For visually-impaired users
You can read this manual with Screen Reader ‘text-to-speech’ software.

You must set up the hardware and install the driver before you can use the machine.
Please use the Quick Setup Guide to set up the machine. You can find a printed copy in the box.
Please read this User’s Guide thoroughly before you use the machine.

Please visit us at http://solutions.brother.com/ where you can get product support, the latest driver updates and utilities, and answers to frequently asked questions (FAQs) and technical questions.

Note: Not all models are available in all countries.
# User's Guides and where do I find them?

Using the documentation

Thank you for buying a Brother machine! Reading the documentation will help you make the most of your machine.

Symbols and conventions used in the documentation

The following symbols and conventions are used throughout the documentation.

⚠️ **WARNING**  
**WARNING** indicates a potentially hazardous situation which, if not avoided, could result in death or serious injuries.

⚠️ **IMPORTANT**  
**IMPORTANT** indicates a potentially hazardous situation which, if not avoided, may result in damage to property or loss of product functionality.

⚠️ **NOTE**  
Notes tell you how you should respond to a situation that may arise or give tips about how the operation works with other features.

⚠️ **Electrical Hazard**  
Electrical Hazard icons alert you to possible electrical shocks.

⚠️ **Fire Hazard**  
Fire Hazard icons alert you to the possibility of a fire.

⚠️ **Hot Surface**  
Hot Surface icons warn you not to touch machine parts that are hot.

⚠️ **Prohibition**  
Prohibition icons indicate actions that must not be performed.

**Bold**  
Bold style identifies keys on the machine control panel or computer screen.

**Italicics**  
Italicized style emphasizes an important point or refers you to a related topic.

**Courier New**  
Courier New font identifies the messages shown on the LCD of the machine.

**NOTE**  
If you are using a tablet running Windows® 8, you can make your selections either by tapping the screen or by clicking with your mouse.

9 AC power connector
10 10BASE-T / 100BASE-TX (HL-3150CDW and HL-3170CDW)
11 USB port

NOTE
Most of the illustrations in this User’s Guide show the HL-3170CDW.
Printing Methods

Acceptable paper and other print media

Print quality may vary according to the type of paper you are using.

You can use the following types of print media: plain paper, thin paper, thick paper, thicker paper, bond paper, recycled paper, labels, envelopes or Glossy paper (see Print media on page 188).

For best results, follow the instructions below:

- DO NOT put different types of paper in the paper tray at the same time because it may cause paper jams or misfeeds.
- For correct printing, you must choose the same paper size from your software application as the paper in the tray.
- Avoid touching the printed surface of the paper immediately after printing.
- Before you buy a lot of paper, test a small quantity to make sure that the paper is appropriate for the machine.

Recommended paper and print media

<table>
<thead>
<tr>
<th>Paper Type</th>
<th>Item</th>
</tr>
</thead>
<tbody>
<tr>

<td>A4, Letter, Legal, B5 (JIS), Executive, A5, A5 (Long Edge), A6, Folio</td>
<td>Plain paper, Thin paper and Recycled paper</td>
<td>up to 250 sheets (80 g/m²)</td>
</tr>
<tr>
<td>Manual feed slot</td>
<td>Width: 76.2 to 216 mm Length: 116 to 355.6 mm</td>
<td>Plain paper, Thin paper, Thick paper, Thicker paper, Bond paper, Recycled paper, Envelopes, Labels and Glossy Paper</td>
<td>1 sheet 1 Envelope</td>
</tr>
</tbody>
</table>

Folio size is 215.9 mm x 330.2 mm.

Recommended paper specifications

The following paper specifications are appropriate for this machine.

<table>
<thead>
<tr>
<th>Basis weight</th>
<th>75-90 g/m²</th>
</tr>
</thead>
<tbody>
<tr>
<td>Thickness</td>
<td>80-110 μm</td>
</tr>
<tr>
<td>Roughness</td>
<td>Higher than 20 sec.</td>
</tr>
<tr>
<td>Stiffness</td>
<td>90-150 cm³/100</td>
</tr>
<tr>
<td>Grain direction</td>
<td>Long grain</td>
</tr>
<tr>
<td>Volume resistivity</td>
<td>10⁻⁹-10⁻¹¹ ohm</td>
</tr>
<tr>
<td>Surface resistivity</td>
<td>10⁻⁹-10⁻¹² ohm-cm</td>
</tr>
<tr>
<td>Filler</td>
<td>CaCO₃ (Neutral)</td>
</tr>
<tr>
<td>Ash content</td>
<td>Below 23 wt%</td>
</tr>
<tr>
<td>Brightness</td>
<td>Higher than 80%</td>
</tr>
<tr>
<td>Opacity</td>
<td>Higher than 85%</td>
</tr>
</tbody>
</table>

- Use plain paper that is suitable for laser/LED machines to make copies.
- Use paper that is 75 to 90 g/m².
- Use long grain paper with a neutral Ph value, and a moisture content of approx. 5%.
- Use this machine can use recycled paper that meets DIN 19309 specifications.

(Before you put paper in this machine, see Important information for choosing your paper on page 193.)
Handling and using special paper

The machine is designed to work well with most types of xerographic and bond paper. However, some paper variables may have an effect on print quality or handling reliability. Always test samples of paper before purchasing to ensure desirable performance. Store paper in its original packaging and keep it sealed. Keep the paper flat and away from moisture, direct sunlight and heat.

Some important guidelines when selecting paper are:

- **DO NOT** use inkjet paper because it may cause a paper jam or damage your machine.
- Preprinted paper must use ink that can withstand the temperature of the machine’s fusing process 200 °C.
- If you use bond paper, paper having a rough surface or paper that is wrinkled or creased, the paper may exhibit degraded performance.

Types of paper to avoid

**IMPORTANT**

Some types of paper may not perform well or may cause damage to your machine.

DO NOT use paper:

- that is highly textured
- that is extremely smooth or shiny
- that is curled or warped

1 A curl of 2 mm or greater may cause jams to occur.

- that is coated or has a chemical finish
- that is damaged, creased or folded
- that exceeds the recommended weight specification in this guide
- with tabs and staples
- with letterheads using low temperature dyes or thermography
- that is multipart or carbonless
- that is designed for inkjet printing

If you use any of the types of paper listed above, they may damage your machine. This damage is not covered under any Brother warranty or service agreement.
Envelopes
Most envelopes can be used with your machine. However, some envelopes may have feed and print-quality problems because of the way they have been made. Envelopes should have edges with straight, well-creased folds. Envelopes should lie flat and not be of baggy or flimsy construction. Use only quality envelopes from a supplier who understands that you will be using the envelopes in a laser machine.
We recommend that you print a test envelope to make sure the print results are what you want.

Types of envelopes to avoid

IMPORTANT
DO NOT use envelopes:
• that are damaged, curled, wrinkled or an unusual shape
• that are extremely shiny or textured
• with clasps, staples, snaps or tie strings
• with self-adhesive closures
• that are of a baggy construction
• that are not sharply creased
• that are embossed (have raised writing on them)
• that were previously printed by a laser/LED printer
• that are pre-printed on the inside
• that cannot be arranged neatly when stacked
• that are made of paper that weighs more than the paper weight specifications for the machine
• with edges that are not straight or consistently square
• with windows, holes, cut-outs or perforations
• with glue on surface as shown in figure below

• with double flaps as shown in figure below

• with sealing flaps that are not folded down when purchased
• with each side folded as shown in figure below

If you use any of the types of envelopes listed above, they may damage your machine. This damage may not be covered under any Brother warranty or service agreement.

Labels
Most labels can be used with your machine. Labels should have an adhesive that is acrylic-based since this material is more stable at the high temperatures in the fuser unit. Adhesives should not come in contact with any part of the machine, because the label stock may stick to the drum units or rollers and cause jams and print quality problems. No adhesive should be exposed between the labels. Labels should be arranged so that they cover the entire length and width of the sheet. Using labels with spaces may result in labels peeling off and causing serious jams or print problems.

All labels used in this machine must be able to withstand a temperature of 200 °C for a period of 0.1 seconds.

Types of labels to avoid
Do not use labels that are damaged, curled, wrinkled or an unusual shape.

IMPORTANT
• DO NOT feed part used label sheets. The exposed carrier sheet will damage your machine.
• DO NOT reuse or insert labels that have previously been used or are missing a few labels on the sheet.
• Label sheets should not exceed the paper weight specifications described in this User’s Guide. Labels exceeding this specification may not feed or print correctly and may cause damage to your machine.
Unprintable area when printing from a computer

The figures below show maximum unprintable areas. The unprintable areas may vary depending on the paper size or settings in the application you are using.

<table>
<thead>

</tbody>
</table>
Loading paper

Loading paper and print media

The machine can feed paper from the standard paper tray or the manual feed slot.

When you put paper into the paper tray, note the following:

- If your application software supports paper size selection on the print menu, you can select it through the software. If your application software does not support it, you can set the paper size in the printer driver or by using the control panel keys.

Loading paper in the standard paper tray

Load up to 250 sheets of paper in the standard paper tray (Tray 1). Paper can be loaded up to the maximum paper mark (¶ ¶ ¶) which is identified on the right side of the paper tray. (For the recommended paper to use, see Acceptable paper and other print media on page 2.)

Printing on plain paper, thin paper or recycled paper from Tray 1

1. Pull the paper tray completely out of the machine.
While pressing the green paper-guide release levers (1), slide the paper guides to fit the paper you are loading in the tray. Make sure that the guides are firmly in the slots.

Fan the stack of paper well to avoid paper jams and misfeeds.
4 Put paper in the tray and make sure:

- The paper is below the maximum paper mark (▼▼▼) (1).
  Over filling the paper tray will cause paper jams.
- The side to be printed on is face down.
- The paper guides touch the sides of the paper so it will feed correctly.

5 Put the paper tray firmly back in the machine. Make sure that it is completely inserted into the machine.

6 Lift up the support flap (1) to prevent paper from sliding off the face-down output tray, or remove each page as soon as it comes out of the machine.
Choose the following settings from each drop-down list of the printer driver.

**Paper Size**

- A4
- Letter
- Legal
- Executive
- A5
- B5
- JIS B5
- Folio
- A5 Long Edge
- A6

For the acceptable paper sizes, see *Type and size of paper* on page 2.

**Media Type**

- Plain Paper
- Thin Paper
- Recycled Paper

**Paper Source**

- Tray1

For any other settings, see *Driver and Software* in Chapter 2.

---

**NOTE**

The name of options in the drop-down lists may vary depending on your operating system and its version.

**Send the print data to the machine.**
Loading paper in the Manual feed slot

(For the recommended paper to use, see Acceptable paper and other print media on page 2.)

NOTE

The machine turns on the Manual Feed mode when you put paper in the manual feed slot.

Printing on plain paper, thin paper, recycled paper or bond paper from the Manual feed slot

1. Lift up the support flap (1) to prevent paper from sliding off the face-down output tray, or remove each page as soon as it comes out of the machine.

2. Open the manual feed slot cover.
3 Use both hands to slide the manual feed slot paper guides to the width of the paper that you are going to use.

4 Use both hands to push one sheet of paper firmly into the manual feed slot until the top edge of the paper presses against the paper feed rollers. Continue pressing the paper against the rollers for about two seconds, or until the machine grabs the paper and pulls it in further.

**NOTE**

- If the error message *Jam Inside* appears on the LCD, the machine cannot grasp and pull the paper. Reset the machine by removing the paper and then pressing *Cancel* on the control panel. Reinsert the paper and be sure to press it firmly against the rollers.

- Put the paper into the manual feed slot with the side to be printed on face up.

- Make sure that the paper is straight and in the correct position on the manual feed slot. If it is not, the paper may not be fed correctly, resulting in a skewed printout or a paper jam.

- Pull the paper out completely when you retry putting the paper into the manual feed slot.

- Do not put more than one sheet of paper in the manual feed slot at any one time, as it may cause a jam.

- If you put paper or other print media in the manual feed slot before the machine is in the Ready mode, an error may occur and the machine will stop printing.
5. Choose the following settings from each drop-down list of the printer driver.

- **Paper Size**
  
  - Width: 76.2 to 216 mm
  - Length: 116 to 355.6 mm
  - Customized paper size

  1. Define your original paper size by choosing **User Defined...** in Windows® printer driver, **PostScript Custom Page Size** in BR-Script printer driver for Windows®, or **Manage Custom Sizes...** in Macintosh printer drivers.

  For the acceptable paper sizes, see *Type and size of paper* on page 2.

- **Media Type**
  
  - Plain Paper
  - Thin Paper
  - Recycled Paper
  - Bond Paper

- **Paper Source**
  
  - Manual

  For any other settings, see *Driver and Software* in Chapter 2.

**NOTE**

The name of options in the drop-down lists may vary depending on your operating system and its version.

6. Send the print data to the machine.

7. After the LCD shows **Manual Feed**, return to step 4 to put in the next sheet of paper. Repeat for each page you want to print.

**NOTE**

The LCD will show **Manual Feed** until a sheet of paper is put in the manual feed slot.
Printing on thick paper, labels, envelopes and glossy paper from the Manual feed slot

When the back cover (face-up output tray) is pulled down, the machine has a straight paper path from the manual feed slot through to the back of the machine. Use this paper feed and output method when you want to print on thick paper, labels, envelopes or glossy paper. (For the recommended paper to use, see Acceptable paper and other print media on page 2 and Envelopes on page 5.)

1. Open the back cover (face-up output tray).

2. (For printing envelopes only)
   Pull down the two grey levers, one on the left side and one on the right side, toward you as shown in the illustration below.
3. Open the manual feed slot cover.

4. Use both hands to slide the manual feed slot paper guides to the width of the paper that you are going to use.
5 Use both hands to push one sheet of paper *firmly* into the manual feed slot until the top edge of the paper presses against the paper feed rollers. Continue pressing the paper against the rollers for about two seconds, or until the machine grabs the paper and pulls it in further.

**NOTE**
- If the error message *Jam Inside* appears on the LCD, the machine cannot grasp and pull the paper. Reset the machine by removing the paper and then pressing *Cancel* on the control panel. Reinsert the paper and be sure to press it *firmly* against the rollers.
- Put the paper into the manual feed slot with the side to be printed on face up.
- Make sure that the paper is straight and in the correct position on the manual feed slot. If it is not, the paper may not be fed correctly, resulting in a skewed printout or a paper jam.
- Pull the paper out completely when you retry putting the paper into the manual feed slot.
- Do not put more than one sheet of paper in the manual feed slot at any one time, as it may cause a jam.
- If you put paper or other print media in the manual feed slot before the machine is in the Ready mode, an error may occur and the machine will stop printing.
Choose the following settings from each drop-down list of the printer driver.

■ Paper Size

(For printing on thick paper, labels or glossy paper)

<table>
<thead>
<tr>
<th>Paper Size</th>
<th>Letter</th>
<th>Legal</th>
<th>Executive</th>
<th>A5</th>
</tr>
</thead>
<tbody>
<tr>
<td>A5 Long Edge</td>
<td>A6</td>
<td>B5</td>
<td>JIS B5</td>
<td></td>
</tr>
<tr>
<td>3 x 5</td>
<td>Folio</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

(For printing envelopes)

<table>
<thead>
<tr>
<th>Media Type</th>
<th>DL</th>
<th>C5</th>

<th>Env. Thin</th>
<th>Env. Thick</th>
</tr>
</thead>
<tbody>
<tr>
<td>Com-10</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Manual</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

For any other settings, see Driver and Software in Chapter 2.

