the best print quality.

1. Make sure you are in Copy mode.
2. Load your document.
3. Use the dial pad to enter the number of copies (up to 99).
4. Press Copy Options and ▲ or ▼ to choose Paper Type. Press OK.
5. Press ▲ or ▼ to choose the type of paper you are using (Plain Paper, Inkjet Paper, Brother BP71, Other Glossy or Transparency). Press OK.
6. Press Mono Start or Colour Start.

Note
To change the default paper type setting see Paper Type on page 22.

Paper Size
If you are copying on paper other than A4 size, you will need to change the paper size setting. You can copy on A4, A5, Photo 10 × 15 cm, Letter or Legal paper.

1. Make sure you are in Copy mode.
2. Load your document.
3. Use the dial pad to enter the number of copies (up to 99).
4. Press Copy Options and ▲ or ▼ to choose Paper Size. Press OK.
5. Press ▲ or ▼ to choose the size of paper you are using (A4, A5, 10(W) x 15(H)cm, Letter or Legal). Press OK.
6. Press Mono Start or Colour Start.

Note
To change the default paper size setting see Paper Size on page 22.
Direct Printing

- Printing photos from a memory card or USB Flash memory drive  60
- Printing photos from a camera (MFC-295CN only)  71
The MFC-253CW, MFC-255CW and MFC-257CW only support memory cards.

PhotoCapture Center™ Operations

Printing from a memory card or USB Flash memory drive without a PC

Even if your machine is not connected to your computer, you can print photos directly from digital camera media or USB Flash memory drive. (See How to print from a memory card or USB Flash memory drive on page 63.)

Scanning to a memory card or USB Flash memory drive without a PC

You can scan documents and save them directly to a memory card or USB Flash memory drive. (See Scan to a memory card or USB Flash memory drive on page 68.)

Using PhotoCapture Center™ from your computer

You can access a memory card or USB Flash memory drive that is inserted in the front of the machine from your PC.

(See PhotoCapture Center™ for Windows® or Remote Setup & PhotoCapture Center™ for Macintosh in the Software User’s Guide on the CD-ROM.)

Using a memory card or USB Flash memory drive

Your Brother machine has media drives (slots) for use with the following, popular digital camera media: Memory Stick™, Memory Stick PRO™, SD, SDHC, xD-Picture Card™ and a USB Flash memory drive.

- miniSD can be used with a miniSD adapter.
- microSD can be used with a microSD adapter.
- Memory Stick Duo™ can be used with a Memory Stick Duo™ adapter.
- Memory Stick PRO Duo™ can be used with a Memory Stick PRO Duo™ adapter.
- Memory Stick Micro™ (M2™) can be used with a Memory Stick Micro™ (M2™) adapter.
- Adapters are not included with the machine. Contact a third party supplier for adapters.
- This product supports xD-Picture Card™ Type M / Type M⁺ / Type H (Large Capacity).
- IBM Microdrive™ is not compatible with the machine.

The PhotoCapture Center™ feature lets you print digital photos from your digital camera at high resolution to get photo quality printing.
Memory cards, USB Flash memory drive and folder structures

Your machine is designed to be compatible with modern digital camera image files, memory cards or USB Flash memory drive; however, please read the points below to avoid errors:

- The image file extension must be .JPG (other image file extensions like .JPEG, .TIF, .GIF and so on will not be recognized).
- Direct PhotoCapture Center™ printing must be performed separately from PhotoCapture Center™ operations using the PC. (Simultaneous operation is not available.)
- The machine can read up to 999 files on a memory card or USB Flash memory drive.
- The DPOF file on the memory cards must be in a valid DPOF format. (See DPOF printing on page 65.)

Please be aware of the following:

- When printing an index or image, the PhotoCapture Center™ will print all valid images, even if one or more images have been corrupted. Corrupted images will not be printed.
- (memory card users)
  Your machine is designed to read memory cards that have been formatted by a digital camera.

  When a digital camera formats a memory card it creates a special folder into which it copies image data. If you need to modify the image data stored on a memory card with your PC, we recommend that you do not modify the folder structure created by the digital camera. When saving new or modified image files to the memory card we also recommend you use the same folder your digital camera uses. If the data is not saved to the same folder, the machine may not be able to read the file or print the image.
- (USB Flash memory drive users)
  This machine supports USB Flash memory drives that have been formatted by Windows®.
Getting started

Firmly put a memory card or USB Flash memory drive into the correct slot.

1 USB Flash memory drive
2 SD, SDHC
3 Memory Stick™, Memory Stick PRO™
4 xD-Picture Card™

**IMPORTANT**
The USB direct interface supports only a USB Flash memory drive, a PictBridge compatible camera, or a digital camera that uses the USB mass storage standard. Any other USB devices are not supported.

The **Photo Capture** key indications

- **Photo Capture** light is on, the memory card or USB Flash memory drive is correctly inserted.
- **Photo Capture** light is off, the memory card or USB Flash memory drive is not correctly inserted.
- **Photo Capture** light is blinking, the memory card or USB Flash memory drive is being read or written to.

**IMPORTANT**
DO NOT unplug the power cord or remove the memory card or USB Flash memory drive from the media drive (slot) or USB direct interface while the machine is reading or writing to the memory card or USB Flash memory drive (the **Photo Capture** key is blinking). You will lose your data or damage the card.

The machine can only read one device at a time so do not put more than one device in the slots.
How to print from a memory card or USB Flash memory drive

Before printing a photo you must first print a thumbnail index to choose the number of the photo you want to print. Follow the instructions below to start printing directly from your memory card or USB Flash memory drive:

1. Make sure you have put the memory card or USB Flash memory drive in the correct slot. For example, the LCD will show the following message:

   ![M.Stick Active]

   Press PhotoCa...

2. Press (Photo Capture). For DPOF printing, see DPOF printing on page 65.

3. Press ▲ or ▼ to choose Print Index. Press OK.

4. Press Colour Start to start printing the index sheet. Make a note of the image number you want to print. See Print Index (Thumbnails) on page 63.

5. To print images press ▲ or ▼ to choose Print Images in step 3 and then press OK. (See Printing Photos on page 64.)

6. Enter the image number and press OK.

7. Press Colour Start to start printing.

Print Index (Thumbnails)

The PhotoCapture Center™ assigns numbers for images (such as NO.1, NO.2, NO.3, and so on).

![Print Index (Thumbnails)]

The PhotoCapture Center™ uses these numbers to identify each picture. You can print a thumbnail page to show all the pictures on the memory card or USB Flash memory drive.

Note

Only file names that are 8 characters or less will be printed correctly on the Index sheet.

1. Make sure you have put the memory card or USB Flash memory drive in the correct slot.

   Press (Photo Capture).

2. Press ▲ or ▼ to choose Print Index. Press OK.

3. Press ▲ or ▼ to choose 6 Images/Line or 5 Images/Line. Press OK.

   ![6 Images/Line]
   ![5 Images/Line]

   Print time for 5 Images/Line will be slower than 6 Images/Line, but the quality is better.
4 Press ▲ or ▼ to choose the type of paper you are using, Plain Paper, Inkjet Paper, Brother BP71 or Other Glossy. Press OK.

5 Press ▲ or ▼ to choose the paper size you are using, A4 or Letter. Press OK.

6 Press Colour Start to print.

Printing Photos

Before you can print an individual image, you have to know the image number.

1 Make sure you have put the memory card or USB Flash memory drive in the correct slot.

2 Print the index first. (See Print Index (Thumbnails) on page 63.)
Press (Photo Capture).

3 Press ▲ or ▼ to choose Print Images. Press OK.

Note
If your memory card contains valid DPOF information, the LCD will show DPOF Print:Yes. See DPOF printing on page 65.

4 Enter the image number that you want to print from the thumbnails printed on the Index page. Press OK.
No.: 1, 3, 6,

Note
- Multiple numbers can be entered by using the OK key to separate numbers. For example 1, OK, 3, OK, 6 would print images 1, 3 and 6.
  The # key can be used to print a range of numbers, for example 1, #, 5 would print all images from 1 to 5.
- You can enter up to 12 characters (including commas) for the image numbers you want to print.

5 Do one of the following:

- After you have chosen all the images you want to print, press OK to choose your settings. Go to step 6.
- If you do not want to change any settings, press Colour Start.

6 Press ▲ or ▼ to choose the type of paper you are using, Plain Paper, Inkjet Paper, Brother BP71 or Other Glossy. Press OK.

7 Press ▲ or ▼ to choose the paper size you are using, Letter, A4, 10x15cm or 13x18cm. Press OK.

- If you choose Letter or A4, go to step 8.
- If you choose another size, go to step 9.
- If you do not want to change any settings, press Colour Start.
Press ▲ or ▼ to choose the print size (8 x 10cm, 9 x 13cm, 10 x 15cm, 13 x 18cm, 15 x 20cm or Max. Size).
Press OK.

Do one of the following:
- To choose the number of copies go to step 10.
- If you have finished choosing settings, press Colour Start.

Enter the number of copies you want. Press OK.

Press Colour Start to print.

The printing positions when using A4 are shown below:

### DPOF printing

DPOF stands for Digital Print Order Format. Major digital camera manufacturers (Canon Inc., Eastman Kodak Company, FUJIFILM Corporation, Panasonic Corporation and Sony Corporation) created this standard to make it easier to print images from a digital camera.

If your digital camera supports DPOF printing, you will be able to choose on the digital camera display the images and number of copies you want to print.

When a memory card containing DPOF information is put into your machine, you can print the chosen image easily.

1. Firmly insert the memory card into the correct slot.

   M.Stick Active

   Press (Photo Capture).

