IMPORTANT SAFETY INSTRUCTIONS

When using this machine, basic safety precautions should always be taken, including the following:
Read all instructions before using.

DANGER - To reduce the risk of electric shock:
1. The machine should never be left unattended while plugged in. Always unplug the machine from the electrical outlet immediately after using and before cleaning.

WARNING - To reduce the risk of burns, fire, electric shock, or injury to persons:
1. Do not allow this machine to be used as a toy. Close attention is necessary when the machine is used by or near children.
2. Use this machine only for its intended use as described in this manual. Use only accessories recommended by the manufacturer as contained in this manual.
3. Never operate this machine if it has a damaged cord or plug, if it is not working properly, if it has been dropped or damaged, or dropped into water. Return the machine to the nearest authorized retailer or service center for examination, repair, electrical or mechanical adjustment.
4. Never operate the machine with any air openings blocked. Keep ventilation openings of the machine and foot control free from the accumulation of lint, dust, and loose cloth.
5. Never drop or insert any object into any opening.
6. Do not use outdoors.
7. Do not operate where aerosol (spray) products are being used or where oxygen is being administered.
8. To disconnect, turn the main switch to the symbol “○” position which represents off, then remove plug from outlet.
9. Do not unplug by pulling on cord. To unplug, grasp the plug, not the cord.
10. Keep fingers away from all moving parts. Special care is required around the machine needle.
11. Always use the proper needle plate. The wrong plate can cause the needle to break.
12. Do not use bent needles.
13. Do not pull or push fabric while stitching. It may deflect the needle causing it to break.
14. Switch the machine to the symbol “○” position when making any adjustments in the needle area, such as threading needle, changing needle, threading bobbin, or changing presser foot, and the like.
15. Always unplug the machine from the electrical outlet when removing covers, lubricating, or when making any other user servicing adjustments mentioned in the instruction manual.
16. This sewing machine is not intended for use by young children or infirm persons without supervision.
17. Young children should be supervised to ensure that they do not play with this machine.
18. If the Light unit is damaged, it must be replaced by authorized dealer.

SAVE THESE INSTRUCTIONS
This machine is intended for household use.
FOR USERS IN THE UK, EIRE, MALTA AND CYPRUS ONLY

If this machine is fitted with a three-pin non-rewireable BS plug then please read the following.

IMPORTANT
If the available socket outlet is not suitable for the plug supplied with this equipment, it should be cut off and an appropriate three-pin plug fitted. With alternative plugs an approved fuse must be fitted in the plug.

NOTE
The plug served from the main lead must be destroyed as a plug with bared flexible cords is hazardous if engaged in a live socket outlet. In the event of replacing the plug fuse, use a fuse approved by ASTA to BS 1362, i.e. carrying the mark, rating as marked on plug.
Always replace the fuse cover, never use plugs with the fuse cover omitted.

WARNING
DO NOT CONNECT EITHER WIRE TO THE EARTH TERMINAL WHICH IS MARKED WITH THE LETTER ‘E’, BY THE EARTH SYMBOL \(\downarrow\) OR COLOURED GREEN OR GREEN AND YELLOW.

The wires in this main lead are coloured in accordance with the following code:

<table>
<thead>
<tr>
<th>Blue</th>
<th>Neutral</th>
</tr>
</thead>
<tbody>
<tr>
<td>Brown</td>
<td>Live</td>
</tr>
</tbody>
</table>

As the colours of the wiring in the main lead of this appliance may not correspond with the coloured markings identifying the terminals in your plug, proceed as follows.

The wire which is coloured blue must be connected to the terminal which is marked with the letter ‘N’ or coloured black or blue.

The wire which is coloured brown must be connected to the terminal which is marked with the letter ‘L’ or coloured red or brown.
Federal Communications Commission (FCC)  
Declaration of Conformity (For USA Only)

Responsible Party:  Brother International Corporation  
100 Somerset Corporate Boulevard  
Bridgewater, NJ 08807-0911 USA  
TEL: (908) 704-1700

declares that the product  
Product Name:  Brother Sewing Machine  
Model Number:  NV1500D/NV1500

complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
- The included interface cable should be used in order to ensure compliance with the limits for a Class B digital device.
- Changes or modifications not expressly approved by Brother Industries, Ltd. could void the user's authority to operate the equipment.
CONGRATULATIONS ON CHOOSING OUR MACHINE

Your machine is the most advanced computerized household embroidery and sewing machine. To fully enjoy all the features incorporated, we suggest that you study the manual.

PLEASE READ BEFORE USING THIS MACHINE

For safe operation
1. Be sure to keep your eye on the needle while sewing. Do not touch the handwheel, thread take-up lever, needle, or other moving parts.
2. Remember to turn off the power switch and unplug the cord when:
   - Operation is completed
   - Replacing or removing the needle or any other parts
   - A power failure occurs during use
   - Maintaining the machine
   - Leaving the machine unattended.
3. Do not store anything on the foot controller.
4. Plug the machine directly into the wall. Do not use extension cords.

For a longer service life
1. When storing this machine, avoid direct sunlight and high humidity locations. Do not use or store the machine near a space heater, iron, halogen lamp, or other hot objects.
2. Use only neutral soaps or detergents to clean the case. Benzene, thinner, and scouring powders can damage the case and machine, and should never be used.
3. Do not drop or hit the machine.
4. Always consult the operation manual when replacing or installing any assemblies, the presser feet, needle, or other parts to assure correct installation.

For repair or adjustment
In the event a malfunction occurs or adjustment is required, first follow the troubleshooting table in the back of the operation manual to inspect and adjust the machine yourself. If the problem persists, please consult your local authorized Brother dealer.

For additional product information and updates, visit our web site at www.brother.com

The contents of this manual and specifications of this product are subject to change without notice.
HOW TO USE THIS MANUAL

Chapters 1 and 2 describe to the first-time user the initial operations for using this machine and the basic sewing operations.

To sew utility stitches
Continue with chapter 3 to learn how to select a stitch and sew using the various stitches.

To sew characters and patterns
Continue with chapter 4 to learn basic operations, from selecting patterns to sewing, in addition to operations such as combining and editing patterns to rotate or resize them, and storing combined patterns.

To embroider
Continue with chapter 5 to learn basic embroidering operations, from selecting patterns to sewing, as well as operations such as editing patterns to rotate or resize them and utilizing more useful functions or techniques. In chapter 6, you can learn how to edit more advanced embroidery patterns and combine patterns.

- Parts related to operations described in the procedures are highlighted in blue. Perform the operations while comparing the screens in the procedures with those that appear on the machine.
- If, while using the machine, you have questions about an operation or you would like to know more about a specific function, refer to the index (P.197) and the table of contents to find the section of the manual to refer to.

STITCH SETTING CHART ...............................191
INDEX ...................................................197
Machine

Front View

1. **Top cover**
   - Open the top cover to thread the machine and wind the bobbin.

2. **Thread guide plate**
   - Pass the thread around the thread guide plate when threading the upper thread.

3. **Thread take-up lever check window**
   - Look through the window to check the position of the take-up lever.

4. **Needle threader lever**
   - Use the needle threader lever when threading the needle automatically.

5. **Thread cutter**
   - Pass the threads through the thread cutter to cut them.

6. **Flat bed attachment with accessory compartment**
   - Store presser feet and bobbins in the accessory compartment of the flat bed attachment. Remove the flat bed attachment when sewing cylindrical pieces such as sleeve cuffs.

7. **Operation buttons (5 buttons) and sewing speed controller**
   - Use these buttons to perform various operations, such as starting sewing and raising or lowering the needle. Slide the sewing speed controller to adjust the sewing speed while using utility stitches.

8. **Knee lifter slot**
   - Insert the knee lifter into the slot.

9. **Knee lifter**
   - Use the knee lifter to raise and lower the presser foot.

10. **LCD (liquid crystal display)**
    - Stitch settings can be viewed and edited, and operations for using the machine can be displayed, and error messages appear in the LCD.

11. **Spool pin**
    - Place a spool of thread on the spool pin.

12. **Spool cap**
    - Use the spool cap to hold the spool in place.

13. **Bobbin winder**
    - Use the bobbin winder when winding the bobbin.

14. **Supplemental spool pin**
    - Use this spool pin to wind the bobbin thread while sewing or to sew with the twin needle.

15. **Thread guide**
    - Pass the thread around this thread guide when winding the bobbin thread.

16. **Bobbin winding thread guide**
    - Pass the thread around this thread guide when winding the bobbin thread.

Right-side/Rear View

1. **Handle**
   - When transporting the machine, carry it by this handle.

2. **Handwheel**
   - Turn the handwheel toward you to sew one stitch or to raise or lower the needle.

3. **Embroidery card slot**
   - Insert the embroidery cards (sold separately) into the embroidery card slot.

4. **USB connector**
   - Plug in a USB cable to connect a computer.

5. **Touch pen holder**
   - Use the touch pen holder to hold the touch pen when it is not being used.

6. **Foot controller jack**
   - Insert the plug on the end of the foot controller cord into the foot controller jack.

7. **Foot controller**
   - Press the foot controller to control the speed of the machine.

8. **Jack connector**
   - Insert the power cord into the connector jack.

9. **Main power switch**
   - Use the main power switch to turn the machine ON and OFF.

10. **Air vent**
    - Do not cover the air vent while the sewing machine is being used.

11. **Feed dog position switch**
    - Use the feed dog position switch to lower the feed dogs.

12. **Presser foot lever**
    - Raise and lower the presser foot lever to raise and lower the presser foot.
Needle and Presser Foot Section

1. **Buttonhole lever**
   Lower the buttonhole lever when sewing buttonholes and bar tacks.

2. **Presser foot holder**
   The presser foot is attached to the presser foot holder.

3. **Presser foot holder screw**
   Use the presser foot holder screw to hold the presser foot holder in place.

4. **Presser foot**
   The presser foot consistently applies pressure to the fabric as it is sewn. Attach the appropriate presser foot for the selected stitch.

5. **Feed dogs**
   The feed dogs feed the fabric in the sewing direction.

6. **Bobbin cover**
   Open the bobbin cover to insert the bobbin.

7. **Needle plate cover**
   Remove the needle plate cover to clean the bobbin case and race.

8. **Needle plate**
   The needle plate is marked with guides to help sew straight seams.

9. **Needle bar thread guide**
   Pass the upper thread through the needle bar thread guide.

10. **Needle clamp screw**
    Use the needle clamp screw to hold the needle in place.

Embroidery Unit

1. **Carriage**
   The carriage moves the embroidery frame automatically when embroidering.

2. **Release button (located under the embroidery unit)**
   Press the release button to remove the embroidery unit.

3. **Embroidery unit connector**
   Insert the embroidery unit connector into the connection port to attach the embroidery unit.

4. **Embroidery frame holder**
   Attach the embroidery frame to the embroidery frame holder to hold the frame in place.

5. **Frame-securing lever**
   Press down the frame-securing lever to secure the embroidery frame.

CAUTION

- After the embroidery frame is set in the frame holder, be sure the frame-securing lever is correctly lowered.
Operation Buttons

1. **“Start/Stop” button**

When this button is pressed, the machine sews a few stitches at a low speed, then begins sewing at the speed set by the sewing speed controller. Press this button again to stop sewing. This button lights up in a different color depending on the machine’s operating condition.

   - **Green:** The machine is ready to sew or is sewing.
   - **Red:** The machine cannot sew.

2. **“Reverse/Reinforcement Stitch” button**

This button is used to sew reinforcement stitches at the beginning and end of stitching. When this button is pressed, the machine sews 3 to 5 stitches in the same spot, then stops automatically. For straight and zigzag stitch patterns that take reverse stitches, the machine sews reverse stitches (stitches sewn in the opposite direction) at low speed only while the “Reverse/Reinforcement Stitch” button is held down.

3. **“Needle Position” button**

Use this button to change the sewing direction or for detailed sewing in small areas. Press this button to raise or lower the needle position. Press this button twice to sew a single stitch.

4. **“Thread Cutter” button**

Press this button after sewing to automatically trim the excess thread.

5. **“Presser Foot Lifter” button**

Press this button to lower the presser foot and apply pressure to the fabric. Press this button again to raise the presser foot.

6. **Sewing speed controller**

Slide the sewing speed controller to the left or right to adjust the sewing speed. Slide the controller to the left to sew at lower speeds. Slide the controller to the right to sew at higher speeds. Beginners should sew at a lower speed until they become familiar with the machine.

CAUTION

- Do not press the “Thread Cutter” button after the threads have already been cut. Otherwise, the needle may break, the threads may become tangled, or damage to the machine may occur.

Included Accessories

The accessories are stored in the flat bed attachment. Open the flat bed attachment as shown below.

1. **Embroidery foot “U” storage space**
2. **Bobbin stand**
   (Place the bobbins on the pins to store them.)
3. **Storage space**
4. **Presser foot storage tray**
   (Store presser feet marked A, G, I, J, M, N, and R.)

---

Green: The machine is ready to sew or is sewing.

Red: The machine cannot sew.

### Memo (For U.S.A. only)

- Foot controller: Model T
- This foot controller can be used with this machine model NV1500D/NV1500.

### Memo

- Always use accessories recommended for this machine.
- The screw for the presser foot holder is available through your authorized dealer (part code: XA4813-051).
- This operation manual and the foot controller can be stored in the machine’s hard case.

---

**Memo (For U.S.A. only)**

Foot controller: Model T

This foot controller can be used with this machine model NV1500D/NV1500.

- **Memo**
  - Always use accessories recommended for this machine.
  - The screw for the presser foot holder is available through your authorized dealer (part code: XA4813-051).
  - This operation manual and the foot controller can be stored in the machine’s hard case.

TURNING THE MACHINE ON/OFF

WARNING

- Use only regular household electricity as the power source. Using other power sources may result in fire, electric shock, or damage to the machine.
- Turn the main power to OFF and remove the plug in the following circumstances:
  When you are away from the machine
  After using the machine
  When the power fails during use
  When the machine does not operate correctly due to a bad connection or a disconnection
  During electrical storms

CAUTION

- Do not use extension cords or multi-plug adapters with many other appliances plugged in to them. Fire or electric shock may result.
- Do not touch the plug with wet hands. Electric shock may result.
- When unplugging the machine, always turn the main power to OFF first. Always grasp the plug to remove it from the outlet. Pulling on the cord may damage the cord, or lead to fire or electric shock.
- Do not allow the power cord to be cut, damaged, modified, forcefully bent, pulled, twisted, or bundled. Do not place heavy objects on the cord. Do not subject the cord to heat. These things may damage the cord, or cause fire or electric shock. If the cord or plug is damaged, take the machine to your authorized dealer for repairs before continuing use.
- Unplug the power cord if the machine is not to be used for a long period of time. Otherwise, a fire may result.
- When leaving the machine unattended, either the main switch of the machine should be turned to OFF or the plug must be removed from the socket-outlet.
- When servicing the machine or when removing covers, either the machine or the electrical set must be unplugged.
- For U.S.A. only
  This appliance has a polarized plug (one blade wider than the other). To reduce the risk of electrical shock, this plug is intended to fit in a polarized outlet only one way. If the plug does not fit fully in the outlet, reverse the plug. If it still does not fit, contact a qualified electrician to install the proper outlet. Do not modify the plug in any way.

1. Insert the power cord into the power cord jack connector, then insert the plug into a wall outlet.

2. Turn the main power switch to “I” to turn on the machine.

3. Turn the main power switch to “O” to turn off the machine.
LCD SCREEN

Display Precautions

- Only touch the display with your finger or the touch pen included with the machine. Do not use a mechanical pencil, screwdriver or any other hard or sharp objects. In addition, do not press the display with extreme pressure, otherwise damage to the display may result.
- All or part of the display may sometimes become darker or lighter due to fluctuations in the surrounding temperature or other changes in the environment. This is not a sign of a malfunction. If the display is difficult to read, adjust its brightness (see page 21).
- The display may be dark immediately after the machine is turned on. This is a normal characteristic of the backlight and is not a sign of a malfunction. After approximately 10 minutes, the display should reach its normal level of brightness.
- If you are not directly facing the display, the colors may be distorted or the screen may be difficult to read. This is a normal characteristic of the display and is not a malfunction. Be sure to sit in front of the display while using it.

When the machine is turned on, the opening screen appears. The machine can be set so that the opening screen is not displayed (see page 21).

Lightly press the display with your finger. Depending on the setting, either "1-01 Straight stitch (Left)" or "1-03 Straight stitch (Middle)" is automatically selected (see page 20).

Memo

It may take some time until the opening screen appears. This is not a sign of a malfunction.

1. Shows whether the machine is set for a single needle or twin needle, and the needle position when the machine is stopped. The desired needle position can be set (see page 20).

   For a single needle

   \[ \downarrow \downarrow \]\quad \uparrow \uparrow \]

   Single needle/down position  Single needle/up position

   For a twin needle

   \[ \downarrow \downarrow \downarrow \downarrow \]\quad \uparrow \uparrow \uparrow \uparrow \]

   Twin needle/down position  Twin needle/up position

2. Presser foot code

   Attach the indicated presser foot before sewing.

3. Shows the number for the selected stitch (only for utility stitches).

4. Shows a preview of the selected stitch.

5. Shows the current page number and the total number of pages available.
## Key Functions

With your finger or the touch pen, press a key at the top of the display (1) to change the screen that is displayed.

### Operation panel

- If , the setting cannot be adjusted. | 42   |
| ⑫  | ![Thread tension keys](image) | Thread tension keys | Shows the thread tension setting of the currently selected stitch pattern. The thread tension is usually set automatically. Press or to adjust the thread tension setting. | 43   |
Using the Machine Setting Mode Key

Press [ needle stop position, turn the buzzer on/off, adjust the pattern or screen, and change other basic machine settings.

- Select whether the needle stops in the raised or lowered position when the machine is stopped.
- Select whether to use the sewing speed controller or to adjust the zigzag width (see page 64).
- Make adjustments to the character and decorative stitch patterns (see page 92).
- Adjust the presser foot height (select the height of the presser foot when the presser foot is raised) (see page 41).
- Adjust the presser foot pressure between 1 (weak) and 4 (strong).
  - The higher the number, the higher the pressure will be. Set the pressure to 3 for normal sewing.
- Select whether “1-01 Straight stitch (Left)” or “1-03 Straight stitch (Middle)” is the utility stitch that is automatically selected when the machine is turned on.

Press [ to display the next page.

- Select from among 5 embroidery frame displays (see page 125).
- Select whether the thread color name, thread color number or sewing time appears for the thread color display in the embroidery screen (see page 138).
- Select the thread brand available when selecting a thread color number in the thread color display of the embroidery screen (see page 138).

Press [ to display the next page.

- Adjust the maximum embroidering speed.
- Adjust the thread tension for embroidering.
- Adjust the height of embroidery foot “U” (see page 120).
- Select the units (mm/inch) for displaying distances and the sizes of embroidery patterns.
- Select the initial screen (Embroidery/Embroidery Edit) when the embroidery unit is installed.

Press [ to display the next page.
1 Adjust the density of the display.
   * Press [−] to make the screen lighter.
   * Press [+] to make the screen darker.

Adjust the density so that the contrast between [ ] and [ ] can be clearly seen.

2 Turn on/off the buzzer.
3 Turn on/off the needle area and work area lights.
4 Select whether or not the opening screen appears when the machine is turned on.
5 Select one of the 13 display languages: [English], [German], [French], [Italian], [Dutch], [Spanish], [Japanese], [Danish], [Norwegian], [Finnish], [Swedish], [Portuguese], [Russian]

* Press [ ] to display the next page.

1 Display the service count of embroidery stitches. The service count is a reminder to take your machine in for regular servicing (Contact your authorized dealer for details.)
2 Shows the version of the software installed on this machine
3 Shows the product identification number for this machine.

Memo

The latest version of software is installed in your machine. Check with your local authorized Brother dealer or at www.brother.com for notification of available updates (see page 189).
Using the Machine Operation Mode Key

Basic machine operations and other information based on the contents of this Operation Manual are stored in this machine.

Press [ ] to open the screen shown below. Six categories are displayed at the top of the screen. Press a key to see more information about that category.