NOTE

- The name of options in the drop-down lists may vary depending on your operating system and its version.
- When Label is selected in the printer driver, the machine will feed the paper from the manual feed slot, even if Manual is not selected as the paper source.
- When you use Envelope #10, choose Com-10 (for Windows®) or Envelope #10 (for Macintosh) from the Paper Size drop-down list.
- For other envelopes that are not listed in the printer driver, such as Envelope #9 or Envelope C6, choose User Defined... (for Windows® printer driver), PostScript Custom Page Size (for BR-Script printer driver for Windows®) or Manage Custom Sizes... (for Macintosh printer driver).

7 Send the print data to the machine.
8. After the LCD shows Manual Feed, return to step 5 to put in the next sheet of paper.

9. (For printing envelopes only)
   When you have finished printing, reset the two grey levers that you pulled down in step 2 back to their original positions.

10. Close the back cover (face-up output tray).

NOTE

• The LCD will show Manual Feed until a sheet of paper or an envelope is put in the manual feed slot.

• Remove each page or envelope immediately after printing. Letting pages or envelopes become stacked may cause the paper to jam or curl.
2-sided printing

The supplied printer drivers all enable 2-sided printing. (Windows® Users) For more information about how to choose the settings, see the Help text in the printer driver.

Guidelines for printing on both sides of the paper

- If the paper is thin, it may wrinkle.
- If paper is curled, straighten it and put it back in the paper tray. If the paper continues to curl, replace the paper.
- If the paper is not feeding correctly, it may be curled. Remove the paper and straighten it. If the paper continues to curl, replace the paper.
- When you use the manual 2-sided function, it is possible that there may be paper jams or poor print quality. (If there is a paper jam, see Paper jams on page 162. If you have a print quality problem, see Improving the print quality on page 176.)

NOTE

Make sure that the paper tray is completely inserted in the machine.
Automatic 2-sided printing (HL-3150CDW and HL-3170CDW)

If you are using the Macintosh Printer Driver, see 2-sided Printing on page 71.

Automatic 2-sided printing with the Windows® printer driver

1. Choose the following settings from each menu of the printer driver.
   - **Paper Size**
     - A4
   - **Media Type**
     - Plain Paper  Recycled Paper  Thin Paper
   - **Paper Source**
     - Tray1  Manual
   - **2-sided / Booklet**
     - 2-sided
     - **2-sided Type** in 2-sided Settings
       - There are four options for each orientation (see 2-sided / Booklet on page 33).
     - **Binding Offset** in 2-sided Settings
       - Specify the offset for binding (see 2-sided / Booklet on page 33).

**NOTE**

- Do not use bond paper.
- The name of options in the drop-down lists may vary depending on your operating system and its version.

For any other settings, see Driver and Software in Chapter 2.

2. Send the print data to the machine. The machine will print on both sides of the paper automatically.
Automatic 2-sided printing with the BR-Script printer driver for Windows®

1. Choose the following settings from each menu of the printer driver.
   - Paper Size
     - A4
   - Media Type
     - Plain Paper
     - Recycled Paper
     - Thin Paper
   - Paper Source
     - Tray 1
     - Manual Feed
   - Print on Both Sides
     - Flip on Short Edge
     - Flip on Long Edge
   - Page Order
     - Front to Back
     - Back to Front

**NOTE**
- Do not use bond paper.
- The name of options in the drop-down lists may vary depending on your operating system and its version.

For any other settings, see *Driver and Software* in Chapter 2.

2. Send the print data to the machine. The machine will print on both sides of the paper automatically.
Manual 2-sided printing

The BR-Script printer driver for Windows® does not support manual 2-sided printing.
If you are using the Macintosh Printer Driver, see Manual 2–sided Printing on page 71.

Manual 2-sided printing with the Windows® printer driver

1. Choose the following settings from each drop-down list of the printer driver.
   - **Paper Size**
     You can use all the paper sizes specified for the tray you are using.
   - **Media Type**
     You can use all the media types that are specified for the tray you are using, except envelopes and labels, which have only one print side.
   - **Paper Source**
     Tray1 Manaul
   - **2-sided / Booklet**
     2-sided (Manual)
   - **2-sided Type in 2-sided Settings**
     There are four options for each orientation (see 2-sided / Booklet on page 33).
   - **Binding Offset in 2-sided Settings**
     Specify the offset for binding (see 2-sided / Booklet on page 33).
   
   For any other settings, see Driver and Software in Chapter 2.

2. Send the print data to the machine. The machine will print all the even-numbered pages on one side of the paper first. Then, the Windows® driver instructs you (with a pop-up message) to reinsert the paper to print the odd-numbered pages.

**NOTE**
Before reinserting the paper, straighten it well, or you may get a paper jam. Very thin or thick paper is not recommended.
Printer driver

A printer driver is software that translates data from the format used by a computer to the format that a particular printer needs. Typically, this format is page description language (PDL).

The printer drivers for the supported versions of Windows® and Macintosh are on the CD-ROM we have supplied or on the Brother Solutions Center website at http://solutions.brother.com/. Install the drivers by following the steps in the Quick Setup Guide. The latest printer drivers can be downloaded from the Brother Solutions Center website at:

http://solutions.brother.com/

For Windows®

- Windows® printer driver (the recommended printer driver for this product)
- BR-Script printer driver (PostScript® 3™ language emulation, for HL-3170CDW) ¹

¹ Install the driver using the Custom Install from the CD-ROM.

For Macintosh

- Macintosh printer driver (the recommended printer driver for this product)
- BR-Script printer driver (PostScript® 3™ language emulation, for HL-3170CDW) ¹

¹ For the installation instruction of the driver, visit us at http://solutions.brother.com/.

For Linux® ¹ ²

- LPR printer driver
- CUPS printer driver

¹ For more information and to download the printer driver for Linux please visit your model page at http://solutions.brother.com/ or use the link on the CD-ROM we have supplied.

² Depending on Linux distributions, the driver may not be available or it may be released after the initial release of your model.
Printing a document

When the machine receives data from your computer, it begins printing by picking up paper from the paper tray or manual feed slot. The manual feed slot can feed many types of paper and envelopes (see Paper capacity of the paper trays on page 3).

1. From your application, choose the Print command.
   If any other printer drivers are installed on your computer, choose Brother HL-XXXX series (where XXXX is your model name) as your printer driver from the Print or Print Settings menu in your software application, and then click OK or Print to begin printing.

2. Your computer sends the data to the machine. The Data LED will blink and the LCD will show Printing.

3. When the machine finishes printing all the data, the Data LED finishes blinking.

NOTE

• Select the paper size and orientation in your application software.
• If your application software does not support your custom paper size, choose the next largest paper size.
• Then adjust the print area by changing the right and left margins in your application software.
## Printer driver settings

You can change the following printer settings when you print from your computer:

<table>

1 Manual 2-sided printing is not available with the BR-Script printer driver for Windows®.

2 Booklet is not available with the Macintosh printer driver and the BR-Script printer driver for Macintosh.
Windows®

Accessing the printer driver settings

1. (For Windows® XP and Windows Server® 2003)
   Click Start, and then Printers and Faxes.
   (For Windows Vista® and Windows Server® 2008)
   Click the (Start) button, Control Panel, Hardware and Sound, and then Printers.
   (For Windows® 7 and Windows Server® 2008R2)
   Click the (Start) button, and then click Devices and Printers.

2. Right-click the Brother HL-XXXX series icon (where XXXX is your model name) and select Printer properties (Properties), and Brother HL-XXXX series if necessary. The printer properties dialog box appears.

3. Choose the General tab and then click Preferences... (Printing Preferences...). To configure the tray settings, click the Device Settings tab.
Features in the Windows® printer driver

For more information, see the Help text in the printer driver.

NOTE
- The screens in this section are from Windows® 7. The screens on your PC will vary depending on your operating system.
- To access the printer driver settings, see Accessing the printer driver settings on page 27.

Basic tab

Change the Page Layout settings by clicking the illustration on the left side of the Basic tab.

1. Choose the Paper Size, Orientation, Copies, Media Type, Print Quality, Colour / Mono and Document Type (1).
2. Choose Multiple Page and 2-sided / Booklet (2).
3. Choose the Paper Source (3).
4. Review the displayed list of settings (4).
5. Click OK to confirm the settings.
   To return to the default settings, click Default, then OK.

NOTE
If you want to preview your document before printing, select the Print Preview check box (5).
Paper Size
From the drop-down box choose the Paper Size you are using.

Orientation
Orientation selects the position of how your document will be printed (Portrait or Landscape).

<table>
<thead>
<tr>
<th>Portrait (Vertical)</th>
<th>Landscape (Horizontal)</th>
</tr>
</thead>
<tbody>
<tr>
<td>![Portrait Image]</td>
<td>![Landscape Image]</td>
</tr>
</tbody>
</table>

Copies
The copies selection sets the number of copies that will be printed.

- **Collate**
  With the Collate check box selected, one complete copy of your document will be printed and then repeated for the number of copies you selected. If the Collate check box is not selected, then each page will be printed for all the copies selected before the next page of the document is printed.

Collate selected

Collate deselected

Media Type
You can use the following types of media in your machine. For the best print quality, select the type of media that matches the paper you are using.

- Plain Paper
- Thin Paper
- Thick Paper
- Thicker Paper
- Bond Paper
- Envelopes
- Env. Thick
- Env. Thin
- Recycled Paper
- Label
- Glossy Paper
NOTE

- When using ordinary plain paper 60 to 105 g/m² choose Plain Paper. When using heavier weight paper or rough paper choose Thick Paper or Thicker Paper. For bond paper, choose Bond Paper.
- When you are using envelopes, choose Envelopes. If the toner is not fixed to the envelope correctly when Envelopes has been selected, choose Env. Thick. If the envelope is crumpled when Envelopes has been selected, choose Env. Thin. For more information, see Paper capacity of the paper trays on page 3.

Print Quality

Choose one of the following print quality settings.

- **Normal (600 x 600 dpi)**
  600×600 dpi. Recommended for ordinary printing. Good print quality with reasonable print speeds.

- **Fine (2400 dpi class)**
  2400 dpi class. The finest print mode. Use this mode to print precise images such as photographs. Since the print data is much larger than in Normal mode, processing time / data transfer time and print time will be longer.

NOTE

The print speed will change depending on the print quality setting you choose. Higher print quality takes longer to print, while lower print quality takes less time to print.

Colour / Mono

Choose the appropriate Colour/Mono setting:

- **Auto**
  The machine checks the content of your documents for colour. If colour is detected, it prints in colour. If no colour content is detected, it prints in monochrome. The total print speed may become slower.

- **Colour**
  When your document contains colour and you want to print it in colour, select this mode.

- **Mono**
  Select this mode if your document has only black and greyscale text and/or objects. If your document contains colour, selecting Mono mode prints your document in 256 levels of grey.

NOTE

- Sometimes a document can contain colour information even if it appears to be monochrome (for example, grey areas can actually be made from a combination of colours).
- If either the Cyan, Magenta or Yellow toner reaches the end of its life while printing a colour document, the print job cannot be completed. You can start the print job again in Mono mode, as long as black toner is available.
Document Type
Use Document Type to automatically select the optimal settings for printing the relevant type of data.

- **Document (Standard)**
  Use this mode for printing a combination of graphics and text.

- **Photo / Image**
  Use this mode for printing photos or images.

- **Document (Mixed)**
  Use this mode for printing combinations of graphics/text and photos/images.

**NOTE**
This mode takes longer to print the data.

- **Manual**
  Choosing Manual allows you to select the settings manually by clicking the Settings button.

Settings dialog box
To change the following settings, click Settings... in the Basic tab.

- **Colour Mode**
  The following options are available in colour Matching mode:
  - **Normal**
    This is the default colour mode.
  - **Vivid**
    The colour of all elements are adjusted to become a more vivid colour.
  - **Auto**
    The printer driver selects the Colour Mode type.

**NOTE**
Using this mode may take longer to print the data.

- **None**
- **Import...**
  To adjust the print configuration of a particular image, click Settings. When you have finished adjusting the image parameters, such as brightness and contrast, import those settings as a print configuration file. Use the Export... function to create a print configuration file from the current settings.

- **Export...**
  To adjust the print configuration of a particular image, click Settings. When you have finished adjusting the image parameters, such as brightness and contrast, export those settings as a print configuration file. Use the Import... function to load a previously exported configuration file.
- **Improve Grey Colour**  
  You can improve the image quality of a shaded area.

- **Enhance Black Printing**  
  If a black graphic does not print correctly, choose this setting.

- **Improve Thin Line**  
  You can improve the image quality of thin lines.

- **Improve Pattern Printing**  
  Select this option if printed fills and patterns are different from the patterns and fills you see on your computer.

**Multiple Page**

The Multiple Page selection can reduce the image size of a page to allow multiple pages to be printed on one sheet of paper or to enlarge the image size for printing one page on multiple sheets of paper.

- **Page Order**  
  When the N in 1 option is selected, the page order can be selected from the drop-down list.

- **Border Line**  
  When using the Multiple Page feature to print multiple pages on one sheet, you can choose to have a solid border, dash border or no border around each page on the sheet.

- **Print cut-out line**  
  When the 1 in NxN pages option is selected, the **Print cut-out line** option can be selected. This option allows you to print a faint cut-out line around the printable area.
2-sided / Booklet

To print a booklet or do 2-sided printing, use this function.

- **None**
  Disable 2-sided printing.

- **2-sided / 2-sided (Manual)**
  To do 2-sided printing, use these options.
  - **2-sided** (HL-3150CDW and HL-3170CDW)
    The machine prints on both sides of the paper automatically.
  - **2-sided (Manual)**
    The machine prints all the even numbered pages first. Then the printer driver will stop and show the instructions required to re-insert the paper. When you click OK the odd numbered pages will be printed.

When you choose **2-sided** or **2-sided (Manual)**, the **2-sided Settings...** button becomes available to choose. You can set following settings in the **2-sided Settings** dialog box.

- **2-sided Type**
  There are four types of 2-sided binding directions available for each orientation.

  **Portrait**
  - Long Edge (Left)
  - Long Edge (Right)
  - Short Edge (Top)
  - Short Edge (Bottom)

  **Landscape**
  - Long Edge (Top)
  - Long Edge (Bottom)
  - Short Edge (Right)
  - Short Edge (Left)

- **Binding Offset**
  When you check **Binding Offset**, you can also specify the offset for binding in inches or millimetres.
**Booklet / Booklet (Manual)**

Use this option to print a document in booklet format using 2-sided printing; it will arrange the document according to the correct page number and allow you to fold at the centre of the print output without having to change the order of the page numbers.

- **Booklet (HL-3150CDW and HL-3170CDW)**
  The machine prints on both sides of the paper automatically.

- **Booklet (Manual)**
  The machine prints all the even numbered sides first. Then the printer driver will stop and show the instructions required to re-install the paper. When you click OK the odd numbered sides will be printed.

When you choose Booklet or Booklet (Manual), the 2-sided Settings... button becomes available to choose. You can set the following settings in the 2-sided Settings dialog box.

- **2-sided Type**
  There are two types of 2-sided binding directions available for each orientation.

  ![](image)

- **Booklet Printing Method**
  When Divide into Sets is selected:

  This option allows you to print the whole booklet in smaller individual booklet sets, and it still allows you to fold at the center of the smaller individual booklet sets without having to change the order of the page numbers. You can specify the number of sheets in each smaller booklet can be set, from 1 to 15. This option is helpful for folding a printed booklet that has a large number of pages.

- **Binding Offset**
  Check Binding Offset to specify the offset for binding in inches or millimetres.

**Paper Source**

You can choose Auto Select, Tray1 or Manual and specify separate trays for printing the first page and for printing from the second page onward.
**Print Preview**

Preview a document before it is printed. If you check the **Print Preview** check box the Print Preview Viewer window will open before printing starts.