2. Press ▲ or ▼ to choose Print Images. Press OK.

3. If there is a DPOF file on the card, the LCD will show:

   DPOF Print:Yes

   Press ▲ or ▼ to choose DPOF Print:Yes. Press OK.

5. Press ▲ or ▼ to choose the type of paper you are using, Plain Paper, Inkjet Paper, Brother BP71 or Other Glossy. Press OK.

6. Press ▲ or ▼ to choose the paper size you are using, Letter, A4, 10x15cm or 13x18cm. Press OK.

   - If you chose Letter or A4, go to step 7.
   - If you chose another size, go to step 3.
Chapter 11

7 Press ▲ or ▼ to choose the print size (8 x 10cm, 9 x 13cm, 10 x 15cm, 13 x 18cm, 15 x 20cm or Max. Size). Press OK.

8 Press Colour Start to print.

Note

A DPOF File error can occur if the print order that was created on the camera has been corrupted. Delete and recreate the print order using your camera to correct this problem.

For instructions on how to delete or recreate the print order, refer to your camera manufacturer’s support website or accompanying documentation.

**PhotoCapture Center™ print settings**

These settings will remain until you change them again.

**Print speed and Quality**

1 Press Menu, 4, 1.

2 Press ▲ or ▼ to choose Normal or Photo. Press OK.

3 Press Stop/Exit.

**Paper Options**

**Paper Type**

1 Press Menu, 4, 2.

2 Press ▲ or ▼ to choose Plain Paper, Inkjet Paper, Brother BP71 or Other Glossy. Press OK.

3 Press Stop/Exit.

**Paper Size**

1 Press Menu, 4, 3.

2 Press ▲ or ▼ to choose the paper size you are using, Letter, A4, 10x15cm or 13x18cm. Press OK.

3 Press Stop/Exit.
Printing photos from a memory card or USB Flash memory drive

Print Size
This setting is available only when you choose Letter or A4 in the paper size setting.

1. Press Menu, 4, 4.
2. Press ▲ or ▼ to choose the print size you are using, 8 x 10cm, 9 x 13cm, 10 x 15cm, 13 x 18cm, 15 x 20cm or Max. Size.
   Press OK.
3. Press Stop/Exit.

Adjusting Brightness and Contrast

Brightness
1. Press Menu, 4, 5.
2. Press ▲ or ▼ to make a lighter or darker print.
   Press OK.
3. Press Stop/Exit.

Contrast
You can choose the contrast setting. More contrast will make an image look sharper and more vivid.

1. Press Menu, 4, 6.
2. Press ▲ or ▼ to increase or decrease the contrast.
   Press OK.
3. Press Stop/Exit.

Cropping
If your photo is too long or wide to fit the available space on your chosen layout, part of the image will be automatically cropped.

The default setting is On. If you want to print the whole image, turn this setting to Off. If you are also using the Borderless setting, turn Borderless to Off. (See Borderless printing on page 67.)

1. Press Menu, 4, 7.
2. Press ▲ or ▼ to choose Off (or On).
   Press OK.
3. Press Stop/Exit.

Borderless printing
This feature expands the printable area to the edges of the paper. Printing time will be slightly slower.

1. Press Menu, 4, 8.
2. Press ▲ or ▼ to choose Off (or On).
   Press OK.
3. Press Stop/Exit.
Date Print

You can print the date if it is already in the data on your photo. The date will be printed on the lower right corner. If the data doesn’t have the date information, you cannot use this function.

2. Press ▲ or ▼ to choose On (or Off). Press OK.
3. Press Stop/Exit.

Note

The DPOF setting on your camera must be turned off to use the Date Print.

Scan to a memory card or USB Flash memory drive

You can scan monochrome and colour documents onto a memory card or USB Flash memory drive. Monochrome documents will be stored in PDF (*.PDF) or TIFF (*.TIF) file formats. Colour documents may be stored in PDF (*.PDF) or JPEG (*.JPG) file formats. The default setting is Color 150 dpi and the default file format is PDF. The machine automatically creates file names based on the current date. (For details, see the Quick Setup Guide.) For example, the fifth image scanned on July 1, 2009 would be named 01070905.PDF. You can change the colour and quality.

<table>
<thead>
<tr>
<th>Quality</th>
<th>Selectable File Format</th>
</tr>
</thead>
<tbody>
<tr>
<td>Color 150 dpi</td>
<td>PDF/JPEG</td>
</tr>
<tr>
<td>Color 300 dpi</td>
<td>PDF/JPEG</td>
</tr>
<tr>
<td>Color 600 dpi</td>
<td>PDF/JPEG</td>
</tr>
<tr>
<td>B/W 200x100 dpi</td>
<td>TIFF/PDF</td>
</tr>
<tr>
<td>B/W 200 dpi</td>
<td>TIFF/PDF</td>
</tr>
</tbody>
</table>

1. Make sure you have put the memory card or USB Flash memory drive in the correct slot.

**IMPORTANT**

DO NOT take out the memory card or USB Flash memory drive while Photo Capture is blinking to avoid damaging the card, USB Flash memory drive or the data stored on them.

2. Load your document.

3. Press (Scan).

4. Press ▲ or ▼ to choose Scan to Media.
Printing photos from a memory card or USB Flash memory drive

5 Do one of the following:
   - To change the quality press OK and go to step 6.
   - To start scanning press Mono Start or Colour Start.

6 Press ▲ or ▼ to choose the quality, and then press OK.

Do one of the following:
   - To change the file type, go to step 7.
   - To start scanning press Mono Start or Colour Start.

7 Press ▲ or ▼ to choose the file type, choose one of the options below:
   - To change the file name press OK and go to step 8.
   - To start scanning press Mono Start or Colour Start.

8 The file name is set automatically. However, you can set a name of your choice using the dial pad. You can only change the first 6 digits. Press Mono Start or Colour Start.

Changing the image quality

1 Press Menu, 4, 0, 1.

2 Press ▲ or ▼ to choose
   B/W 200x100 dpi, B/W 200 dpi, Color 150 dpi, Color 300 dpi or Color 600 dpi.
   Press OK.

3 Press Stop/Exit.

Changing the monochrome file format

1 Press Menu, 4, 0, 2.

2 Press ▲ or ▼ to choose TIFF or PDF. Press OK.

3 Press Stop/Exit.

Changing the colour file format

1 Press Menu, 4, 0, 3.

2 Press ▲ or ▼ to choose PDF or JPEG. Press OK.

3 Press Stop/Exit.
Understanding the Error Messages

Once you are familiar with the types of errors that can occur while you are using PhotoCapture Center™, you can easily identify and troubleshoot any problems.

- **Hub is Unusable.**
  This message will appear if a Hub or USB Flash memory drive with a Hub has been put into the USB direct interface.

- **Media Error**
  This message will appear if you put in a memory card that is either bad or not formatted, or when there is a problem with the media drive. To clear this error, take out the memory card.

- **No File**
  This message will appear if you try to access a memory card or USB Flash memory drive in the drive (slot) that does not contain a .JPG file.

- **Out of Memory**
  This message will appear if you are working with images that are too large for the machine's memory.
  This message will also appear when a memory card or USB Flash memory drive you are using does not have enough space available for the scanned document.

- **Media is Full.**
  This message will appear if you are trying to save more than 999 files in a memory card or USB Flash memory drive.

- **Unusable Device**
  This message will appear if a USB device or USB Flash memory drive that is not supported has been connected to the USB direct interface. (For more information, visit us at http://solutions.brother.com.)
  This message will also appear if you connect a broken device to the USB direct interface.
Printing photos directly from a PictBridge camera

Your Brother machine supports the PictBridge standard, allowing you to connect to and print photos directly from any PictBridge compatible digital camera.

If your camera is using the USB Mass Storage standard, you can also print photos from a digital camera without PictBridge. (See Printing photos directly from a digital camera (without PictBridge) on page 73.)

PictBridge requirements

To avoid errors, remember the following points:

- The machine and the digital camera must be connected using a suitable USB cable.

- The image file extension must be .JPG (other image file extensions like .JPEG, .TIF, .GIF and so on will not be recognized).

- PhotoCapture Center™ operations are not available when using the PictBridge feature.

Setting your digital camera

Make sure your camera is in PictBridge mode. The following PictBridge settings may be available from the LCD of your PictBridge compatible camera.

Depending on your camera some of these settings may not be available.

<table>
<thead>
<tr>
<th>Camera Menu Selections</th>
<th>Options</th>
</tr>
</thead>
<tbody>
<tr>
<td>Paper Size</td>

<td>Off</td>
</tr>
</tbody>
</table>

- When your camera does not have any menu selections, these settings are also used.

- The names and availability of each setting depends on the specification of your camera.

Please refer to the documentation supplied with your camera for more detailed information on changing PictBridge settings.
Printing Images

Note
Remove any memory cards or USB Flash memory drive from the machine before connecting a digital camera.

1. Make sure that your camera is turned off. Connect your camera to the USB direct interface (1) on the machine using the USB cable.

1 USB direct interface

2. Turn on the camera. When the machine has recognized the camera, the LCD shows the following message:

   Camera Connected

3. Choose the photo you want to print following the instructions from your camera. When the machine starts printing a photo, the LCD will show Printing.

DPOF printing

DPOF stands for Digital Print Order Format. Major digital camera manufacturers (Canon Inc., Eastman Kodak Company, FUJIFILM Corporation, Panasonic Corporation and Sony Corporation) created this standard to make it easier to print images from a digital camera.

If your digital camera supports DPOF printing, you will be able to choose on the digital camera display the images and number of copies you want to print.