### Contents of Each Category

<table>
<thead>

</table>

### Main Buttons

- “Thread Cutter” button
- “Presser Foot Lifter” button
- “Start/Stop” button
- “Reverse/Reinforcement Stitch” button
- “Needle Position” button

### Basic Embroidering Operations

- Attaching iron-on stabilizer to the fabric
- Inserting the fabric
- Attaching the embroidery frame
- Attaching the embroidery unit
- Attaching embroidery foot “U”
- Correct stabilizer to use

### Maintenance

- Cleaning the race and bobbin case
Example: Displaying information about upper threading

1. Press .

2. Press .
   → A list of basic operations appears in the lower half of the screen.

3. Press (upper threading).
   → The instructions for threading the machine appear.

4. Press to view the next page.

5. When you are finished with the instructions, press (CLOSE).

Using the Pattern Explanation Key

To learn more about the uses for a stitch pattern, select the stitch, and then press to see a description of the selected stitch.

Example: Displaying information on the use for

1. Select , and then press .
   → Uses for appear.

2. When you are finished with the instructions, press (CLOSE).
Winding the Bobbin

This section describes how to wind thread onto a bobbin. With this machine, you can use the supplemental spool pin to wind the bobbin while sewing using the main spool pin.

CAUTION

- The included bobbin was designed specifically for this sewing machine. If bobbins from other models are used, the machine will not operate correctly. Use only the included bobbin or bobbins of the same type (part code: X52800-150).

Using the Supplemental Spool Pin

While sewing embroidery, the bobbin can conveniently be wound.

1. Turn on the machine, and then open the top cover.

2. Align the groove in the bobbin with the spring on the bobbin winder shaft, and then set the bobbin on the shaft.

3. Set the supplemental spool pin in the “up” position.

4. Place the spool of thread on the supplemental spool pin so that the thread unwinds from the front. Then, slide the spool cap as far as possible onto the supplemental spool pin to secure the thread spool.

CAUTION

- If the thread spool and/or spool cap are set incorrectly, the thread may tangle on the spool pin and cause the needle to break.
- Use the spool cap (large, medium, or small) that is closest in size to the thread spool. If a spool cap smaller than the thread spool is used, the thread may become caught in the slit on the end of the spool.

Note

When using cross-wound thread on a thin spool, use the small spool cap, and leave a small gap between the cap and the thread spool.
While holding the thread from the spool in your right hand, hold the end of the thread with your left hand, and then pass the thread through the thread guide.

Pass the thread under the pin on the bobbin winding thread guide, and then pass it around the pretension disk.

* Make sure that the thread passes under the pretension disk.

Wind the thread clockwise around the bobbin four or five times.

Pass the end of the thread through the guide slit in the bobbin winder seat, and then pull the thread to the right to cut it with the cutter.

Cut the thread, and then remove the bobbin.

CAUTION
Be sure to follow the process described. If the thread is not cut with the cutter, and the bobbin is wound, when the thread runs low, it may tangle around the bobbin.

CAUTION
• Setting the bobbin improperly may cause the thread tension to loosen, breaking the needle and possibly resulting in injury.

Note
When removing the bobbin, pull up only on the bobbin. Do not pull on the bobbin winder seat, otherwise it may become loose, resulting in damage to the machine.
**Winding the Bobbin Using the Spool Pin**

The main spool pin cannot be used to wind the bobbin while sewing. For details, see “Using the Supplemental Spool Pin” on page 24.

1. Turn on the machine.
2. Open the top cover.
3. Align the groove in the bobbin with the spring on the bobbin winder shaft, and then slide the bobbin onto the shaft.

   - Groove in bobbin
   - Spring on bobbin winder shaft

4. Pivot the spool pin so that it angles upward, and then place the spool of thread on the spool pin.
   
   * Make sure that the thread unwinds from the front.

   - Spool cap
   - Thread spool
   - Spool pin

5. Slide the spool cap as far as possible onto the spool pin, and then return the spool pin to its original position.

6. While holding the thread from the spool with both hands, pull the thread through the lower notch in the thread guide plate, then through the upper notch.

   - Lower notch in the thread guide plate
   - Upper notch in the thread guide plate

7. Pass the thread through the thread guide.

   - Thread guide

8. Pass the thread under the pin on the bobbin winding thread guide, and then pass it around the pretension disk.
   
   * Make sure that the thread passes under the pretension disk.

   - Pin
   - Pretension disk

9. Follow steps 7 through 10 on page 25.
Setting the Bobbin

This section describes how to set a bobbin wound with thread into the machine. You can begin sewing without pulling up the bobbin thread. If you wish to pull up the bobbin thread, for example, when sewing gathers, follow the procedure described in the next section.

![CAUTION]

- Use a bobbin thread that has been correctly wound. Otherwise, the needle may break or the thread tension will be incorrect.

1. Press the “Presser Foot Lifter” button to raise the presser foot.

2. Slide the bobbin cover latch to the right, and then remove the bobbin cover.

3. Hold the bobbin with your right hand and hold the end of the thread with your left hand.

4. Insert the wound bobbin into the bobbin case so that the thread unwinds in the direction of the arrow.

![CAUTION]

- Be sure to hold down the bobbin with your finger and unwind the bobbin thread correctly. Otherwise, the thread may break or the thread tension will be incorrect.

5. Lightly hold down the bobbin with your right hand, and then, while slightly pulling the thread with your left hand, guide it through the groove.

6. After guiding the thread completely through the groove, pull it toward you to cut it with the cutter.

7. Attach the bobbin cover by inserting the tab in the lower-left corner of the bobbin cover, then lightly press down on the right side of the cover until it snaps into place.

Pulling Up the Bobbin Thread

There may be some sewing applications where you may want to pull up the bobbin thread, for example, when making gathers or with free-motion quilting. Follow the procedure described below to pull up the bobbin thread.

![Memo]

Thread the upper thread before pulling up the bobbin thread. For details, see “Upper Threading” on page 28.

1. Follow steps 1 through 4 from the previous section to insert the bobbin into the bobbin case.
2 Guide the bobbin thread through the groove, following the arrow in the illustration.

Note
- Do not cut the thread with the cutter.
- Do not attach the bobbin cover.

3 While lightly holding the upper thread, press the “Needle Position” button twice to lower, then raise the needle.

4 Gently pull the upper thread to pull up the bobbin thread.

→ A loop of the bobbin thread comes out from the hole in the needle plate.

5 Pull out about 100 mm of the bobbin thread, and then pass it under the presser foot toward the rear of the machine, making it even with the upper thread.

6 Attach the bobbin cover.

Upper Threading

This section describes how to thread the machine and the needle. The machine is marked with numbers that indicate the threading order.

Note
- Do not cut the thread with the cutter.
- Do not attach the bobbin cover.

CAUTION
- Be sure to thread the machine properly. Improper threading can cause the thread to tangle and break the needle, leading to injury.
- When using accessories not included with this machine, attach the accessory to the machine after threading the machine.

1 Turn on the machine.

2 Press the “Presser Foot Lifter” button to raise the presser foot.

→ The upper thread shutter opens so the machine can be threaded.

Memo
This machine is equipped with an upper thread shutter, allowing you to check that the upper threading is performed correctly.
3 Press the “Needle Position” button to raise the needle.

4 Pivot the spool pin so that it angles upward, and then place the spool of thread on the spool pin.
   * Make sure that the thread unwinds from the front.

5 Slide the spool cap as far as possible onto the spool pin, and then return the spool pin to its original position.

6 While holding the thread from the spool with both hands, pull the thread through the lower notch in the thread guide plate, then through the upper notch.

7 While holding the thread from the spool in your right hand, hold the end of the thread with your left hand, and then guide the thread through the groove, following the arrows in the illustration.

8 Guide the thread down, up, then down through the groove, as shown in the illustration.

9 Pass the thread through the needle bar thread guide (marked “6”).
   * Hold the thread with both hands and guide it as shown in the illustration.

---

Note

If you try to thread the needle with the needle threader lever without raising it, damage to the machine may result.

---

CAUTION

- If the thread spool and/or spool cap are set incorrectly, the thread may tangle on the spool pin and cause the needle to break.
- Use the spool cap (large, medium, or small) that is closest in size to the thread spool. If a spool cap smaller than the thread spool is used, the thread may become caught in the slit on the end of the spool and cause the needle to break.

Memo

Look through the take-up lever check window to check the position of the take-up lever. Before threading the machine, make sure that the take-up lever is in the raised position.
Pass the thread through the thread guide disks (marked “7”).
* Make sure that the thread passes through the groove in the thread guide.
* Make sure that the thread securely enters the thread guide disks, otherwise the needle may not be threaded.

11 Pull the thread up through the thread cutter to cut the thread, as shown in the illustration.

12 Lower the needle threader lever slowly until it clicks.
* The hook is rotated and passes through the eye of the needle.

Note
- If the needle threader lever is lowered quickly, the needle may not be threaded.
- Make sure that no objects, such as the fabric, are touching the hook.

13 Release the needle threader lever.
→ The thread passes through the eye of the needle.

14 Carefully pull the end of thread that was passed through the eye of the needle.

Note
Do not pull the thread strongly. Otherwise, the needle may bend or break.
* If a loop was formed in the thread passed through the eye of the needle, carefully pull on the loop of thread through to the back of the needle.

15 Pull out about 100 mm (approx. 3-4 inches) of the thread, and then pass it under the presser foot toward the rear of the machine.

16 Press the “Presser Foot Lifter” button to lower the presser foot before starting to sew.

Note
- The needle threader can be used with home sewing machine needles 75/11 through 100/16. For details on appropriate needle and thread combinations, see “Fabric/Thread/Needle Combinations” on page 36.
- If automatic needle threading could not be completed correctly, repeat the procedure, starting with the needle bar thread guide (marked “6”).
- Some needles cannot be threaded with the needle threader. In this case, instead of using the needle threader after passing the thread through the needle bar thread guide (marked “6”), manually pass the thread through the eye of the needle from the front.

Memo
This completes the upper threading procedure.
Using the Twin Needle

Using the twin needle, you can sew two parallel lines of the same stitch. Although the same bobbin thread is used, interesting patterns can be sewn by threading each needle with a different color of thread. Both upper threads should have the same thickness and quality. The twin needle can only be used with patterns where appears when they are selected. Check the “STITCH SETTING CHART” at the end of this manual for patterns that can be used with the twin needle.

**CAUTION**

- Use only twin needles made for this machine (part code X59296-151). Other needles could break, resulting in damage.
- Be sure to set the twin needle mode when using the twin needle. Using the twin needle while the machine is in single needle mode could cause the needle to break, resulting in damage.
- Do not sew with bent needles. The needle could break and cause injury.
- When using the twin needle, be sure to use presser foot “J”. In case bunched stitches may occur, use the presser foot “N”.

1 Press , and then install the twin needle (see “CHANGING THE NEEDLE” on page 34).

2 Thread the machine for the first needle according to the procedure for threading a single needle (see “Upper Threading” on page 28).

3 Pass the thread through the needle bar thread guide, and then thread the needle on the left side.

4 Set the supplemental spool pin in the “up” position.

5 Place the additional spool of thread on the supplemental spool pin so that the thread unwinds from the front. Then, slide the spool cap as far as possible onto the supplemental spool pin to secure the thread spool.

6 While holding the thread from the spool in your right hand, hold the end of the thread with your left hand, and then pass the thread through the thread guide.

* Do not pass the thread through the bobbin winding thread guide.
While holding the thread from the spool with both hands, pull the thread through the lower notch in the thread guide plate, then through the upper notch. Hold the end of the thread with your left hand, and then guide the thread through the groove, following the arrows in the illustration.

Without passing the thread through the needle bar thread guide, thread the needle on the right side.

Press \[ \text{ } \] to select the setting for twin needle sewing.

* The stitch width becomes narrower than with single needle sewing.

CAUTION

- Be sure to set the twin needle mode when using the twin needle. Using the twin needle while the machine is in single needle mode could cause the needle to break, resulting in damage.

Press the “Start/Stop” button after lowering the presser foot lever.

Memo

To change the sewing direction with the twin needle, raise the needle from the fabric, raise the presser foot lever, and then turn the fabric.
CHANGING THE PRESSER FOOT

Getting Ready

CHANGING THE PRESSER FOOT

Removing the Presser Foot

1. Press the “Needle Position” button to raise the needle.

2. Press .

- The screen changes, and all keys and operation buttons are locked.

Attaching the Presser Foot

1. Place the presser foot under the holder, aligning the pin on the foot with the notch in the holder, and then lower the presser foot lever so that the presser foot pin snaps into the notch in the holder.

2. Press , or press  in the screen.

- All keys and operation buttons are unlocked, and the previous screen is displayed.

3. Raise the presser foot lever.

CAUTION

- Always press in the operation panel before changing the presser foot. If is not pressed and the “Start/Stop” button or another button is pressed, the machine will start and may cause injury.
- Always use the correct presser foot for the selected stitch pattern. If the wrong presser foot is used, the needle may strike the presser foot and bend or break, and may cause injury.
- Only use presser feet made for this machine. Using other presser feet may lead to accident or injury.
**Changing the Needle**

### Checking the Needle

Place the flat side of the needle on a flat surface (such as the needle plate or a piece of glass) and check that the gap between the needle and the flat surface is even.

#### Note

Never use bent or blunt needles.

1. **Press the “Needle Position” button to raise the needle.**

2. **Press .**

   - The screen changes, and all keys and operation buttons are locked.

---

**CAUTION**

- Always press \( \text{ \( \text{ \( \text{ \( \text{ \( \}} \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) \) 34
3. Use the included screwdriver to turn the needle clamp screw toward the front of the machine to loosen it, and then remove the needle.

Note
Do not apply extreme force when loosening or tightening the needle clamp screw, otherwise damage to the machine may result.

4. With the flat side of the needle facing the back, insert the new needle until it touches the needle stopper. Use the screwdriver to securely tighten the needle clamp screw.

CAUTION
- Be sure to push in the needle until it touches the stopper, and securely tighten the needle clamp screw with a screwdriver. If the needle is not completely inserted or the needle clamp screw is loose, the needle may break or the machine may be damaged.

5. Press , or press in the screen.

→ All keys and operation buttons are unlocked, and the previous screen is displayed.
About the Needle

The sewing machine needle is probably the most important part of the sewing machine. Choosing the proper needle for your sewing project will result in a beautiful finish and fewer problems. Below are some things to keep in mind about needles.

- The smaller the needle number, the finer the needle. As the numbers increase, the needles get thicker.
- Use fine needles with lightweight fabrics, and thicker needles with heavyweight fabrics.
- To avoid skipped stitches, use ball point needle (gold colored) 90/14 with stretch fabrics.
- To avoid skipped stitches, use ball point needle (gold colored) 90/14 when sewing character or decorative stitches.
- Use needle 75/11 for embroidery. Ball point needles (gold colored) 90/14 are not recommended for embroidery, as they may bend or break, causing injury.
- It is recommended that a 90/14 needle should be used when embroidering on heavyweight fabrics or stabilizing products (for example, denim, puffy foam, etc.). A 75/11 needle may bend or break, which could result in injury.
- A home sewing machine needle 75/11 is inserted in the sewing machine.

Fabric/Thread/Needle Combinations

The following table provides information concerning the appropriate thread and needle for various fabrics. Please refer to this table when selecting a thread and needle for the fabric you wish to use.

<table>
<thead>
<tr>
<th>Fabric</th>
<th>Thread Type</th>
<th>Size of needle</th>
</tr>
</thead>
<tbody>
<tr>
<td>Medium weight fabric</td>
<td>Broadcloth Cotton</td>
<td>60 - 80, 75/11 - 90/14</td>
</tr>
<tr>
<td></td>
<td>Taffeta Synthetic mercerized</td>
<td>60 - 80</td>
</tr>
<tr>
<td></td>
<td>Flannel, Gabardine Silk or silk finished</td>
<td>50</td>
</tr>
<tr>
<td>Lightweight fabric</td>
<td>Lawn, Batiste Cotton</td>
<td>60 - 80, 65/9 - 75/11</td>
</tr>
<tr>
<td></td>
<td>Georgette Synthetic mercerized</td>
<td>60 - 80</td>
</tr>
<tr>
<td></td>
<td>Challis, Satin Silk</td>
<td>50</td>
</tr>
<tr>
<td>Heavyweight fabric</td>
<td>Denim Cotton</td>
<td>30 - 50, 90/14 - 100/16</td>
</tr>
<tr>
<td></td>
<td>Corduroy Synthetic mercerized</td>
<td>50</td>
</tr>
<tr>
<td></td>
<td>Tweed Silk</td>
<td>50</td>
</tr>
<tr>
<td>Stretch fabric</td>
<td>Jersey Thread for knits</td>
<td>50 - 60, Ball point needle (gold colored) 75/11 - 90/14</td>
</tr>
<tr>
<td></td>
<td>Tricot</td>
<td>50 - 60</td>
</tr>
<tr>
<td>For top stitching</td>
<td>Synthetic mercerized</td>
<td>30, 90/14 - 100/16</td>
</tr>
<tr>
<td></td>
<td>Silk</td>
<td>30</td>
</tr>
</tbody>
</table>

Memo

For transparent nylon thread, always use needle 90/14 - 100/16. The same thread is usually used for the bobbin thread and upper threading.

CAUTION

- Be sure to follow the needle, thread, and fabric combinations listed in the table. Using an improper combination, especially a heavyweight fabric (i.e., denim) with a small needle (i.e., 65/9 - 75/11), may cause the needle to bend or break, and lead to injury. Also, the seam may be uneven, the fabric may pucker, or the machine may skip stitches.

CAUTION

- To avoid injury, pay special attention to the needle while the machine is in operation. Keep your hands away from moving parts while the machine is in operation.
- Do not stretch or pull the fabric during sewing. Doing so may lead to injury.
- Do not use bent or broken needles. Doing so may lead to injury.
- Take care that the needle does not strike basting pins or other objects during sewing. Otherwise, the needle may break and cause injury.
- If stitches become bunched, lengthen the stitch length setting before continuing sewing. Otherwise, the needle may break and cause injury.

Sewing a Stitch

1. Turn on the machine, and then press the “Needle Position” button to raise the needle.
2. Select a stitch pattern.
3. Install the presser foot (see “CHANGING THE PRESSER FOOT” on page 33).
4. Place the fabric under the presser foot, hold the fabric and thread ends with your left hand, and then turn the handwheel to lower the needle into the fabric at the starting point of the stitching.
   * The black button on the left side of presser foot “J” should be pressed only if the fabric does not feed or when sewing thick seams. Normally, you can sew without pressing the black button.
5. Lower the presser foot lever.
6. Slide the sewing speed controller to adjust the sewing speed.
   * The sewing speed can also be adjusted during sewing.
7. Lightly place your hands on the fabric to guide it, and then press the “Start/Stop” button to start sewing.
To stop sewing, press the “Start/Stop” button again.

Press the “Thread Cutter” button to trim the threads.

The needle automatically stops in the raised position.

CAUTION
- Do not press the “Thread Cutter” button after the threads have been cut. Doing so could tangle the thread or break the needle and damage the machine.
- Do not press the “Thread Cutter” button when there is no fabric set in the machine or during machine operation. The thread may tangle, possibly resulting in damage.

When the needle has stopped moving, raise the presser foot and remove the fabric.

CAUTION
Do not press the “Thread Cutter” button after the threads have been cut. Doing so could cause a fire or an electric shock.

Memo
- When the foot controller is being used, the “Start/Stop” button has no effect on sewing.
- The foot controller cannot be used when embroidering.

1 Insert the foot controller plug into its jack on the machine.

2 Slowly press the foot controller to start sewing.

3 Release the foot controller to stop the machine.

Note
When cutting thread thicker than #30, nylon thread or other decorative threads, use the thread cutter on the side of the machine.

Memo
- The speed set using the sewing speed controller is the foot controller's maximum sewing speed.

Memo
(For U.S.A. only)
Foot controller: Model T
This foot controller can be used with model NV1500D/NV1500.

Note
This machine is equipped with a bobbin thread sensor that warns you when the bobbin thread is almost empty. When the bobbin thread is nearly empty, the machine stops automatically and a message appears in the screen. When this message appears, change the bobbin with one full of thread. However, if the “Start/Stop” button is pressed, a few stitches can be sewn.
Using the Knee Lifter

Using the knee lifter, you can raise and lower the presser foot with your knee, leaving both hands free to handle the fabric.

1. Align the tabs on the knee lifter with the notches in the jack, and then insert the knee lifter as far as possible.

2. Use your knee to move the knee lifter to the right in order to raise the presser foot. Release the knee lifter to lower the presser foot.