**Page List Area (1)**

The Page List Area displays the page numbers for the actual pages that will be printed. If you chose a page in this list, a preview of the print results for the page will be displayed in the Preview Area. If you do not want to print a page, deselect the check box.

**Preview Area (2)**

The Preview Area displays a preview of the print results for the pages chosen in the Page List Area.

**NOTE**

- If the **Booklet** setting was selected in the Printer driver settings, you cannot use the Print Preview function.
- If the **2-sided** setting was selected in the Printer driver settings, you cannot delete pages using the Page List Area.
Advanced tab

Change the tab settings by clicking the following selections:

- **Scaling** (1)
- **Reverse Print** (2)
- **Use Watermark** (3)
- **Header-Footer Print** (4)
- **Toner Save Mode** (5)
- **Secure Print** (6)
- **Administrator** (7)
- **User Authentication** (8)
- **Other Print Options** (9)

**Scaling**
You can change the scale of the print image.

**Reverse Print**
Select **Reverse Print** to rotate the page 180 degrees.
Use Watermark

Put a logo or text to your document as a watermark. Choose one of the preset Watermarks, or use a bitmap file that you have created. Check Use Watermark, and then click the Settings... button.

Watermark Settings

- Bring To Front
  This option will overlay the selected characters or image onto your printed document.

- In Outline Text
  Check In Outline Text if you only want to print an outline of a text watermark.

- Custom Settings
  Print one watermark on the first page and another watermark on the following pages.

- Edit Watermark
  Click the Add button to add the watermark settings, and then choose Use Text or Use Bitmap File in Watermark Style.
• **Title**
  Enter an appropriate title for the watermark.

• **Text**
  Enter your Watermark Text into the **Text** box, and then choose the **Font**, **Style**, **Size** and **Choose Colour**....

• **Bitmap**
  Enter the file name and location of your bitmap image in the **File** box, or click **Browse** to search for the file. The scaling of the bitmap image can be adjusted from 25 - 999%.

• **Position**
  Use this setting to control the position of the watermark on the page.
Header-Footer Print

When this feature is enabled, it will print the date and time on your document from your computer’s system clock and the PC login user name or the text you entered. Click Settings to customize.

ID Print
Select Login User Name to print your PC login user name. To print a different name, select Custom and type a name in the Custom text box.

Toner Save Mode
Conserve toner use with this feature. When you set Toner Save Mode to On, print appears lighter. The default setting is Off.

NOTE
We do not recommend Toner Save Mode for printing photo or greyscale images.

Secure Print
Secure documents are documents that are password protected when they are sent to the machine. Only the people who know the password will be able to print them. Since the documents are secured at the machine, you must enter the password using the control panel of the machine to print them.

To send a secured document:

1. Click Settings... from Secure Print and check Secure Print.
2. Enter your password and click OK.
3. To print a secured document, you must enter your password using the control panel of the machine (see Printing Secure data on page 98).

To delete a secured document:

You must use the control panel of the machine to delete a secured document (see Printing Secure data on page 98).
Administrator
Administrators have the authority to limit access to functions such as scaling and watermark.

**Password**
Type the password in this box.

**NOTE**
Click **Set Password...** to change the password.

**Copies Lock**
Locks the Copies selection in the Basic tab to prevent users from printing multiple copies.

**Multiple Page & Scaling Lock**
Locks the multiple page and scaling settings.

**Colour / Mono Lock**
Locks the Colour/Mono settings as Mono to prevent colour printing.

**Watermark Lock**
Locks the settings of the Watermark option to prevent changes being made.

**Header-Footer Print Lock**
Locks the settings of the Header-Footer Print option to prevent changes being made.
User Authentication

If you are restricted from PC Print by the Secure Function Lock 2.0 feature, you must set your ID and PIN in the User Authentication Settings dialog box. Click Settings in User Authentication and enter your ID and PIN. If your PC login name is registered to Secure Function Lock 2.0, you can select the Use PC Login Name check box instead of entering your ID and PIN.

More information about Secure Function Lock 2.0, see Network User's Guide

NOTE

• If you are using the machine on a network, you can click Check Print Status to see your ID information, such as the restricted features and the remaining number of pages you are allowed to print. The Authentication result dialog box will appear.

• If you are using the machine on a network, you can check the Show print status before printing check box to cause the Authentication result dialog box to open each time you print.

• If you want to enter your ID and PIN each time you print, select the Enter ID Name/PIN for each print job check box.

Other Print Options

You can set the following in Printer Function:

- Colour Calibration
- Use Reprint
- Sleep Time
- Improve Print Output
- Skip Blank Page
- Print Text in Black
Colour Calibration

The output density of each colour may vary depending on the temperature and humidity of the environment the machine is in. This setting helps you to improve colour density by letting the printer driver use the colour calibration data stored in your machine.

- **Use Calibration Data**
  If you select this check box, the printer driver will use the calibration data retrieved from the machine to set colour matching in the printer driver. This will ensure consistent print quality.

- **Get Device Data Automatically**
  If you select this check box, the printer driver will use the colour calibration data from your machine.

- **Start Colour Calibration**
  If you click this button, your machine will start the colour calibration, and then the printer driver will use the calibration data from your machine.

Use Reprint

The machine stores the print jobs sent to it in memory. You can reprint the last job without sending the data again from your computer. For more information about the Reprint function, see *Reprinting documents* on page 97.

**NOTE**

To prevent other people from printing your data using the Reprint function, deselect the **Use Reprint** check box.
Sleep Time
When the machine does not receive data for a certain period of time, it enters Sleep mode. In Sleep mode, the machine acts as though it were turned off. When you choose Printer Default, the timeout setting will be reset to the specific time set at the factory; this can be altered in the driver. Intelligent Sleep mode adjusts to the most appropriate timeout setting depending on the frequency of your machine use.

While the machine is in Sleep mode, the LCD shows Sleep, but the machine can still receive data. Receiving a print job will wake up the machine to start printing.

Improve Print Output
This feature allows you to improve a print quality problem.

■ Reduce Paper Curl
   If you choose this setting, the paper curl may be reduced.
   If you are printing only a few pages, you do not need to choose this setting. We recommend that you change the printer driver setting in Media Type to a thin setting.

NOTE
This operation will decrease the temperature of the machine’s fusing process.

■ Improve Toner Fixing
   If you choose this setting, the toner fixing capabilities may be improved. If this selection does not provide enough improvement, change the printer driver setting in Media Type to a thick setting.

NOTE
This operation will increase the temperature of the machine’s fusing process.
Skip Blank Page
If Skip Blank Page is selected, the printer driver detects blank pages and excludes them from printing.

NOTE
This option does not work when you choose the following options:
• Use Watermark
• Header-Footer Print
• N in 1 and 1 in NxB Pages in Multiple Page
• 2-sided (Manual), Booklet, Booklet (Manual) and 2-sided with Binding Offset in 2-sided / Booklet

Print Text in Black
This function enables printing all text in Black only.

NOTE
It may not work with certain characters.
Print Profiles tab

Print Profiles are editable presets designed to give you quick access to frequently used printing configurations.

- Print profile list box (1)
- Delete Profile (2)
- Always show Print Profiles tab first (3)
- Add Profile (4)
- Current print profile view (5)

1. Choose your profile from the print profile list box.
2. To display the Print Profiles tab at the front of the window every time you print, select Always show Print Profiles tab first.
3. Click OK to apply your chosen profile.

Add Profile

Click the Add Profile button to display the Add Profile dialog box. Add up to 20 new profiles with your preferred settings.

1. Enter the desired title in Name.
2. Choose an icon you want to use from the Icon list, then click OK.
3. The settings shown on the left side of the printer driver window will be saved.
Delete Profile
Click the Delete Profile button to display the Delete Profile dialog box. You can delete any of the profiles you have added.

1. Choose your profile from the print profile list box.
2. Click Delete.
3. The selected profile will be deleted.
Device Settings tab

NOTE
To access the Device Settings tab, see Accessing the printer driver settings on page 27.

The printer driver detects and displays the machine's serial number and paper size setting for the paper tray when you click the Auto Detect button.

■ Serial No. (1)
By clicking Auto Detect (2), the printer driver will probe the machine and display its serial number. If it fails to receive the information, the screen will display “---------------”.

■ Paper Source Setting (3)
Click the Auto Detect (2) button to detect and display the machine's serial number and paper size setting for the paper trays.

NOTE
The Auto Detect (2) function is not available under the following machine conditions:
• The machine is turned off.
• The machine is in an error state.
• The machine is connected to the print server using a USB cable in a shared network environment.
• The cable is not connected to the machine correctly.
Support

Click **Support...** in the **Printing Preferences** dialog box.

**Brother Solutions Center (1)**

The Brother Solutions Center (http://solutions.brother.com/) is a website offering information about your Brother product including FAQs (Frequently Asked Questions), User’s Guides, driver updates and tips for using your machine.
■ Original Supplies Website (2)
  You can visit our website for original Brother supplies by clicking this button.

■ Brother CreativeCenter (3)
  You can visit our website for free and easy online solutions for business and home users by clicking this button.

■ Print Settings (4)
  This button will print the pages that show how the internal settings of the machine have been configured.

■ Check Setting... (5)
  You can check the printer driver settings.

■ About... (6)
  This button will list the printer driver files and version information.
Features in the BR-Script3 printer driver (PostScript® 3™ language emulation)

NOTE
The screens in this section are from Windows® 7. The screens on your PC may vary depending on your operating system.

Printing Preferences

NOTE
You can access the Printing Preferences dialog box by clicking Preferences... in the General tab of the Brother HL-XXXX BR-Script3 Properties dialog box.

■ Layout tab
You can change the layout by choosing the settings for Orientation, Print on Both Sides (2-sided), Page Order and Pages Per Sheet.

- Orientation
  Orientation selects the position of your document on the printed page. (Portrait, Landscape or Rotated Landscape)

- Print on Both Sides
  To do 2-sided printing, choose Flip on Short Edge or Flip on Long Edge.

- Page Order
  Specifies the order in which the pages of your document will be printed. Front to Back prints the document so that page 1 is on top of the stack. Back to Front prints the document so that page 1 is on the bottom of the stack.
• **Pages Per Sheet**
  The **Pages Per Sheet** selection can reduce the image size of a page by allowing multiple pages to be printed on one sheet of paper. Choose **Booklet** to print a document in the booklet style.

• **Draw Borders**
  To add a border, use this function.

**Paper/Quality** tab

Choose the **Paper Source**.

![Paper Source Tab](image)

**Paper Source**

Choose **Automatically Select**, **Tray1** or **Manual Feed**.

**Automatically Select**

This setting will pull paper from any paper source that has a paper size defined in the printer driver that matches your document.

**Tray1**

This setting will pull paper from Tray 1.

**Manual Feed**

This setting will pull paper from the manual feed slot. The paper size in the manual feed slot should match the size defined in the printer driver.
Secure documents are documents that are password protected when they are sent to the machine. Only the people who know the password will be able to print them. Since the documents are secured at the machine, you must enter the password using the control panel of the machine to print them.

To send a secured document:

1. Check **Secure Print**.
2. Enter your password and click **OK**.
3. To print the secured document, you must enter your password using the control panel of the machine (see *Printing Secure data* on page 98).

To delete a secured document:

You must use the control panel of the machine to delete a secured document (see *Printing Secure data* on page 98).
Advanced options

Access the Advanced options by clicking the Advanced... button on the Layout tab or Paper/Quality tab.

1. Choose the Paper Size and Copy Count (1).
   - **Paper Size**
     From the drop-down box choose the Paper Size you are using.
   - **Copy Count**
     The copy selection sets the number of copies that will be printed.

2. Set the Image Colour Management, Scaling and TrueType Font settings (2).
   - **Image Colour Management**
     Specifies how to print your colour graphics.
     - If you don’t want to enable Image Color Management, click ICM Disabled.
     - If you want the calculations for colour matching to be performed on the host computer before it sends the document to the machine, click ICM Handled by Host System.
     - If you want the calculations for colour matching to be performed on your machine, click ICM Handled by Printer using printer calibration.
   - **Scaling**
     Specifies whether to reduce or enlarge documents, and by what percentage.
   - **TrueType Font**
     Specifies the TrueType font options. Click Substitute with Device Font (the default) to use equivalent printer fonts for printing documents that contain TrueType fonts. This will permit faster printing; however, you might lose special characters not supported by the printer font. Click Download as Softfont to download TrueType fonts for printing instead of using printer fonts.
3 Change settings by choosing a setting in the **Printer Features** list (3):

![Printer Features window]

- **Print Quality**
  - Choose one of the following print quality settings.
    - **Normal (600 x 600 dpi)**
      600 dpi class. Recommended for ordinary printing. Good print quality with good print speed.
    - **Fine (2400 dpi class)**
      2400 dpi class. The finest print mode. Use this mode to print precise images such as photographs. Since the print data is much larger than in Normal mode, processing time, data transfer time, and print time will be longer.

- **Media Type**
  - You can use the following types of media in your machine. For the best print quality, select the type of media you are using.
    - Plain Paper
    - Thin Paper
    - Thick Paper
    - Thicker Paper
    - Bond Paper
    - Envelopes
    - Env. Thick
    - Env. Thin
    - Recycled Paper
    - Label
    - Glossy Paper
Toner Save Mode
Conserve toner use with this feature. When you set **Toner Save Mode** to **On**, print appears lighter. The default setting is **Off**.

**NOTE**
We do not recommend **Toner Save Mode** for printing Photo or greyscale images.

Sleep Time [Min.]
When the machine does not receive data for a certain period of time, it enters Sleep mode. In Sleep mode, the machine acts as though it were turned off. When you choose Printer Default, the timeout setting will be reset to the specific time set at the factory; this can be altered in the driver. Intelligent Sleep mode adjusts to the most appropriate timeout setting depending on the frequency of your machine use.

While the machine is in Sleep mode, the LCD shows **Sleep**, but the machine can still receive data. Receiving a print job will wake up the machine to start printing.

Colour / Mono
Choose the colour mode:

- **Auto**
  The machine checks the content of your documents for colour. If colour is detected, it prints in colour. If no colour content is detected, it prints in monochrome. The total print speed may become slower.

- **Colour**
  The device will print all pages in full colour mode.

- **Mono**
  Selecting Mono mode prints your documents in greyscale.

**NOTE**
- Sometimes a document can contain colour information even if it appears to be monochrome (for example, grey areas can actually be made from a combination of colours).
- If either the Cyan, Magenta or Yellow toner reaches the end of its life while printing a colour document, the print job cannot be completed. You can choose to start the print job again in Mono mode, as long as black toner is available.

Colour Mode
The following options are available in Colour Matching mode:

- **Normal**
  This is the Default colour mode.

- **Vivid**
  The colour of all elements are adjusted to become a more vivid colour.

- **None**
- **Improve Grey Colour**  
  You can improve the image of a shaded area.

- **Enhance Black Printing**  
  If a black graphic does not print correctly, choose this setting.

- **Halftone Screen Lock**  
  Stops other applications from modifying the Halftone settings. The default setting is **On**.

- **High Quality Image Printing**  
  You can get high quality image printing. If you set **High Quality Image Printing** to **On**, the print speed will be slower.

- **Improve Print Output**  
  This feature allows you to improve a print quality problem.
  
  - **Reduce Paper Curl**  
    If you choose this setting, the paper curl may be reduced. If you are printing only a few pages, you do not need to choose this setting. We recommend that you change the printer driver setting in **Media Type** to a thin setting.

  **NOTE**  
  This operation will decrease the temperature of the machine’s fusing process.

  - **Improve Toner Fixing**  
    If you choose this setting, the toner fixing capabilities may be improved. If this selection does not provide enough improvement, change the printer driver setting in **Media Type** to a thick setting.