Note
A DPOF File error can occur if the print order that was created on the camera has been corrupted. Delete and recreate the print order using your camera to correct this problem. For instructions on how to delete or recreate the print order, refer to your camera manufacturer’s support website or accompanying documentation.

IMPORTANT
To prevent damage to your machine, do not connect any device other than a digital camera or USB Flash memory drive to the USB direct interface.
Printing photos directly from a digital camera (without PictBridge)

If your camera supports the USB Mass Storage standard, you can connect your camera in mass storage mode. This enables you to print photos from your camera.

(If you would like to print photos in PictBridge mode, see Printing photos directly from a PictBridge camera on page 71.)

Note

The name, availability and operation differ among digital cameras. Please refer to the documentation supplied with your camera for detailed information, such as how to switch from PictBridge mode to USB mass storage mode.

Printing Images

Note

Remove any memory cards or USB Flash memory drive from the machine before connecting a digital camera.

1. Make sure that your camera is turned off. Connect your camera to the USB direct interface (1) on the machine using the USB cable.

1 USB direct interface

2. Turn on the camera.

3. Follow the steps in Printing Photos on page 64.

IMPORTANT

To prevent damage to your machine, do not connect any device other than a digital camera or USB Flash memory drive to the USB direct interface.
Understanding the Error Messages

Once you are familiar with the types of errors that can occur while you are printing from a camera, you can easily identify and troubleshoot any problems.

- **Out of Memory**
  - This message will appear if you are working with images that are too large for the machine’s memory.

- **Unusable Device**
  - This message will appear if you connect a camera which is not using the USB Mass Storage standard. This message will also appear if you connect a broken device to the USB direct interface.

(For more detailed solutions see *Error and maintenance messages* on page 97.)
Section V

Software

Software and Network features
The CD-ROM includes the Software User’s Guide and Network User’s Guide for features available when connected to a computer (for example, printing and scanning). The guide has easy to use links that, when clicked, will take you directly to a particular section.

You can find information on these features:
- Printing
- Scanning
- ControlCenter3 (Windows®)
- ControlCenter2 (Macintosh)
- Faxing from your computer
- PhotoCapture Center™
- Network Printing
- Network Scanning
- Wired and Wireless Network

How to read the HTML User’s Guide
This is a quick reference to use the HTML User’s Guide.

Windows®

Note
If you have not installed the software, see Viewing Documentation on page 3.

1. From the Start menu, point to Brother, MFC-XXXX (where XXXX is your model number) from the programs group, then click User’s Guides in HTML format.
2. Click SOFTWARE USER’S GUIDE (or NETWORK USER’S GUIDE) from the top menu.

3. Click the heading you would like to read from the list at the left of the window.

Macintosh

1. Make sure your Macintosh is turned on. Insert the Brother CD-ROM into your CD-ROM drive.
2. Double-click the Documentation icon.
3. Double-click your language folder, and then double-click top.html.
4. Click SOFTWARE USER’S GUIDE (or NETWORK USER’S GUIDE) in the top menu, and then click the heading you would like to read from the list at the left of the window.

Choosing a location

Put your machine on a flat, stable surface that is free of vibration and shocks, such as a desk. Put the machine near a telephone socket and a standard, grounded electrical socket. Choose a location where the temperature remains between 10 °C and 35 °C.

**WARNING**

DO NOT put the machine near heaters, air conditioners, refrigerators, medical equipment, chemicals or water.

DO NOT connect your machine to electrical sockets on the same circuit as large appliances or other equipment that might disrupt the power supply.

**CAUTION**

- Avoid placing your machine in a high-traffic area.
- Avoid placing your machine on a carpet.
- DO NOT expose the machine to direct sunlight, excessive heat, moisture, or dust.
- DO NOT connect your machine to electrical sockets controlled by wall switches or automatic timers.
- Disruption of power can wipe out information in the machine’s memory.
- Avoid interference sources, such as other cordless telephone systems or speakers.
- DO NOT tip the machine, or place it on any tilted surface. Doing this may cause ink spillage and internal damage to your machine.
To use the machine safely

Please keep these instructions for later reference and read them before attempting any maintenance.

**WARNING**

There are high voltage electrodes inside the machine. Before you clean the inside of the machine, make sure you have unplugged the telephone line cord first and then the power cord from the electrical socket. Doing this will prevent an electrical shock.

---

**WARNING**

DO NOT handle the plug with wet hands. Doing this might cause an electrical shock.

---

**WARNING**

DO NOT pull on the middle of the AC power cord. Doing this might cause an electrical shock.

---

**WARNING**

DO NOT use flammable substances, any type of spray, liquid or aerosol cleaners to clean the inside or outside of the machine. Doing this may cause a fire or electrical shock.

---

**WARNING**

Unplug this product from the wall socket before cleaning the inside of the machine.
If the machine becomes hot, releases smoke, or generates any strong smells, immediately unplug the machine from the electrical socket. Call your Brother dealer or Brother Customer Service.

If metal objects, water or other liquids get inside the machine, immediately unplug the machine from the electrical socket. Call your Brother dealer or Brother Customer Service.

Use caution when installing or modifying telephone lines. Never touch telephone wires or terminals that are not insulated unless the telephone line has been unplugged at the wall socket. Never install telephone wiring during a lightning storm. Never install a telephone wall socket in a wet location.

This product must be installed near an electrical socket that is easily accessible. In case of an emergency, you must unplug the power cord from the electrical socket to shut off the power completely.

This product should be connected to an AC power source within the range indicated on the rating label. DO NOT connect it to a DC power source or inverter. If you are not sure, contact a qualified electrician.

Always make sure the plug is fully inserted.

DO NOT use the machine if the power cord is frayed or damaged, doing so may cause a fire.
When using your telephone equipment, basic safety precautions should always be followed to reduce the risk of fire, electric shock and injury to people, including the following:

1. DO NOT use this product near water, for example, near a bath tub, wash bowl, kitchen sink or washing machine, in a wet basement or near a swimming pool.

2. Avoid using this product during an electrical storm. There may be a remote risk of electric shock from lightning.

3. DO NOT use this product to report a gas leak in the vicinity of the leak.
**CAUTION**

⚠️

DO NOT put your hands on the edge of the machine under the document cover or the scanner cover. Doing this may cause injury.

⚠️

DO NOT put your hands on the edge of the paper tray under the paper tray cover. Doing this may cause injury.
DO NOT touch the area shaded in the illustration. Doing this may cause injury.

When moving the machine you must lift it from the base, by placing a hand at each side of the unit as shown in the illustration. DO NOT carry the machine by holding the scanner cover or the Jam Clear Cover.
Important safety instructions

1. Read all of these instructions.
2. Save them for later reference.
3. Follow all warnings and instructions marked on the product.
4. DO NOT use this product near water.
5. DO NOT place this product on an unstable cart, stand, or table. The product may fall, causing serious damage to the product.
6. Slots and openings in the cabinet and the back or bottom are provided for ventilation. To ensure reliable operation of the product and to protect it from overheating, these openings must not be blocked or covered. The openings should never be blocked by placing the product on a bed, sofa, rug, or other similar surface. This product should never be placed near or over a radiator or heater. This product should never be placed in a built-in installation unless adequate ventilation is provided.
7. Use only the power cord supplied with this machine.
8. This product is equipped with a 3-wire grounded plug, a plug having a third (grounded) pin. This plug will only fit into a grounded power outlet. This is a safety feature. If you are unable to insert the plug into the outlet, call your electrician to replace your obsolete outlet. DO NOT defeat the purpose of the grounded plug.
9. DO NOT allow anything to rest on the power cord. DO NOT place this product where people can walk on the cord.
10. DO NOT place anything in front of the machine that will block received faxes. DO NOT place anything in the path of received faxes.
11. Wait until pages have exited the machine before picking them up.
12. Unplug this product from the power socket and refer all servicing to Brother Authorized Service Personnel under the following conditions:
   - If liquid has been spilled into the product.
   - If the product has been exposed to rain or water.
   - If the product does not operate normally when the operating instructions are followed, adjust only those controls that are covered by the operating instructions. Incorrect adjustment of other controls may result in damage and will often require extensive work by a qualified technician to restore the product to normal operation.
   - If the product has been dropped or the casing has been damaged.
   - If the product exhibits a distinct change in performance, indicating a need for service.
13. To protect your product against power surges, we recommend the use of a power protection device (Surge Protector).
14. DO NOT use the machine during an electrical storm (there is the remote possibility of an electrical shock) or to report a gas leak in the vicinity of the leak.
IMPORTANT - For your safety

To ensure safe operation, the supplied three-pin plug must be inserted only into a standard three-pin electrical socket that is effectively grounded through the normal household wiring. The fact that the equipment operates satisfactorily does not imply that the power is grounded and that the installation is completely safe. For your safety, if in any doubt about the effective grounding of the power, consult a qualified electrician.

Wiring information (U.K. only)
Important
If you need to replace the plug fuse, fit a fuse that is approved by ASTA to BS1362 with the same rating as the original fuse.
Always replace the fuse cover. Never use a plug that does not have a cover.

Warning - This machine must be earthed.
The wires in the mains lead are coloured in line with the following code:
- Green and Yellow: Earth
- Blue: Neutral
- Brown: Live
If in any doubt, call a qualified electrician.

LAN connection (MFC-295CN only)

⚠️ CAUTION
DO NOT connect this product to a LAN connection that is subject to over-voltages.