- **Note**
  - If the knee lifter is not pushed into the mounting slot as far as possible, it may come out during use.

- **Note**
  - When the presser foot is in raised position, move the knee lifter further to the right for the presser foot to lower.

**CAUTION**

- Be sure to keep your knee away from the knee lifter during sewing. If the knee lifter is pushed during machine operation, the needle may break or the thread tension may loosen.

Sewing Reinforcement Stitches

Generally stitching must be secured at the beginning and end with reverse/reinforcement stitches. Press the “Reverse/Reinforcement Stitch” button to sew reverse/reinforcement stitches.

Depending on the selected stitch pattern, reverse or reinforcement stitches are sewn while the “Reverse/Reinforcement Stitch” button is kept pressed. With reinforcement stitches, 3 to 5 stitches are sewn at the same place. With reverse stitches, the stitching is sewn at a low speed in the opposite direction.

In addition, this machine can be set to sew reinforcement stitches (or reverse stitches) automatically. For details, see “Automatic Reinforcement Stitching” on page 43.

Sewing Curves

Sew slowly while keeping the seam parallel with the fabric edge as you guide the fabric around the curve.

Changing Sewing Direction

Stop the machine with the needle in the fabric at the point where you want to change the sewing direction, and then raise the presser foot lever. Using the needle as a pivot, turn the fabric, lower the presser foot lever, and then continue sewing.

Sewing a Seam Allowance of 0.5 cm or Less

Baste the corner before sewing, and then, after changing the sewing direction at the corner, pull the basting thread toward the back while sewing.

- **0.5 cm**
Sewing Heavyweight Fabric

■ If the Fabric Does Not Fit Under the Presser Foot
The presser foot lever can be raised to two different positions. If the fabric is too thick to fit under the presser foot, raise the presser foot lever to its highest position so that the fabric can be placed under the presser foot.

■ If the Fabric Does Not Feed
If the fabric does not feed when starting to sew or when sewing thick seams, press the black button on the left side of presser foot “J”.

1 Raise the presser foot lever.

2 While keeping the black button on the left side of presser foot “J” pressed in, lower the presser foot lever.

* The presser foot remains level, enabling the fabric to be fed. Once the trouble spot has been sewn, the presser foot will return to its normal operation.

Memo
If the fabric cannot be smoothly placed under the presser foot, select the presser foot height higher on the setting screen (see page 20). The default is 7.5 mm from the needle plate when the presser foot is raised.

CAUTION
• Do not forcefully push fabrics more than 6 mm (approx. 1/4 inch) thick through the sewing machine. This may cause the needle to break and cause injury.

Sewing Lightweight Fabric
Iron the fabric with starch or place thin paper or tear away embroidery stabilizer under thin fabrics to make sewing easier. Gently tear off the paper or the stabilizer after sewing.

1 Thin paper
When a stitch is selected, the most appropriate stitch width, stitch length, and upper thread tension are automatically set. However, if needed, you can change any of the settings as described in this section.

**Note**
- Settings for some stitches cannot be changed (See the “STITCH SETTING CHART” at the end of this manual).
- If a stitch setting is changed, but not saved, the stitch setting returns to its default when the machine is turned off or a different stitch is selected.

### Adjusting the Stitch Width

The stitch width (zigzag width) can be adjusted to make the stitch wider or narrower.

<table>
<thead>
<tr>
<th>Width</th>
<th>Length</th>
<th>Tension</th>
</tr>
</thead>
<tbody>
<tr>
<td>3.2 mm</td>
<td>1.4 mm</td>
<td>4.0</td>
</tr>
</tbody>
</table>

Each press of makes the zigzag stitch narrower.

Each press of makes the zigzag stitch wider.

Press to return the setting to its default.

### Adjusting the Stitch Length

The stitch length can be adjusted to make the stitch coarser or finer.

<table>
<thead>
<tr>
<th>Width</th>
<th>Length</th>
<th>Tension</th>
</tr>
</thead>
<tbody>
<tr>
<td>0.0 mm</td>
<td>2.8 mm</td>
<td>4.0</td>
</tr>
</tbody>
</table>

Each press of makes the stitch finer (shorter).

Each press of makes the stitch coarser (longer).

Press to return the setting to its default.

### CAUTION
- If the stitches get bunched together, lengthen the stitch length and continue sewing. Do not continue sewing without lengthening the stitch length. Otherwise, the needle may break and cause injury.
Adjusting the Thread Tension

The default thread tension, which is automatically set, can normally be used regardless of the type of thread or fabric being sewn. However, with some fabric and thread combinations, the thread tension may need to be adjusted.

**Correct Thread Tension**

The upper thread and the bobbin thread should cross near the center of the fabric. If the thread tension is incorrectly set, the seam may have a poor finish or the fabric may pucker.

- **Upper Thread Is Too Tight**
  - If the bobbin thread can be seen on the surface of the fabric, press [-]. Each press of the key reduces the setting and makes the thread tension more loose.

- **Upper Thread Is Too Loose**
  - If the upper thread can be seen on the wrong side of the fabric, press [+]. Each press of the key increases the setting and makes the thread tension tighter.

Press [-] to return the setting to its default.

---

**USEFUL FUNCTIONS**

Automatic Reinforcement Stitching

After selecting a stitch pattern, turn on the automatic reinforcement stitching setting before sewing, and the machine will automatically sew reinforcement stitches (or reverse stitches, depending on the stitch pattern) at the beginning and end of sewing.

1. **Select a stitch pattern.**
2. **Press** [ ] to select the automatic reinforcement/reverse stitching setting.

**Memo**

The automatic reinforcement/reverse stitching setting is already selected with some stitches, such as buttonholes and bar tacks.
3 Place the fabric under the presser foot with the needle at the starting point of the stitching, and then press the “Start/Stop” button. The machine will automatically sew reverse stitches (or reinforcement stitches), and then begin sewing.

![Reverse stitches (or reinforcement stitches)](image1)

**Memo**

If you press the “Start/Stop” button to pause sewing, then press it again to continue, reverse stitches (or reinforcement stitches) will not be sewn.

4 If the “Reverse/Reinforcement Stitch” button is pressed, the machine automatically sews reverse stitches (or reinforcement stitches), then stops.

![Reverse stitches (or reinforcement stitches)](image2)

**Memo**

To cancel the automatic reverse/reinforcement stitching setting, press 🛠 again so that it appears as 🛠.

---

### Automatic Thread Cutting

If the automatic thread cutting setting is selected before sewing, the machine will automatically sew reinforcement stitches (or reverse stitches, depending on the selected stitch pattern) and cut the thread when the “Reverse/Reinforcement Stitch” button is pressed at the end of stitching. This is useful when sewing buttonholes and bar tacks.

**Memo**

- The automatic thread cutting setting can be selected when the automatic reinforcement/reverse stitching setting is selected.
- The automatic thread cutting setting is already selected with embroidery patterns.

1 Select a stitch pattern.

![Select a stitch pattern](image3)

3 Place the fabric under the presser foot with the needle at the starting point of the stitching, and then press the “Start/Stop” button. The machine will automatically sew reverse stitches (or reinforcement stitches), and then begin sewing.

![Reverse stitches (or reinforcement stitches)](image4)

**Memo**

If you press the “Start/Stop” button to pause sewing, then press it again to continue, reverse stitches (or reinforcement stitches) will not be sewn.

4 If the “Reverse/Reinforcement Stitch” button is pressed, the machine automatically sews reverse stitches (or reinforcement stitches), then cuts the thread.

![Reverse stitches (or reinforcement stitches)](image5)

**Memo**

To cancel the automatic thread cutting setting, press 🛠 again so that it appears as 🛠.
Locking the Screen

If the screen is locked before starting to sew, the various settings, such as the stitch width and stitch length, are locked and cannot be changed. This prevents screen settings from accidentally being changed or the machine from being stopped while large pieces of fabric or other projects are being sewn. The screen can be locked while sewing utility stitches and character/decorative stitches.

1 Select a stitch pattern.

2 If necessary, adjust any settings, such as the stitch width and stitch length.

3 Press .
   → The key appears as .

4 Sewing begins.

5 When you are finished sewing, press to unlock the screen.

Note

- When the screen is locked (), no key other than and the keys can be operated. To select a different stitch pattern or change the settings, press so that it appears as to unlock the screen.
- When the screen is locked, pressing any of the keys unlocks the screen.
- The screen is unlocked when the machine is turned off.

SELECTING A UTILITY STITCH

- Stitch Selection Screens

Press \( \text{Previous Page Button} \) to display the previous or next page.

- Straight/Overcasting/Quilting Stitches

- Decorative Stitches

- Heirloom Stitches

- Buttonholes/Bar tacks

- Multi-Directional Sewing
Selecting a Stitch Pattern

1 Turn on the machine, and then lightly press the display.

→ Depending on the setting, either "1-01 Straight stitch (Left)" or "1-03 Straight stitch (Middle)" is automatically selected.

2 Press \[ \text{UTILITY STITCH} \] to display a screen of the stitches in the selected category, and then select a stitch pattern.

* If a different screen is displayed, press \[ \text{UTILITY STITCH} \].

→ An image of the selected stitch pattern is displayed below the symbol of the appropriate presser foot.

Memo
For details on the stitch patterns, refer to the “STITCH SETTING CHART” at the end of this manual.

■ Using the Mirror Image Key

Press \[ \text{MIRROR} \] so that it appears as \[ \text{MIRROR} \]. A mirror image of the selected stitch pattern is created.

Note
If \[ \text{MIRROR} \] appears as \[ \text{MIRROR} \] after a stitch (buttonholes, multi-directional sewing patterns, etc.) is selected, a mirror image of the selected stitch cannot be created.

Saving Stitch Settings

This machine is preset with the default settings for the stitch width (zigzag width), stitch length, thread tension, automatic thread cutting, automatic reverse/reinforcement stitching, etc. However, if you wish to save specific settings for a stitch so that they can be used later, press \[ \text{OTHERS} \] after changing the settings to save the new settings with the selected stitch.

Example: Using a stitch length of 2.0 mm for the straight stitch

1 Select a straight stitch.

Memo
The default stitch length is 2.5 mm.

2 Set the stitch length to 2.0 mm.

3 Press \[ \text{OTHERS} \].

* To reset the selected stitch pattern to its default settings, press \[ \text{RESET} \], and then press \[ \text{OTHERS} \].
SELECTING A UTILITY STITCH

Memo
- The next time that the same straight stitch is selected, the stitch length is set to 2.0 mm.
- All stitch settings (stitch width (zigzag width), stitch length, thread tension, automatic thread cutting, and automatic reverse/reinforcement stitching) are saved, not just the setting that was changed. When the same stitch pattern is selected, the last settings saved are displayed even if the machine was turned off. If the settings are changed again and is pressed, or if is pressed to reset the setting to its default, the new settings are not saved unless is pressed another time.

Using the Sewing Type Selection Key

By pressing , a utility stitch can also be selected according to its desired use. When you are not sure which stitch to select for your application or when you need information on how certain stitches are used, press , select the appropriate stitch for your project, and then follow the instructions to sew the selected stitch. We recommend that beginners use this method to select stitches.

Example: Displaying information about overcasting

1. Press .

   → The advice screen is displayed.

2. Press .

   → The upper part of the screen displays a selection of overcasting stitches with explanations.

3. Read the descriptions, and then select the appropriate stitch.

   * Press or to scroll the page.

   → The screen displays directions for sewing the selected stitch.

4. Follow the directions to sew the stitch.

   * Press to display the next page.

5. When you have finished sewing, press .

   → The next time that the same straight stitch is selected, the stitch length is set to 2.0 mm.

   All stitch settings (stitch width (zigzag width), stitch length, thread tension, automatic thread cutting, and automatic reverse/reinforcement stitching) are saved, not just the setting that was changed. When the same stitch pattern is selected, the last settings saved are displayed even if the machine was turned off. If the settings are changed again and is pressed, or if is pressed to reset the setting to its default, the new settings are not saved unless is pressed another time.
## SEWING THE STITCHES

### Note

When using the twin needle (see page 31), be sure to attach presser foot “J”.

### Memo

“-” at the beginning of the stitch shown on the key indicates that reverse stitches are sewn when the “Reverse/Reinforcement Stitch” button is pressed. “•” at the beginning of the stitch shown on the key indicates that reinforcement stitches are sewn when the “Reverse/Reinforcement Stitch” button is pressed.
1. Select a stitch pattern.

2. Attach presser foot “J”.

3. Hold the thread ends and the fabric with your left hand, and turn the handwheel toward you with your right hand to insert the needle into the fabric at the starting point of the stitching.

4. Lower the presser foot lever.

5. Hold the “Reverse/Reinforcement Stitch” button pressed to sew reverse stitches (or reinforcement stitches), and then press the “Start/Stop” button to start sewing slowly.

6. At the end of the stitching, hold the “Reverse/Reinforcement Stitch” button pressed to sew reverse stitches (or reinforcement stitches).

7. Press the “Thread Cutter” button to trim the threads.
   * If the automatic thread cutting setting is selected before sewing, the machine will automatically sew reverse stitches (or reinforcement stitches) at the beginning of stitching. When the “Reverse/Reinforcement Stitch” button is pressed at the end of stitching, the machine will automatically sew reverse stitches (or reinforcement stitches) and cut the thread.

**Changing the Needle Position (Left or Middle Needle Position Stitches Only)**

When you select left or middle needle position stitches, you can use [ ] and [ ] in the stitch width display to change the position of the needle. Match the distance from the right edge of the presser foot to the needle with the stitch width, then align the edge of the presser foot with the edge of the fabric during sewing for an attractive finish.

---

**CAUTION**

- Be sure the needle does not strike a basting pin, or any other objects, during sewing. The thread could tangle or the needle could break, causing injury.
**Utility Stitches**

**Basting**

1. Press , and then attach presser foot “J”.
2. Press the “Reverse/Reinforcement Stitch” button to sew reinforcement stitches at the beginning of the stitching.

**Memo**

For a standard 16 mm (approx. 5/8 inch) seam allowance, set the width to 0 mm on the screen. While sewing, align the edge of the fabric with the 16mm (approx. 5/8 inch) mark on the needle plate.

![Diagram of Basting](image)

- 16 mm (approx. 5/8 inch)

**Darts Seams**

1. Press , and then attach presser foot “J”.
2. Press the “Reverse/Reinforcement Stitch” button to sew reverse stitches at the beginning of the stitching, and then sew from the wide end to the other end without stretching the fabric.

* If the automatic reverse/reinforcement stitching setting is selected before sewing, reverse stitches will be sewn at the beginning of the stitching.

![Diagram of Darts Seams](image)

3. Without sewing reverse stitches at the end of the stitching, pull out 50 mm (approx. 1-15/16 inches) of the threads, cut them, and then tie the two ends together.

4. Insert the ends of the thread into the dart with a sewing needle.

5. Iron the dart to one side.

**Memo**

- **16 mm (approx. 5/8 inch)**

- The stitch length can be set between 5 mm and 30 mm (approx. 3/16 and 1-3/16 inches).

- **Between 5 mm (approx. 3/16 inch) and 30 mm (approx. 1-3/16 inches)**

- This is easy to do if the foot controller is used (see page 39).

**End the basting with reinforcement stitches.**
Gathering

Sew gathers on sleeves, the waist of a gathered skirt, etc.

1. Select a straight stitch, and then attach presser foot “J”.

2. Set the stitch length to 4.0 mm (approx. 3/16 inch) and the thread tension to 2.0 (weaker tension).

- **Memo**
  - If you press , then , the stitch length is automatically set to 4.0 mm (approx. 3/16 inch) and the thread tension is automatically set to 2.0.

3. Pull out 50 mm (approx. 1-15/16 inches) of both the upper and bobbin threads (see “Pulling Up the Bobbin Thread” on page 27).

- **Flat Fell Seams**

  Use flat fell seams to reinforce seams and finish edges neatly.

1. Press , and then attach presser foot “J”.

2. With the surfaces of the two pieces of fabric facing each other, sew the seam line, and then cut off half the seam allowance from the side on which the flat fell seam will lie.
   - If the automatic reverse/reinforcement stitching and automatic thread cutting settings are selected before sewing, reverse stitches will automatically be sewn at the beginning and end of the stitching and the thread will be cut.

3. Spread out the fabric along the seam line.

- **Pulling Up the Bobbin Thread**

  Pull the bobbin threads to create the desired amount of gathering, and then tie the threads.

  Smooth the gathers by ironing them.

  Sew along the seam line, and then remove the basting stitch.
4. Lay both seam allowances on the side of the shorter one (cut seam allowance) and iron them flat.

5. Fold the longer seam allowance around the shorter one, and then sew along the edge of the fold.

---

**Pintucks**

Use pin tucks to decorate blouses.

1. Mark the positions of the folds on the wrong side of the fabric.

2. Turn the fabric over, and then iron only the folds with the tip of the iron.

3. Press , and then attach presser foot “I”.

4. Attach the pin on the right side of presser foot “I” to the presser foot holder, and then sew along the folds.

   * If the automatic reverse/reinforcement stitching and automatic thread cutting settings are selected before sewing, reverse stitches will automatically be sewn at the beginning and end of the stitching and the thread will be cut.

5. Iron the folds in the same direction.
Zigzag Stitches

Zigzag stitches are useful for a variety of applications, including overcasting and sewing appliqués and patchwork.

Note
When using the twin needle (see page 31), be sure to attach presser foot “J”.

<table>
<thead>
<tr>
<th>Stitch Key</th>

<td>2.5 - 5.0 (3/32 - 3/16)</td>
<td>1.4 (1/16)</td>
</tr>
</tbody>
</table>

1. Select a stitch, and then attach presser foot “J”.

Memo
“*” at the beginning of the stitch shown on the key indicates that reverse stitches are sewn when the “Reverse/Reinforcement Stitch” button is pressed. “*” at the beginning of the stitch shown on the key indicates that reinforcement stitches are sewn when the “Reverse/Reinforcement Stitch” button is pressed.

- **Overcasting**
  Sew while making sure that the needle drops slightly off the edge of the fabric.

  ![Needle drop point](needle_drop.png)

- **Appliqués**
  Attach the appliqué using a temporary spray adhesive or basting, and then sew along the edge of the appliqué, making sure that the needle drops slightly off the edge.
■ Patchwork (Crazy Quilts)
Turn back the desired width of fabric, place it over a different piece of fabric, and then sew the two fabric pieces together so the stitching bridges both pieces.

■ Sewing Curves
Shorten the stitch length setting to obtain a fine stitch. Sew slowly, keeping the seams parallel with the fabric edge as you guide the fabric around the curve.

Elastic Zigzag Stitches

Use elastic zigzag stitches for a wide variety of applications, including overcasting, tape attaching, and darning.

<table>
<thead>
<tr>
<th>Stitch Key</th>
<th>Stitch Name</th>
<th>Presser Foot</th>
<th>Applications</th>
<th>Stitch Width [mm (inch)]</th>
<th>Stitch Length [mm (inch)]</th>
<th>Twin Needle</th>
</tr>
</thead>
<tbody>
<tr>
<td>1-62</td>
<td>2 step elastic zigzag</td>
<td>J</td>
<td>Overcasting (medium weight and stretch fabrics), tape and elastic</td>
<td>5.0 (3/16)</td>
<td>1.5 - 7.0 (1/16 - 1/4)</td>
<td>OK (J)</td>
</tr>
<tr>
<td>1-73</td>
<td>3 step elastic zigzag</td>
<td>J</td>
<td>Overcasting (medium, heavyweight and stretch fabrics), tape and elastic</td>
<td>5.0 (3/16)</td>
<td>1.5 - 7.0 (1/16 - 1/4)</td>
<td>OK (J)</td>
</tr>
</tbody>
</table>

Select a stitch, and then attach presser foot “J”.

■ Tape attaching
Stretch the tape flat. While stretching the tape flat, sew the tape to the fabric.

■ Overcasting
Use this stitch to sew overcasting on the edge of stretch fabrics. Sew while making sure that the needle drops slightly off the edge of the fabric.
Overcasting

Sew overcasting at the beginning and end of seams for skirts or pants, and at the beginning and end of all cuttings. Depending on the selected stitch, use presser foot “G” or “J” or the side cutter attachment.