  **NOTE**  
  This operation will increase the temperature of the machine’s fusing process.
Ports tab

To change the port where your machine is connected or the path to the network machine you are using, choose or add the port you want to use.
Uninstalling the printer driver

Uninstall the printer driver that you have installed with the following steps.

**NOTE**

- **UnInstall** is not available if you originally installed the printer driver from the Windows **Add a printer** function.

- After uninstalling, we recommend that you restart your computer to remove files that were in use during the uninstall.

1. Click the **Start** button, point to **All Programs, Brother**, and then to your machine name.
2. Click **UnInstall**.
3. Follow the instructions on the screen.
**Status Monitor**

The **Status Monitor** utility is a configurable software tool for monitoring the status of one or more devices; it allows you to get immediate notification of error messages such as paper empty, paper jam or toner replacement required.

![Status Monitor](image)

Check the device status at any time by double-clicking the icon in the tasktray or by choosing **Status Monitor** located in **Start/All Programs/Brother/HL-XXXX** on your computer.

*(Windows® 7 / Windows® 8)*

If you have selected the **Enable Status Monitor on startup** check box during installation, you will find the button or **Status Monitor** icon on the taskbar.

To show the **Status Monitor** icon on your taskbar, click the button. The **Status Monitor** icon will appear in the small window. Then drag the icon to the taskbar.

Click the Troubleshooting button to access the troubleshooting website.

If the toner level is low or there is a problem with the toner cartridge, the following icons will appear.

<table>
<thead>
<tr>
<th>Icon</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>![Icon]</td>
<td>The toner level is low.</td>
</tr>
<tr>
<td>![Icon]</td>
<td>The toner cartridge is empty.</td>
</tr>
</tbody>
</table>

**NOTE**

- For more information about using the Status Monitor software, right-click the **Status Monitor** icon and choose **Help**.
- The automatic software update feature is active when the status monitor feature is active.
**Monitoring the machine’s status**

Once you start up your computer, the Brother Status Monitor icon appears on the tasktray.

<table>
<thead>
<tr>
<th>Icon</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="image" alt="Green Icon" /></td>
<td>A green icon indicates the normal stand-by condition.</td>
</tr>
<tr>
<td><img src="image" alt="Yellow Icon" /></td>
<td>A yellow icon indicates a warning.</td>
</tr>
<tr>
<td><img src="image" alt="Red Icon" /></td>
<td>A red icon indicates an error has occurred.</td>
</tr>
<tr>
<td><img src="image" alt="Grey Icon" /></td>
<td>A grey icon indicates the offline condition.</td>
</tr>
</tbody>
</table>

The **Status Monitor** can be displayed in the tasktray or on the desktop of your computer.

**Popup on Error**

**Popup on Error** lets you know if there is a problem with a device that your computer is monitoring. The default setting is On.

To turn off **Popup on Error**, right-click the **Brother Status Monitor** icon or window and deselect the **Popup on Error** check box.

**NOTE**

Even if **Popup on Error** is turned off, you can check the machine’s status at any time by displaying the **Status Monitor**.
Macintosh

Features in the printer driver (Macintosh)

This machine supports Mac OS X v10.6.8, 10.7.x, 10.8.x.

NOTE
The screens in this section are from OS X v10.7.x. The screens on your Macintosh will vary depending on your operating system version.

Choosing page setup options

Select the Paper Size, Orientation and Scale.

1. From an application such as TextEdit, click File, then Page Setup. Make sure Brother HL-XXXX (where XXXX is your model name.) is chosen in the Format For pop-up menu. Select change the settings for Paper Size, Orientation and Scale, then click OK.
2 From an application such as TextEdit, click **File**, then **Print** to start printing.

   (For Mac OS X v10.6.8)
   For more page setup options, click the disclosure triangle beside the Printer pop-up menu.

---

**NOTE**

Save the current settings as a preset by choosing **Save As** from the **Presets** drop-down list.
(For OS X v10.7.x and 10.8.x)
For more page setup options, click the **Show Details** button.

**NOTE**
Save the current settings as a preset by choosing **Save Current Settings as Preset**... from the **Presets** drop-down list.
Choosing printing options
To control special printing features, choose **Print Settings** from the Print dialog box. For the details of available options, see the following descriptions of each option.

Cover Page
You can choose the following cover page settings:

- **Print Cover Page**
  To add a cover page to your document, use this function.

- **Cover Page Type**
  Choose a template for the cover page.

- **Billing Info**
  To add the billing information to the cover page, enter text in the **Billing Info** text box.
Layout

- **Pages per Sheet**
  The *Pages per Sheet* selection can reduce the image size of a page by allowing multiple pages to be printed on one sheet of paper.

- **Layout Direction**
  When you specify the pages per sheet, you can also specify the direction of the layout.

- **Border**
  To add a border, use this function.

- **Two-Sided**
  See *2-sided Printing* on page 71.

- **Reverse page orientation**
  Select *Reverse page orientation* to rotate the page 180 degrees.

- **Flip horizontally**
  Select *Flip horizontally* to print the page as a reflection flipped left-to-right.
Secure Print

Secure documents are documents that are password protected when they are sent to the machine. Only the people who know the password will be able to print them. Since the documents are secured at the machine, you must enter the password using the control panel of the machine to print them.

To send a secured document:

1. Select Secure Print.
2. Enter your password, user name and job name and then click Print.
3. To print a secured document, you must enter your password using the control panel of the machine (see Printing Secure data on page 98).

To delete a secured document, you must use the control panel of the machine to delete it (see Printing Secure data on page 98).
Print Settings
Choose your settings in the Print Settings list:

- Media Type
  Select one of the following media types:
  - Plain Paper
  - Thin Paper
  - Thick Paper
  - Thicker Paper
  - Bond Paper
  - Envelopes
  - Env. Thick
  - Env. Thin
  - Recycled Paper
  - Label
  - Glossy Paper

- Print Quality
  Choose one of the following print quality settings:
  - Normal
    600 dpi class. Recommended for ordinary printing. Good print quality with good print speed.
  - Fine
    2400 dpi class. The finest print mode. Use this mode to print precise images such as photographs. Since the print data is much larger than in Normal mode, processing time, data transfer time, and printing time will be longer.
NOTE
The print speed will change depending on the print quality setting you choose. Higher print quality takes longer to print, while lower print quality takes less time to print.

Color / Mono
Choose the appropriate Colour/Mono setting:

• Auto
  The machine checks the content of your documents for colour. If colour is detected, it prints in colour. If no colour content is detected, it prints in monochrome. The total print speed may become slower.

• Color
  When your document contains colour and you want to print it in colour, select this mode.

• Mono
  Select this mode if your document has only black and greyscale text and/or objects. Mono mode makes the print processing speed faster than colour mode. If your document contains colour, selecting Mono mode prints your document in 256 levels of grey.

NOTE
• Sometimes a document can contain colour information even if it appears to be monochrome (for example, grey areas can actually be made from a combination of colours).
• If either the Cyan, Magenta or Yellow toner cartridge reaches the end of its life while printing a colour document, the print job cannot be completed. You can choose to start the print job again in Mono mode, as long as black toner is available.

Paper Source
Choose Auto Select, Tray1 or Manual.
**Advanced print settings**

When you click the triangle mark (►) beside **Advanced**, the advanced print settings appear.

- **Toner Save Mode**
  Conserve toner use with this feature. When you set **Toner Save Mode** to On, print appears lighter. The default setting is Off.

**NOTE**
We do not recommend **Toner Save Mode** for printing Photo or greyscale images.
**Improve Print Output**

This feature allows you to improve a print quality problem.

- **Reduce Paper Curl**
  
  If you choose this setting, the paper curl may be reduced.
  
  If you are printing only a few pages, you do not need to choose this setting. We recommend that you change the printer driver setting in **Media Type** to a thin setting.

**NOTE**

This operation will decrease the temperature of the machine’s fusing process.

- **Improve Toner Fixing**

  If you choose this setting, the toner fixing capabilities may be improved. If this selection does not provide enough improvement, change the printer driver setting in **Media Type** to a thick setting.

**NOTE**

This operation will increase the temperature of the machine’s fusing process.

**Sleep Time**

When the machine does not receive data for a certain period of time, it enters Sleep mode. In Sleep mode, the machine acts as though it were turned off. If you choose **Printer Default**, the timeout setting will be reset to the specific time set at the factory; this can be altered in the driver. To change the Sleep Time, choose **Manual** and then enter the time in the text box on the driver.

While the machine is in Sleep mode, the LCD shows **Sleep**, but the machine can still receive data. Receiving a print job will wake up the machine to start printing.

**Other Print Options**

- **Skip Blank Page**

  If **Skip Blank Page** is selected, the printer driver detects blank pages and excludes them from printing.

**Color Settings**

**Color Mode**

The following options are available in Color Matching mode:

- **Normal**
  
  This is the Default colour mode.

- **Vivid**

  The colour of all elements are adjusted to become a more vivid colour.

- **None**

**Improve Gray Color**

You can improve the image of a shaded area.

**Enhance Black Printing**

If a black graphic does not print correctly, choose this setting.
2-sided Printing

- **Automatic 2-sided Printing** (HL-3150CDW and HL-3170CDW)
  Select **Layout**.
  Choose **Long-Edge binding** or **Short-Edge binding** in **Two-Sided**.

- **Manual 2-sided Printing**
  Select **Paper Handling**.
  - Choose **Even Only** and **Print**. Reload the printed paper into the tray (blank side face down in Tray 1 or Manual Feed Slot). Choose **Odd Only** and **Print**.
Features in the BR-Script3 printer driver (PostScript® 3™ language emulation)

This section introduces the distinctive operations of the BR-Script3 printer driver. For the basic operations of the BR-Script3 printer driver, see Features in the printer driver (Macintosh) on page 61 for Page Setup, Cover Page, Paper Source and Layout.

Choosing printing options

To control special print features, choose Printer Features from the Print dialog box.
Printer Features
Feature Sets: General 1

- Print Quality
  Select one of the following resolutions from the Print Quality drop-down list.
  - Normal
    600×600 dpi. Recommended for ordinary printing. Good print quality with reasonable print speeds.
  - Fine
    2400 dpi class. The finest print mode. Use this mode to print precise images such as photographs. Since the print data is much larger than in Normal mode, processing time / data transfer time and print time will be longer.

- Media Type
  Select the media type that matches the type of paper you loaded in the machine.
  - Plain Paper
  - Thin Paper
  - Thick Paper
  - Thicker Paper
  - Bond Paper
  - Envelopes
  - Env. Thick
  - Env. Thin
  - Recycled Paper
  - Label
  - Glossy Paper
- **Toner Save Mode**
  You can conserve toner using this feature. When you check **Toner Save Mode**, your print appears lighter. The default setting is Off.

**NOTE**
We do not recommend **Toner Save Mode** for printing Photo or greyscale images.

- **Sleep Time [Min.]**
  When the machine does not receive data for a certain period of time, it enters Sleep mode. In Sleep mode, the machine acts as though it were turned off. If you choose **Printer Default**, the timeout setting will be reset to the specific time set at the factory; this can be altered in the driver. To change the Sleep Time, choose 2, 10 or 30.
  
  While the machine is in Sleep mode, the LCD shows **Sleep**, but the machine can still receive data. Receiving a print job will wake up the machine to start printing.

- **Color / Mono**
  Choose the appropriate colour mode:
  
  - **Auto**
    The machine checks the content of your documents for colour. If colour is detected, it prints in colour. If no colour content is detected, it prints in monochrome. The total print speed may become slower.
  
  - **Color**
    The device will print all pages in full colour mode.
  
  - **Mono**
    Selecting Mono mode prints your documents in greyscale.

**NOTE**
- Sometimes a document can contain colour information even if it appears to be monochrome (for example, grey areas can actually be made from a combination of colours).
- If either the Cyan, Magenta or Yellow toner cartridge reaches the end of its life while printing a colour document, the print job cannot be completed. You can choose to start the print job again in Mono mode, as long as black toner is available.

- **Color Mode**
  The following options are available in Colour Matching mode:
  
  - **Normal**
    This is the Default colour mode.
  
  - **Vivid**
    The colour of all elements are adjusted to become a more vivid colour.
  
  - **None**
Feature Sets: General 2

- **Improve Gray Colour**
  
  You can improve the image of a shaded area.

- **Enhance Black Printing**
  
  If a black graphic does not print correctly, choose this setting.

- **Halftone Screen Lock**
  
  Stops other applications from modifying the Halftone settings. The Default setting is **On**.

- **High Quality Image Printing**
  
  You can increase the quality of the printed image. If you set **High Quality Image Printing** to **On**, the print speed will be slower.

- **Improve Print Output**
  
  This feature allows you to improve a print quality problem.

  - **Reduce Paper Curl**
    
    If you choose this setting, the paper curl may be reduced.

    If you are printing only a few pages, you do not need to choose this setting. We recommend that you change the printer driver setting in **Media Type** to a thin setting.

  **NOTE**
  
  This operation will decrease the temperature of the machine's fusing process.

  - **Improve Toner Fixing**
    
    If you choose this setting, the toner fixing capabilities may be improved. If this selection does not provide enough improvement, change the printer driver setting in **Media Type** to a thick setting.

  **NOTE**
  
  This operation will increase the temperature of the machine's fusing process.
**Secure Print**

Secure documents are documents that are password protected when they are sent to the machine. Only the people who know the password will be able to print them. Since the documents are secured at the machine, you must enter the password using the control panel of the machine to print them.

To create a secure print job, select **Secure Print** and select the **Secure Print** check box. Enter a password in the **Password** text box and click **Print**.

(For more information about Secure Print, See *Printing Secure data* on page 98.)
Removing the printer driver

1. Log in as an ‘Administrator’.

2. From the Apple menu, choose **System Preferences**. Click **Print & Fax** or **Print & Scan** ¹, then choose the printer you want to remove and remove it by clicking the - button.

3. Click **Delete Printer**.

¹ **Print & Scan** for OS X v10.7.x and 10.8.x users
Status Monitor

The Status Monitor utility is a configurable software tool for monitoring the status of the machine; it lets you see error messages such as paper empty or paper jam at pre-set update intervals and access the Web Based Management utility. Check the device status by launching Brother Status Monitor following these steps:

For Mac OS X v10.6.8

1. Run **System Preferences**, select **Print & Fax**, then choose the machine.
2. Click **Options & Supplies....** Select the **Utility** tab, and then click **Open Printer Utility**. The Status Monitor will start up.

For OS X v10.7.x and 10.8.x

1. Run **System Preferences**, select **Print & Scan**, then choose the machine.
2. Click **Options & Supplies....** Select the **Utility** tab, and then click **Open Printer Utility**. The Status Monitor will start up.

Updating the machine’s status

If you want the latest machine status while the Status Monitor window is open, click the Refresh icon.

If the toner level is low or there is a problem with the toner cartridge, the following icons will appear.

<table>
<thead>
<tr>
<th>Icon</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>![Warning]</td>
<td>The toner level is low.</td>
</tr>
<tr>
<td>![Error]</td>
<td>The toner cartridge is empty.</td>
</tr>
</tbody>
</table>

You can set the interval at which the software will update the machine status information. Go to the menu bar, **Brother Status Monitor** and choose **Preferences**.
Hiding or showing the window
After starting the Status Monitor, you can hide or show the window. To hide the window, go to the menu bar, Brother Status Monitor and choose Hide Status Monitor. To show the window, click the Brother Status Monitor icon in the dock.

Quitting the window
Click Brother Status Monitor in the menu bar and then choose Quit Status Monitor from the pop-up menu.