Radio interference
This product complies with EN55022 (CISPR Publication 22) /Class B. When connecting the machine to a computer, ensure that you use a USB cable which does not exceed 2 meters in length.
EU Directive 2002/96/EC and EN50419

This equipment is marked with the above recycling symbol. It means that at the end of the life of the equipment you must dispose of it separately at an appropriate collection point and not place it in the normal domestic unsorted waste stream. This will benefit the environment for all. (European Union only)

International ENERGY STAR® Qualification Statement

The purpose of the International ENERGY STAR® Program is to promote the development and popularization of energy-efficient office equipment.

As an ENERGY STAR® Partner, Brother Industries, Ltd. has determined that this product meets the ENERGY STAR® specifications for energy efficiency.
Legal limitations for copying

It is an offence to make reproductions of certain items or documents with the intent to commit fraud. This memorandum is intended to be a guide rather than a complete list. We suggest you check with relevant legal authorities if in doubt about a particular item or document.

The following are examples of documents which should not be copied:

- Money
- Bonds or other certificates of indebtedness
- Certificates of Deposit
- Armed Forces Service or Draft papers
- Passports
- Postage Stamps (cancelled or uncancelled)
- Immigration Papers
- Welfare documents
- Cheques or Drafts drawn by Governmental Agencies
- Identification Documents, badges or insignias

Copyrighted works cannot be copied. Sections of a copyrighted work can be copied for ‘fair dealing’. Multiple copies would indicate improper use.

Works of art should be considered the equivalent of copyrighted works.

Licenses and Certificates of Title to motor vehicles may not be copied under certain state/provincial laws.

# Troubleshooting and Routine Maintenance

## Troubleshooting

If you think there is a problem with your machine, check the chart below and follow the troubleshooting tips.

Most problems can be easily resolved by yourself. If you need additional help, the Brother Solutions Center offers the latest FAQs and troubleshooting tips. Visit us at http://solutions.brother.com.

### If you are having difficulty with your machine

### Printing

<table>
<thead>
<tr>
<th>Difficulty</th>
<th>Suggestions</th>
</tr>
</thead>
<tbody>
<tr>
<td>No printout.</td>
<td>Check the interface cable or wireless connection on both the machine and your computer. (See the Quick Setup Guide.)</td>
</tr>
<tr>
<td></td>
<td>Check that the machine is plugged in and that the On/Off key is on.</td>
</tr>
<tr>
<td></td>
<td>Check to see if the LCD is showing an error message. (See Error and maintenance messages on page 97.)</td>
</tr>
<tr>
<td></td>
<td>One or more ink cartridges have reached the end of their life. (See Replacing the ink cartridges on page 106.)</td>
</tr>
<tr>
<td></td>
<td>If the LCD shows Cannot Print and Replace XX Ink (where XX is an abbreviation of the colour), see Replacing the ink cartridges on page 106.</td>
</tr>
<tr>
<td></td>
<td>Check that the correct printer driver has been installed and chosen.</td>
</tr>
<tr>
<td></td>
<td>Make sure the machine is online. Click Start and then Printers and Faxes. Right-click and choose Brother MFC-XXXX (where XXXX is your model name), and make sure that Use Printer Offline is unchecked.</td>
</tr>
<tr>
<td></td>
<td>When you choose the Print Odd Pages and Print Even Pages settings, you may see a print error message on your computer, as the machine pauses during the process. The error message will disappear after the machine re-starts printing.</td>
</tr>
<tr>
<td>Poor print quality.</td>
<td>Check the print quality. (See Checking the print quality on page 111.)</td>
</tr>
<tr>
<td></td>
<td>Make sure that the Printer Driver or Paper Type setting in the menu matches the type of paper you are using. (See Printing for Windows® or Printing and Faxing for Macintosh in the Software User's Guide on the CD-ROM and Paper Type on page 22.)</td>
</tr>
<tr>
<td></td>
<td>Make sure that your ink cartridges are fresh. The following may cause ink to clog:</td>
</tr>
<tr>
<td></td>
<td>- The expiration date written on the cartridge package has passed. (Brother Original cartridges stay usable for up to two years if kept in their original packaging.)</td>
</tr>
<tr>
<td></td>
<td>- The ink cartridge has been in your machine for over six months.</td>
</tr>
<tr>
<td></td>
<td>- The ink cartridge may not have been stored correctly before use.</td>
</tr>
<tr>
<td></td>
<td>Make sure you are using Brother Original Innobella™ ink.</td>
</tr>
<tr>
<td></td>
<td>Try using the recommended types of paper. (See Acceptable paper and other print media on page 14.)</td>
</tr>
<tr>
<td></td>
<td>The recommended environment for your machine is between 20 °C to 33 °C.</td>
</tr>
</tbody>
</table>

---

**Note:** The Quick Setup Guide and Error and maintenance messages are on page 97. Replacing the ink cartridges are on page 106.
## Printing (continued)

<table>
<thead>
<tr>
<th>Difficulty</th>
<th>Suggestions</th>
</tr>
</thead>
<tbody>
<tr>
<td>White horizontal lines appear in text or graphics.</td>
<td>Clean the print head. (See <em>Cleaning the print head</em> on page 110.)</td>
</tr>
<tr>
<td></td>
<td>Make sure you are using Brother Original Innobella™ ink.</td>
</tr>
<tr>
<td></td>
<td>Try using the recommended types of paper. (See <em>Acceptable paper and other print media</em> on page 14.)</td>
</tr>
<tr>
<td>The machine prints blank pages.</td>
<td>Clean the print head. (See <em>Cleaning the print head</em> on page 110.)</td>
</tr>
<tr>
<td></td>
<td>Make sure you are using Brother Original Innobella™ ink.</td>
</tr>
<tr>
<td>Characters and lines are stacked.</td>
<td>Check the printing alignment. (See <em>Checking the print alignment</em> on page 112.)</td>
</tr>
<tr>
<td>Printed text or images are skewed.</td>
<td>Make sure the paper is loaded correctly in the paper tray and the paper side guides are adjusted correctly. (See <em>Loading paper and other print media</em> on page 8.)</td>
</tr>
<tr>
<td></td>
<td>Make sure the Jam Clear Cover is closed properly.</td>
</tr>
<tr>
<td>Smudged stain at the top center of the printed page.</td>
<td>Make sure the paper is not too thick or curled. (See <em>Acceptable paper and other print media</em> on page 14.)</td>
</tr>
<tr>
<td>Smudged stain at the right or left corner of the printed page.</td>
<td>Make sure the paper is not curled when you print on the back side of the paper with the Print Odd Pages and Print Even Pages settings.</td>
</tr>
<tr>
<td>Printing appears dirty or ink seems to run.</td>
<td>Make sure you are using the recommended types of paper. (See <em>Acceptable paper and other print media</em> on page 14.) Don't handle the paper until the ink is dry.</td>
</tr>
<tr>
<td></td>
<td>Make sure you are using Brother Original Innobella™ ink.</td>
</tr>
<tr>
<td></td>
<td>If you are using photo paper, make sure that you have set the correct paper type. If you are printing a photo from your PC, set the Media Type in the Basic tab of the printer driver.</td>
</tr>
<tr>
<td>Stains appear on the reverse side or at the bottom of the page.</td>
<td>Make sure the printer platen is not dirty with ink. (See <em>Cleaning the machine’s printer platen</em> on page 109.)</td>
</tr>
<tr>
<td></td>
<td>Make sure you are using Brother Original Innobella™ ink.</td>
</tr>
<tr>
<td></td>
<td>Make sure you are using the paper support flap. (See <em>Loading paper and other print media</em> on page 8.)</td>
</tr>
<tr>
<td>The machine prints dense lines on the page.</td>
<td>Check Reverse Order in the Basic tab of the printer driver.</td>
</tr>
<tr>
<td>The printouts are wrinkled.</td>
<td>In the printer driver Advanced tab, click Colour Settings, and uncheck Bi-Directional Printing for Windows® or Bi-Directional Printing for Macintosh. Make sure you are using Brother Original Innobella™ ink.</td>
</tr>
<tr>
<td>Cannot perform ‘Page Layout’ printing.</td>
<td>Check that the paper size setting in the application and in the printer driver are the same.</td>
</tr>
<tr>
<td>Print speed is too slow.</td>
<td>Try changing the printer driver setting. The highest resolution needs longer data processing, sending and printing time. Try the other quality settings in the printer driver Basic tab. Also, click the Colour Settings, and make sure you uncheck Colour Enhancement. Turn the borderless feature off. Borderless printing is slower than normal printing. (See <em>Printing for Windows®</em> or <em>Printing and Faxing</em> for Macintosh in the Software User's Guide on the CD-ROM.)</td>
</tr>
<tr>
<td>Photo paper does not feed properly.</td>
<td>When you print on Brother Photo paper, load one extra sheet of the same photo paper in the paper tray. An extra sheet has been included in the paper package for this purpose. Clean the paper pick-up roller. (See <em>Cleaning the paper pick-up rollers</em> on page 110.)</td>
</tr>
</tbody>
</table>
## Troubleshooting and Routine Maintenance

### Printing (continued)

</tbody>
</table>

### Telephone Line or Connections

<table>
<thead>
<tr>
<th>Difficulty</th>
<th>Suggestions</th>
</tr>
</thead>
<tbody>
<tr>
<td>Dialling does not work. (No dial tone)</td>
<td>Check that the machine is plugged in and switched on.</td>
</tr>
<tr>
<td></td>
<td>Check the line cord connection.</td>
</tr>
<tr>
<td></td>
<td>Change the Tone/Pulse setting. (See <code>Quick Setup Guide</code>.)</td>
</tr>
<tr>
<td>The machine does not answer when called.</td>
<td>Make sure the machine is in the correct receiving mode for your setup. (See <code>Receive modes on page 34</code>.) Check for a dial tone. If possible, call your machine to hear it answer. If there is still no answer, check the telephone line cord connection. If there is no ringing when you call your machine, ask your telephone company to check the line.</td>
</tr>
</tbody>
</table>
# Receiving Faxes