### Overcasting Using Presser Foot “G”

<table>
<thead>
<tr>
<th>Stitch Key</th>
<th>Stitch Name</th>
<th>Presser Foot</th>
<th>Applications</th>
<th>Stitch Width [mm (inch)]</th>
<th>Stitch Length* [mm (inch)]</th>
<th>Twin Needle</th>
</tr>
</thead>
<tbody>
<tr>
<td>1-15</td>
<td>Overcasting</td>
<td>G</td>
<td>Reinforcing of light and medium weight fabrics</td>
<td>3.5 (1/8)</td>
<td>2.0 (1/16)</td>
<td>NO</td>
</tr>
<tr>
<td>1-16</td>
<td>Overcasting</td>
<td>G</td>
<td>Reinforcing of heavyweight fabric</td>
<td>5.0 (3/16)</td>
<td>2.5 (3/32)</td>
<td>NO</td>
</tr>
<tr>
<td>1-17</td>
<td>Overcasting</td>
<td>G</td>
<td>Reinforcing of medium, heavyweight and easily friable fabrics or decorative stitching.</td>
<td>5.0 (3/16)</td>
<td>2.5 (3/32)</td>
<td>NO</td>
</tr>
</tbody>
</table>

1. Select a stitch, and then attach presser foot “G”.

2. Lower the presser foot so that the presser foot guide is flush against the edge of the fabric.

3. Sew along the presser foot guide.

**CAUTION**

- After the stitch width is adjusted, turn the handwheel toward you by hand and check that the needle does not touch the presser foot. If the needle hits the presser foot, the needle may break and cause injury.

- The needle should not touch

- If the presser foot is raised to its highest level, the needle may strike the presser foot.
### Overcasting Using Presser Foot “J”

<table>
<thead>
<tr>
<th>Stitch Key</th>
<th>Stitch Name</th>
<th>Presser Foot</th>

</tr>
<tr>
<td></td>
<td>Overcasting stitch</td>
<td></td>
<td>Stretch knit seam</td>
<td>5.0 (3/16)</td>
<td>0.0 - 7.0 (0 - 1/4)</td>
<td>NO</td>
</tr>
<tr>
<td></td>
<td>Single diamond overcast</td>
<td></td>
<td>Reinforcement and seaming stretch fabric</td>
<td>6.0 (15/64)</td>
<td>1.0 - 7.0 (1/16 - 1/4)</td>
<td>OK (J)</td>
</tr>
<tr>
<td></td>
<td>Single diamond overcast</td>
<td></td>
<td>Reinforcement of stretch fabric</td>
<td>6.0 (15/64)</td>
<td>1.0 - 7.0 (1/16 - 1/4)</td>
<td>OK (J)</td>
</tr>
</tbody>
</table>

1. Select a stitch, and then attach presser foot “J”.

2. Sew while making sure that the needle drops slightly off the edge of the fabric.

---

**Memo**

For best results when sewing stretch fabrics, decrease the pressure of the presser foot.
**SEWING THE STITCHES**

- **Overcasting Using the Side Cutter**
  
  By using the side cutter, you can do overcasting while cutting the fabric.

<table>
<thead>
<tr>
<th>Stitch</th>
<th>Stitch name</th>
<th>Presser foot</th>
<th>Applications</th>
<th>Stitch width [mm (inch.)]</th>
<th>Stitch length [mm (inch.)]</th>
<th>Twin needle</th>

<td>2.5 (3/32)</td>
<td>1.0 - 4.0 (1/16 - 3/16)</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

**Memo**

Thread the needle manually when using the side cutter, or only attach the side cutter after threading the needle using the needle threader.

---

1. Follow the steps on page 33 to remove the presser foot.
2. Position the fork on the side cutter’s operating lever onto the needle clamp screw.
3. Position the side cutter so that the side cutter pin is aligned with the notch in the presser foot holder, and then lower the presser foot.

---

**CAUTION**

- Make sure to only select one of the stitches listed below. Using another stitch may cause the needle to hit the presser foot and break, possibly causing injury.

---

**Memo**

Make sure that the fork of the operating lever is set onto the needle clamp screw firmly.

---

1. Needle clamp screw
2. Operating lever

→ The side cutter is attached.
4 Select a stitch.

5 Make a cut of approximately 20 mm (approx. 3/4 inch) in the fabric.

6 Position the fabric so that the right side of the cut is on top of the guide plate and the left side of the cut is underneath the presser foot.

7 Thread the needle manually and pull out a long section of the upper thread. Pass it below the presser foot and pull it out in the fabric feed direction.

8 Start sewing.

→ A seam allowance is cut while the stitching is sewn.

**Note**

If the width has been adjusted, turn the handwheel by hand to check that the needle does not touch the side cutter. If the needle touches the side cutter, it might cause the needle to break.

**Memo**

- The fabric will not be cut if the whole fabric is simply spread out underneath the presser foot guide plate. Set the fabric as explained in step 5 from the previous section, and then start sewing.

- One layer of 13 oz. denim can be cut.
- Clean the side cutter after use to avoid having dust and scraps of thread build up on it.
- Add a small amount of oil as required to the cutting edge of the cutter.

**When Sewing Straight Stitches While Using the Side Cutter**

The seam margin should be approximately 5 mm (approx. 3/16 inch).
You can make beautiful quilts quickly and easily with this machine. When making a quilt, you will find it convenient to use the knee lifter and foot controller to free your hands for other tasks (see “Using the Foot Controller” on page 39 and/or see “Using the Knee Lifter” on page 40). Patterns with “P” or “Q” in the lower-right corner of the key are intended for quilting.

### Piecing
Sewing two pieces of fabric together is called piecing. When cutting pieces for quilt blocks, make sure the seam allowance is 6.5 mm (approx. 1/4 inch).

**Memo**
To change the width of the seam allowance, adjust the stitch width to change the needle position.

1. **Press**  or  , and then attach presser foot “J”.
2. **Sew with the edge of the fabric aligned with the side of the presser foot.**

</tbody>
</table>

**Memo**
- The stitch width refers to the needle position, not the width of the seam allowance.
- To change the needle position, press  or  in the width display.
- After the stitch length and needle position are set as desired, the settings can be saved (see page 49).
Quilting

Sewing together the quilt top, batting, and backing is called quilting. You can sew the quilt with the walking foot to keep the quilt top, batting, and backing from sliding. The walking foot has a set of feed dogs that move together with the feed dogs in the needle plate during sewing.

1. Follow the steps on page 33 to remove the presser foot.
2. Loosen the screw of the presser foot holder to remove the presser foot holder.
3. Set the operation lever of the walking foot so that the needle clamp screw is set between the fork, and position the walking foot on the presser foot bar.
4. Lower the presser foot lever. Tighten the screw securely with the screwdriver.
5. Place one hand on each side of the presser foot to hold the fabric secure while sewing.

Memo

- Sew at slow to medium speed.
- Do not sew in reverse or use stitches that require side ways or reverse feeding.
- Always check to be sure that your quilting surface is securely basted before beginning to sew. Specialized machine quilt needles and threads are also available for machine quilting.

Appliqués

The seam will blend in if transparent nylon thread is used for the upper thread.

1. Trace the pattern onto the appliqué fabric, and then cut around it.
2. Cut a piece of thick paper or stabilizer to the finished size of the appliqué design, place it on the back of the appliqué, and then fold over the seam allowance using an iron.
3. Turn the appliqué over, and attach the stabilizer with basting pins or a basting stitch.
4. Press , and then attach presser foot “J”.

Memo

Sew at slow to medium speed.

Do not sew in reverse or use stitches that require side ways or reverse feeding.

Always check to be sure that your quilting surface is securely basted before beginning to sew. Specialized machine quilt needles and threads are also available for machine quilting.
SEWING THE STITCHES

5 Check the needle drop point, and then sew along the edge of the appliqué while making sure that the needle drops slightly off the edge of the fabric.

![Needle drop point](image)

6 Set “WIDTH CONTROL” to “ON”. The sewing speed will be adjusted using the foot controller.

![Foot controller settings](image)

7 While sewing, slide the sewing speed controller to adjust the stitch width.

![Sewing speed controller](image)

8 When you are finished sewing, set “WIDTH CONTROL” back to “OFF”.

**CAUTION**
- Be careful that the needle does not strike a basting pin during sewing. Striking a pin can cause the needle to break, resulting in injury.

**Satin Stitching**
Use the foot controller to sew with satin stitches. If you set the speed control slide to control the stitch width, you can make subtle changes in the stitch width during sewing.

1 Connect the foot controller (see page 39).

2 Press , and then attach presser foot “J”.

3 Press in the length display to shorten the stitch length.

**Memo**
A stitch length between 0.3 and 0.5 mm (approx. 1/64 and 1/32 inch) is best for satin stitches, although this range varies depending on the type of fabric and thickness of thread used.

![Satin stitch settings](image)

4 Press .

* Change the sewing speed controller to a stitch width controller.
Free-motion Quilting
With free-motion quilting, the feed dogs can be lowered (using the feed dog position switch) so that the fabric can be moved freely in any direction. The quilting foot is needed for free-motion quilting. We recommend attaching the foot controller and sewing at a consistent speed.

Memo
In order to sew a balanced stitch, it may be necessary to lower the upper thread tension (see page 43) or to loosen the presser foot pressure on the setting screen (see page 20). Test with a scrapped piece.

1. Select .
2. Remove the presser foot holder (see page 63).
3. Align the quilting foot with the lower-left side of the presser bar.

Memo
The pin on the quilting foot should be positioned over the needle clamp screw.

4. Hold the quilting foot in place with your right hand, and then tighten the presser foot holder screw using the screwdriver in your left hand.

5. Lower the feed dog position switch, located at the rear of the base of the machine, to up.

6. Use both hands to stretch the fabric taut, and then move the fabric at a regular pace in order to sew uniform stitches roughly 2.0-2.5 mm (approx. 1/16 - 3/32 inch) in length.

7. After sewing is finished, raise the feed dog position switch to down to raise the feed dogs. Reset your machine to normal setting.

Memo
Normally, the feed dog position switch is in the up position.

CAUTION
- Be sure to securely tighten the screws with the screwdriver. Otherwise, the needle may touch the presser foot, causing it to bend or break.
Blind Hem Stitches

Select a blind hem stitch to sew the hems or cuffs of dresses, blouses, pants, or skirts.

<table>
<thead>
<tr>
<th>Stitch Key</th>
<th>Stitch Name</th>
<th>Presser Foot</th>
<th>Applications</th>
<th>Stitch Width [mm (inch)]</th>
<th>Stitch Length [mm (inch)]</th>
<th>Twin Needle</th>
</tr>
</thead>
<tbody>
<tr>
<td>00</td>

<td>3 ← → 3</td>
<td>2.0 (1/16)</td>
<td>NO</td>
</tr>
<tr>
<td>00</td>
<td>Blind hem stitch</td>
<td>R</td>
<td>Hemming stretch fabric</td>
<td>3 ← → 3</td>
<td>2.0 (1/16)</td>
<td>NO</td>
</tr>
</tbody>
</table>

1. Select a stitch pattern.

Memo
For best results when sewing stretch fabrics, decrease the pressure of the presser foot.

2. Place the fabric wrong side up, and then fold and baste the fabric as shown.

3. Fold the fabric again, as shown.

4. Attach presser foot “R”, and then lower the presser foot so that the presser foot guide is flush against the fold of the fabric.

5. Sew while keeping the fold in the fabric against the presser foot guide.

① 5 mm
② Wrong side of fabric
③ Basting

① Presser foot guide
② Fold

① Needle position
② Presser foot guide
Remove the basting, and then turn over the fabric.

Wrong side of fabric
Surface of fabric

■ If the Needle Does Not Catch the Fold
Press the width display so that the needle slightly catches the fold.

■ If the Needle Catches Too Much of the Fold
Press the width display so that the needle slightly catches the fold.

Memo
Blind hem stitches cannot be sewn if the needle does not catch the fold on the left side. However, if the needle catches too much of the fold, the fabric cannot be unfolded and too much of the seam will appear on the surface of the fabric, leaving an unattractive finish. If either of these occur, follow the instructions below to correct the problem.

1 Use a temporary spray adhesive or basting to attach the appliqué to the fabric.

2 Press or .

Memo
- Adjust the stitch width and length according to the shape, size and fabric quality of the appliqué (see page 42).
- For details on the stitch patterns, refer to the “STITCH SETTING CHART” at the end of this manual.

3 Attach presser foot “J”, and then sew along the edge of the appliqué, making sure that the needle drops slightly off the edge.

Memo
- Adjust the stitch width and length according to the shape, size and fabric quality of the appliqué (see page 42).
- For details on the stitch patterns, refer to the “STITCH SETTING CHART” at the end of this manual.
**Sewing Sharp Curves**

Stop the machine with the needle in the fabric outside the appliqué. Raise the presser foot and turn the fabric a little bit at a time while sewing for an attractive finish to the seam.

---

**Shell Tuck Stitching**

The arched tuck that looks like shells lined up in a row is called a shell tuck. In addition to edging, this decorative stitching can be used on the neckline or sleeves of dresses and blouses.

1. **Press .**

   **Memo**
   For details on the stitch patterns, refer to the “STITCH SETTING CHART” at the end of this manual.

2. **Increase the thread tension for an attractive scalloped finish to the shell tuck stitching.**

   **Memo**
   If the thread tension is too loose, the shell tuck stitching will not scallop.

3. **Fold the fabric in half along the bias.**

   **Note**
   Use a thin fabric.

4. **Attach presser foot “J”, and then sew along the edge of the fabric, making sure that the needle drops slightly off the edge.**

5. **Unfold the fabric, and then iron the tucks down to one side.**

---

**Scalloping**

Scallop stitching (wave-shaped running stitching) can be used to decorate the edges of blouse collars and handkerchiefs.

1. **Press , and then attach presser foot “N”.**

   **Memo**
   - If the automatic thread cutting setting is selected before sewing, the machine will automatically sew reinforcement stitches at the beginning of stitching. When the “Reverse/Reinforcement Stitch” button is pressed at the end of stitching, the machine will automatically sew reinforcement stitches and cut the thread.
   - For best results, apply a temporary spray adhesive and iron the fabric before sewing.
   - For details on the stitch patterns, refer to the “STITCH SETTING CHART” at the end of this manual.
2 Leave a seam when sewing the scallop stitches so that the pattern is not sewn directly on the edge of the fabric.

Note
Sew test stitches on the fabric before sewing on your project.

3 Trim along the seam, making sure not to cut the stitches.

---

Top Stitching

For a decorative effect in a crazy quilt, stitches can be sewn over a pressed seam allowance.

1 Select a straight stitch, and then attach presser foot “J”.

2 Sew together two pieces of fabric with their surfaces facing each other, and then open the seam allowances.

3 Turn the fabric over so that the surface faces up, and then sew over the seam with the center of the presser foot aligned with the seam.

* Select one of the following stitch patterns.

Note
Make sure that the automatic reverse/reinforcement stitching and automatic thread cutting settings are not selected.

4 Set the stitch length to 4.0 mm (approx. 3/16 inch) and the thread tension to 2.0 (weaker tension).

5 Pull out 50 mm (approx. 1-15/16 inches) of both the upper and bobbin threads.

6 Sew stitching 10 mm (approx. 3/8 inch) apart.

Note
Sew test stitches on the fabric before sewing on your project.

Smocking

The decorative stitching created by sewing or embroidering over gathers is called smocking. It is used to decorate the front of blouses or cuffs.

1 Select a straight stitch, and then attach presser foot “J”.

2 Set the stitch length to 4.0 mm (approx. 3/16 inch) and the thread tension to 2.0 (weaker tension).

3 Pull out 50 mm (approx. 1-15/16 inches) of both the upper and bobbin threads.

4 Sew stitching 10 mm (approx. 3/8 inch) apart.

Note
Make sure that the automatic reverse/reinforcement stitching and automatic thread cutting settings are not selected.
Pull the bobbin threads to create the desired amount of gather, and then smooth the gathers by ironing them.

Press \( \text{or } \) .

Memo
For details on the stitch patterns, refer to the “STITCH SETTING CHART” at the end of this manual.

Sew between the straight stitches.

Pull out the straight stitch threads.

Fagoting
Stitching across an open seam is called fagoting. It is used on blouses and children’s clothing.

Separate the two pieces of fabric by about 4 mm (approx. 3/16 inch), and baste them onto thin paper.

Press \( \text{or } \), and then set the stitch width to the maximum (7.0 mm).

Memo
For details on the stitch patterns, refer to the “STITCH SETTING CHART” at the end of this manual.

Attach presser foot “J”, and then sew with the presser foot centered between the two pieces of fabric.

Memo
This stitch is more decorative when thicker thread is used.

When you are finished sewing, gently tear off the paper.
Tape or Elastic Attaching

Elastic tape is sewn onto the fabric unstretched.

1. Select a straight stitch, and then attach presser foot “J”.

2. Set the stitch length to 4.0 mm (approx. 3/16 inch) and the thread tension to 2.0 (weaker tension).

3. Pull out 50 mm (approx. 1-15/16 inches) of both the upper and bobbin threads (see “Pulling Up the Bobbin Thread” on page 27).

4. Sew two rows of straight stitches on the surface of the fabric, and then pull the bobbin threads to create the desired amount of gather.

5. Pin the elastic tape to the wrong side of the fabric with the elastic tape evenly positioned on the gathers.

6. Press \( \text{ or } \).

7. While pulling the elastic tape so that it is about the same length as the fabric, pull the fabric at the pin nearest the front of the presser foot with your right hand, and feed the fabric behind the presser foot with your left hand according to the feeding speed.

8. Pull out the threads for the straight stitches.

---

**Note**

Make sure that the automatic reverse/reinforcement stitching and automatic thread cutting settings are not selected.

**Memo**

This is easy to do if the foot controller is used.

**CAUTION**

- Be sure the needle does not strike a basting pin, or any other objects, during sewing. The thread could tangle or the needle could break, causing injury.
Sewing the Stitches

Heirloom Stitching

By sewing with the wing needle sold separately, the needle holes are enlarged, creating a lace-like decorative stitch. This stitching is used to decorate tablecloths, hems, and shirt fronts.

■ Hemstitching (1) (Daisy Stitch)

1. Insert the wing needle (130/705H, size 100/16).

2. Select a stitch, attach presser foot “N”, and then start sewing.
   * Select a stitch between 3-01 and 3-22.

Note
For best results, use lightweight to medium weight homespun fabrics with a slight stretch.

CAUTION
• The “Automatic Threading” button cannot be used. Thread the wing needle by hand, from front to back. Using the “Automatic Threading” button may result in damage to the machine.
• A more attractive finish can be obtained if you use a “130/705H Wing” needle when sewing these patterns. If using a wing needle and the stitch width has been set manually, check that the needle will not touch the presser foot by carefully rotating the handwheel before starting sewing.

Memo
For details on the stitch patterns, refer to the “STITCH SETTING CHART” at the end of this manual.

■ Hemstitching (2) (Drawn Work (1))
1 Pull out several threads from the fabric to leave a 3 mm (approx. 1/8 inch) area open.

Memo
For best result, use loosely woven fabrics.

2 Press , and then attach presser foot “N”.

Memo
For details on the stitch patterns, refer to the “STITCH SETTING CHART” at the end of this manual.

3 With the surface of the fabric facing up, sew along the right edge of the open area.

4 Press to create a mirror image of the stitch.

5 Sew along the left edge of the open area so that the stitching looks symmetrical.

- Hemstitching (3) (Drawn Work (2))

1 Pull out several threads from both sides of a 4 mm (approx. 3/16 inch) area left unopened, as shown in the illustration.

Memo
Drawn work can also be sewn using the wing needle (sold separately).

2 Press .

Memo
For details on the stitch patterns, refer to the “STITCH SETTING CHART” at the end of this manual.

3 Attach presser foot “N”, and then sew along the center of the unopened area.

Memo
Drawn work can also be sewn using the wing needle (sold separately).

Memo
For details on the stitch patterns, refer to the “STITCH SETTING CHART” at the end of this manual.
Buttonhole Stitches

Select the desired buttonhole stitch according to your application and the size of the button.

</tbody>
</table>

Buttonholes are sewn from the front of the presser foot to the back, as shown below.

[Diagram showing the sewing process of buttonholes]

① Reinforcement stitching
1. Select a stitch, and then attach presser foot “A”.

2. Mark the position and length of the buttonhole on the fabric.

**Memo**
The maximum buttonhole length is 28 mm (approx. 1-1/6 inches) (diameter + thickness of the button).

3. Pull out the button holder plate on the presser foot, and then insert the button that will be put through the buttonhole.
   * The size of the buttonhole is set by clamping the button in the button holder plate.