Web Based Management (Network Connection only)
Access the Web Based Management System by clicking the machine icon on the Status Monitor screen. A standard Web Browser can be used to manage your machine using HTTP (Hyper Text Transfer Protocol). For information about the Web Based Management System, see Network User's Guide: Web Based Management
Software

Software for networks

For information about network utility software, see Network User's Guide: *Network features*
Control panel

This machine has one Liquid Crystal Display (LCD), eight keys and two Light Emitting Diodes (LEDs) on the control panel. The LCD is a 16 character single-line display.

Control panel overview

The illustration is based on HL-3170CDW.

1 LCD
Displays messages to help you set up and use your machine.
A four level indicator shows the wireless signal strength if you are using a wireless connection.

```
0 1 2 3 4 5 6 7 Max
```

2 Power On/Off
You can turn the machine on and off.
Press and hold down \( \text{\textcircled{\textbf{\textup{on}}}} \) to turn the machine on.
Press and hold down \( \text{\textcircled{\textbf{\textup{off}}}} \) to turn the machine off. The screen will show Shutting Down and will stay on for a few seconds before going off.
3 Menu Keys:

▲ or ▼ ( + or -)
Press to scroll through the menus and options.
Press to enter numbers and increase the number. You can enter numbers in two ways. Press ▲ or ▼ to move up or down one number at a time, or hold down ▲ or ▼ to move faster. When you see the number you want, press OK.

OK
Lets you store your settings in the machine. After changing a setting, the machine returns to the previous menu level.

Back
Go back one level in the menu structure.
Lets you choose the previous digit while setting numbers.

4 Secure
You can print data saved in the memory when you enter your four-digit password. (For more information, see Printing Secure data on page 98.)

5 Go
You can clear some error messages by pressing Go. To clear all other errors follow the control panel instructions or see Error and maintenance messages on page 157.
Pause and continue printing.
Lets you print any data remaining in the machine’s memory.
Lets you choose the displayed option in the last menu level. After a setting is changed, the machine returns to Ready mode.
Switch to Reprint mode by pressing this key and holding it down for about 4 seconds. (For details, see Reprinting documents on page 97.)

6 Cancel
Lets you cancel the current setting.
Cancels a programmed print job and clears it from the machine’s memory. To cancel multiple print jobs, hold down this key until the LCD shows Cancel All Jobs.

7 Error LED
Blinks in orange when the LCD displays an error or an important status message. (For details, see LED indications on page 83.)

8 Data LED
The LED will blink depending on the machine status. (For details, see LED indications on page 83.)
General Information

LED indications

The LEDs are lights that show the machine's status.

Data LED (Green)

<table>
<thead>
<tr>
<th>LED indication</th>
<th>Meaning</th>
</tr>
</thead>
<tbody>
<tr>
<td>On</td>
<td>Data is in the machine's memory.</td>
</tr>
<tr>
<td>Blinking</td>
<td>The machine is receiving or processing data.</td>
</tr>
<tr>
<td>Off</td>
<td>There is no remaining data in the memory.</td>
</tr>
</tbody>
</table>

Error LED (Orange)

<table>
<thead>
<tr>
<th>LED indication</th>
<th>Meaning</th>
</tr>
</thead>
<tbody>
<tr>
<td>Blinking</td>
<td>There is a problem with the machine.</td>
</tr>
<tr>
<td>Off</td>
<td>There is no problem with the machine.</td>
</tr>
</tbody>
</table>

Machine status messages

The following table shows the machine's status messages during normal operation:

<table>
<thead>
<tr>
<th>Machine Status Message</th>
<th>Meaning</th>
</tr>
</thead>
<tbody>
<tr>
<td>Cooling Down</td>
<td>The machine is cooling down.</td>
</tr>
<tr>
<td>Cancel Printing</td>
<td>The machine is canceling the job.</td>
</tr>
<tr>
<td>Cancel All Jobs</td>
<td></td>
</tr>
<tr>
<td>Calibrate</td>
<td>The machine is calibrating the colour density.</td>
</tr>
<tr>
<td>Ignore Data</td>
<td>The machine is ignoring data processed using the PS driver.</td>
</tr>
<tr>
<td>Pause</td>
<td>The machine has suspended its operations. Press Go to start the machine again.</td>
</tr>
<tr>
<td>Please Wait</td>
<td>The machine is warming up.</td>
</tr>
<tr>
<td></td>
<td>The machine is carrying out the calibration process.</td>
</tr>
<tr>
<td>Printing</td>
<td>The machine is printing.</td>
</tr>
<tr>
<td>Ready</td>
<td>The machine is ready to print.</td>
</tr>
<tr>
<td>Sleep</td>
<td>In Sleep mode (power save mode) the machine acts as though it were turned off, but the machine can still receive data. Receiving a print job will wake up the machine to start printing.</td>
</tr>
<tr>
<td>Deep Sleep</td>
<td>In Deep Sleep mode (reducing more power consumption than Sleep mode), the machine acts as though it were turned off. If the machine does not receive data for a certain length of time while it is in Sleep mode, it enters Deep Sleep mode. The machine will wake up when the machine receives a print job.</td>

<td>The machine is adjusting the print position.</td>
</tr>
</tbody>
</table>
Menu table

How to access the menu mode

1. Press any of the Menu keys (▲, ▼, OK or Back) to take the machine offline.
2. Scroll through each menu level by pressing ▲ or ▼ for the direction you want.
3. Press OK when the option you want appears on the LCD. The LCD will then show the next menu level.
4. Press ▲ or ▼ to scroll to your next menu selection.
5. Press OK or Go.

When you have finished setting an option, the LCD will show Accepted.

Menu table

There are seven menus. For more information about the selections available in each menu, see the following tables.

If no control panel operations are performed for 30 seconds, the LCD returns to Ready mode.

NOTE

The control panel LCD names are as follows:

• Standard paper tray: Tray1
• Manual feed slot: Manual Feed

**Network Reset**

Restores all network settings of the internal print server to the factory default.

---

The factory settings are shown in Bold with an asterisk.

---

1. **## means a number within the range of 000 to 255. On connection to the network, if the machine's 'Boot Method' is 'Auto' the machine will attempt to set the IP address and Subnet Mask from a boot server such as DHCP or BOOTP. If a boot server cannot be found, an APIPA IP address will be allocated, such as 169.254.[001-254].[000-255]. If the 'Boot Method' of the machine is set to 'Static' you will need to manually enter an IP address from the machine's control panel.**

2. **HL-3150CDW and HL-3170CDW only**

Reprinting documents

Reprinting the last job

Reprint the data from the last print job without sending it from the computer again.

NOTE

• The Reprint function is not available when Secure Function Lock 2.0 is On. (For more information about Secure Function Lock 2.0, see Network User’s Guide: Secure Function Lock 2.0)

• If the machine does not have enough memory to spool the print job, it will not print the document.

• If you wait 30 seconds to continue the control panel operation, the Reprint setting will close and the LCD will return to Ready mode.

• For more information about the settings in the printer driver, see Advanced tab on page 36.

• After you turn the machine off, the last print job will be deleted.

How to reprint the last job

1. Make sure that the Reprint setting is On by using the keys on the control panel to enter the General Setup menu.

NOTE

If you print with the Windows® printer driver we have supplied with the machine, the settings for Use Reprint in the printer driver will take priority over the settings made on the control panel. Select the Use Reprint check box in the printer driver. (For more information, see Use Reprint on page 42.)

2. Press Go for about 4 seconds and then release it.

3. Make sure that the LCD shows Reprint: Print. Press OK.

4. Press ▲ or ▼ to enter the number of copies. Choose between 1 and 999 Copies.

5. Press OK or Go.

NOTE

To delete the last print job from the memory, replace steps 3 to 5 with the following step:

• Press ▲ or ▼ to choose Reprint: Delete. Press OK.

The LCD will show Deleted, and then the machine will return to Ready mode.
Printing Secure data

Secure data

Secure documents are protected by a password and only those people who know the password will be able to print the document. The machine will not print the document when you send it for printing. To print the document, you must use the control panel of the machine (with the password). Secure data will be deleted after it is printed once.

When the area to spool data is full, the LCD shows Out of Memory. Press Cancel to return to Ready mode.

To delete the spooled data, carry out this operation using the control panel.

NOTE

• Secure data will be deleted when the machine is turned off.

• If you wait 30 seconds to continue the control panel operation, the Secure Print setting will close and the LCD will return to Ready mode.

• For more information about the settings in the printer driver and how to create secure data, see Secure Print on page 39 (For Windows® printer driver), Advanced options on page 53 (For Windows® BR-Script printer driver), Secure Print on page 66 (For Macintosh printer driver) or Secure Print on page 76 (For Macintosh BR-Script printer driver).

How to print Secure data

1. Press Secure.
2. Press ▲ or ▼ to choose the user name. Press OK.
3. Press ▲ or ▼ to choose the job. Press OK.
4. Press ▲ or ▼ to enter your password. Press OK.
5. Press ▲ or ▼ to choose Print. Press OK.
6. Press ▲ or ▼ to enter the number of copies you want.
7. Press OK or Go.

NOTE

To delete the secure print data from the memory, replace steps 6 to 7 with the following step:

• Press ▲ or ▼ to choose Delete. Press OK.

The LCD will show Deleted, and then the machine will return to Ready mode.
Security features

Secure Function Lock 2.0

Secure Function Lock lets you restrict Public access to the Print functions. This feature also prevents users from changing the Default settings of the machine by limiting access to the Menu settings. Before using the security features you must first enter an administrator password. The administrator can set up restrictions for individual users along with a user password. Restricted users must enter the user password to use the machine. Secure Function Lock can be set by using Web Based Management and BRAdmin Professional 3 (Windows® only) (see Network User's Guide).

1 The Print functions include print jobs via AirPrint, Google Cloud Print and Brother iPrint&Scan.

NOTE

• Make a careful note of your password. If you forget it, you will have to reset the password stored in the machine. For information about how to reset the password call Brother customer service or your local Brother dealer.

• Only administrators can set limitations and make changes for each user.

Setting Lock

Setting Lock lets you set a password to stop other people from accidentally changing your machine settings. Make a careful note of your password. If you forget it, you will have to reset the passwords stored in the machine. Please call your administrator, Brother customer service or your local Brother dealer.

While Setting Lock is On, you cannot change the following settings without a password:

- Paper Tray
- General Setup
- Print Menu (except Table Print)
- Network (except Status, Mac Address, Status Info. and Device Info. of Wi-Fi Direct)
- Reset Menu

Setting up the password

1 Press ▲ or ▼ to choose General Setup. Press OK.
2 Press ▲ or ▼ to choose Setting Lock. Press OK.
3 Enter a four-digit number for the password. To enter each digit, press ▲ or ▼ to choose a number and then press OK.
4 Re-enter the password when the LCD shows Verify:.
Changing your Setting Lock password

Turn Setting Lock off before you change the password (see Turning Setting Lock on/off on page 100).

1. Press ▲ or ▼ to choose General Setup. Press OK.
2. Press ▲ or ▼ to choose Setting Lock. Press OK.
3. Press ▲ or ▼ to choose Set Password. Press OK.
4. Enter the registered four-digit password. To enter each digit, press ▲ or ▼ to choose a number and then press OK.
5. Enter a four-digit number for the new password. To enter each digit, press ▲ or ▼ to choose a number and then press OK.
6. Re-enter the password when the LCD shows Verify:.

Turning Setting Lock on/off

If you enter the wrong password when following the instructions below, the LCD will show Wrong Password. Re-enter the correct password.

Turning Setting Lock on

1. Press ▲ or ▼ to choose General Setup. Press OK.
2. Press ▲ or ▼ to choose Setting Lock. Press OK.
3. Press OK when the LCD shows On.
4. Enter the registered four-digit password. To enter each digit, press ▲ or ▼ to choose a number and then press OK.

Turning Setting Lock off

1. Press ▲ or ▼ to choose General Setup. Press OK.
2. Press ▲ or ▼ to choose Setting Lock. Press OK.
3. Enter the registered four-digit password. To enter each digit, press ▲ or ▼ to choose a number and then press OK.
4. Press OK or Go when the LCD shows Off.
Ecology features

Toner Save

Save toner by using this feature. When you set Toner Save to On, the print appears lighter. The default setting is Off.

1. Press ▲ or ▼ to choose General Setup. Press OK.
2. Press ▲ or ▼ to choose Ecology. Press OK.
3. Press ▲ or ▼ to choose Toner Save. Press OK.
4. Press ▲ or ▼ to choose On or Off. Press OK or Go.

Sleep Time

The Sleep mode setting can reduce power consumption. When the machine is in Sleep mode (Power Save mode) it acts as though it were turned off. The machine will wake up and start printing when it receives a print job.

Choose how long the machine must be idle before it goes into Sleep mode. When the machine receives a print file or document, the timer will be reset. The default setting is 3 minutes. While the machine is in Sleep mode the LCD will show Sleep.

1. Press ▲ or ▼ to choose General Setup. Press OK.
2. Press ▲ or ▼ to choose Ecology. Press OK.
3. Press ▲ or ▼ to choose Sleep Time. Press OK.
4. Press ▲ or ▼ to enter the length of time the machine will remain idle before entering Sleep mode. Press OK or Go.

Deep Sleep mode

If the machine is in Sleep mode and does not receive any jobs for a certain length of time, the machine will go into Deep Sleep mode and the LCD will show Deep Sleep. Deep Sleep mode uses less power than Sleep mode. The machine will wake up, when the machine receives a print job.
Auto Power Off

If the machine is in Deep Sleep mode for a certain length of time, it will go into Power Off mode automatically. To start printing, press and hold down \( \text{ } \) on the control panel and then send the print data.

You can choose how long the machine must be in Deep Sleep mode before it goes into Auto Power Off mode, by following these steps:

1. Press \( \uparrow \) or \( \downarrow \) to choose General Setup. Press OK.
2. Press \( \uparrow \) or \( \downarrow \) to choose Ecology. Press OK.
3. Press \( \uparrow \) or \( \downarrow \) to choose Auto Power Off. Press OK.
4. Press \( \uparrow \) or \( \downarrow \) to choose Off, 1 hour, 2 hours, 4 hours or 8 hours. Press OK or Go.

NOTE
The machine does not go into Power Off when the machine is connected to a wired or wireless network or has secure print data in the memory.
Colour Correction

Frequency

Set how often the colour correction (Colour Calibration and Auto Registration) occurs. The factory setting is Normal. The colour correction process consumes some amount of the toner.

1. Press ▲ or ▼ to choose Color Correction. Press OK.
2. Press ▲ or ▼ to choose Frequency. Press OK.
3. Press ▲ or ▼ to choose Normal, Low or Off. Press OK.

Colour Calibration

The output density for each colour may vary depending on the machine’s environment, such as temperature and humidity. Calibration helps you to improve the colour density.

NOTE

• If you are using the Windows® printer driver, the driver will get the calibration data automatically if both Use Calibration Data and Get Device Data Automatically check boxes are selected. The default settings are on. See Colour Calibration on page 42.

• If you are using the Macintosh printer driver, you must perform the calibration using the Status Monitor. Turn on the Status Monitor, and then select Color Calibration from the Control menu. See Status Monitor on page 78 for how to turn on the Status Monitor.

Calibration

1. Press ▲ or ▼ to choose Color Correction. Press OK.
2. Press ▲ or ▼ to choose Color Calibration. Press OK.
3. Press ▲ or ▼ to choose Calibrate. Press OK.
4. Press ▲ to choose Yes. The machine performs the Calibration, and then returns to Ready mode.

Reset

Reset the calibration parameters back to those set at the factory.

1. Press ▲ or ▼ to choose Color Correction. Press OK.
2. Press ▲ or ▼ to choose Color Calibration. Press OK.
3. Press ▲ or ▼ to choose Reset. Press OK.
4. Press ▲ to choose Reset. The LCD shows Accepted, and then returns to Ready mode.
Auto Registration

Adjust the print position of each colour automatically.
If solid areas of colour or images have cyan, magenta or yellow fringes, use the auto-registration feature to correct the problem.