<table>
<thead>
<tr>
<th>Difficulty</th>
<th>Suggestions</th>
</tr>
</thead>
<tbody>
<tr>
<td>Cannot receive a fax</td>
<td>Check the line cord connection. Make sure the machine is in the correct receiving mode for your setup. (See Receive modes on page 34.)</td>
</tr>
<tr>
<td></td>
<td>If you often have interference on the telephone line, try changing the menu setting of Compatibility to Basic (for VoIP). (See Telephone line interference on page 96.)</td>
</tr>
<tr>
<td></td>
<td>If you connect your machine to PBX or ISDN, set the menu setting of Telephone Line Type to your telephone type. (See Setting the Telephone Line Type on page 38.)</td>
</tr>
</tbody>
</table>

# Sending Faxes

<table>
<thead>
<tr>
<th>Difficulty</th>
<th>Suggestions</th>
</tr>
</thead>
<tbody>
<tr>
<td>Cannot send a fax</td>
<td>Check the line cord connection. Make sure that the Fax key is illuminated. (See Entering Fax mode on page 28.)</td>
</tr>
<tr>
<td></td>
<td>Ask the other party to check that the receiving machine has paper. Print the Transmission Verification Report and check for an error. (See Reports on page 49.)</td>
</tr>
<tr>
<td>Transmission Verification Report says 'RESULT:ERROR'</td>
<td>There is probably temporary noise or static on the line. Try sending the fax again. If you send a PC FAX message and get 'RESULT:ERROR' on the Transmission Verification Report, your machine may be out of memory. If the problem continues, ask the telephone company to check your telephone line.</td>
</tr>
<tr>
<td></td>
<td>If you often get transmission errors due to possible interference on the telephone line, try changing the menu setting of Compatibility to Basic (for VoIP). (See Telephone line interference on page 96.)</td>
</tr>
<tr>
<td></td>
<td>If you connect your machine to PBX or ISDN, set the menu setting of Telephone Line Type to your telephone type. (See Telephone line interference on page 96.)</td>
</tr>
<tr>
<td>Poor fax send quality</td>
<td>Try changing your resolution to Fine or S.Fine. Make a copy to check your machine's scanner operation. If the copy quality is not good, clean the scanner. (See Cleaning the scanner glass on page 109.)</td>
</tr>
<tr>
<td>Sent faxes are blank</td>
<td>Make sure you are loading the document properly. (See Loading documents on page 18.)</td>
</tr>
<tr>
<td>Vertical black lines when sending</td>
<td>If the copy you made shows the same problem, clean the scanner. (See Cleaning the scanner glass on page 109.)</td>
</tr>
</tbody>
</table>

(MFC-295CN only)
### Handling Incoming Calls

<table>
<thead>
<tr>
<th>Difficulty</th>
<th>Suggestions</th>
</tr>
</thead>
<tbody>
<tr>
<td>The machine ‘Hears’ a voice as a CNG Tone.</td>
<td>If Fax Detect is set to On, your machine is more sensitive to sounds. It may mistakenly interpret certain voices or music on the line as a fax machine calling and respond with fax receiving tones. Deactivate the machine by pressing Stop/Exit. Try avoiding this problem by turning Fax Detect to Off. (See Fax Detect on page 37.)</td>
</tr>
<tr>
<td>Sending a fax call to the machine.</td>
<td>If you answered at the machine, press Mono Start and hang up at once. If you answered on an external or extension telephone, press your Remote Activation Code (default setting is * 5 1). When your machine answers, hang up.</td>
</tr>
<tr>
<td>Custom features on a single line.</td>
<td>If you have Call Waiting, Call Waiting/Caller ID, an alarm system or any other custom feature on a single telephone line with your machine, it may create a problem sending or receiving faxes. <strong>For example:</strong> If you subscribe to Call Waiting or some other custom service and its signal comes through the line while your machine is sending or receiving a fax, the signal can temporarily interrupt or disrupt the faxes. Brother’s ECM (Error Correction Mode) feature should help overcome this problem. This condition is related to the telephone system industry and is common to all devices that send and receive information on a single, shared line with custom features. If avoiding a slight interruption is crucial to your business, a separate telephone line with no custom features is recommended.</td>
</tr>
</tbody>
</table>

### Menu Setting Difficulties

<table>
<thead>
<tr>
<th>Difficulty</th>
<th>Suggestions</th>
</tr>
</thead>
<tbody>
<tr>
<td>The machine beeps when you try to access the Setup Send or Setup Receive menu.</td>
<td>If the Fax key is not illuminated, press it to turn on Fax mode. The Setup Send or Setup Receive setting is available only when the machine is in Fax mode.</td>
</tr>
</tbody>
</table>

### Copying Difficulties

<table>
<thead>
<tr>
<th>Difficulty</th>
<th>Suggestions</th>
</tr>
</thead>
<tbody>
<tr>
<td>Cannot make a copy</td>
<td>Make sure that the Copy key is illuminated. (See Entering Copy mode on page 52.)</td>
</tr>
<tr>
<td>Copies are blank.</td>
<td>Make sure you are loading the document properly. (See Loading documents on page 18.)</td>
</tr>
<tr>
<td>Vertical streaks appear in copies.</td>
<td>If you see vertical streaks on copies, clean the scanner. (See Cleaning the scanner glass on page 109.)</td>
</tr>
<tr>
<td>Poor copy results when using the ADF.</td>
<td>Try using the scanner glass. (See Using the scanner glass on page 19.)</td>
</tr>
<tr>
<td>Vertical black line appears in copies.</td>
<td>Vertical black lines or streaks on copies are typically caused by dirt or correction fluid on the glass strip. Clean the glass strip. (See Cleaning the scanner glass on page 109.)</td>
</tr>
<tr>
<td>Fit to Page does not work properly.</td>
<td>Make sure your source document is not skewed.</td>
</tr>
</tbody>
</table>
### Scanning Difficulties

<table>
<thead>
<tr>
<th>Difficulty</th>
<th>Suggestions</th>
</tr>
</thead>
<tbody>
<tr>
<td>TWAIN/WIA errors appear when starting to scan.</td>
<td>Make sure the Brother TWAIN/WIA driver is chosen as the primary source. In PaperPort™ 11SE with OCR, click <strong>File, Scan or Get Photo</strong> and click <strong>Select</strong> to choose the Brother TWAIN/WIA driver.</td>
</tr>
<tr>
<td>OCR does not work.</td>
<td>Try increasing the scanner resolution.</td>
</tr>
<tr>
<td>Poor scanning results when using the ADF. (MFC-295CN only)</td>
<td>Try using the scanner glass. (See <em>Using the scanner glass</em> on page 19.)</td>
</tr>
</tbody>
</table>

### Software Difficulties

<table>
<thead>
<tr>
<th>Difficulty</th>
<th>Suggestions</th>
</tr>
</thead>
<tbody>
<tr>
<td>Cannot install software or print.</td>
<td>Run the <strong>Repair MFL-Pro Suite</strong> program on the CD-ROM. This program will repair and reinstall the software.</td>
</tr>
<tr>
<td>‘Device Busy’</td>
<td>Make sure the machine is not showing an error message on the LCD.</td>
</tr>
</tbody>
</table>
| Cannot print images from FaceFilter Studio. | To use FaceFilter Studio, you must install the FaceFilter Studio application from the CD-ROM supplied with your machine. To install FaceFilter Studio see the *Quick Setup Guide*.  
Also, before you start FaceFilter Studio for the first time, you must make sure your Brother machine is turned on and connected to your computer. This will allow you to access all the functions of FaceFilter Studio. |

### PhotoCapture Center™ Difficulties

<table>
<thead>
<tr>
<th>Difficulty</th>
<th>Suggestions</th>
</tr>
</thead>
</table>
| Removable Disk does not work correctly. | 1) Have you installed the Windows® 2000 update? If not, do the following:  
   1) Unplug the USB cable.  
   2) Install the Windows® 2000 update using one of the following methods.  
      - Install MFL-Pro Suite from the CD-ROM. (See the *Quick Setup Guide*.).  
      - Download the latest service pack from the Microsoft Website.  
   3) Wait about 1 minute after you restart the PC, and then connect the USB cable.  
2) Take out the memory card or USB Flash memory drive and put it back in again.  
3) If you have tried ‘Eject’ from within Windows®, take out the memory card or USB Flash memory drive before you continue.  
4) If an error message appears when you try to eject the memory card or USB Flash memory drive, it means the card is being accessed. Wait a while and then try again.  
5) If all of the above do not work, turn off your PC and machine, and then turn them on again. (You will have to unplug the power cord of the machine to turn it off.) |
| Cannot access Removable Disk from Desktop icon. | Make sure that you have correctly inserted the memory card or USB Flash memory drive. |
| Part of my photo is missing when printed. | Make sure that Borderless printing and Cropping are turned off. (See *Borderless printing* on page 67 and *Cropping* on page 67.) |
## Network Difficulties

<table>
<thead>
<tr>
<th>Difficulty</th>
<th>Suggestions</th>
</tr>
</thead>
<tbody>
<tr>
<td>Cannot print over the network.</td>
<td>Make sure that your machine is powered on and is online and in Ready mode. Print a Network Configuration list (see Reports on page 49) and check the current Network settings printed in this list. (MFC-295CN only) Reconnect the LAN cable to the hub to verify that the cabling and network connections are good. If possible, try connecting the machine to a different port on your hub using a different cable. If the connections are good, the machine shows LAN Active for 2 seconds. (If you are having Network problems, see Network User’s Guide on the CD-ROM for more information.)</td>
</tr>
</tbody>
</table>
| The network scanning feature does not work. | **<Windows® users>**
Firewall settings on your PC may be rejecting the necessary network connection. Follow the instructions below to configure the Firewall. If you are using personal Firewall software, see the User’s Guide for your software or contact the software manufacturer.