**Note**
Pass the thread under the presser foot.

4. Hold the outside frame of the buttonhole foot toward the back with your finger, and then lower the presser foot so that the mark on the fabric aligns with the marks on the buttonhole foot.

5. Pull down the buttonhole lever.
   * The buttonhole lever should be positioned behind the metal bracket on the buttonhole foot, as shown in the illustration.

**Note**
- Slide the outside frame of the buttonhole foot backward as far as possible, making sure that there is no gap behind the part of the foot marked “A”, as shown in the illustration. If the buttonhole foot is not slid back as far as possible, the buttonhole will not be sewn at the correct size.
- Pass the thread under the presser foot.

**Memo**
The maximum buttonhole length is 28 mm (approx. 1-1/6 inches) (diameter + thickness of the button).
Gently hold the end of the upper thread, and then start sewing.

* Once sewing is completed, the machine automatically sews reinforcement stitches, then stops.
* If the automatic thread cutting setting is selected before sewing, the machine will automatically cut the thread at the end of stitching.

**Note**
- If the fabric does not feed, for example, because it is too thick, press \( + \) in the length display to increase the stitch length.
- When sewing is finished, raise the buttonhole lever to its original position.

Insert a pin along the inside of a bar tack at the end of the buttonhole, and then insert the seam ripper into the center of the buttonhole and cut towards the pin.

**Note**
- Be careful not to cut the stitches with the seam ripper.

**CAUTION**
- When using the seam ripper to open the buttonhole, do not put your hand or finger in the path of the ripper. The ripper may slip and cause injury.

For keyhole buttonholes, use the included eyelet punch to make a hole in the rounded end of the buttonhole. Then, insert a pin along the inside of the bar tack, insert a seam ripper into the hole made with the eyelet punch, and then cut towards the pin.
Sewing Stretch Fabrics
When sewing a buttonhole on stretch fabrics, press or , and use a gimp thread.

1 Hook the gimp thread onto the back of buttonhole foot “A”, and then pull the ends of the gimp thread under the presser foot. Pass the thread ends through the grooves at the front of the presser foot, and then temporarily tie them.
* Use #5 embroidery thread or lace yarn for the gimp thread.

2 Lower the presser foot lever, and then start sewing.
* Set the stitch width to the width of the gimp thread.

3 When sewing is finished, gently pull the gimp thread to remove any slack, and then use a handsewing needle with a large eye to pull the gimp thread to the wrong side of the fabric.

4 Tie the ends together, and then trim the excess.
* After using the seam ripper to cut the threads sewn over the buttonhole, trim the threads.

Buttons That Do Not Fit into the Button Holder Plate
Use the markings on the presser foot scale to set the size of the buttonhole. The distance between the markings on the presser foot scale is 5 mm (approx. 3/16 inch).
Add together the diameter and thickness of the button, and then set the button holder plate to the calculated value.

Example: For a button with a diameter of 15 mm (approx. 9/16 inch) and a thickness of 10 mm (approx. 3/8 inch), the scale should be set at 25 mm (approx. 1 inch).
Darning

Use darning stitches for mending and other applications.

<table>
<thead>
<tr>
<th>Stitch Key</th>
<th>Stitch Name</th>
<th>Presser Foot</th>
<th>Applications</th>
<th>Stitch Width [mm (inch)]</th>
<th>Stitch Length [mm (inch)]</th>
<th>Twin Needle</th>

<td>7.0 (1/4)</td>
<td>2.5 - 7.0 (3/32 - 1/4)</td>
<td>2.0 (1/16)</td>
</tr>
</tbody>
</table>

Darning is sewn from the front of the presser foot to the back, as shown below.

1. Select a stitch pattern.
2. Set the scale on buttonhole foot “A” to the desired length of the darning, and then attach the buttonhole foot.
3. Hold the outside frame of the buttonhole foot toward the back with your finger, and then lower the presser foot so that it aligns with the area to be darned.

Memo

The maximum length for darning is 28 mm (approx. 1-1/16 inches).

Note

- Slide the outside frame of the buttonhole foot backward as far as possible, making sure that there is no gap behind the part of the foot marked “A”, as shown in the illustration. If the buttonhole foot is not slid back as far as possible, the darning will not be sewn at the correct size.
- Pass the thread under the presser foot.
4 Pull down the buttonhole lever.  
* The buttonhole lever should be positioned behind the metal bracket on the buttonhole foot, as shown in the illustration.

5 Gently hold the end of the upper thread, and then start sewing.  
* Once sewing is completed, the machine automatically sews reinforcement stitches, then stops.  
* If the automatic thread cutting setting is selected before sewing, the machine will automatically cut the thread at the end of stitching.

![Buttonhole lever](image1)

![Metal bracket](image2)

Note: If the fabric does not feed, for example, because it is too thick, press + in the length display to increase the stitch length.

---

### Bar Tacks

Bar tacks are one type of reinforcement stitching used to strengthen points subject to strain, such as ends of pocket openings and slits.

<table>
<thead>
<tr>
<th>Stitch Key</th>
<th>Stitch Name</th>
<th>Presser Foot</th>
<th>Applications</th>
<th>Stitch Width [mm (inch)]</th>
<th>Stitch Length [mm (inch)]</th>
<th>Twin Needle</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Bar tack</td>
<td></td>
<td>Reinforcement at opening of pocket, etc.</td>
<td>2.0 (1/16)</td>
<td>0.4 (1/64)</td>
<td>NO</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
<td>1.0 - 3.0 (1/16 - 1/8)</td>
<td>0.3 - 1.0 (1/64 - 1/16)</td>
<td></td>
</tr>
</tbody>
</table>

1 Press .

2 Set the scale on buttonhole foot “A” to the desired length of the darning, and then attach the buttonhole foot.

**Memo**

The bar tack length can be set between 5 and 28 mm (approx. 3/16 and 1-1/16 inches). Bar tacks are usually between 5 and 10 mm (approx. 3/16 and 3/8 inch) (This differs depending on the application.)
3 Position the fabric so that the opening of the pocket moves toward you during sewing. Hold the outside frame of the buttonhole foot toward the back with your finger, check the first needle drop point, and then lower the presser foot.

![Diagram showing first needle drop point]

① First needle drop point: 2 mm (approx. 1/16 inch)

- Slide the outside frame of the buttonhole foot backward as far as possible, making sure that there is no gap behind the part of the foot marked “A”, as shown in the illustration. If the buttonhole foot is not slid back as far as possible, the bar tack will not be sewn at the correct size.
- Pass the thread under the presser foot.

4 Pull down the buttonhole lever.

* The buttonhole lever should be positioned behind the metal bracket on the buttonhole foot, as shown in the illustration.

![Diagram showing buttonhole lever and metal bracket]

① Buttonhole lever
② Metal bracket

5 Gently hold the end of the upper thread, and then start sewing.

* Once sewing is completed, the machine automatically sews reinforcement stitches, then stops.
* If the automatic thread cutting setting is selected before sewing, the machine will automatically cut the thread at the end of stitching.

![Diagram showing buttonhole lever and metal bracket]

① Presser foot
② Thick fabric

Bar Tacks on Thick Fabrics
Place a piece of folded fabric or cardboard beside the fabric being sewn to level the buttonhole foot and allow for easier feeding.

![Diagram showing folded fabric and buttonhole foot]

① Presser foot
② Thick fabric

Note
If the fabric does not feed, for example, because it is too thick, press + in the length display to increase the stitch length.
Button Sewing

Buttons with 2 or 4 holes can be sewn on.

**Note**
Make sure that the automatic thread cutting setting is not selected when sewing on buttons.

<table>
<thead>
<tr>
<th>Stitch Key</th>
<th>Stitch Name</th>
<th>Presser Foot</th>
<th>Applications</th>
<th>Stitch width [mm (inch.)]</th>
<th>Stitch length [mm (inch.)]</th>

<tbody>
<tr>
<td>4-18</td>
<td>Button sewing</td>
<td>M</td>
<td>Attaching buttons</td>
<td>3.5 (1/8)</td>
<td>2.5 - 4.5 (3/32 - 3/16)</td>
<td>—</td>
</tr>
</tbody>
</table>

1. Press .

2. Raise the presser foot lever, and remove the flat bed attachment.

3. Lower the feed dog position switch to TT to lower the feed dogs.

4. Attach button fitting foot “M”, slide the button along the metal plate and into the presser foot, and then lower the presser foot lever.

5. Turn the handwheel toward you to check that the needle correctly goes into the holes of the button without touching it.

6. Gently hold the end of the upper thread, and then start sewing.
   * Once sewing is completed, the machine automatically sews reinforcement stitches, then stops.
   * If the automatic thread cutting setting is selected before sewing, the machine will automatically cut the thread at the end of stitching.

7. With scissors, cut the upper and bobbin threads at the beginning of the stitching, pull the upper thread at the end of the stitching to the wrong side of the fabric, and then tie it with the bobbin thread.

8. When button sewing is finished, raise the feed dog position switch to TT to raise the feed dogs.

**CAUTION**
- Make sure the needle does not strike the button during sewing. The needle may break and cause injury.
SEWING THE STITCHES

■ Attaching a 4-Hole Button
Sew the two holes toward the front. Then, raise the presser foot, move the fabric so that the needle goes into the back two holes, and then sew them in the same way.

■ Attaching a Button with a Shank

1. Pull the shank lever toward you.

When sewing is finished, pull the two ends of the upper thread between the button and the fabric, wind them around the shank, and then tie them together.

3. Tie the ends of the bobbin thread together at the beginning and end of the stitching on the wrong side of the fabric.

Eyelets

Eyelets can be used for making belt holes and other similar applications.

<table>
<thead>
<tr>
<th>Stitch Key</th>
<th>Stitch Name</th>
<th>Presser Foot</th>
<th>Applications</th>
<th>Stitch width [mm (inch.)]</th>
<th>Stitch length [mm (inch.)]</th>
<th>Twin needle</th>
</tr>
</thead>
<tbody>
<tr>
<td>①</td>
<td>Eyelet</td>
<td>N</td>
<td>For making eyelets, holes on belts, etc.</td>
<td>7.0 (1/4) 6.0 5.0 (1/4 15/64 3/16)</td>
<td>7.0 (1/4) 6.0 5.0 (1/4 15/64 3/16)</td>
<td>NO</td>
</tr>
</tbody>
</table>

1. Press ①, and then attach presser foot “N”.

2. Press — or + in the width display or — or + in the length display to set the size of the eyelet.

3. Lower the needle into the fabric at the beginning of the stitching, lower the presser foot lever, and then start sewing.

* Reinforcement stitches are automatically sewn at the end of the stitching.

* If the automatic thread cutting setting is selected before sewing, the machine will automatically cut the thread at the end of stitching.

① Starting point of stitching
4 Use the eyelet punch to cut a hole in the center of the stitching.

Multi-Directional Sewing (Straight Stitch and Zigzag Stitch)

Use these stitch patterns to attach patches or emblems to pant legs, shirt sleeves, etc.

Memo
Pass the free arm through the tubular piece of fabric, and then sew in the order shown in the illustration.

1 Remove the flat bed attachment to enable free-arm sewing.

2 Pass the free arm through the fabric.

3 Press  , and then attach presser foot “N”.

Memo
For details on the stitch patterns, refer to the “STITCH SETTING CHART” at the end of this manual.

4 Insert the needle into the fabric at the starting point of the stitching, and then sew seam 1.

5 Press , and then sew seam 2.

* The fabric will move sideways, so guide the fabric with your hands to sew straight.

6 Press , and then sew seam 3.
SEWING THE STITCHES

Press \( \text{ } \), and then sew seam 4.

* The fabric will move sideways, so guide the fabric with your hands to sew straight.

Press . and then sew seam 4.

* The fabric will move sideways, so guide the fabric with your hands to sew straight.

Memo
Zigzag stitches can also be used with multi-directional sewing.

Zipper Insertion

■ Centered Zipper
Use for bags and other such applications.

Press \( \text{ } \).

* Be sure to select the straight stitch with the middle needle position.

Press .

* Be sure to select the straight stitch with the middle needle position.

Memo
For details on the stitch patterns, refer to the “STITCH SETTING CHART” at the end of this manual.

Attach presser foot “J”, sew straight stitches up to the zipper opening, and then sew basting stitches to the top of the fabric.

Press open the seam allowance, align the seam with the center of the zipper, and then baste the zipper in place.

Remove presser foot “J”, and then attach the pin on the right side of zipper foot “I” to the presser foot holder.

Topstitch around the zipper, and then remove the basting.

CAUTION
• When using zipper foot “I”, make sure the straight stitch, middle needle position is selected. Turn the handwheel to make sure the needle does not strike the presser foot. If another stitch is selected, the needle will strike the presser foot, causing the needle to break and possibly causing injury.

CAUTION
• Make sure the needle does not strike the zipper during sewing. If the needle strikes the zipper, the needle may break, leading to injury.
Side Zipper
Use for side zippers on skirts or dresses.

1. **Press**.

   * Be sure to select the straight stitch with the middle needle position.

2. Attach presser foot “J”, sew straight stitches to the zipper opening, and then sew basting stitches to the edge of the fabric.

3. Press the seam allowance open and align the folded hem along the teeth of the zipper, while maintaining 3 mm (approx. 1/8 inch) of sewing space.

4. Remove presser foot “J”, and then attach the presser foot holder to the pin on the right side of zipper foot “I”.

5. Set the presser foot in the 3 mm (approx. 1/8 inch) margin.

6. Starting from the end of the zipper opening, sew to a point about 50 mm (approx. 2 inches) from the edge of the fabric, then stop the machine.

7. Pull down the zipper slider, then continue sewing to the edge of the fabric.

---

**CAUTION**
- When using zipper foot “I”, make sure the straight stitch, middle needle position is selected. Turn the handwheel to make sure the needle does not strike the presser foot. If another stitch is selected, the needle will strike the presser foot, causing the needle to break and possibly causing injury.

---

**CAUTION**
- Make sure the needle does not strike the zipper during sewing. If the needle strikes the zipper, the needle may break, leading to injury.
Close the zipper, turn the fabric over so that the surface faces up, and then baste the other side of the zipper to the fabric.

Remove the presser foot, and then attach the pin on the left side of the zipper foot to the presser foot holder.

Set the fabric so that the left edge of the presser foot touches the edge of the zipper teeth.

Sew reverse stitches at the top of the zipper, then continue sewing.

Stop sewing about 50 mm (approx. 2 inches) from the edge of the fabric, leave the needle in the fabric, and remove the basting stitches.

Open the zipper and sew the rest of the seam.

SELECTING STITCH PATTERNS

Stitch Selection Screens

Press to display the screen shown below.

Press to display the previous or next page.

* The patterns in screens (b), (d) and (f) have a stitch width of 7 mm or less. Both the stitch length and width can be adjusted.

1 Decorative stitch patterns
2 7 mm decorative stitch patterns
3 Satin stitch patterns
4 7 mm satin stitch patterns
5 Cross stitch patterns
6 Utility decorative stitch patterns
7 Alphabet patterns (gothic font)
8 Alphabet patterns (handwriting font)
9 Alphabet patterns (outline style)

Patterns stored in “MY CUSTOM STITCH™” (see page 173)
Patterns saved in the machine’s memory (see page 106)
Patterns saved on the computer (see page 107)
Press this key to create your own stitches with the “MY CUSTOM STITCH™” function (see page 166).

Note
When the screen is locked ( ), no key other than and the keys can be operated.
1 Press , and then press the key for the category containing the pattern that you want to sew.

2 Select a stitch pattern that you want to sew.
   * Press to display the next page.
   * Press to display the previous page.
   * Press to return to the screen of pattern categories.

→ An image of the selected stitch pattern is displayed below the symbol of the appropriate presser foot.

3 To combine patterns, select the next pattern.
   * Press to check the selected pattern combination.
   * If the wrong pattern was selected, press to erase the pattern, and then select the new stitch pattern.

Alphabet Patterns

Three alphabet patterns are available in different styles. The procedure for selecting a character is the same with all styles.

1 Press , and then press the key for the character style that you want to sew.
2 Press to display a selection screen of characters, and then select a character. Repeat this step until you have selected all of the characters.

* If a wrong character was selected, press to erase the character, and then select the new character.
* To select a different character style, press and then select the new character style.
* Press to check the selected characters.

An image of the selected characters is displayed below the symbol of the appropriate presser foot.

Example: To select “Bus”

1 Press .

2 Press .

3 Press .

4 Press , then .

→ “Bus” appears.

* A maximum of 70 characters can be combined.
Sewing Attractive Finishes

Note

- To achieve the best results when sewing character/decorative stitches, check the table below for the proper fabric/needle/thread combinations.
- Other factors, such as the type or thickness of the fabric being sewn or the type of stabilizer material used, also affect the stitching. Therefore, be sure to sew a few trial stitches before sewing your project.
- Since shrinkage or bunched stitches may result when satin stitches are sewn, be sure to affix stabilizer material to the fabric.
- While sewing, guide the fabric with your hands so that it will be fed straight.

<table>
<thead>
<tr>
<th>Fabric</th>
<th>When sewing on stretch fabrics, lightweight fabrics, or fabrics with coarse weaves, attach stabilizer on the wrong side of the fabric. If you do not wish to do so, place the fabric on a thin paper such as tracing paper.</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Fabric</td>
</tr>
<tr>
<td>2</td>
<td>Stabilizer</td>
</tr>
<tr>
<td>3</td>
<td>Thin paper</td>
</tr>
<tr>

<td>#50 - #60</td>
</tr>
<tr>
<td>Needle</td>
<td>With lightweight, regular, or stretch fabrics: Brother ballpoint needle (golden colored)</td>
</tr>
<tr>
<td></td>
<td>With heavyweight fabrics: home sewing machine needle 90/14</td>
</tr>
<tr>
<td>Presser foot</td>
<td>Monogramming foot “N”. Using another presser foot may give inferior results.</td>
</tr>
</tbody>
</table>

Basic Sewing

1. Select a stitch pattern.
2. Attach presser foot “N”.
3. Place the fabric under the presser foot, pull the upper thread under the presser foot and to the side, and then lower the presser foot lever.

4. Press the “Reverse/Reinforcement Stitch” button to sew reinforcement stitches, and then press the “Start/Stop” button to start sewing.

CAUTION

- When sewing 7 mm satin stitch patterns and the stitches are bunched, lengthen the stitch length. If you continue sewing when the stitches are bunched, the needle may bend or break (see “Adjusting the Stitch Length” on page 42).

Memo

- If the fabric is pulled or pushed during sewing, the pattern may not be sewn correctly. In addition, depending on the pattern, there may be movement to the left and right as well as to the front and back. Therefore, guide the fabric with your hands so that it will be fed straight.
5 Press the “Start/Stop” button to stop the machine, and then press the “Reverse/Reinforcement Stitch” button to sew reinforcement stitches.

Memo
- When sewing character stitch patterns, the machine automatically sews reinforcement stitches at the end of the stitching, then stops (The machine is automatically set to sew reinforcement stitches at the beginning and end of each character.)
- After sewing is finished, trim any excess thread.

Note
When sewing some patterns, the needle will stop in the raised position while the fabric is fed due to the operation of the needle bar separation mechanism which is used in this machine. At such times, a clicking sound different from the sound generated during sewing will be heard. This sound is normal and is not the sign of a malfunction.

Adjusting Patterns
Depending on the type and thickness of the fabric being sewn, the sewing speed, whether or not stabilizer material is used, etc., the desired result may not be achieved. If this occurs, press , and then perform the following adjustment using the same sewing conditions as those used for your project. If the pattern is still misaligned after making adjustments with selected, adjust each pattern separately.

1 Press , and then press on P. 6 of the screen.

2 Attach presser foot “N”, and then sew the pattern.

3 Compare the sewn pattern with the following illustration.
4 Press \[ \text{ } \]

If the pattern is bunched together:
Press \[ + \] in the FINE ADJUST VERT. display.
Each press of the key increases the value and lengthens the pattern.

If the pattern is stretched:
Press \[ - \] in the FINE ADJUST VERT. display.
Each press of the key decreases the value and shortens the pattern.

If the pattern is skewed to the left:
Press \[ + \] in the FINE ADJUST HORIZ. display.
Each press of the key increases the value and moves the pattern to the right.