1. Press ▲ or ▼ to choose Color Correction. Press OK.
2. Press ▲ or ▼ to choose Auto Regist.. Press OK.
3. Press OK to select Registration.
4. Press ▲ to choose Yes.
   The machine performs the Registration, and then returns to Ready mode.
Replacing consumable items

You will need to replace the consumable items when the machine indicates that the life of the consumable is over. You can replace the following consumable items by yourself.

Using non-Brother supplies is not recommended and may affect the print quality, hardware performance, and machine reliability.

**NOTE**

The drum unit and toner cartridge are two separate parts.

1 A4 or Letter size single-sided pages.
2 Approx. cartridge yield is declared in accordance with ISO/IEC 19798.
3 1 page per job
4 Drum life is approximate and may vary by type of use.
5 Standard toner cartridge
6 High yield toner cartridge
NOTE

- Go to [http://www.brother.com/original/index.html](http://www.brother.com/original/index.html) for instructions on how to return the used toner cartridge to the brother collection program. If you choose not to return your used toner cartridge, please discard the used toner cartridge according to local regulations, keeping it separate from domestic waste. If you have questions, call your local waste disposal office (see Product Safety Guide: *Recycling information in accordance with the WEEE (2002/96/EC) and Battery (2006/66/EC) Directives*).

- We recommend placing used consumable items on a piece of paper to prevent accidentally spilling or scattering the material inside.

- If you use paper that is not a direct equivalent for the recommended paper, the life of consumable items and machine parts may be reduced.

- The projected life for each of the toner cartridges is based on ISO/ICE 19798. Frequency of replacement will vary depending on the print volume, percentage of coverage, types of media used, and powering on/off the machine.

- Frequency of replacement consumables except toner cartridges will vary depending on the print volume, types of media used, and powering on/off the machine.
Replacing the toner cartridges

Model Name: For the model name of toner cartridges, see Replacing consumable items on page 105

The Standard toner cartridge can print approximately 2,500 pages (black) or approximately 1,400 pages (cyan, magenta, yellow). The High Yield toner cartridge can print approximately 2,200 pages (cyan, magenta, yellow). Actual page count will vary depending on your average type of document. When a toner cartridge is running low, the LCD shows Toner Low.

The toner cartridge that comes supplied with the machine will need to be replaced after approximately 1,000 pages.

1 Approx. cartridge yield is declared in accordance with ISO/IEC 19798.

NOTE

• The indication of remaining toner life will vary depending on the types of documents printed and customer’s usage.

• It is a good idea to keep a new toner cartridge ready for use when you see the Toner Low warning.

• To ensure high quality printing, we recommend that you use only Brother Original toner cartridges. When you want to buy toner cartridges, please call Brother customer service or your local Brother dealer.

• We recommend that you clean the machine when you replace the toner cartridge. See Cleaning and Checking the machine on page 139.

• DO NOT unpack the new toner cartridge until you are ready to install it.

Toner Low: X

If the LCD shows Toner Low: X, the machine has nearly run out of toner. Buy a new toner cartridge and have it ready before you get a Replace Toner message. X shows the toner colour that is near the end of its life. (BK=Black, C=Cyan, M=Magenta, Y=Yellow). To replace the toner cartridge, see Replacing the toner cartridges on page 110.

Buy a new toner cartridge and have it ready before you get a Replace Toner message.

Replace Toner

When the following message appears on the LCD, you must replace the toner cartridge:

The scrolling message on the LCD indicates which colour you must replace.

When the LCD shows Replace Toner the machine will stop printing until you replace the toner cartridge. A new Brother Original toner cartridge will reset the Replace Toner mode.
Replacing the toner cartridges

1. Make sure that the machine is turned on.
2. Open the top cover until it locks in the open position.
3 Take out the toner cartridge and drum unit assembly for the colour shown on the LCD.

**WARNING**

⚠️ HOT SURFACE

After you have just used the machine, some internal parts of the machine will be extremely hot. Wait for the machine to cool down before you touch the internal parts of the machine.
Important

- We recommend that you place the toner cartridge and drum unit assembly on a clean, flat surface with a piece of disposable paper underneath it in case you accidentally spill or scatter toner.
- To prevent damage to the machine from static electricity, DO NOT touch the electrodes shown in the illustration.

4 Push down the green lock lever and take the toner cartridge out of the drum unit.
WARNING

• DO NOT put a toner cartridge or a toner cartridge and drum unit assembly into a fire. It could explode, resulting in injuries.

• DO NOT use flammable substances, any type of spray, or an organic solvent/liquid containing alcohol or ammonia to clean the inside or outside of the machine. Doing so could cause a fire or electrical shock. Instead, use only a dry, lint-free cloth.

(See Product Safety Guide: General precautions)

IMPORTANT

• Handle the toner cartridge carefully. If toner scatters on your hands or clothes, immediately wipe or wash it off with cold water.

• To avoid print quality problems, DO NOT touch the shaded parts shown in the illustrations.

NOTE

• Be sure to seal up the used toner cartridge tightly in a bag so that toner powder does not spill out of the cartridge.

• Go to http://www.brother.com/original/index.html for instructions on how to return your used consumable items to the Brother collection program. If you choose not to return your used consumable, please discard the used consumable according to local regulations, keeping it separate from domestic waste. If you have questions, call your local waste disposal office (see Product Safety Guide: Recycling information in accordance with the WEEE (2002/96/EC) and Battery (2006/66/EC) Directives).
5 Unpack the new toner cartridge. Hold the cartridge level with both hands and gently shake it from side to side several times to spread the toner evenly inside the cartridge.

**IMPORTANT**
- DO NOT unpack the new toner cartridge until you are ready to install it. If a toner cartridge is left unpacked for a long time, the toner life will be shortened.
- If an unpacked drum unit is exposed to direct sunlight (or room light for long periods of time), the unit may be damaged.
- Brother machines are designed to work with toner of a particular specification and will work to a level of optimum performance when used with Brother Original toner cartridges. Brother cannot guarantee this optimum performance if toner or toner cartridges of other specifications are used. Brother does not therefore recommend the use of cartridges other than Brother Original cartridges with this machine, or the refilling of empty cartridges with toner from other sources. If damage is caused to the drum unit or other part of this machine as a result of the use of toner or toner cartridges other than Brother Original products due to the incompatibility or lack of suitability of those products with this machine, any repairs required as a result may not be covered by the warranty.

6 Pull off the protective cover.

**IMPORTANT**
Put the toner cartridge in the drum unit immediately after you have removed the protective cover. To prevent any degradation to the print quality, DO NOT touch the shaded parts shown in the illustrations.
Routine Maintenance

7 Put the new toner cartridge firmly into the drum unit until you hear it lock into place. If you install it correctly, the green lock lever on the drum unit will lift automatically.

NOTE
Make sure you installed the toner cartridge correctly or it may separate from the drum unit.

8 Clean the corona wire inside the drum unit by gently sliding the green tab from left to right and right to left several times.

NOTE
Be sure to return the tab to the home position (▲) (1). The arrow on the tab must be aligned with the arrow on the drum unit. If it is not, printed pages may have a vertical stripe.
9 Repeat step 3 and step 8 to clean each of three remaining corona wires.

**NOTE**
When you clean the corona wires, you do not have to remove the toner cartridge from the drum unit.

10 Slide the toner cartridge and drum unit assembly into the machine. Make sure that you match the toner cartridge colour to the same colour label on the machine.
11 Close the top cover of the machine.

**NOTE**
After replacing the toner cartridge, DO NOT turn off the machine or open the top cover until the LCD shows **Ready**.
Replacing the drum units

Model Name: DR-241CL 4 pc. Drum Set or single drum units DR-241CL-BK, DR-241CL-CMY

A new drum unit can print approximately 15,000 A4 or Letter size single-sided pages. DR-241CL Drum Set contains four drum units one Black (DR-241CL-BK) and three Colour (DR-241CL-CMY). DR-241CL-BK contains one Black drum. DR-241CL-CMY contains one Colour drum.

When a drum reaches the factory-established rotation limit corresponding to the rated page yield, the products LCD display will advise you to replace the appropriate drum(s). The product will continue to function once the drum has reached its limit; however, print quality may be severely compromised.

As the drums rotate in unison during the various stages of operation (regardless of whether toner is deposited on the page) and because damage to a single drum unit is not likely, you will need to replace all of the drums at once (unless you have replaced an individual drum [DR-241CL-BK for black and DR-241CL-CMY for Colour] for reasons other than reaching its rated life). For your convenience, Brother sells the drum units as a set of four (DR-241CL).

**IMPORTANT**

For best performance, use a Brother Original drum unit and Brother Original toner units. Printing with a third-party drum unit or toner unit may reduce not only the print quality but also the quality and life of the machine itself. Warranty coverage may not apply to problems caused by the use of a third-party drum unit or toner unit.

Drum!

The corona wires have become dirty. Clean the corona wires in the 4 drum units (see Cleaning the corona wires on page 142).

Drums End Soon

The four drum units are nearing the end of their rated life and will require replacement. We recommend you keep Brother Original drum units ready for installation. Buy a new drum unit set (DR-241CL) and have it ready before you get a Replace Drums message.

Drum End Soon: X

If only a specified drum is near the end of its life, the LCD shows the Drum End Soon: X message. The X indicates the drum unit colour that is near the end of its life. (BK=Black, C=Cyan, M=Magenta, Y=Yellow). We recommend you keep Brother Original drum units ready for installation. Buy a new drum unit DR-241CL-BK (for Black) or a DR-241CL-CMY (for either C, M, Y colours) and have it ready before you get a Replace Drums message. To replace the drum units, see Replacing the drum units on page 120.
Routine Maintenance

Replace Drums

Replace Drums

The four drum units have exceeded their rated life. Please replace each drum unit with a new one. We recommend Brother Original drum units be installed at this time.

After replacement, reset each drum counter for each drum unit replaced by following the instructions included with the new drum units.

Replace Drum: X

Replace Drum: X

If only a specified drum needs to be replaced, the LCD shows the Replace Drum: X message. The X indicates the drum unit colour that you must replace. (BK=Black, Y=Yellow, M=Magenta, C=Cyan).

Drum Stop

Drum Stop

We cannot guarantee the print quality. Please replace the drum unit with a new one. We recommend a Brother Original drum unit be installed at this time.

After replacement, reset the drum counter by following the instructions included with the new drum unit.
Replacing the drum units

**IMPORTANT**
- While removing the drum unit, handle it carefully because it may contain toner. If toner scatters on your hands or clothes, immediately wipe or wash it off with cold water.
- Every time you replace the drum unit, clean the inside of the machine (see Cleaning and Checking the machine on page 139).

When you replace a drum unit with a new one, you must reset the drum counter by completing the following steps:

1. Make sure that the machine is turned on.
2. Open the top cover until it locks in the open position.
3. Take out the toner cartridge and drum unit assembly for the colour shown on the LCD.
WARNING

HOT SURFACE

After you have just used the machine, some internal parts of the machine will be extremely hot. Wait for the machine to cool down before you touch the internal parts of the machine.

IMPORTANT

- We recommend that you place the toner cartridge and drum unit assembly on a clean, flat surface with a piece of disposable paper underneath it in case you accidentally spill or scatter toner.
- To prevent damage to the machine from static electricity, DO NOT touch the electrodes shown in the illustration.
4 Push down the green lock lever and take the toner cartridge out of the drum unit.

**WARNING**

⚠️ ⚠️ ⚠️  
- DO NOT put a toner cartridge or a toner cartridge and drum unit assembly into a fire. It could explode, resulting in injuries.
- DO NOT use flammable substances, any type of spray, or an organic solvent/liquid containing alcohol or ammonia to clean the inside or outside of the machine. Doing so could cause a fire or electrical shock. Instead, use only a dry, lint-free cloth.

(See Product Safety Guide: *General precautions*)
IMPORTANT
• Handle the toner cartridge carefully. If toner scatters on your hands or clothes, immediately wipe or wash it off with cold water.
• To avoid print quality problems, DO NOT touch the shaded parts shown in the illustrations.

<Toner cartridge>  <Drum unit>

• We recommend that you place the toner cartridge on a clean, flat, level, stable surface with a sheet of disposable paper or cloth underneath it in case you accidentally spill or scatter toner.

NOTE
• Be sure to seal up the used drum unit tightly in a bag so that toner powder does not spill out of the drum unit.
• Go to http://www.brother.com/original/index.html for instructions on how to return your used consumable items to the Brother collection program. If you choose not to return your used consumable, please discard the used consumable according to local regulations, keeping it separate from domestic waste. If you have questions, call your local waste disposal office (see Product Safety Guide: Recycling information in accordance with the WEEE (2002/96/EC) and Battery (2006/66/EC) Directives).

5 Unpack the new drum unit.
6 Put the toner cartridge firmly into the new drum unit until you hear it lock into place. If you install the cartridge correctly, the green lock lever on the drum unit will lift automatically.

![Image of toner cartridge installation](image)

**NOTE**

Make sure you install the toner cartridge correctly or it may separate from the drum unit.

7 Clean the corona wire inside the drum unit by gently sliding the green tab from left to right and right to left several times.

![Image of corona wire cleaning](image)

**NOTE**

Be sure to return the tab to the home position (▲) (1). The arrow on the tab must be aligned with the arrow on the drum unit. If it is not, printed pages may have a vertical stripe.
8. Repeat step 3 and step 7 to clean each of three remaining corona wires.

NOTE
When you clean the corona wires, you do not have to remove the toner cartridge from the drum unit.

9. Slide the toner cartridge and drum unit assembly into the machine. Make sure you match the toner cartridge colour to the same colour label on the machine.
10 Close the top cover of the machine.

11 When you replace the drum unit with a new one, you need to reset the drum counter. Instructions of how to do this can be found in the box your new drum unit came in.
Recovering the belt unit

Model Name: BU-220CL
A new belt unit can print approximately 50,000 A4 or Letter size single-sided pages.

Belt End Soon

If the LCD shows Belt End Soon, it means the belt unit is near the end of its life. Buy a new belt unit and have it ready before you get a Replace Belt message. To replace the belt unit, see Replacing the belt unit on page 127.

Replace Belt
When the following message appears on the LCD, you must replace the belt unit:

IMPORTANT
• DO NOT touch the surface of the belt unit. If you touch it, it could degrade print quality.
• Damage caused by incorrect handling of the belt unit may void your warranty.

Replacing the belt unit
1. Make sure that the machine is turned on.
2. Open the top cover until it locks in the open position.
Take out all of the toner cartridge and drum unit assemblies.

**IMPORTANT**

- We recommend that you place the toner cartridge and drum unit assemblies on a clean, flat surface with disposable paper underneath them in case you accidentally spill or scatter toner.
- To prevent damage to the machine from static electricity, DO NOT touch the electrodes shown in the illustration.
- Handle the toner cartridge carefully. If toner scatters on your hands or clothes, immediately wipe or wash it off with cold water.
- To avoid print quality problems, DO NOT touch the shaded parts shown in the illustrations.
4 Hold the green handle of the belt unit and lift the belt unit up, and then pull it out.

**IMPORTANT**
To avoid print quality problems, DO NOT touch the shaded parts shown in the illustrations.

5 Unpack the new belt unit and install the new belt unit in the machine.
6 Slide each toner cartridge and drum unit assembly into the machine. Make sure that you match the toner cartridge colour to the same colour label on the machine. Repeat this step for each of the toner cartridge and drum unit assemblies.
7 Close the top cover of the machine.

8 When you replace the belt unit with a new one, you need to reset the belt unit counter. Instructions of how to do this can be found in the box your new belt unit came in.
Replacing the waste toner box

Model Name: WT-220CL
The life of a waste toner box is approximately 50,000 A4 or Letter size single-sided pages.