For Windows® XP SP2 and Windows Vista® users, see Firewall settings in the Software User’s Guide on the CD-ROM.

For Windows® XP SP1 users, please visit the Brother Solutions Center. (http://solutions.brother.com)

**<Macintosh users>**
Re-select your machine in the Device Selector application located in Macintosh HD/Library/Printers/Brother/Utilities/DeviceSelector or from the model list in ControlCenter2. |
| Your computer cannot find your machine. | **<Windows® users>**
Firewall settings on your PC may be rejecting the necessary network connection. For detail, see the instruction above.

**<Macintosh users>**
Re-select your machine in the Device Selector application located in Macintosh HD/Library/Printers/Brother/Utilities/DeviceSelector or from the model list in ControlCenter2. |
**Dial Tone detection**

When you send a fax automatically, by default your machine will wait for a fixed amount of time before it starts to dial the number. By changing the Dial Tone setting to Detection you can make your machine dial as soon as it detects a dial tone. This setting can save a small amount of time when sending a fax to many different numbers. If you change the setting and start having problems with dialling you should change back to the default No Detection setting.

1. Press Menu, 0, 5.
2. Press ▲ or ▼ to choose Detection or No Detection. Press OK.
3. Press Stop/Exit.

**Telephone line interference**

If you are having problems sending or receiving a fax due to possible interference on the telephone line, we recommend that you adjust the Equalization for compatibility to reduce the modem speed for fax operations.

1. Press Menu, 0, 7.
2. Press ▲ or ▼ to choose Normal (or Basic(for VoIP)).
   - Basic(for VoIP) cuts the modem speed to 9,600 bps. Unless interference is a recurring problem on your telephone line, you may prefer to use it only when needed.
   - Normal sets the modem speed at 14,400 bps. (Default)
   Press OK.
3. Press Stop/Exit.

**Note**

When you change the compatibility to Basic(for VoIP), the ECM feature is only available for colour fax sending.
Error and maintenance messages

As with any sophisticated office product, errors may occur and consumable items may need to be replaced. If this happens, your machine identifies the error and shows an error message. The most common error and maintenance messages are shown below.

You can correct most errors and routine maintenance messages by yourself. If you need more help, the Brother Solutions Center offers the latest FAQs and troubleshooting tips. Visit us at http://solutions.brother.com.

</table>
| B&W Print Only      | One or more of the colour ink cartridges have reached the end of their life. You can use the machine in monochrome mode for approximately four weeks depending on the number of pages you print. While this message appears on the LCD, each operation works in the following way:  
  ■ Printing  
  If you click Greyscale in the Advanced tab of the printer driver you can use the machine as a monochrome printer.  
  ■ Copying  
  If the paper type is set to Plain Paper or Inkjet Paper, you can make copies in monochrome.  
  ■ Faxing  
  If the paper type is set to Plain Paper or Inkjet Paper, the machine will receive and print faxes in monochrome.  
  If a sending machine has a colour fax, the machine’s ‘handshake’ will ask that the fax be sent as monochrome.  
  If the paper type is set to Other Glossy or Brother BP71, the machine will stop all print operations. If you unplug the machine, or take out the ink cartridge, you cannot use the machine until you change to a new ink cartridge. | Replace the ink cartridges. (See Replacing the ink cartridges on page 106.) |

Transferring your faxes or Fax Journal report

If the LCD shows:
Clean Unable XX
Init Unable XX
Print Unable XX
Scan Unable XX
We recommend transferring your faxes to another fax machine. (See Transferring faxes to another fax machine on page 102.)

You can also transfer the Fax Journal report to see if there are any faxes you need to transfer. (See Transferring the Fax Journal report to another fax machine on page 102.)

Transferring faxes to another fax machine

If you have not set up your Station ID, you cannot enter fax transfer mode. (See Enter personal information (Station ID) in the Quick Setup Guide.)

1 Press Menu, 9, 0, 1.

2 Do one of the following:
   - If the LCD shows No Data, there are no faxes left in the machine’s memory. Press Stop/Exit.
   - If the LCD shows Enter Fax No., enter the fax number to which faxes will be forwarded.

3 Press Mono Start.

Transferring the Fax Journal report to another fax machine

If you have not set up your Station ID, you cannot enter fax transfer mode. (See Enter personal information (Station ID) in the Quick Setup Guide.)

1 Press Menu, 9, 0, 2.

2 Enter the fax number to which the Fax Journal report will be forwarded.

3 Press Mono Start.

Document jam (MFC-295CN only)

Documents can jam in the ADF unit if they are not inserted or fed properly, or if they are too long. Follow the steps below to clear a document jam.

Document is jammed in the top of the ADF unit

1 Take out any paper from the ADF that is not jammed.

2 Open the ADF cover.

3 Pull the jammed document up and to the left.

4 Close the ADF cover.

5 Press Stop/Exit.
IMPORTANT
To avoid future document jams close the ADF cover correctly by pushing it down gently in the middle.

Document is jammed inside the ADF unit

1. Take out any paper from the ADF that is not jammed.
2. Lift the document cover.
3. Pull the jammed document out to the left.
4. Close the document cover.
5. Press Stop/Exit.

Printer jam or paper jam

Take out the jammed paper depending on where it is jammed in the machine.

1. If the paper support flap is open, close it, and then close the paper support. Pull the paper tray completely out of the machine.

![Printer with paper tray pulled out]

2. Pull out the jammed paper (1) and press Stop/Exit.

![Printer with jammed paper]

3. Clear the error message by lifting the scanner cover from the front of the machine and then close it.

- If the error message is still displayed, or if you cannot remove the jammed paper from the front of the machine, please go to the next step.
4 Open the Jam Clear Cover (1) at the back of the machine. Pull the jammed paper out of the machine.

5 Close the Jam Clear Cover. Make sure the cover is closed properly.

6 Using both hands, use the plastic tabs on both sides of the machine to lift the scanner cover (1) until it locks securely in the open position. Make sure that there is no jammed paper left inside the machine. Check both ends of the print carriage.

![Diagram 1]

![Diagram 2]

**IMPORTANT**

Before you unplug the machine from the power source, you can transfer your faxes that are stored in the memory to your PC or another fax machine so you will not lose any important messages. (See *Transferring your faxes* or *Fax Journal report* on page 102.)
IMPORTANT

• If the paper is jammed under the print head, unplug the machine from the power source, and then move the print head to take out the paper.

• If the print head is at the right corner as shown in the illustration, you cannot move the print head. Hold down Stop/Exit until the print head moves to the middle. Then unplug the machine from the power source, and take out the paper.

• If ink gets on your skin or clothing immediately wash it off with soap or detergent.

Lift the scanner cover to release the lock (1). Gently push the scanner cover support down (2) and close the scanner cover (3) using both hands.

Push the paper tray firmly back into the machine. While holding the paper tray in place, pull out the paper support until it clicks and unfold the paper support flap.

IMPORTANT

Make sure you pull out the paper support until it clicks.
Routine maintenance

Replacing the ink cartridges

Your machine is equipped with an ink dot counter. The ink dot counter automatically monitors the level of ink in each of the 4 cartridges. When the machine detects an ink cartridge is running out of ink, the machine will tell you with a message on the LCD.

The LCD will tell you which ink cartridge is low or needs replacing. Be sure to follow the LCD prompts to replace the ink cartridges in the correct order.

Even though the machine tells you to replace an ink cartridge, there will be a small amount of ink left in the ink cartridge. It is necessary to keep some ink in the ink cartridge to prevent air from drying out and damaging the print head assembly.

1. Open the ink cartridge cover.
   If one or more ink cartridges have reached the end of their life, the LCD shows Cannot Print or B&W Print Only.

2. Press the lock release lever as shown to release the ink cartridge indicated on the LCD. Remove the cartridge from the machine.

3. Open the new ink cartridge bag for the colour shown on the LCD, and then take out the ink cartridge.

---

**IMPORTANT**

Brother multifunction machines are designed to work with ink of a particular specification and will work to a level of optimum performance and reliability when used with genuine Brother Original ink cartridges. Brother cannot guarantee this optimum performance and reliability if ink or ink cartridges of other specifications are used. Brother does not therefore recommend the use of cartridges other than genuine Brother Original cartridges or the refilling of used cartridges with ink from other sources. If damage is caused to the print head or other parts of this machine as a result of using other brands of ink or ink cartridges, any repairs required as a result may not be covered by the warranty.
4  Turn the green knob on the protective yellow cap clockwise until it clicks to release the vacuum seal, then remove the cap (1).

5  Each colour has its own correct position. Insert the ink cartridge in the direction of the arrow on the label.

6  Gently push the ink cartridge until it clicks, and then close the ink cartridge cover.

7  The machine will automatically reset the ink dot counter.

**Note**

- If you replaced an ink cartridge, for example Black, the LCD may ask you to verify that it was a brand new one (Did You Change Blck?). For each new cartridge you installed, press 1 (Yes) to automatically reset the ink dot counter for that colour. If the ink cartridge you installed is not a brand new one, be sure to press 2 (No).

- If the LCD shows No Cartridge or Cannot Detect after you install the ink cartridges, check that the ink cartridges are installed correctly.