If the pattern is skewed to the right:
Press \[ - \] in the FINE ADJUST HORIZ. display.
Each press of the key decreases the value and moves the pattern to the left.

5 Sew the pattern again. If the pattern still is not sewn correctly, adjust it again. Continue making adjustments until the pattern is sewn correctly.

6 After the pattern is sewn correctly, quit making adjustments. Press \[ \text{CLOSE} \] to return to the previous screen.

4

Memo
You can sew with the setting screen on the display.
EDITING STITCH PATTERNS

Using the editing functions, you can change the patterns in a variety of ways, such as resizing them or flipping them to create a mirror image.

Memo
Depending on the pattern that is selected, some editing functions may not be available.

<td>95</td>
</tr>
</tbody>
</table>
Changing the Pattern Size

After selecting a stitch pattern, press \[ L \] until the desired size is selected.

**Memo**
- Stitch patterns entered after the pattern size was changed are added at the selected size until it is changed again.
- You cannot change the size of stitch patterns once they have been combined.

Changing the Pattern Length
(7 mm Satin Stitch Patterns Only)

If 7 mm satin stitch patterns are selected, the pattern length can be changed without changing the zigzag width or stitch length. After selecting a stitch pattern, press \[ L \] to select one of the five settings available.

Creating a Vertical Mirror Image

After selecting a stitch pattern, press \[ \] to flip the pattern vertically.

Creating a Horizontal Mirror Image

After selecting a stitch pattern, press \[ \] to flip the pattern horizontally.
**EDITING STITCH PATTERNS**

### Selecting a Single/Repeating Pattern

Press [96] to select whether the pattern is sewn repeatedly or once.

**Memo**

If you press [96] while sewing, the key changes to [96] and the machine will sew one copy of the pattern, then automatically stop.

### Changing the Thread Density
(Satin Stitch Patterns Only)

After selecting a stitch pattern, press [96] until the desired stitching density is selected.

**CAUTION**

- If the stitches bunch when thread density is changed to [96], return the thread density to [96]. If you continue sewing when the stitches are bunched, the needle may bend or break.

**Memo**

- Stitch patterns entered after the stitching density was changed are added at the selected density until it is changed again.
- You cannot change the stitching density of stitch patterns once they have been combined.
COMBINING STITCH PATTERNS

You can combine many varieties of stitch patterns, such as character stitches, cross stitches, satin stitches, or stitches you design with MY CUSTOM STITCH function (see chapter 7 for information about MY CUSTOM STITCH). You can also combine stitch patterns of different sizes, mirror image stitch patterns, and others.

Before Combining Patterns

Note
- When stitch patterns are combined, the machine is automatically set to sew the pattern once. To repeatedly sew the combined stitch patterns, combine the patterns, and then press \( \text{ } \).  
- You cannot change settings (such as the size and orientation) for stitch patterns once they have been combined. To resize or reorient the patterns, specify the settings for each pattern as it is added to the combination.

Combining Patterns From Different Categories

Example:

1. Press \( \text{ } \).  
2. Press \( \text{ } \).  
3. Press \( \text{ } \).

→ The screen of pattern categories appears.
**Combining Stitch Patterns of Different Sizes**

**Example:**

1. Press 📄.

2. Press 📄.

3. Press 📄.

4. Press 📄.

5. Press 📄.

6. To repeatedly sew the pattern combination, press 📄 so that it appears as 📄.

**Memo**

- Press 🚫 to erase the last pattern entered. Patterns are erased one at a time.
- If the entire combined pattern cannot be displayed, press 📄 to view an image of the pattern.
**Combining Stitch Patterns of Different Orientations**

**Example:**

→ The second pattern is flipped on a vertical axis.
To repeatedly sew the pattern combination, press \text{计数} so that it appears as \text{计数}.

→ The combination appears as a repeating pattern.

**Memo**

- Press \text{删除} to erase the last pattern entered. Patterns are erased one at a time.
- If the entire combined pattern cannot be displayed, press \text{确认} to view an image of the pattern. Press \text{关闭} to return to the previous screen.

→ The image of the pattern appears.

Combining Stitch Patterns of Different Lengths

1. Press \text{计数}.

2. Press \text{确认} once so that it appears as \text{确认}.

→ The pattern is displayed with a length of 4.
3 Press \( \text{\textbullet} \) again, and then press \( \text{\textbullet} \) three times so that it appears as \( \text{22} \).

\[ \rightarrow \text{The second pattern is displayed with a length of 2.} \]

4 To repeatedly sew the pattern combination, press \( \text{\textbullet} \) so that it appears as \( \text{22} \).

\[ \rightarrow \text{The combination appears as a repeating pattern.} \]

### Creating Step Patterns (7 mm Satin Stitch Patterns Only)

Stitch patterns that are shifted to create a step-shaped pattern are called step patterns.

Step patterns can be created by using \( \text{\textbullet} \) and \( \text{\textbullet} \) to shift 7 mm satin stitch patterns.

Press \( \text{\textbullet} \) once to move the stitch pattern to the left by half the width of the stitch pattern.

Press \( \text{\textbullet} \) once to move the stitch pattern to the right by half the width of the stitch pattern.

Example:
2. Press © and then press ±.

→ The next pattern is moved to the right.

3. Press © again, and then press ±.

4. Press © so that it appears as ©.

→ The combination appears as a repeating pattern.

Examples of Pattern Combinations
Stitch Data Precautions

Observe the following precautions when using stitch data other than that created and saved in this machine.

■ Types of Stitch Data That Can Be Used
  - Only .pmu stitch data files can be used with this machine. Using data other than that created using this machine may cause the machine to malfunction.

■ Computers and Operating Systems with the Following Specifications Can Be Used
  - Compatible models:
    IBM PC with a USB port as standard equipment
    IBM PC-compatible computer equipped with a USB port as standard equipment
  - Compatible operating systems:
    Microsoft Windows 98SE/Me/2000/XP
    (Windows 98SE requires a driver. Download the driver from our Web site (www.brother.com). In addition, only Windows 98 Second Edition can use the driver.)

■ Precautions on Using the Computer to Create and Save Data
  - If the file name of stitch data cannot be identified, for example, because the name contains special characters, the file is not displayed. If this occurs, change the name of the file.
  - Do not create folders in USB media. If stitch data is stored in a folder, that stitch data cannot be displayed by the machine.

■ Trademarks
  - IBM is a registered trademark or a trademark of International Business Machines Corporation.
  - Microsoft and Windows are registered trademarks or trademarks of Microsoft Corporation.

Each company whose software title is mentioned in this manual has a software license agreement specific to its proprietary programs. All other brands and product names mentioned in this manual are registered trademarks of their respective companies. However, the explanations for markings such as © and ™ are not clearly described within the text.

Saving Stitch Patterns in the Machine’s Memory

You can save often-used stitch patterns in the machine’s memory. The machine’s memory can hold up to 16 stitch patterns.

Note
Do not turn off the machine while the “Saving” screen is displayed, otherwise you may lose the stitch pattern that you are saving.

Memo
- It takes a few seconds to save a stitch pattern in the machine’s memory.
- See page 106 for information on retrieving a saved stitch pattern.

1 Press .

2 Press .

* Press CLOSE to return to the previous screen without saving the stitch pattern.

→ The “Saving” screen appears. When the pattern is saved, the previous screen appears automatically.
If the Memory Is Full

If this screen appears while you are trying to save a pattern on the machine’s memory, the memory is too full to hold the currently selected stitch pattern. To save the stitch pattern in the machine’s memory, you have to delete a previously saved stitch pattern.

1 Press **DELETE**.
   * Press **CANCEL** to return to the previous screen without saving the stitch pattern.

2 Select a stitch pattern to be deleted.
   * Press **CHECK** to display the pattern saved in that pocket. If the entire saved stitch pattern cannot be displayed, press **CHECK** to view the entire stitch pattern.
   * Press **CLOSE** if you do not want to delete the stitch pattern.

3 Press **DELETE**.
   → A confirmation message appears.
4 Press **OK**.

* If you decide not to delete the stitch pattern, press **CANCEL**.

![Image]

→ The old stitch pattern is deleted, and the new stitch pattern is automatically saved.

---

### Saving Stitch Patterns to the Computer

Using the included USB cable, connect the sewing machine to your computer so that stitch patterns can be retrieved from and saved to your computer.

**Note**

Do not turn off the machine while the "Saving" screen is displayed, otherwise you may lose the stitch pattern that you are saving.

---

1 **Plug the USB cable connectors into the corresponding USB ports on the computer and on the machine.**

* The USB cable can be plugged into the USB ports on the computer and machine whether or not they are turned on.

![Image]

1 USB port
2 USB cable connector

→ The “Removable Disk” icon appears in “My Computer” on the computer.

---

**Note**

* The connectors on the USB cable can only be inserted into a port in one direction. If it is difficult to insert the connector, do not insert it with force, and then check the orientation of the connector.
* For details on the position of the USB port on the computer, refer to the instruction manual for the corresponding equipment.

2 **Press **.
**USING THE MEMORY FUNCTION**

3 Press USB. → Press close to return to the previous screen without saving the stitch pattern.

→ The stitch pattern is temporarily saved to “Removable Disk” under “My Computer”.

4 Select the stitch pattern’s .pmu file in “Removable Disk”, and copy the file to the computer.

**Retrieving Stitch Patterns from the Machine’s Memory**

1 Press USB. → The pocket selection screen appears.

2 Select a stitch pattern to be retrieved.
   * Press so that the pattern saved in that pocket appears. If the entire saved stitch pattern cannot be displayed, press OPEN to view the entire stitch pattern.
   * Press close to return to the previous screen without saving the stitch pattern.

**Note**

Do not turn off the machine while the “Saving” screen is displayed, otherwise you may lose the data.

1 Pockets holding saved stitch patterns
3 Press **RETRIEV**.

* Press **DELETE** to delete the stitch pattern.

→ The selected stitch pattern is retrieved and the sewing screen appears.

Retrieving Stitch Patterns from the Computer

1. Plug the USB cable connectors into the corresponding USB ports on the computer and on the machine (see page 105).

2. On the computer, open “My Computer”, and then go to “Removable Disk”.

3. Move/copy the pattern data to “Removable Disk”.

→ Stitch pattern data in “Removable Disk” is written to the machine.

Note
- While data is being written, do not disconnect the USB cable.
- Do not create folders within “Removable Disk”. Since folders are not displayed, stitch pattern data within folders cannot be retrieved.

4. Press **USB**.

→ The stitch patterns in the computer are displayed in the selection screen.

5. Select a stitch pattern to be retrieved.

* Press so that the pattern saved in that pocket appears. If the entire saved stitch pattern cannot be displayed, press to view the entire stitch pattern.
* Press CLOSE to return to the previous screen without saving the stitch pattern.

1. Pockets holding saved stitch patterns

Press RETRIEVE.

* Press DELETE to delete the stitch pattern.

→ The selected stitch pattern is retrieved and the sewing screen appears.

**CAUTION**

- When disconnecting the USB cable:
  Before disconnecting the USB cable, click the "Unplug or Eject Hardware" icon in the taskbar of Windows® Me/2000 or the "Safely Remove Hardware" icon in the taskbar of Windows® XP. Then, when the removable disk has been removed safely, disconnect the USB cable from the computer and the machine.
  
  With Windows 98 SE, check that the Access lamp is not flashing before disconnecting the USB cable from the computer and the machine.

**Note**

- Be sure to perform the operation described above before disconnecting the USB cable from the computer and the machine, otherwise the computer may malfunction, the data may not be written correctly, or the data or data writing area on the machine may be damaged.
  
- The pattern retrieved from the computer is only temporarily written to the machine. It is erased from the machine when the machine is turned off. If you wish to keep the pattern, store it in the machine (see “Saving Stitch Patterns in the Machine’s Memory” on page 103).

**Note**
The pattern retrieved from the computer is only temporarily written to the machine. It is erased from the machine when the machine is turned off. If you wish to keep the stitch pattern, store it in a pocket on the machine (see “Saving Stitch Patterns in the Machine’s Memory” on page 103).

</table>

* It is recommended that a 90/14 needle should be used when embroidering on heavy weight fabrics or stabilizing products (for example; denim, puffy foam, etc.).
Attaching Embroidery Foot “U”

**CAUTION**

- When attaching a presser foot, always press in the operation panel. You may accidentally press the “Start/Stop” button and possibly cause injury.
- Be sure to use embroidery foot “U” when doing embroidery. Using another presser foot may cause the needle to strike the presser foot, causing the needle to bend or break and possibly cause injury.

1. Press the “Needle Position” button to raise the needle.

2. Press .

   → The Presser foot/Needle exchange screen appears and all keys and operation buttons are locked.

3. Raise the presser foot lever.

4. Press the black button on the presser foot holder to remove the presser foot.

5. Use the included screwdriver to loosen the presser foot holder screw, and then remove the presser foot holder.

6. Attach embroidery foot “U” so that the presser foot holder screw fits into the notch in the foot.

   * Make sure that embroidery foot “U” is vertical when it is installed.

7. Hold the embroidery foot in place with your right hand, and then use the included screwdriver to securely tighten the presser foot holder screw.

**CAUTION**

- Use the included screwdriver to firmly tighten the screw of the presser foot holder. If the screw is loose, the needle may strike the presser foot and possibly cause injury.

8. Press , or in the screen that appeared.

   → All keys and operation buttons are unlocked, and the previous screen is displayed.
Before Embroidering

Attaching the Embroidery Unit

**CAUTION**
- Do not move the machine with the embroidery unit attached. The embroidery unit could fall off and cause injury.
- Keep your hands and foreign objects away from the embroidery carriage and frame when the machine is embroidering. Otherwise, injury may result.
- If the embroidery unit could not be initialized correctly, a buzzer will sound. If this happens, go through the initialization process again. This is not a malfunction.

**Note**
- Do not touch the embroidery unit connector, otherwise damage to the connector pins or the machine may result.
- Do not apply extreme force to the embroidery unit carriage or pick up the unit by the carriage, otherwise damage to the embroidery unit may result.
- Store the embroidery unit in its storage box/case.

1. **Turn off the machine, and then remove the flat-bed attachment.**

2. **Slide the tab on the cover of the connection port in the direction of the arrow to open the cover.**

3. **Insert the embroidery unit connector into the connection port, and then lightly push in the embroidery unit until it snaps into place.**

4. **Turn on the machine.**

   → A message appears in the screen.

**Note**
- Make sure that there is no gap between the embroidery unit and the sewing machine, otherwise the embroidery pattern may not be sewn correctly. Be sure to fully insert the connector into the connection port.
- Do not push on the carriage when attaching the embroidery unit to the machine, otherwise damage to the embroidery unit may result.

**Note**
- Be sure to turn off the machine before attaching the embroidery unit, otherwise damage to the machine may result.

**Note**
- Be sure to close the cover of the connection port when the embroidery unit is not being used.
5 Press OK.

The carriage of the embroidery unit will move. Keep your hands etc. away from the carriage.

→ The carriage moves to its initial position.

6 The message will disappear after 15 seconds or press OK to move to the next step.

---

Before embroidering, make sure embroidery frame is moved as far back as possible and frame-securing lever is locked down. Then, press "Start/Stop" button to embroider.

Note

A confirmation message to lower the frame-securing lever after the carriage moves to its initial position is displayed. Continue with pattern selection and remember to lower the frame-securing lever when the embroidery frame is attached.

→ Pattern selection screen appears.

---

Removing the Embroidery Unit

1 Press Embroidery or Embroidery Emt, and then press .

→ The carriage moves to the storage position.

CAUTION

- Always remove the embroidery frame before pressing . Otherwise, the frame may strike the embroidery foot, and possibly cause injury.
- The embroidery unit will not fit in the storage box/case if this step is not done.

Note

If the carriage does not move to the storage position, the embroidery unit cannot be put into its storage box/case.

2 Turn off the machine.

Note

Be sure to turn off the machine before removing the embroidery unit, otherwise damage to the machine may result.

3 Press the release button under the end of the embroidery unit, and then pull the unit away from the machine.

CAUTION

- Do not carry the embroidery unit by holding the release button compartment.

Note

If the machine was not initialized correctly, the initial screen may not appear. This is not a sign of a malfunction. If this occurs, turn the machine off, then on again.

Note

A confirmation message to lower the frame-securing lever after the carriage moves to its initial position is displayed. Continue with pattern selection and remember to lower the frame-securing lever when the embroidery frame is attached.

→ Pattern selection screen appears.

Note

Keep your hands and foreign objects away from the embroidery carriage and frame when the machine is embroidering. Otherwise, injury may result.

Note

If the carriage does not move to the storage position, the embroidery unit cannot be put into its storage box/case.

Note

Be sure to turn off the machine before removing the embroidery unit, otherwise damage to the machine may result.
**SELECTING EMBROIDERY PATTERNS**

- **Copyright Information**
  The embroidery patterns stored in the machine and on embroidery cards (sold separately) are intended for private use only. Any public or commercial use of copyrighted patterns is an infringement of copyright law and is strictly prohibited.

- **Pattern Selection Screens**
  There are many character and decorative embroidery patterns stored in the machine’s memory. When the carriage moves to its initial position, a screen appears so that you can select a pattern. If a different screen is displayed, press .

  - 1. **One-point patterns**
  - 2. **Floral patterns**
  - 3. **Alphabet patterns**
  - 4. **Frame patterns**
  - 5. **Embroidery cards** (sold separately)
  - 6. **Patterns saved in the machine’s memory**
  - 7. **Patterns saved on the computer**

The screen that appears differs depending on the card that is inserted.

Press \( \text{Previous/Next Page} \) to display the previous or next page.
One-point Patterns/Floral Patterns

1. Select a type of embroidery pattern.

2. Select an embroidery pattern.

3. Press \( \text{SEWING} \).
   * Press \( \text{VIEW} \) to view an image of the embroidery pattern.

\[ \rightarrow \text{The sewing screen appears.} \]

   * To select a different embroidery pattern, press \( \text{RETURN} \). (After a confirmation message to delete the selected pattern appears, the pattern selection screen appears.)
Alphabet Patterns

1. Press .

2. Select a character style.

3. Press to display a selection screen of characters, and then select a character to be embroidered.

   * To change the size, press until the desired size is selected.
   * If a wrong character was selected, press to erase the character.
   * If the pattern is too small to see clearly, you can use key to check it.
   * Press to display all entered characters.

Memo

- The next character that is selected will have the new character size.
- You cannot change the size of characters once they have been combined.

4. Press .

   * Press to view an image of the embroidery pattern.

→ The sewing screen appears.
Continue with “VIEWING THE SEWING SCREEN” on page 119.

* To select a different character, press \( \text{RETURN} \). (After a confirmation message to delete the selected pattern appears, the pattern selection screen appears.)

**Frame Patterns**

1. Press \( \text{SELECT} \).

2. In the top part of the screen, select a frame shape. In the bottom part of the screen, select a frame pattern.

3. Press \( \text{SELECT} \).

   * Press \( \text{EXIT} \) to view an image of the embroidery pattern.

→ The sewing screen appears.
Embroidery Cards

- **About Embroidery Cards (Sold Separately)**
  - If an embroidery card other than our original embroidery cards is used, the machine may not operate correctly. Be sure to use only embroidery cards manufactured for this machine.
  - Embroidery cards purchased in foreign countries may not work with this machine.
  - Only insert or remove the embroidery card when is displayed, or when the machine is turned off.
  - Store embroidery cards in their protective cases.

- **Note**
  Do not insert the embroidery card in a direction other than that shown by the arrow on the card, do not insert the card with extreme force, and do not insert any object other than embroidery cards into the slot, otherwise the machine may be damaged.

- **With the side of the embroidery card marked with an arrow facing toward you, fully insert the card into the embroidery card slot on the right side of the machine.**
VIEWING THE SEWING SCREEN

Using the editing keys, you can change the patterns in a variety of ways, such as resizing them or rotating them.

1 Shows the code for the appropriate presser foot. When embroidering, be sure to use embroidery foot “U”.
2 Shows the embroidering area for the extra large frame (26 cm × 16 cm (approx. 10-1/4 inches × 6-1/4 inches)).
3 Shows the selected pattern.
4 Shows the total number of stitches in the selected pattern and the number of stitches that have already been sewn.
5 Shows the total amount of time required to sew the pattern and the amount of time that has already been spent sewing (not including the amount of time required to change threads).
6 Shows the number of colors in the selected pattern and the number of the color currently being sewn.
7 Shows the embroidery frames that can be used with the selected pattern. Be sure to use the correct frame (see page 121).
8 Shows the order in which the colors are sewn. Embroider in order, starting from the top.
9 Shows the thread color (at the bottom) and the part being sewn (at the top).