WT Box End Soon

If the LCD shows WT Box End Soon, it means the waste toner box is near the end of its life. Buy a new waste toner box and have it ready before you get a Replace WT Box message. To replace the waste toner box, see Replacing the waste toner box on page 132.

Replace WT Box
When the following message appears on the LCD, you must replace the waste toner box:

Replacing the waste toner box

1. Make sure that the machine is turned on.
2. Open the top cover until it locks in the open position.
3. Take out all of the toner cartridge and drum unit assemblies.

IMPORTANT
- We recommend that you place the toner cartridge and drum unit assemblies on a clean, flat surface with disposable paper underneath them in case you accidentally spill or scatter toner.
- To prevent damage to the machine from static electricity, DO NOT touch the electrodes shown in the illustration.
- Handle the toner cartridge carefully. If toner scatters on your hands or clothes, immediately wipe or wash it off with cold water.
- To avoid print quality problems, DO NOT touch the shaded parts shown in the illustrations.

<Toner cartridge>  <Drum unit>
4 Hold the green handle of the belt unit and lift the belt unit up, and then pull it out.

**IMPORTANT**
To avoid print quality problems, **DO NOT** touch the shaded parts shown in the illustrations.

5 Remove the orange packing material and discard it.

**NOTE**
This step is only necessary when you are replacing the waste toner box for the first time, and is not required for the replacement waste toner box. The orange packing pieces are installed at the factory to protect your machine during shipment.
Hold the green handle of the waste toner box and remove the waste toner box from the machine.

**IMPORTANT**
DO NOT reuse the waste toner box.

**WARNING**

- DO NOT put the waste toner box into a fire. It could explode, resulting in injuries.
- DO NOT use flammable substances, any type of spray, or an organic solvent/liquid containing alcohol or ammonia to clean the inside or outside of the machine. Doing so could cause a fire or electrical shock. Instead, use only a dry, lint-free cloth.

(See Product Safety Guide: *General precautions*)

**NOTE**

- Be sure to seal up the waste toner box tightly in an appropriate bag so that toner powder does not spill out of the waste toner box.
- Discard the used waste toner box according to local regulations, keeping it separate from domestic waste. If you have questions, call your local waste disposal office.
7 Unpack the new waste toner box and install the new waste toner box in the machine.

8 Put the belt unit back in the machine.
Slide each toner cartridge and drum unit assembly into the machine. Make sure that you match the toner cartridge colour to the same colour label on the machine. Repeat this step for all the toner cartridge and drum unit assemblies.
10 Close the top cover of the machine.
Cleaning and Checking the machine

Clean the outside and inside of the machine regularly with a dry, lint-free cloth. When you replace the toner cartridge or the drum unit, make sure that you clean the inside of the machine. If printed pages are stained with toner, clean the inside of the machine with a dry, lint-free cloth.

**WARNING**

- **DO NOT** put a toner cartridge or a toner cartridge and drum unit assembly into a fire. It could explode, resulting in injuries.
- **DO NOT** use flammable substances, any type of spray, or an organic solvent/liquid containing alcohol or ammonia to clean the inside or outside of the machine. Doing so could cause a fire or electrical shock. Instead, use only a dry, lint-free cloth.

(See Product Safety Guide: *General precautions*)

**IMPORTANT**

Use neutral detergents. Cleaning with volatile liquids such as thinner or benzine will damage the surface of the machine.

Cleaning the outside of the machine

1. Press and hold down the power button to turn the machine off.
2. Disconnect the interface cables from the machine, and then unplug the power cord from the electrical socket.
Routine Maintenance

3. Wipe the outside of the machine with a dry, lint-free cloth to remove dust.

4. Pull the paper tray completely out of the machine.

5. If paper is loaded in the paper tray, remove it.

6. Remove anything that is stuck inside the paper tray.

7. Wipe the inside and the outside of the paper tray with a dry, lint-free cloth to remove dust.

8. Re-load the paper and put the paper tray firmly back in the machine.

9. Plug the machine’s power cord back into the electrical socket first, and then connect the interface cables.

10. Turn on the machine.
Cleaning the LED head

If there is a problem with the print quality, such as light or faded colours or white streaks or bands down the page, clean the LED heads as follows:

1. Press and hold down the power button to turn the machine off.
2. Open the top cover until it locks in the open position.
3. Wipe the windows of LED heads (1) with a dry, lint-free cloth. Be careful not to touch the windows of LED heads (1) with your fingers.
4. Close the top cover of the machine.
5. Turn on the machine.
Cleaning the corona wires

If you have print quality problems, clean the corona wire as follows:

1. Make sure that the machine is turned on.
2. Open the top cover until it locks in the open position.
3 Take out a toner cartridge and drum unit assembly.

**WARNING**

**HOT SURFACE**

After you have just used the machine, some internal parts of the machine will be extremely hot. Wait for the machine to cool down before you touch the internal parts of the machine.
**IMPORTANT**

- We recommend that you place the toner cartridge and drum unit assembly on a piece of disposable paper or cloth in case you accidentally spill or scatter toner.

- Handle the toner cartridge and drum unit assemblies carefully. If toner scatters on your hands or clothes, immediately wipe or wash it off with cold water.

- To prevent damage to the machine from static electricity, DO NOT touch the electrodes shown in the illustration.

4 Clean the corona wire inside the drum unit by gently sliding the green tab from left to right and right to left several times.

**NOTE**

Be sure to return the tab to the home position (▲) (1). The arrow on the tab must be aligned with the arrow on the drum unit. If it is not, printed pages may have a vertical stripe.
5 Slide the toner cartridge and drum unit assembly into the machine. Make sure that you match the toner cartridge colour to the same colour label on the machine.

6 Repeat steps 3 to 5 to clean each of the remaining corona wires.

7 Close the top cover of the machine.
Cleaning the drum unit

If your printout has white or black dots at 94 mm intervals, the drum may have foreign material, such as glue from a label stuck on the drum surface. Follow the steps below to solve the problem.

1. Make sure the machine is in Ready mode.
2. Press ▲ or ▼ to choose Machine Info. Press OK.
3. Press ▲ or ▼ to choose Drum Dot Print. Press OK to print the drum dot check sheet.
4. Press and hold down \( \) to turn the machine off.
5. Open the top cover until it locks in the open position.

The colour of printed dots is the colour of the drum you should clean. Take out the toner cartridge and drum unit assembly of the colour causing the problem.
**WARNING**

**HOT SURFACE**

After you have just used the machine, some internal parts of the machine will be extremely hot. Wait for the machine to cool down before you touch the internal parts of the machine.

**IMPORTANT**

- We recommend that you place the toner cartridge and drum unit assembly on a piece of disposable paper or cloth in case you accidentally spill or scatter toner.

- Handle the toner cartridge and drum unit assembly carefully. If toner scatters on your hands or clothes, immediately wipe or wash it off with cold water.

- To prevent damage to the machine from static electricity, DO NOT touch the electrodes shown in the illustration.
7. Push down the green lock lever and take the toner cartridge out of the drum unit.

8. Turn the drum unit as shown in the illustration. Make sure that the drum unit gear (1) is on the left side.

9. Read following information from the drum dot check sheet.
   - Dot location: The sheet has eight numbered columns. The number of the column with the printed dot in it is used to find the dot position on the drum.
10 Use the numbered markers next to the drum roller to find the mark. For example, a dot in column 2 on the check sheet would mean that there is a mark in the “2” region of the drum.

11 Turn the edge of the drum unit toward you by hand while looking at surface of the suspected area.

**NOTE**
To avoid print quality problems, DO NOT touch the surface of the drum unit except the edge.

12 When you have found the mark on the drum that matches the drum dot check sheet, wipe the surface of the drum gently with a cotton swab until the mark on the surface comes off.

**IMPORTANT**
DO NOT clean the surface of the photosensitive drum with a sharp object or any liquids.
Routine Maintenance

13 Put the toner cartridge back into the drum unit until you hear it lock into place. If you install the cartridge in correctly, the green lock lever on the drum unit will lift automatically.

NOTE

Make sure that you put in the toner cartridge correctly or it may separate from the drum unit.
14 Slide the toner cartridge and drum unit assembly into the machine. Make sure that you match the toner cartridge colour to the same colour label on the machine.

15 Close the top cover of the machine.

16 Turn on the machine.
Cleaning the paper pick-up roller

Cleaning the paper pick-up roller periodically may prevent paper jams by insuring the proper feeding of paper.

1. Press and hold down  to turn the machine off.
2. Pull the paper tray completely out of the machine.
3. If paper is loaded in the paper tray, remove it.
4. Remove anything that is stuck inside the paper tray.
5. Tightly wring out a lint-free cloth soaked in lukewarm water, and then wipe the separator pad (1) of the paper tray with it to remove dust.

6. Wipe the two pick-up rollers (1) inside of the machine to remove dust.

7. Reload the paper and put the paper tray firmly back in the machine.
8. Turn on the machine.
Packing and shipping the machine

**WARNING**
This machine is heavy and weighs more than 17.4 kg. Be careful not to pinch your fingers when you put the machine down.

If for any reason you must ship your machine, carefully repack the machine in the original packaging to avoid damage during transit. The machine should be adequately insured with the carrier.

Unless you are returning the machine as part of the Brother Exchange Service, leave the toner cartridges and drum units inside the machine when you pack and ship it.

1. Press and hold down \( \text{Off} \) to turn the machine off. Leave the machine turned off for at least 10 minutes to cool down.
2. Disconnect all the cables, and then unplug the power cord from the electrical socket.
3. Put the packing material (1) into the carton.
4 Wrap the machine in a plastic bag, then put it on the bottom packing material (1).

NOTE
If you are returning your machine to Brother as part of the Exchange Service, pack only the machine. Keep all separate parts, including the drum unit and toner cartridge assemblies and printed materials, to use with your 'Exchange' machine.

5 Put the packing material (2) marked “R FRONT” on the right of the machine. Put the packing material (3) marked “L FRONT” on the left of the machine.
6. Put the AC power cord and printed materials in the original carton as shown in the illustration.

7. Close the carton and tape it shut.
If you think there is a problem with your machine, check each item below first and follow the troubleshooting tips. Most problems can be easily resolved by yourself.

**Identifying your problem**

First, check the following:

- The machine's power cord is connected correctly and the machine is turned on. If the machine does not turn on after connecting the power cord, see *Other difficulties* on page 174.
- All of the protective parts have been removed.
- Paper is inserted correctly in the paper tray.
- The interface cables are securely connected to the machine and the computer, or the wireless connection is set up on both the machine and your computer.
- LCD Messages
  
  (See *Error and maintenance messages* on page 157.)

If you did not solve your problem with the above checks, identify your problem and then go to the page suggested below.

**Machine does not print.**

- Paper handling
  
  (See *Paper handling difficulties* on page 173.)

**Pages are printed, but there are still problems.**

- Print quality
  
  (See *Improving the print quality* on page 176.)

- Printout is incorrect
  
  (See *Printing difficulties* on page 172.)

**Network and other problems:**

- *Network difficulties* on page 174
- *Other difficulties* on page 174
Error and maintenance messages

As with any sophisticated office product, errors may occur and consumable items may need to be replaced. If this happens, your machine identifies the error or required routine maintenance and shows the appropriate message. The most common error and maintenance messages are shown below.

You can clear most errors and perform routine maintenance by yourself. If you need more help, the Brother Solutions Center offers the latest FAQs and troubleshooting tips: Visit us at http://solutions.brother.com/.

Using non-Brother supplies is not recommended and may affect the print quality, hardware performance, and machine reliability.

NOTE

The LCD names are as follows.
• Standard paper tray: Tray 1
• Manual feed slot: Manual Feed

Troubleshooting

**Paper jams**

Always remove the remaining paper from the paper tray and straighten the stack when you are adding new paper. This helps prevent multiple sheets of paper from feeding through the machine at one time and prevents paper jams.

**Paper is jammed in the manual feed slot**

If the LCD shows **Jam Manual Feed**, follow these steps:

1. Remove any paper that is jammed in and around the manual feed slot.

2. Press **Go** to resume printing.

**Paper is jammed in the Paper Tray**

If the LCD shows **Jam Tray 1**, follow these steps:

1. Pull the paper tray completely out of the machine.
Troubleshooting

2 Use both hands to slowly pull out the jammed paper.

NOTE
Pulling the jammed paper downward allows you to remove the paper more easily.

3 Make sure that the paper is below the maximum paper mark (▼ ▼ ▼) in the paper tray. While pressing the green paper-guide release lever, slide the paper guides to fit the paper size. Make sure that the guides are firmly in the slots.

4 Put the paper tray firmly back in the machine.
Troubleshooting

**Paper is jammed underneath the Paper Tray**

If the LCD shows Jam 2-sided, follow these steps:

1. Leave the machine turned on for 10 minutes for the internal fan to cool the extremely hot parts inside the machine.

2. Pull the paper tray completely out of the machine.

3. Make sure that the jammed paper does not remain inside the machine.

4. If paper is not caught inside the machine, check underneath the paper tray.
If the paper is not caught in the paper tray, open the back cover.

**WARNING**

**HOT SURFACE**

After you have just used the machine, some internal parts of the machine will be extremely hot. Wait for the machine to cool down before you touch the internal parts of the machine.

Use both hands to pull out the jammed paper slowly.

Close the back cover until it locks in the closed position.

Put the paper tray back in the machine.
Troubleshooting

Paper is jammed at the back of the machine
If the LCD shows Jam Rear, a paper jam occurred behind the back cover. Follow these steps:

1. Leave the machine turned on for 10 minutes for the internal fan to cool the extremely hot parts inside the machine.
2. Open the back cover.

WARNING

HOT SURFACE
After you have just used the machine, some internal parts of the machine will be extremely hot. Wait for the machine to cool down before you touch the internal parts of the machine.
### Troubleshooting

3. Pull the green tabs at the left and right sides toward you to release the fuser cover (1).

4. Use both hands to gently pull the jammed paper out of the fuser unit.

5. Close the fuser cover (1).

6. Close the back cover.
Paper is jammed inside the machine
If the LCD shows Jam Inside, follow these steps:

1. Leave the machine turned on for 10 minutes for the internal fan to cool the extremely hot parts inside the machine.
2. Open the top cover until it locks in the open position.

⚠️ WARNING
⚠️ HOT SURFACE
After you have just used the machine, some internal parts of the machine will be extremely hot. Wait for the machine to cool down before you touch the internal parts of the machine.
3 Take out all four toner cartridge and drum unit assemblies.

**IMPORTANT**

- We recommend that you put the toner cartridge and drum unit assemblies on a piece of disposable paper or cloth in case you accidentally spill or scatter toner.
- Handle the toner cartridge and drum unit assemblies carefully. If toner scatters on your hands or clothes, immediately wipe or wash it off with cold water.
- To prevent damage to the machine from static electricity, DO NOT touch the electrodes shown in the illustration.
4 Pull out the jammed paper slowly.

5 Slide each toner cartridge and drum unit assembly into the machine. Make sure that you match the toner cartridge colour to the same colour label on the machine for all four toner cartridge and drum unit assemblies.
6. Close the top cover of the machine.

**NOTE**
If you turn off the machine during Jam Inside, the machine will print incomplete data from your computer when it is turned back on. Before you turn on the machine, delete the print spooler job on your computer.
If you are having difficulty with your machine

**IMPORTANT**
- For technical help, you must call the country where you bought the machine. Calls must be made from within that country.
- If you think there is a problem with your machine, check the chart below and follow the troubleshooting tips. Most problems can be easily resolved by yourself.
- If you need additional help, the Brother Solutions Center offers the latest FAQs and troubleshooting tips. Visit us at [http://solutions.brother.com/](http://solutions.brother.com/).