---

**CAUTION**

If ink gets in your eyes, wash them out with water at once and call a doctor if you are concerned.
**IMPORTANT**

- **DO NOT** take out ink cartridges if you do not need to replace them. If you do so, it may reduce the ink quantity and the machine will not know the quantity of ink left in the cartridge.

- **DO NOT** touch the cartridge insertion slots. If you do so, the ink may stain your skin.

- If ink gets on your skin or clothing, immediately wash it off with soap or detergent.

- If you mix the colours by installing an ink cartridge in the wrong position, clean the print head several times after correcting the cartridge installation.

- Once you open an ink cartridge, install it in the machine and use it up within six months of installation. Use unopened ink cartridges by the expiration date written on the cartridge package.

- **DO NOT** dismantle or tamper with the ink cartridge, this can cause the ink to leak out of the cartridge.

---

**Cleaning the outside of the machine**

---

**IMPORTANT**

- Use neutral detergents. Cleaning with volatile liquids such as thinner or benzine will damage the outside surface of the machine.

- **DO NOT** use cleaning materials that contain ammonia.

- **DO NOT** use isopropyl alcohol to remove dirt from the control panel. It may crack the panel.

---

Clean the outside of the machine as follows:

1. Pull the paper tray (1) completely out of the machine.

2. Wipe the outside of the machine with a dry, lint-free soft cloth to remove dust.

3. Lift the paper tray cover and remove anything that is stuck inside the paper tray.

4. Wipe the inside and outside of the paper tray with a dry, lint-free soft cloth to remove dust.

5. Close the output paper tray and put the paper tray firmly back in the machine.
Cleaning the scanner glass

1. Lift the document cover (1). Clean the scanner glass (2) and the white plastic (3) with a soft lint-free cloth moistened with a non-flammable glass cleaner.

2. **(MFC-295CN only)**
   In the ADF unit, clean the white bar (1) and the glass strip (2) with a soft, lint-free cloth moistened with a non-flammable glass cleaner.

**Note**
In addition to cleaning the scanner glass and glass strip with a non-flammable glass cleaner, run your finger tip over the scanner glass and glass strip to see if you can feel anything on it. If you feel dirt or debris, clean the scanner glass and glass strip again concentrating on that area. You may need to repeat the cleaning process three or four times. To test, make a copy after each cleaning attempt.

Cleaning the machine’s printer platen

**CAUTION**
Be sure to unplug the machine from the electrical socket before cleaning the printer platen to avoid electrical shock.

1. Lift the scanner cover until it locks securely in the open position.

2. Clean the machine’s printer platen (1) and the area around it, wiping off any scattered ink with a soft, dry lint-free cloth.
Cleaning the paper pick-up rollers

1 Pull the paper tray completely out of the machine.

2 Unplug the machine from the electrical socket and open the Jam Clear Cover (1) at the back of the machine.

3 Clean the Paper Pick-up Rollers (1) with isopropyl alcohol on a cotton swab.

4 Close the Jam Clear Cover. Make sure the cover is closed correctly.

5 Put the paper tray firmly back in the machine.

6 Re-connect the power cord.

Cleaning the print head

To maintain good print quality, the machine will automatically clean the print head. You can start the cleaning process manually if there is a print quality problem.

Clean the print head and ink cartridges if you get a horizontal line in the text or graphics, or blank text on your printed pages. You can clean Black only, three colours at a time (Yellow/Cyan/Magenta), or all four colours at once.

Cleaning the print head consumes ink. Cleaning too often uses ink unnecessarily.

**IMPORTANT**

DO NOT touch the print head. Touching the print head may cause permanent damage and may void the print head's warranty.

1 Press **Menu**, 8, 2.

2 Press ▲ or ▼ to choose **Black, Color or All**.
   Press **OK**.
   The machine cleans the print head. When cleaning is finished, the machine will go back to standby mode automatically.

**Note**

If you clean the print head at least five times and the print has not improved, try installing a new genuine Brother Branded replacement cartridge for each problem colour. Try cleaning the print head again up to five more times. If the print has not improved call your Brother dealer.
Checking the print quality

If faded or streaked colours and text appear on your output, some of the nozzles may be clogged. You can check this by printing the Print Quality Check Sheet and looking at the nozzle check pattern.

1. Press Menu, 8, 1.
2. Press ▲ or ▼ to choose Print Quality. Press OK.
3. Press Colour Start. The machine begins printing the Print Quality Check Sheet.
4. Check the quality of the four colour blocks on the sheet.
   Is Quality OK?
   1. Yes 2. No
5. Do one of the following:
   - If all lines are clear and visible, press 1 to choose Yes, and go to step 9.
   - If you can see missing short lines as shown below, press 2 to choose No.

   OK          Poor
   
6. The LCD asks you if the print quality is OK for black and three colours.
   Black OK?
   1. Yes 2. No
   Press 1 (Yes) or 2 (No).

7. The LCD asks you if you want to start cleaning.
   Start Cleaning?
   1. Yes 2. No
   Press 1 (Yes). The machine starts cleaning the print head.
8. After cleaning is finished, press Colour Start. The machine starts printing the Print Quality Check Sheet again and then returns to step 4.
9. Press Stop/Exit. If you repeat this procedure at least five times and the print quality is still poor, replace the ink cartridge for the clogged colour. After replacing the ink cartridge, check the print quality. If the problem still exists, repeat the cleaning and test print procedures at least five times for the new ink cartridge. If ink is still missing, call your Brother dealer.

! IMPORTANT

DO NOT touch the print head. Touching the print head may cause permanent damage and may void the print head's warranty.

Note

When a print head nozzle is clogged the printed sample looks like this.
After the print head nozzle is cleaned, the horizontal lines are gone.
Checking the print alignment

You may need to adjust the print alignment after transporting the machine, or if your printed text becomes blurred or images become faded.

1. Press Menu, 8, 1.
2. Press ▲ or ▼ to choose Alignment. Press OK.
3. Press Mono Start or Colour Start. The machine starts printing the Alignment Check Sheet.

   Is Alignment OK?

   1. Yes 2. No

4. Check the 600 dpi and 1200 dpi test prints to see if number 5 most closely matches number 0.
   - If the number 5 samples of both the 600 dpi and 1200 dpi test prints are the best matches, press 1 (Yes) to finish the Alignment Check, and go to step 7.
   - If another test print number is a better match for either 600 dpi or 1200 dpi, press 2 (No) to choose it.

5. For 600 dpi, press the number of the test print that most closely matches the number 0 sample (1-8).

   600dpi Adjust

   Select Best #5

6. For 1200 dpi, press the number of the test print that most closely matches the number 0 sample (1-8).

   1200dpi Adjust

   Select Best #5

7. Press Stop/Exit.

Checking the ink volume

You can check the ink that is left in the cartridge.

1. Press Menu, 8, 3.
2. The LCD shows the ink volume.
3. Press ▲ or ▼ to choose the colour you want to check.
4. Press Stop/Exit.

Note

You can check the ink volume from your computer. (See Printing for Windows® or Printing and Faxing for Macintosh in the Software User’s Guide on the CD-ROM.)
Machine Information

Checking the serial number

You can see the machine’s serial number on the LCD.

1. Press Menu, 7, 1.
   1.Serial No. XXXXXXXXXXXX
2. Press Stop/Exit.

Reset functions

The following reset functions are available:

1. Network
   You can reset the print server back to its default factory settings such as the IP address information.

2. Speed Dial&Fax
   Speed Dial resets the following settings:
   - Speed Dial
     (Speed-Dial and Setup Groups)
   - Station ID
     (Name and Number)
   - Report settings
     (Transmission Verification Report, Quick Dial List and Fax Journal)

3. All Settings
   You can reset all the machine settings back to the factory.
   Brother strongly recommends you use this operation when you dispose of the machine.

Note

Unplug the interface cable before you choose Network or All Settings.

How to reset the machine

1. Press Menu, 0, 8.
2. Press ▲ or ▼ to choose the reset function you want to use. Press OK.
4. Press 1 to confirm.
Packing and shipping the machine

When you transport the machine, use the packing materials that came with your machine. Follow the instructions below to properly pack your machine. Damage caused to your machine during transit is not covered by your warranty.

**IMPORTANT**

It is important to allow the machine to ‘park’ the print head after a print job. Listen carefully to the machine before unplugging it to make sure that all mechanical noise has stopped. Not allowing the machine to finish this parking process may lead to print problems and possible damage to the print head.

1. Open the ink cartridge cover.
2. Press the lock release lever to release the ink cartridge and take out all the ink cartridges. (See Replacing the ink cartridges on page 106.)
3. Install the green protective part, and then close the ink cartridge cover.

**IMPORTANT**

- Make sure that the plastic tabs on both sides of the green protective part (1) have securely clicked into place (2).
- If you are not able to find the green protective part, DO NOT remove the ink cartridges before shipping. It is essential that the machine be shipped with either the green protective part or the ink cartridges in position. Shipping without them will cause damage to your machine and may void your warranty.

4. Unplug the machine from the telephone wall socket and take the telephone line cord out of the machine.
5. Unplug the machine from the electrical socket.
6. Using both hands, use the plastic tabs on both sides of the machine to lift the scanner cover until it locks securely into the open position. Then unplug the interface cable from the machine, if it is connected.
7 Lift the scanner cover (①) to release the lock. Gently push the scanner cover support down (②) and close the scanner cover (③).

8 Wrap the machine in the bag.

9 Pack the machine and the printed materials in the original carton with the original packing material as shown below. Do not pack the used ink cartridges in the carton.

10 Close the carton and tape it shut.
On-screen programming

Your machine is designed to be easy to operate with LCD on-screen programming using the menu keys. User-friendly programming helps you take full advantage of all the menu selections your machine has to offer.