10 Shows the order in which the colors are sewn. Embroider in order, starting from the top.

Memo

Depending on the pattern that is selected, some editing functions may not be available. Keys that appear in dashed lines are not available.
PREPARING THE FABRIC

**CAUTION**

- Use fabrics with a thickness of less than 3 mm (approx. 1/8 inch). Using fabrics thicker than 3 mm (approx. 1/8 inch) may cause the needle to break.
- When using layers with thicker batting etc., you can sew more attractive embroidery by adjusting the embroidery presser foot height in the embroidery settings screen (see below).
- In the case of thick terry cloth towels we recommend that you place a piece of water soluble stabilizer on the top surface of the towel. This will help to reduce the nap of the toweling and result in more attractive embroidery.

**Memo**

With this machine, the height of embroidery foot “U” is automatically set according to the thickness of the fabric being embroidered. When embroidering thicker fabric, for example, fabric filled with batting, adjust the height of the presser foot in the settings screen.

Press \[ \text{Emboss} \], and then press \[ - \] or \[ + \] in the PRESSER FOOT HEIGHT display on P. 3 of the screen to adjust the height of the presser foot according to the thickness of the fabric.

To raise the presser foot, increase the setting (see page 20). (Normally, the height is set to 1.5 mm.)

**Attaching Stabilizer to Fabric**

For best results, always use stabilizer material for embroidery. In order to prevent shrinkage of the stitching or misaligned patterns, observe the following. When embroidering fabrics that cannot be ironed (such as towels or fabrics with loops that expand when ironed) or when embroidering an area that is difficult to iron, place the stabilizer material under the fabric without attaching it, and then hoop the fabric and the stabilizer in the embroidery frame.

**CAUTION**

- Always use a stabilizer material for embroidery when sewing stretch fabrics, lightweight fabrics, fabrics with a coarse weave, or fabrics which cause pattern shrinkage. Otherwise, the needle may break and cause injury. Not using a stabilizer material may result in a poor finish to your project.

**1 Prepare the stabilizer material for embroidering.**

* Use a piece of stabilizer material that is larger than the embroidery frame. When hooping the fabric in the embroidery frame, be sure that the stabilizer material is clamped in place on all edges in order to prevent wrinkles in the fabric.

**2 Using a steam iron, iron the stabilizer material to the wrong side of the fabric.**

**Note**

When embroidering lightweight fabrics, such as organdy or lawn, or when embroidering napped fabrics, such as towel or corduroy, use water-soluble stabilizer (sold separately) for best results. The water-soluble stabilizer material will dissolve completely in water, giving the embroidery a more attractive finish.
**Hooping Fabric in the Embroidery Frame**

### Types of Embroidery Frames

<table>
<thead>
<tr>
<th>Extra Large</th>
<th>Large</th>
<th>Medium (Sold Separately)</th>
<th>Small (Sold Separately)</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="image1" alt="Extra Large Frame" /></td>
<td><img src="image2" alt="Large Frame" /></td>
<td><img src="image3" alt="Medium Frame" /></td>
<td><img src="image4" alt="Small Frame" /></td>
</tr>
<tr>
<td>Embroidering area: 26 cm × 16 cm (approx. 10 - 1/4 inches × 6 - 1/4 inches)</td>
<td>Embroidering area: 18 cm × 13 cm (approx. 7 inches × 5 inches)</td>
<td>Embroidering area: 10 cm × 10 cm (approx. 4 inches × 4 inches)</td>
<td>Embroidering area: 2 cm × 6 cm (approx. 1 inch × 2 - 1/2 inches)</td>
</tr>
<tr>
<td>Use when embroidering connected or combined characters or patterns, or when embroidering large patterns.</td>
<td>Use when embroidering patterns with a size less than 18 cm × 13 cm (approx. 7 inches × 5 inches).</td>
<td>Use when embroidering pattern with a size less than 10 cm × 10 cm (approx. 4 inches × 4 inches)</td>
<td>Use when embroidering small-sized patterns, such as name tags.</td>
</tr>
</tbody>
</table>

Select a frame appropriate for the pattern size. The frame options are displayed in the screen.

![Frame Options Screen](image5)

① Can be used  
② Cannot be used

### CAUTION

- If you use a frame that is too small, the presser foot may strike the frame during sewing and cause injury.
■ Inserting the Fabric

**Note**
If the fabric is not taut, the pattern may be misaligned or the fabric may pucker. Follow the procedure described below to gently stretch the fabric in the embroidery frame so that the fabric is not loose. In addition, be sure to work on a level surface when hooping the fabric in the embroidery frame.

1. Lift up and loosen the frame adjustment screw, and then remove the inner frame.

   ![Frame Adjustment Screw](image1)

   - Inner frame
   - Frame adjustment screw

2. Lay the fabric right side up on top of the outer frame, and then place the inner frame on top.

   * Be sure to align △ on the inner frame with ▽ on the outer frame.

   ![Fabric Layout](image2)

   - Inner frame
   - Outer frame
   - Frame adjustment screw

3. Slightly tighten the frame adjustment screw, and then gently pull the edges of the fabric to remove any slack.

   ![Fabric Pull](image3)

   - Frame adjustment screw

4. Gently stretch the fabric, and then securely tighten the frame adjustment screw so that the fabric remains stretched.

   ![Fabric Stretching](image4)

   * Make sure that the edges of the inner and outer frames are aligned.

   - Outer frame
   - Inner frame
   - Wrong side of fabric

**Memo**
- After stretching the fabric, lightly tapping it should produce a drum-like sound.
- While stretching the fabric from all four corners and all four edges, securely tighten the frame adjustment screw.

5. Return the frame adjustment screw to its original position.

   ![Frame Adjustment Screw](image5)

■ Using the Embroidery Sheet

When you want to embroider the pattern at a particular location, use the embroidery sheet to hoop the fabric in the embroidery frame.

1. Mark the area of the fabric to be embroidered.

   ![Embroidery Sheet](image6)

   - Embroidery pattern
   - Mark
2 Place the embroidery sheet in the inner frame, and then align the guide lines on the embroidery sheet with the marks on the fabric.

3 Stretch the fabric within the inner and outer frames so that there are no folds or wrinkles (see page 122).

4 Remove the embroidery sheet.

**Embroidering Small Fabrics and Fabric Edges**

Use embroidery stabilizer to provide extra support. After embroidering, carefully remove the stabilizer.

**■ Embroidering Small Fabrics**

When embroidering small pieces of fabric, use temporary spray adhesive to attach the small piece of the fabric to stabilizer, and then hoop the stabilizer in the embroidery frame. If you do not wish to use a temporary spray adhesive, attach the fabric to the stabilizer with basting stitches.

**■ Embroidering Edges or Corners**

When embroidering corners or edges of fabric, use temporary spray adhesive to attach the corner or edge of the fabric to stabilizer, and then hoop the stabilizer in the embroidery frame. If you do not wish to use a temporary spray adhesive, attach the fabric to the stabilizer with basting stitches.

**■ Embroidering Ribbons or Tape**

When embroidering narrow pieces of fabric, use temporary spray adhesive to attach the ribbon or tape to stabilizer, and then hoop the stabilizer in the embroidery frame. If you do not wish to use a temporary spray adhesive, hoop both ends of the ribbon or tape together with the stabilizer in the embroidery frame.
**ATTACHING THE EMBROIDERY FRAME**

**Note**
Before attaching the embroidery frame, set the bobbin.

1. Press the “Presser Foot Lifter” button to raise the presser foot.

2. Raise the frame-securing lever.

3. Align the embroidery frame guide with the right edge of the embroidery frame holder.

4. Slide the embroidery frame into the holder, making sure that △ on the embroidery frame aligns with ▽ on the holder.

5. Lower the frame-securing lever so that it is level with the frame to secure the embroidery frame in the embroidery frame holder.

6. After the embroidery frame is attached, press the “Presser Foot Lifter” button again to lower the presser foot.

---

**CAUTION**
- If the frame-securing lever is not lowered, the embroidery pattern may not sew out correctly or the presser foot may strike the embroidery frame and cause injury.

---

**Removing the Embroidery Frame**

1. Press the “Presser Foot Lifter” button to raise the presser foot.

2. Raise the frame-securing lever.

3. Pull off the embroidery frame toward you.
EDITING THE PATTERN

CAUTION

- After the size of the pattern has been changed, check the icons for the embroidery frames that can be used and use only the indicated frames. If a frame other than those indicated is used, the presser foot may strike the embroidery frame, possibly causing injuries.

Changing the Embroidery Frame Display

1. Press \text{\textbullet.}

2. Press \text{\textbullet} or \text{\textbullet} in the “EMBROIDERY FRAME DISPLAY” on P. 2 of the screen to select how the embroidery frame is displayed.
   * There are five embroidery frame layouts.

   

3. After selecting the layout, press \text{\textbullet.}

Changing the Pattern Position

1. Press LAYOUT.
EDITING THE PATTERN

2 Press \( \text{①} \) to move the pattern.

   * Press \( \text{③} \) to move the pattern in the direction of the arrow on the key.
   * Press \( \text{④} \) to center the pattern.

3 Press \( \text{⑥} \).

Rotating the Pattern

1 Press \( \text{①} \).

2 Press \( \text{②} \).

   * Each press of the key rotates the pattern 90 degrees.

3 Press \( \text{③} \).

Changing the Pattern Size

1 Press \( \text{①} \).

Note

- If a large-size embroidery pattern was selected, \( \text{②} \) changes to \( \text{③} \), allowing the pattern to be rotated in 1 degree increments. The pattern cannot be rotated more than 90 degrees.
- With large patterns that extend out of the extra-large embroidery frame when rotated 90 degrees, each press of this button rotates the pattern 180 degrees.
2 Press \( \text{SIZE} \).

3 Change the size of the pattern.
   - Press \( \uparrow \) to reduce the size of the pattern.
   - Press \( \downarrow \) to enlarge the size of the pattern.
   - Press \( \text{RETURN} \) to return the pattern to its original size.

Memo
- Some patterns or characters can be enlarged more than others.
- Some patterns or characters can be enlarged to a greater degree if they are rotated 90 degrees.

4 Press \( \text{CLOSE} \).

5 Press \( \text{RETURN} \).

Creating a Horizontal Mirror Image

1 Press \( \text{LAYOUT} \).

2 Press \( \text{SIZE} \).

→ The key appears as \( \text{æ} \).

3 Press \( \text{RETURN} \).
Changing the Stitching Density (Alphabet and Frame Patterns Only)

1. Press \[\text{[}]\text{[}]\text{[}]\text{[]}.\]

2. Change the stitching density.
   * Press \[-\] to reduce the stitching density.
   * Press \[+\] to increase the stitching density.
   * Each press of the key changes the stitching density by 5%. (The density can be set between 80% and 120%.)

3. Press \[\text{CLOSE}].

Changing the Color of Single Characters

Combined alphabet patterns can be sewn with each letter in a different color. If “MULTI COLOR” is set, the machine stops after each character is sewn so that the thread can be changed to one of a different color.

1. Press \[\text{MULTI COLOR}\].

2. After a character is sewn, change the thread color, and then sew the next character.
CHECKING THE PATTERN

Checking the Embroidering Position

The embroidery frame is moved to indicate the embroidering position. Closely watch the frame to check that the pattern will be sewn at the correct place.

1. Press  to select the position to be checked.

→ The frame moves to indicate the selected position.

Memo
- To view the entire embroidering area, press .
  The frame moves to indicate the entire embroidering area.

CAUTION
- Make sure the needle is up when the embroidery frame is moving. If the needle is down, it could break and result in injury.

3. Press  .
CHECKING THE PATTERN

Previewing the Pattern

1 Press  to select the frame used in the preview.

* Embroidery frame icons that appear in dashed line cannot be selected.
* Press  to enlarge the preview of the embroidery pattern.

Memo
- Press the “Start/Stop” button to sew the pattern as it appears in this screen.
- Patterns with many stitches may take some time to preview.

2 Press  to select the frame used in the preview.

3 Press  .

130
Sewing Attractive Finishes

There are many factors that go into sewing beautiful embroidery. Using the appropriate stabilizer (see page 120) and hooping the fabric in the frame (see page 121) are two important factors mentioned earlier. Another important point is the appropriateness of the needle and thread being used. See the explanation of threads below. Included with this machine are two bobbin cases. Follow the explanation below.

<table>
<thead>
<tr>
<th>Thread</th>
<th>Upper thread</th>
<th>Bobbin thread</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Use embroidery thread, or country embroidery thread intended for use with this machine.</td>
<td>Use embroidery bobbin thread intended for use with this machine.</td>
</tr>
</tbody>
</table>

**Memo**

If you use threads other than those listed above, the embroidery may not sew out correctly.

**Bobbin case**

Standard bobbin case (green marking on the screw) is in the machine for sewing and embroidery. The bobbin case originally installed in the machine has a green screw.

Alternate bobbin case (pink marking) is set with lighter tension for embroidery with different weights of bobbin threads and a variety of embroidery techniques.

See page 176 for how to remove the bobbin case.

**Note**

- Before embroidering, check that there is enough thread in the bobbin. If you continue sewing without enough thread in the bobbin, the thread may tangle.
- Do not leave objects in the range of motion of the embroidery frame. The frame may strike the object and cause a poor finish to the embroidery pattern.
- When embroidering on large garments (especially jackets or other heavy fabrics), do not let the fabric hang over the table. Otherwise, the embroidery unit cannot move freely, and the pattern may not turn out as planned.

**Embroidery Needle Plate Cover**

Under some conditions, based on the type of fabric, stabilizer, or thread being used, there may be some looping in the upper thread. In this case, attach the included embroidery needle plate cover to the needle plate. Attach the cover by inserting the two projections on the underside of the cover into the notches on the needle plate as shown below.

**CAUTION**

- Push the embroidery needle plate cover as far as possible to attach it. If the embroidery needle plate cover is not securely attached, it may cause the needle to break.

**Note**

Do not use the embroidery needle plate cover for any applications other than embroidery.
Sewing Embroidery Patterns

Example: To embroider

1 Thread the machine with thread for the first color, pass the thread through the hole in embroidery foot “U”, pull out some thread to give it some slack, and then lightly hold the end of the thread in your left hand.

2 Lower the presser foot, and then press the “Start/Stop” button to start embroidering. After 5 or 6 stitches are sewn, press the “Start/Stop” button again to stop the machine.

3 Trim off the excess thread at the beginning of the stitching. If the thread is hidden under the presser foot, raise the presser foot, and then cut the thread.

4 Press the “Start/Stop” button again to start embroidering.

   → When the area for the first color has been sewn, the machine automatically trims the threads, then stops, and the presser foot is automatically raised. The next color in the embroidery color order moves to the top.

5 Remove the thread for the first color from the machine, and then thread the machine with the thread for the second color.

6 Repeat these steps to embroider the remaining colors.

   → After the last stitch is sewn, the message “Finishing sewing” appears. Press \( \text{OK} \) to return to the previous screen.

7 When the pattern is finished, trim the excess thread jumps (thread linking part of the pattern, etc.).

Memo
If there are too many thread colors to be displayed, press \( \text{CHECK COLOR} \) to scroll through the thread colors.

\( \text{CAUTION} \)

• If the thread is too tight, the needle may bend or break.

* Depending on the pattern, a more attractive finish can be achieved by trimming the thread jumps after each color is embroidered.
Embroidering Appliqué Patterns

There are some patterns which call for an appliqué inside the pattern. When sewing an embroidery pattern with an appliqué, the color sewing order display shows “Appliqué Material”, “Appliqué Position”, “Appliqué”, and then the sewing order of the colors around the appliqué.

Memo
When “Appliqué Material”, “Appliqué Position” and “Appliqué” are displayed, a specific color does not appear. Use a proper color thread to match the appliqué piece.

1. Attach iron-on stabilizer to the wrong side of the appliqué fabric.

2. Hoop the appliqué fabric (from step 1) in the embroidery frame, and then press the “Start/Stop” button to sew material of the appliqué design.

3. After sewing is finished, remove the appliqué fabric from the embroidery frame, and then carefully cut along the stitching.

4. Hoop the base fabric in the embroidery frame.

5. Press the “Start/Stop” button to sew the position of the appliqué.

   * Use the same color of thread to be used to attach the appliqué.

Memo
The embroidering procedure is the same as the basic procedure described in “Sewing Embroidery Patterns” on page 132.

Note
Carefully cut out the appliqué along the outline that was sewn. If the appliqué is cut out along the inside of the outline, the appliqué fabric may not be caught by the stitching. If this step is not performed correctly, the appliqué will not be sewn correctly. In addition, carefully remove any excess threads.
Apply a thin layer of adhesive or spray adhesive to the back of the appliqué piece, and then attach it to the base fabric at the appliqué position sewn in step 5.

After the appliqué piece is attached, press the “Start/Stop” button to sew the appliqué.

The appliqué is then completed.

Change the upper thread, and then finish embroidering the remainder of the pattern.

If the Bobbin Runs Out of Thread

If the bobbin begins to run out of thread during embroidering, the machine stops and the following message appears. Replace the bobbin thread according to the following procedure. If very little sewing remains, press close to sew 10 stitches without rethreading the machine.

Replacing the Bobbin

1. Press close.

2. Press the “Thread Cutter” button to trim the threads.

3. Press the “Presser Foot Lifter” button to raise the presser foot.

4. Raise the frame-securing lever, and then remove the embroidery frame.

5. Replace the bobbin with a full one, and then reattach the embroidery frame.

Note

- Be careful not to apply a strong force to the hooped fabric.
- When removing and reattaching the embroidery frame, do not allow the frame to hit the carriage or the presser foot, otherwise the pattern may become misaligned.

If the appliqué fabric is a lightweight fabric, you may want to use a fusible web to stabilize the fabric and to attach it to the base fabric. Do not remove the base fabric from the embroidery frame when ironing on the appliqué piece.

Depending on the pattern that is selected, “Appliqué” may not appear, but instead will appear as a color. If “Appliqué” appears as a color, embroider using thread of that color.

Note

- If glue is attached to the presser foot, needle or needle plate, finish embroidering the appliqué pattern, and then clean off the glue.
- For best results, trim all excess threads between pattern parts.
6 Press the “Presser Foot Lifter” button to lower the presser foot.

7 To return to the point in the pattern where sewing was stopped, follow steps 3 through 6 in the next section.

Memo
For best results, return to a point 2 or 3 stitches before sewing stopped.

If the Thread Breaks During Sewing

1 Press the “Start/Stop” button to stop the machine.

2 If the upper thread broke, rethread the machine. If the bobbin thread broke, follow the instructions in steps 1 through 5 from the previous section to reinstall the bobbin.

3 Press \( \pm \).

4 Press \( \pm 1 \), \( \pm 10 \) or \( \pm 100 \) to move the needle back 2 or 3 stitches before the point where the thread broke.

* If you cannot return to the point where the thread broke, press \( \mp \) to select a color and return to the beginning of that color. Then, press \( \pm 1 \), \( \pm 10 \) or \( \pm 100 \) to move forward slightly before the point where the thread broke.

5 Press \( \text{CLOSE} \).

6 Press the “Start/Stop” button to continue embroidering.
Restarting from the Beginning

1. Press [−/+].

   → The embroidery frame moves, returning the needle to the beginning of the pattern.

2. Press [ ].

3. Press [CLOSE].

4. Press the “Start/Stop” button.

Adjusting the Thread Tension

When embroidering, the thread tension should be set so that the upper thread can be slightly visible from the wrong side of the fabric. With some fabric and thread combinations, the thread tension may need to be adjusted.

- Correct Thread Tension

   The upper thread can be slightly visible from the wrong side of the fabric. If the thread tension is not set correctly, the stitching may be uneven, there may be puckering in the fabric, or the thread may break.

   Follow the procedures described below to adjust the thread tension according to the current condition.

   ![Correct Thread Tension](image)

   Right side of fabric Wrong side of fabric

   Note

   If the thread tension is set so that it is extremely weak, the machine may stop during sewing. This is not a sign of a malfunction. Slightly increase the thread tension to begin sewing again.