### Printing difficulties

<tr>
<td></td>
<td>(See <em>Error and maintenance messages</em> on page 157.)</td>
</tr>
<tr>
<td></td>
<td>Check the machine is online:</td>
</tr>
<tr>
<td></td>
<td>(Windows® 7 and Windows Server® 2008 R2)</td>
</tr>
<tr>
<td></td>
<td>Click the (Start) button and Devices and Printers. Right-click Brother HL-XXXX series and click See what's printing. Click Printer and make sure Use Printer Offline is deselected.</td>
</tr>
<tr>
<td></td>
<td>(Windows Vista® and Windows Server® 2008)</td>
</tr>
<tr>
<td></td>
<td>Click the (Start) button, Control Panel, Hardware and Sound, and then Printers. Right-click Brother HL-XXXX series. Make sure that Use Printer Offline is deselected.</td>
</tr>
<tr>
<td></td>
<td>(Windows® XP and Windows Server® 2003)</td>
</tr>
<tr>
<td></td>
<td>Click the Start button and choose Printers and Faxes. Right-click Brother HL-XXXX series. Make sure that Use Printer Offline is deselected.</td>
</tr>
<tr>
<td></td>
<td>Contact your administrator to check your Secure Function Lock settings.</td>
</tr>
<tr>
<td></td>
<td>Make sure the interface is set to Auto on the machine (see how to change the interface on page 88).</td>
</tr>
<tr>
<td></td>
<td>Check that the machine is not in Power Off mode.</td>
</tr>
<tr>
<td></td>
<td>If the machine is in Power Off mode, press and hold down on the control panel, and then re-send print data.</td>
</tr>
<tr>
<td></td>
<td>(See <em>Auto Power Off</em> on page 102.)</td>
</tr>
<tr>
<td>The machine is not printing or has stopped printing.</td>
<td>Press Cancel.</td>
</tr>
<tr>
<td></td>
<td>The machine will cancel the print job and clear it from the memory. The printout may be incomplete.</td>
</tr>
<tr>
<td>The headers or footers appear when the document displays on the screen but they are not on the printed page.</td>
<td>There is an unprintable area on the top and bottom of the page. Adjust the top and bottom margins in your document to allow for this.</td>
</tr>
<tr>
<td></td>
<td>(See <em>Unprintable area when printing from a computer</em> on page 7.)</td>

### Paper handling difficulties

<table>
<thead>
<tr>
<th>Difficulties</th>
<th>Suggestions</th>
</tr>
</thead>
<tbody>
<tr>
<td>The machine does not feed paper.</td>
<td>If the paper tray is empty, load a new stack of paper into the paper tray.</td>
</tr>
<tr>
<td></td>
<td>If there is paper in the paper tray, make sure it is straight. If the paper is curled, straighten it. Sometimes it is helpful to remove the paper, turn the stack over and put it back in the paper tray.</td>
</tr>
<tr>
<td></td>
<td>Reduce the amount of paper in the paper tray, and then try again.</td>
</tr>
<tr>
<td></td>
<td>Make sure that manual feed mode is not selected in the printer driver.</td>
</tr>
<tr>
<td></td>
<td>Clean the paper pick-up roller. (See Cleaning the paper pick-up roller on page 152.)</td>
</tr>
<tr>
<td>The machine does not feed paper from the Manual feed slot.</td>
<td>Make sure that Manual is selected in the printer driver.</td>
</tr>
<tr>
<td>How do I print on envelopes?</td>
<td>Load one envelope at a time in the Manual feed slot. Your application must be set to print the envelope size you are using. This is usually done in the Page Setup or Document Setup menu of your application.</td>
</tr>
<tr>
<td></td>
<td>(See your application’s manual for more information.)</td>
</tr>
</tbody>
</table>
Network difficulties

<table>
<thead>
<tr>
<th>Difficulties</th>
<th>Suggestions</th>
</tr>
</thead>
<tbody>
<tr>
<td>Cannot print over a network after completing the software installation.</td>
<td>When the <strong>Cannot print to the networked printer</strong> screen appears, follow the on-screen instructions. If the problem is not solved, see Network User’s Guide: Troubleshooting. Make sure the interface is set to Auto on the machine (see how to change the interface on page 88).</td>
</tr>
<tr>
<td>(HL-3150CDW and HL-3170CDW)</td>
<td></td>
</tr>
<tr>
<td>The Brother software cannot be installed.</td>
<td><strong>(Windows®)</strong> If the Security Software warning appears on the PC screen during the installation, change the Security Software settings to permit the Brother product setup program or other program to run. <strong>(Macintosh)</strong> If you are using a firewall function of anti-spyware or antivirus security software, temporarily disable it and then install the Brother software.</td>
</tr>
<tr>
<td>Cannot connect to wireless network.</td>
<td>Investigate the problem using the WLAN Report. Print the WLAN Report in the menu selection: Machine Info., Print WLAN Report and then press Go. For more details, see Quick Setup Guide</td>
</tr>
<tr>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Other difficulties

<table>
<thead>
<tr>
<th>Difficulties</th>
<th>Suggestions</th>
</tr>
</thead>
<tbody>
<tr>
<td>The machine will not turn on.</td>
<td>Adverse conditions on the power connection (such as lightning or a power surge) may have triggered the machine’s internal safety mechanisms. Turn the machine off and unplug the power cord. Wait for ten minutes, then plug in the power cord and turn the machine on. If the problem is not solved, turn off the machine. If you are using a power breaker, disconnect it to make sure it is not the problem. Plug the machine's power cord directly into a different known working wall electrical socket and turn on the machine. If there is still no power, try a different power cable.</td>
</tr>
</tbody>
</table>

For other problems concerning using your machine on a Network, see Network User's Guide
### Other difficulties (continued)

<table>
<thead>
<tr>
<th>Difficulties</th>
<th>Suggestions</th>
</tr>
</thead>
<tbody>
<tr>
<td>The machine cannot print EPS data that includes binary with the BR-Script3 printer driver. (Windows®)</td>
<td>To print EPS data, do the following:</td>
</tr>
<tr>
<td>1</td>
<td>For Windows® 7 and Windows Server® 2008 R2: Click the Start button and Devices and Printers. For Windows Vista® and Windows Server® 2008: Click the Start button, Control Panel, Hardware and Sound, and then Printers. For Windows® XP and Windows Server® 2003: Click the Start button, and select Printers and Faxes.</td>
</tr>
<tr>
<td>2</td>
<td>Right-click the Brother HL-XXXX BR-Script3 icon and select Printer properties (Properties), and Brother HL-XXXX BR-Script3 if necessary.</td>
</tr>
<tr>
<td>3</td>
<td>From the Device Settings tab, choose TBCP (Tagged binary communication protocol) in Output Protocol.</td>
</tr>
<tr>
<td>(Macintosh)</td>
<td>If your machine is connected to a computer with a USB interface, you cannot print EPS data that includes binary. You can print the EPS data at the machine through a network. For installing the BR-Script3 printer driver through the network, visit the Brother Solutions Center at <a href="http://solutions.brother.com/">http://solutions.brother.com/</a>.</td>
</tr>
</tbody>
</table>
Improving the print quality

If you have a print quality problem, print a test page first (see on page 85). If the printout looks good, the problem is probably not the machine. Check the interface cable or try the machine on another computer. If the printout has a quality problem, check the following steps first. And then, if you still have a print quality problem, check the chart below and follow the recommendations.

**NOTE**

Brother does not recommend the use of cartridges other than genuine Brother Original cartridges or the refilling of used cartridges with toner from other sources.

1. To get the best print quality, we suggest using the recommended paper. Check that you are using paper that meets our specifications (see Acceptable paper and other print media on page 2).

2. Check that the drum units and toner cartridges are installed correctly.

<table>
<thead>
<tr>
<th>Examples of poor print quality</th>
<th>Recommendation</th>
</tr>
</thead>
<tbody>
<tr>
<td>Printed pages are compressed, horizontal stripes appear, or characters in the top, bottom, left and right margins are cut off</td>
<td>Adjust the print margins on your application and reprint the job.</td>
</tr>
<tr>
<td>Colours are light or faint on the whole page</td>
<td>Perform the calibration using the control panel or the printer driver (see Colour Calibration on page 103).</td>
</tr>
<tr>
<td></td>
<td>Make sure toner save mode is off in the control panel or the printer driver.</td>
</tr>
<tr>
<td></td>
<td>Make sure that the media type setting in the driver matches the type of paper you are using (see Acceptable paper and other print media on page 2).</td>
</tr>
<tr>
<td></td>
<td>Shake all four toner cartridges gently.</td>
</tr>
<tr>
<td></td>
<td>Wipe the windows of all four LED heads with a dry lint free soft cloth (see Cleaning the LED head on page 141).</td>
</tr>
</tbody>
</table>
### Troubleshooting

#### White streaks or bands down the page

- Wipe the windows of all four LED heads with a *dry* lint free soft cloth (see *Cleaning the LED head* on page 141).
- Make sure that foreign material such as a torn piece of paper, sticky note or dust is not inside the machine and around the drum unit and toner cartridge.
- Clean the drum unit (see *Cleaning the drum unit* on page 146).

#### Coloured streaks or bands down the page

- Clean all four corona wires (one for each colour) inside the drum unit by sliding the green tab (see *Cleaning the corona wires* on page 142).
- Make sure the green tab of the corona wire is at the home position (△) (1).
- Replace the toner cartridge that matches the colour of the streak or band (see *Replacing the toner cartridges* on page 110). To identify the colour of the toner cartridge, visit us at [http://solutions.brother.com/](http://solutions.brother.com/) to view our FAQs and troubleshooting tips.
- Identify the colour causing the problem and put in a new drum unit (see *Replacing the drum units* on page 120).
  To identify the colour of the drum unit, visit us at [http://solutions.brother.com/](http://solutions.brother.com/) to view our FAQs and troubleshooting tips.

## Examples of poor print quality

<table>
<thead>
<tr>
<th>Recommendation</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="image" alt="Poor fixing" /></td>
</tr>
<tr>
<td>Make sure you lift up the two grey levers inside the back cover until they stop in the up position (1).</td>
</tr>
<tr>
<td>Make sure that the media type setting in the driver matches the type of paper you are using (see <em>Acceptable paper and other print media</em> on page 2).</td>
</tr>
<tr>
<td>Choose <strong>Improve Toner Fixing</strong> mode in the printer driver.</td>
</tr>
<tr>
<td><em>(For Windows, see <em>Other Print Options</em> on page 41.)</em></td>
</tr>
<tr>
<td><em>(For Macintosh, see <em>Print Settings</em> on page 67.)</em></td>
</tr>
<tr>
<td>If this selection does not provide enough improvement, change the printer driver setting in <strong>Media Type</strong> to a thick setting. If you are printing an envelope, choose <strong>Env. Thick</strong> in the media type setting.</td>
</tr>
<tr>
<td><img src="image" alt="Curled or wavy" /></td>
</tr>
<tr>
<td>Make sure that the media type setting in the driver matches the type of paper you are using (see <em>Acceptable paper and other print media</em> on page 2).</td>
</tr>
<tr>
<td>Choose <strong>Reduce Paper Curl</strong> mode in the printer driver.</td>
</tr>
<tr>
<td><em>(For Windows, see <em>Other Print Options</em> on page 41.)</em></td>
</tr>
<tr>
<td><em>(For Macintosh, see <em>Print Settings</em> on page 67.)</em></td>
</tr>
<tr>
<td>If the problem is not solved, choose <strong>Plain Paper</strong> in the media type setting.</td>
</tr>
<tr>
<td>If you do not use the machine often, the paper may have been in the paper tray too long. Turn over the stack of paper in the paper tray. Also, fan the paper stack and then rotate the paper 180° in the paper tray.</td>
</tr>
<tr>
<td>Store the paper where it will not be exposed to high temperatures and high humidity.</td>
</tr>
<tr>
<td>Open the back cover (face-up output tray) to let the printed pages exit onto the face-up output tray.</td>
</tr>
</tbody>
</table>
### Troubleshooting

<table>
<thead>
<tr>
<th>Examples of poor print quality</th>
<th>Recommendation</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="image" alt="Envelope Creases" /></td>
<td>Make sure that the envelope levers inside the back cover are pulled down to the envelope position when you print envelopes. See <em>Loading paper in the Manual feed slot</em> on page 12.</td>
</tr>
</tbody>
</table>

**NOTE**

When you have finished printing, open the back cover and reset the two grey levers back to their original positions (1) by lifting them up until they stop.

---

1. ![Image of envelope levers](image)
Machine Information

Checking the Serial Number

You can see the machine’s Serial Number on the LCD.

1. Press ▲ or ▼ to choose Machine Info. Press OK.
2. Press ▲ or ▼ to choose Serial No. Press OK.

Default settings

The machine has three levels of default settings; the default settings have been set at the factory before shipment (see Menu table on page 84).

- Network
- Factory Reset
- Settings Reset

NOTE

- You cannot modify the preset default settings.
- Page counters can never be changed.

Network default settings

To reset only the print server back to its default settings (by resetting all network information such as the password and IP address), follow these steps:

1. Press ▲ or ▼ to choose Reset Menu. Press OK.
2. Press ▲ or ▼ to choose Network. Press OK.
3. Press ▲ to choose Yes. The machine will restart automatically.

Factory Reset

You can partially reset the machine partially back to its factory printer settings. The settings that will not be reset are the Interface, Local Language, Reprint, Setting Lock, Secure Function Lock 2.0 and the Network settings:

1. Press ▲ or ▼ to choose Reset Menu. Press OK.
2. Press ▲ or ▼ to choose Factory Reset. Press OK.
3. Press ▲ to choose Reset.
Settings Reset
This operation will reset all the machine’s settings back to the settings that were set at the factory:

1. Disconnect the network cable from the machine; otherwise the network settings (such as IP address) will not be reset.
2. Press ▲ or ▼ to choose Reset Menu. Press OK.
3. Press ▲ and Cancel at the same time. Press OK after Settings Reset appears.
5. The machine will restart automatically.

Important information for choosing your paper

The information in this section will help you choose paper to use with this machine.

NOTE
If you use paper that is not recommended, a paper jam or misfeed may occur in the machine.

Before you buy a large quantity of paper
Make sure that the paper is appropriate for the machine.

Paper for plain paper copies
Paper is divided by usage, such as paper for printing and paper for copying. The usage is usually written on the paper’s package. Check the package to see whether it is appropriate for laser printers. Use paper that is appropriate for laser printers.

Basis weight
The basis weight of the paper in general use varies in different countries. We recommend that you use paper that weighs 75 to 90 g/m², although this machine is able to cope with thinner or thicker paper than these weights.

Long grain and short grain
The pulp fiber of the paper is aligned during paper manufacturing. And paper can be classified into two types, long grain and short grain.
Long grain paper fibers run in the same direction as the long edge of the paper. Short grain paper fibers run perpendicular to the long edge of the paper. Though most plain paper for copying is long grain, some is short grain. We recommend that you use long grain paper for this machine. Short grain paper is too weak for the paper transport of the machine.

Acid paper and neutralized paper
Paper can be classified as either acid paper or neutralized paper.
Though modern paper manufacture methods started with acid paper, neutralized paper is recently taking the place of acid paper because of environmental issues.
However, many forms of acid paper can be found in recycled paper. We recommend that you use neutralized paper for this machine.
Use an acid paper check pen to distinguish acid paper from neutral paper.

Print surface
The characteristics of the face side and reverse side of a sheet of paper may vary a little.
Usually, the opening side of the paper ream package is the print side. Follow the instructions on the paper package. Typically, the print side is indicated by an arrow.