Since your programming is done on the LCD, we have created step-by-step on-screen instructions to help you program your machine. All you need to do is follow the instructions as they guide you through the menu selections and programming options.

Menu table

You can program your machine by using the Menu table that begins on page 118. These pages list the menu selections and options.

Press Menu followed by the menu numbers to program your machine.

Memory storage

Even if there is a power failure, you will not lose your menu settings because they are stored permanently. Temporary settings (such as Contrast, Overseas mode, and so on) will be lost. You may have to reset the date and time.

Menu keys

<table>
<thead>
<tr>
<th>Key</th>
<th>Function</th>
</tr>
</thead>
<tbody>
<tr>
<td>Menu</td>
<td>Access the menu.</td>
</tr>
<tr>
<td>OK</td>
<td>Go to the next menu level. Accept an option.</td>
</tr>
<tr>
<td>Clear/Back</td>
<td>Go back to the previous menu level. Delete an incorrect letter when you need to enter text into the machine.</td>
</tr>
<tr>
<td>Scroll</td>
<td>Scroll through the current menu level.</td>
</tr>
<tr>
<td>Go back</td>
<td>Go back to the previous menu level.</td>
</tr>
<tr>
<td>Stop/Exit</td>
<td>Exit the menu or stop the current operation.</td>
</tr>
</tbody>
</table>
To access the menu mode:

1. Press **Menu**.

2. Choose an option.
   - Press 1 for General Setup menu.
   - Press 2 for Fax menu.
   - Press 3 for Copy menu.
   - Press 0 for Initial Setup menu.

   You can scroll more quickly through each menu level by pressing ▲ or ▼ for the direction you want.

3. Press **OK** when that option appears on the LCD.
   The LCD will then show the next menu level.

4. Press ▲ or ▼ to scroll to your next menu selection.

5. Press **OK**.
   When you finish setting an option, the LCD shows **Accepted**.

6. Press **Stop/Exit**.
# Menu Table

The menu table will help you understand the menu selections and options that are found in the machine's programs. The factory settings are shown in Bold with an asterisk.

Entering Text

When you are setting certain menu selections, such as the Station ID, you may need to enter text into the machine. Most number keys have three or four letters printed on keys. The keys for 0, # and * do not have printed letters because they are used for special characters.

Press the appropriate dial pad key the number of times shown in this reference table to access the character you want.

Inserting spaces

To enter a space in a fax number, press ► once between numbers. To enter a space in a name, press ► twice between characters.

Making corrections

If you entered an incorrect letter and want to change it, press ◀ to move the cursor under the incorrect character. Then press Clear/Back. Re-enter the correct character. You can also back up and insert letters.

Repeating letters

If you need to enter a letter that is on the same key as the letter before, press ◄ to move the cursor to the right before you press the key again.

Special characters and symbols

Press *, # or 0, and then press ◄ or ► to move the cursor under the special character or symbol you want. Then press OK to choose it.

Press * for (space) ! “ # $ % & ’ ( ) * + , - . / €
Press # for : ; < > ? @ [ ] ^ _
Press 0 for Ä Æ Ö Ü ÅÇÉÈØ
General

Printer Type: Inkjet
Print Method: Mono: Piezo with 94 × 1 nozzle
          Colour: Piezo with 94 × 3 nozzles
Memory Capacity: 32 MB
LCD (liquid crystal display): 16 characters × 1 line
Power Source: AC 220 to 240V 50/60 Hz
Power Consumption:
    Off: Average 0.75 W
    Sleep Mode: Average 3 W
    Standby: Average 4.5 W
    Operating: Average 22 W
(MFC-295CN)
    Off: Average 0.85 W
    Sleep Mode: Average 3.5 W
    Standby: Average 6 W
    Operating: Average 26 W

Dimensions
(MFC-253CW/255CW/257CW)

(MFC-295CN)
### Specifications

| **Weight** | 7.3 kg (MFC-253CW/255CW/257CW)  
|            | 7.9 kg (MFC-295CN) |
| **Noise**  | Operating: $L_{PAM} = 50$ dB or less $^1$ |
| **Noise per ISO 9296** | Operating:  
|                  | (MFC-253CW/255CW/257CW)  
|                  | $L_{WAd} = 63.6$ dB (A) (Mono)  
|                  | $L_{WAd} = 55.8$ dB (A) (Colour)  
|                  | (MFC-295CN)  
|                  | $L_{WAd} = 63.6$ dB (A) (Mono)  
|                  | $L_{WAd} = 55.4$ dB (A) (Colour) |

Office equipment with $L_{WAd} > 63.0$ dB (A) is not suitable for use in rooms where people do primarily intellectual work. Such equipment should be placed in separate rooms because of the noise emission.

| **Temperature** | Operating: 10 to 35 °C

## Interfaces

**USB**

A USB 2.0 interface cable that is no longer than 2 m.

**LAN cable**

Ethernet UTP cable category 5 or greater.

** Wireless LAN**

Your machine supports IEEE 802.11b/g wireless communication with your wireless LAN using Infrastructure mode or a wireless Peer-to-Peer connection in Ad-hoc Mode.

1. Your machine has a full-speed USB 2.0 interface. This interface is compatible with Hi-Speed USB 2.0; however, the maximum data transfer rate will be 12 Mbits/s. The machine can also be connected to a computer that has a USB 1.1 interface.

2. Third party USB ports are not supported for Macintosh.

**Conditions:**

1. Microsoft® Internet Explorer® 5.5 or greater.
2. For WIA, 1200 × 1200 resolution. Brother Scanner Utility enables to enhance up to 19200 × 19200 dpi.
3. Third party USB ports are not supported.
4. PC Fax supports monochrome only.
5. PaperPort™ 11SE supports Microsoft® SP4 or higher for Windows® 2000 and SP2 or higher for XP.
6. Removable disk is a function of PhotoCapture Center™.

For the latest driver updates, visit us at [http://solutions.brother.com/](http://solutions.brother.com/).

All trademarks, brand and product names are the property of their respective companies.
Consumable items

**Ink**
The machine uses individual Black, Yellow, Cyan and Magenta ink cartridges that are separate from the print head assembly.

**Service Life of Ink Cartridge**
The first time you install a set of ink cartridges the machine will use an amount of ink to fill the ink delivery tubes for high quality print outs. This process will only happen once. After this process is complete the cartridges provided with your machine will have a lower yield than standard cartridges (65%). With all following ink cartridges you can print the specified number of pages.

**Replacement Consumables**
<Black> LC980BK, <Cyan> LC980C, <Magenta> LC980M, <Yellow> LC980Y

- Black - Approximately 300 pages
- Yellow, Cyan and Magenta - Approximately 260 pages

1 Approx. cartridge yield is declared in accordance with ISO/IEC 24711.

For more information about the replacement consumables, visit us at [http://www.brother.com/pageyield](http://www.brother.com/pageyield).

**What is Innobella™?**
Innobella™ is a range of genuine consumables offered by Brother. The name "Innobella™" derives from the words "Innovation" and "Bella" (meaning "Beautiful" in Italian) and is a representation of the "innovative" technology providing you with "beautiful" and "long lasting" print results.

When you print photo images, Brother recommends Innobella™ glossy photo paper (BP71 series) for high quality. Brilliant prints are made easier with Innobella™ Ink and paper.
Network (LAN)

LAN
You can connect your machine to a network for Network Printing, Network Scanning, PC Fax Send and access photos from PhotoCapture Center™ 1. Also included is Brother BRAdmin Light 2 Network Management software.

Support for
Windows® 2000 Professional/Windows® XP/
Windows® XP Professional x64 Edition/Windows Vista®/
Windows Server® 2008 3

Mac OS X 10.3.9 - 10.4.x - 10.5.x 4

(MFC-295CN)
Ethernet 10/100 Base-TX Auto Negotiation (Wired LAN)

(MFC-253CW/255CW/257CW)
IEEE 802.11 b/g (Wireless LAN)

Protocols
TCP/IP for IPv4: ARP, RARP, BOOTP, DHCP,
APIPA (Auto IP), NetBIOS/WINS, LPR/LPD,
Custom Raw Port/Port9100, DNS Resolver,
mDNS, LLMNR responder, FTP Server,
TELNET, SNMPv1, TFTP, Scanner Port,
LLTD responder, Web Services (Printing)

Network Security
(MFC-253CW/255CW/257CW)
SSID/ESSID, 128 (104) / 64 (40) bit WEP,
WPA2-PSK (AES), WPA-PSK (TKIP/AES)

Setup Support Utility
(MFC-253CW/255CW/257CW)
SecureEasySetup™ Yes (simple setup with your SecureEasySetup™-capable access point/router)
AOSS™ Yes (simple setup with your AOSS™-capable access point/router)
WPS Yes (simple setup with your Wi-Fi Protected Setup-capable access point/router)

1 See the Computer Requirements chart on page 141.
2 If you require more advanced printer management, use the latest Brother BRAdmin Professional utility version that is available as a download from http://solutions.brother.com.
3 Print only via network.
4 For the latest driver updates for the Mac OS X you are using, visit us at http://solutions.brother.com.
If your wireless access point supports either SecureEasySetup™, Wi-Fi Protected Setup (PBC) or AOSS™, you can configure the machine easily without a computer. By pushing a button on the wireless LAN router/access point and the machine, you can set up the wireless network and security settings. See the user’s guide for your wireless LAN router/access point for instructions on how to access one-push mode.

**Note**

Routers or access points that support SecureEasySetup™, Wi-Fi Protected Setup or AOSS™ have the symbols shown below.