   Memo

   - If the machine is turned off or a different pattern is selected, the thread tension setting returns to its default.
   - When a saved pattern is retrieved, the thread tension setting changes to that set when the pattern was saved.
■ If the Upper Thread Is Too Tight
The upper thread is too tight when the bobbin thread is visible from the right side of the fabric.

1. Press \( \text{\textbullet} \text{\textbullet} \text{\textbullet} \text{\textbullet} \).

2. Press \(+\) in the tension display.
   * Each press of the key decreases the value and weakens the upper thread tension.

3. Press \text{\textbullet} \text{\textbullet} \text{\textbullet} \text{\textbullet}.

■ If the Upper Thread Is Too Loose
The upper thread is too loose when there are loose thread locks or when loops appear on the right side of the fabric.

1. Press \( \text{\textbullet} \text{\textbullet} \text{\textbullet} \text{\textbullet} \).

2. Press \(+\) in the tension display.
   * Each press of the key increases the value and tightens the upper thread tension.

3. Press \text{\textbullet} \text{\textbullet} \text{\textbullet} \text{\textbullet}.

**Automatic Thread Cutting (End Color Trim)**

If the automatic thread cutting setting is selected before embroidering, the machine will automatically cut the thread at the end of each color when the machine is stopped. To cancel the setting, press \( \text{\textbullet} \text{\textbullet} \text{\textbullet} \text{\textbullet} \), and then press \( \text{\textbullet} \text{\textbullet} \) again so that it appears as \( \text{\textbullet} \text{\textbullet} \text{\textbullet} \text{\textbullet} \).
Changing the Embroidering Speed

1. Press \[ \text{button} \].
2. Press \[ - \] or \[ + \] in the “MAX EMBROIDERY SPEED” display on P. 2 of the screen.
   * You can choose from 3 embroidering speed levels.

3. Press \[ \text{CLOSE} \].

Memo
- SPM is the number of stitches sewn in one minute.
- Decrease the sewing speed when embroidering on thin, thick, or heavy fabrics.
- The sewing speed can be changed while embroidery is being sewn.
- The maximum sewing speed setting does not change until a new setting is selected. The setting specified before the machine is turned off remains selected the next time that the machine is turned on.
- Decrease the sewing speed to 600 spm when using a specialty thread like a metallic thread.

Changing the Thread Color Display

From the following, select the thread color that appears in the embroidery color order display. You can change the thread color display on embroidery screen, to the thread color name, each time to embroider or the thread number.

<table>
<thead>
<tr>
<th>THREAD COLOR NAME</th>
<th>TIME</th>
<th>THREAD NUMBER</th>
</tr>
</thead>
<tbody>
<tr>
<td>EMBROIDERY/POLYESTER THREAD#</td>
<td>513</td>
<td>EMBROIDERY</td>
</tr>
<tr>
<td>COUNTRY/COTTON THREAD#</td>
<td>444</td>
<td>COUNTRY</td>
</tr>
<tr>
<td>MADEIRA POLY THREAD#</td>
<td>1648</td>
<td>MA POLY</td>
</tr>
<tr>
<td>MADEIRA RAYON</td>
<td>1649</td>
<td>MA RAYON</td>
</tr>
<tr>
<td>SULKY POLY THREAD#</td>
<td>1177</td>
<td>SULKY</td>
</tr>
<tr>
<td>ROBISON-ANTON POLY THREAD#</td>
<td>5522</td>
<td>RX POLY</td>
</tr>
</tbody>
</table>
Example: Displaying the thread number of “EMBROIDERY”

1. Press \[ \] .

2. Press \[ \] or \[ \] beside \[ \] on P. 2 of the screen to select the “#123”.

→ “EMBROIDERY” appears at the bottom.

3. Press \[ \], \[ \] to select the thread brand.

4. Press \[ \] .

→ The thread color display is changed.

Memo
Colors on the screen may vary slightly from actual spool colors.
USING THE MEMORY FUNCTION

Embroidery Data Precautions
Observe the following precautions when using embroidery data other than that created and saved in this machine.

**CAUTION**
- When using embroidery data other than our original patterns, the thread or needle may break when sewing with a stitch density that is too fine or when sewing three or more overlapping stitches. In that case, use one of our original data design systems to edit the embroidery data.

**Types of Embroidery Data That Can Be Used**
- Only .pes, .phc, and .dst embroidery data files can be used with this machine. Using data other than that saved using our design systems may cause the embroidery machine to malfunction.

**Computers and Operating Systems with the Following Specifications Can Be Used**
- Compatible models:
  - IBM PC with a USB port as standard equipment
  - IBM PC-compatible computer equipped with a USB port as standard equipment
- Compatible operating systems:
  - Microsoft Windows 98SE/Me/2000/XP
  - Windows 98 Second Edition can use the driver.

**Precautions on Using the Computer to Create and Save Data**
- If the file name of embroidery data cannot be identified, for example, because the name contains special characters, the file is not displayed. This occurs, change the name of the file.
- If .pes embroidery data larger than 26 cm (H) × 16 cm (W) (approx. 10 1/4 inches (H) × 6 1/4 inches (W)) is selected, a message appears asking if you wish to rotate the pattern 90 degrees. Embroidery data larger than 26 cm (H) × 16 cm (W) (approx. 10 1/4 inches (H) × 6 1/4 inches (W)), even after being rotated 90 degrees, cannot be used (All designs must be within the 26 cm (H) × 16 cm (W) (approx. 10 1/4 inches (H) × 6 1/4 inches (W)) design field size.)
- .pes files saved with the number of stitches or the number of colors exceeding the specified limits cannot be displayed. Use one of our original data design systems to edit the embroidery pattern so that it meets the specifications.
- Do not create folders in Removable Disk. If embroidery data is stored in a folder, that embroidery data cannot be displayed by the embroidery machine.
- Even if the embroidery unit is not attached, the machine will manage embroidery data.

**Tajima (.dst) Embroidery Data**
- .dst data is displayed in the pattern list screen by file name (the actual image cannot be displayed). Only the first eight characters of the file name can be displayed.
- Since Tajima (.dst) data does not contain specific thread color information, it is displayed with our default thread color sequence. Check the preview and change the thread colors as desired.

**Trademarks**
- IBM is a registered trademark or a trademark of International Business Machines Corporation.
- Microsoft and Windows are registered trademarks or trademarks of Microsoft Corporation.

Each company whose software title is mentioned in this manual has a Software License Agreement specific to its proprietary programs. All other brands and product names mentioned in this manual are registered trademarks of their respective companies. However, the explanations for markings such as ® and ™ are not clearly described within the text.
Saving Embroidery Patterns in the Machine’s Memory

You can save embroidery patterns that you have customized and will use often, for example, your name or other pattern combinations, patterns that have been rotated or resized, or patterns that have had their embroidering position changed.

Note
Do not turn off the machine while the “Saving” screen is displayed, otherwise you may lose the pattern that you are saving.

Memo
- It takes a few seconds to save a pattern in the machine’s memory.
- See page 143 for information on retrieving a saved pattern.

1 With the pattern that you want to save displayed in the sewing screen, press .

2 Press .
   * Press to return to the previous screen without saving the pattern.

If the Memory Is Full
If the following screen appears, either the maximum number of patterns have been saved or the pattern that you want to save takes a lot of memory, and the machine cannot save it. To save the pattern in the machine’s memory, you have to delete a previously saved pattern.

1 Press DELETE.
   * Press CANCEL to return to the previous screen without saving the pattern.

2 Select a pattern to be deleted.
   * Press to display the pattern saved in that pocket.
   * Press close if you do not want to delete the pattern.

Note
Do not turn off the machine while the “Saving” screen is displayed, otherwise you may lose the pattern that you are saving.

Memo
It takes a few seconds to save a pattern in the machine’s memory.
See page 143 for information on retrieving a saved pattern.
142

Using the included USB cable, connect the sewing machine to your computer so that embroidery patterns can be retrieved from and saved to your computer.

**Note**
Do not turn off the machine while the “Saving” screen is displayed, otherwise you may lose the pattern that you are saving.

1. **Plug the USB cable connectors into the corresponding USB ports on the computer and on the machine.**

   * The USB cable can be plugged into the USB ports on the computer and machine whether or not they are turned on.

   ![USB connection diagram]

   ① USB port  
   ② USB cable connector

   → The “Removable Disk” icon appears in “My Computer” on the computer.

**Note**
- The connectors on the USB cable can only be inserted into a port in one direction. If it is difficult to insert the connector, do not insert it with force, and then check the orientation of the connector.
- For details on the position of the USB port on the computer (or USB hub), refer to the instruction manual for the corresponding equipment.

2. **Press the DELETE button.**

   ① Amount of memory currently being used  
   ② Total amount of machine memory available for saving patterns  
   ③ Pockets where a pattern is saved (The amount of memory used by the pattern is indicated on the pocket.)

   ![Memory status screen]

3. **Press the OK button.**

   * If you decide not to delete the pattern, press the CANCEL button.

   ![Confirmation screen]

   → The “Saving” screen appears. When the pattern is saved, the previous screen appears automatically.

**Memo**
- If there is enough memory available after deleting the pattern, the pattern that you want to save will be saved automatically. If there is not enough memory available after deleting the pattern, repeat the above procedure to delete another pattern from the machine’s memory.
- It takes a few seconds to save a pattern in the machine’s memory.
- See page 143 for more information about retrieving saved patterns.
2 With the pattern that you want to save displayed in the sewing screen, press 📨. 

3 Press 📨. 
   * Press CLOSE to return to the previous screen without saving the pattern.

4 Select the pattern’s .phc file in “Removable Disk”, and copy the file to the computer.

Retrieving Patterns from the Machine’s Memory

1 Press 📨. 

   → The pocket selection screen appears.

2 Select a pattern to be retrieved. 
   * Press to display the pattern saved in the selected pocket. 
   * If you decide not to retrieve the pattern, press CLOSE.
Press (MEMORY).

→ The sewing screen appears.

Retrieving Patterns from the Computer

1. Plug the USB cable connectors into the corresponding USB ports on the computer and on the machine (see page 142).

2. The “Removable Disk” icon appears in “My Computer” on the computer.

3. Copy the pattern data to “Removable Disk”.

→ Pattern data in “Removable Disk” is written to the machine.

Note

- While data is being written, do not disconnect the USB cable.
- Do not create folders within “Removable Disk”. Since folders are not displayed, pattern data within folders cannot be retrieved.
- While the machine is sewing, do not write data to or delete data from “Removable Disk”.

4 Press the Embroidery button.

→ The pattern selection screen appears.

5 Select an embroidery pattern to be retrieved.

* If you decide not to retrieve the pattern, press CLOSE.

6 Press the SEWING button.

→ The sewing screen appears.

### Memo

- If there are 13 or more patterns saved in “Removable Disk”, the patterns cannot be displayed. When the message “Only 12 patterns can be saved.” appears, delete patterns from “Removable Disk” so that it contains no more than 12 patterns. Then, close the error message, repeat the procedure starting from step 4 and then press Embroidery to retrieve the pattern.

- For details on large-size embroidery patterns, refer to PE-DESIGN Instruction Manual.

### CAUTION

- When disconnecting the USB cable:

  Before disconnecting the USB cable, click the “Unplug or Eject Hardware” icon in the taskbar of Windows® Me/2000 or the “Safely Remove Hardware” icon in the taskbar of Windows® XP. Then, when the removable disk has been removed safely, disconnect the USB cable from the computer and the machine.

  With Windows 98SE, check that the Access lamp is not flashing before disconnecting the USB cable from the computer and the machine.

### Note

- Be sure to perform the operation described above before disconnecting the USB cable from the computer and the machine, otherwise the computer may malfunction, the data may not be written correctly, or the data or data writing area on the machine may be damaged.

- The pattern retrieved from the computer is only temporarily written to the machine. It is erased from the machine when the machine is turned off. If you wish to keep the pattern, store it in the machine (see “Saving Embroidery Patterns in the Machine’s Memory” on page 141).
Using a Frame Pattern to Make an Appliqué (1)

You can use frame patterns of the same size and shape to create an appliqué. Embroider one pattern with a straight stitch and the other pattern with a satin stitch.

1. Select a straight stitch frame pattern, embroider the pattern onto the appliqué fabric, and then neatly cut around the outside of the stitching.

2. Embroider the same pattern on the base fabric.

3. Apply a thin layer of fabric glue or temporary spray adhesive to the back of the appliqué piece cut out in step 1, and then attach the appliqué to the base fabric within the outline.

4. Select the satin stitch frame pattern of the same shape, and then embroider over the appliqué and base fabric from step 3.

Note

If the size or embroidering position of the straight stitch frame pattern was changed, be sure to change the size or embroidering position of the satin stitch frame pattern in the same way.
Using a Frame Pattern to Make an Appliqué (2)

This is a second method for making appliqués using embroidery patterns. With this method, there is no need to change the fabric in the embroidery frame. To make the appliqué, embroider one pattern with a straight stitch and the other pattern with a satin stitch.

1. Select a straight stitch frame pattern, and then embroider the pattern onto the base fabric.

2. Place the appliqué fabric over the pattern embroidered in step 1. Make sure that the appliqué fabric completely covers the stitching.

3. Embroider the same pattern on the appliqué fabric.

4. Remove the embroidery frame from the machine, and then cut around the outside of the stitching.

Note
Leave the fabric in the embroidery frame when cutting off the excess appliqué fabric. In addition, do not apply extreme pressure to the framed fabric, otherwise the fabric could become loose.

5. Select the satin stitch frame pattern of the same shape as the appliqué.

Note
Do not change the size or embroidering position of the pattern.

6. Attach the embroidery frame removed in step 4, and then embroider the pattern.

USING THE MEMORY FUNCTION .................................................. 162
With the Embroidery Edit functions, you can change the size of patterns, rotate patterns, adjust the character spacing and layout, and perform many other editing operations. In addition, characters and patterns can be combined and rearranged within the 26 cm × 16 cm (approx. 10 - 1/4 inches × 6 - 1/4 inches) embroidering area. With the Embroidery Edit functions, you can combine various patterns and characters to create original patches and embroidery.

- **Combined Patterns**
  You can easily create combinations of one-point patterns, frame patterns, character patterns, and patterns from separately sold embroidery cards.

- **Move Patterns**
  Within the 26 cm × 16 cm (approx. 10 - 1/4 inches × 6 - 1/4 inches) embroidery area, you can change the position of patterns, and check their position on the LCD.

- **Rotate Patterns**
  You can rotate patterns one degree, 10 degrees or 90 degrees at a time.

- **Enlarge or Reduce Patterns**
  You can make patterns larger or smaller.
  - This function is not available with some patterns.

- **Create Mirror Images**
  You can create horizontal mirror images of patterns.
  - This function is not available with some patterns.

- **Change Character Spacing**
  You can increase or decrease the spacing between characters in combined patterns.

- **Change Character Appearance/Layout**
  You can change the layout of the characters to a curved line, a diagonal line, or any of the 6 choices available.
SELECTING PATTERNS TO EDIT

Attach the embroidery unit, prepare the machine for embroidering according to the instructions on page 110, and then press \( \text{Embroidery Edit} \) to display the screen shown below.

![Embroidery Edit Screen]

1. One-point patterns
2. Floral patterns
3. Alphabet patterns
4. Frame patterns
5. Embroidery cards (sold separately)
6. Patterns saved in the machine’s memory
7. Patterns saved on the computer

Selecting One-point Patterns/Floral Patterns/Frame Patterns

1. Select the category of the pattern.

![Select Pattern Screen]

2. Select an embroidery pattern.

   * For details on selecting patterns, see page 115 and page 117.

   → The selected pattern is highlighted.

Memo

For details on the pattern selection screen, see page 114 or the Quick Reference Guide.
SELECTING PATTERNS TO EDIT

3 Press \[SET\].

→ The selected pattern appears in the screen.

4 Continue with “EDITING PATTERNS” on page 154.

Alphabet Patterns

With the Embroidery Edit functions, you can edit the appearance of a character at the same time that you enter it.

1 Press \[A\].

2 Select the character style, and then enter the characters.

   * For details on selecting characters, see page 116.
   * Press \[CHECK\] to view an image of all entered characters.
3 Press **ARRAY** to change the layout of the pattern.

1 Layout of characters

**Memo**
The layout of the characters appears in the upper-left corner of the screen.

4 Select the layout.

→ The displayed character layout changes.

5 Press **CLOSE** to return to the previous screen.

6 Press **SET**.

→ The embroidery edit screen appears.

7 Continue with see “EDITING PATTERNS” on page 154.

### Note

Keys that appear in dashed lines are not available with the selected pattern.
Moving the Pattern

Press \[ \text{←, →, ↑, ↓} \] to move the pattern in the direction shown on the key.
Press \[ \text{←, →} \] to center the pattern.

Rotating the Pattern

1. Press \[ \text{ROTATE} \].

2. Select the angle that the pattern is rotated.
   * Press \[ \text{90°} \] to rotate the pattern 90 degrees to the left.
   * Press \[ \text{90°} \] to rotate the pattern 90 degrees to the right.
   * Press \[ \text{10°} \] to rotate the pattern 10 degrees to the left.
   * Press \[ \text{10°} \] to rotate the pattern 10 degrees to the right.
   * Press \[ \text{1°} \] to rotate the pattern 1 degree to the left.
   * Press \[ \text{1°} \] to rotate the pattern 1 degree to the right.
   * Press \[ \text{RESET} \] to return the pattern to its original position.

3. Press \[ \text{CLOSE} \].
**EDITING PATTERNS**

### Changing the Size of the Pattern

1. Press \[ \textit{SIZE}. \]

2. Select the direction in which the size is changed.
   - Press \[ \] to reduce the pattern proportionately.
   - Press \[ \] to enlarge the pattern proportionately.
   - Press \[ \] to reduce the pattern vertically.
   - Press \[ \] to enlarge the pattern vertically.
   - Press \[ \] to reduce the pattern horizontally.
   - Press \[ \] to enlarge the pattern horizontally.
   - Press \[ \] to return the pattern to its original size.

3. Press \[ \textit{CLOSE}. \]

### Deleting the Pattern

Press \[ \textit{SELECT}. \] to select the pattern to be deleted, and then press \[ \textit{DELETE}. \]
- The darker pattern will be deleted.
Changing the Configuration of Character Patterns

1. Press \( \text{EDIT} \).

2. Select the layout.
   * After selecting an arc layout, press \( \text{up} \) to expand the arc.
   * After selecting an arc layout, press \( \text{down} \) to reduce the arc.

3. Press \( \text{left} \) to adjust the position.
   * Press \( \text{center} \) to center the pattern.

4. Press \( \text{CLOSE} \).

Changing the Character Spacing

1. Press \( \text{SPACING} \).

2. Press \( \text{left} \) or \( \text{right} \).
   * Press \( \text{left} \) to widen the character spacing.
   * Press \( \text{right} \) to tighten the character spacing.
   * Press \( \text{center} \) to return the pattern to its original spacing.

3. Press \( \text{left} \) to adjust the position.
   * Press \( \text{center} \) to center the pattern.

4. Press \( \text{CLOSE} \).
Changing the Color of Each Character in a Pattern

Press \textbf{MULTI COLOR} so that it appears as \textbf{MULTI COLOR}. The machine will stop after each character is embroidered so the thread can be changed.

\textbf{Memo}

The multi color settings can also be set from the sewing screen. For details, see page 128.

After Editing

1. Press \textbf{EDIT END}.

2. Press \textbf{SEWING} to embroider the edited pattern.

* Press \textbf{EDIT} to return to the embroidery edit screen.

\textbf{Memo}

For details on combining patterns, see page 159.
This section will describe how to combine characters and embroidery patterns.

**Editing Combined Patterns**

1. Press .

2. Press  on P. 1 of the screen.

3. Press .

4. Press .
5 Press **AA**.

6 Press **ABC**.

7 Enter “WELCOME”.
   * For details on selecting characters, see page 116.
   * After entering “W”, press **M** to change the size to M, then enter the remaining characters.
   * Press **CHECK** to view an image of all entered characters.

8 Press **SET**.
9 Press \([-\text{Array}\)] to change the layout of the characters.
   * For details, see page 157.

10 Press \([-\text{ arrow}\)] to adjust the position of the characters.

11 Press \([-\text{ CLOSE}\)] .

12 Press \([-\text{ EDIT END}\)] .
Sewing Combined Patterns

Combined patterns will be embroidered in the order that they were entered. In this example, the embroidery order will be as follows. For details, see “Sewing Embroidery Patterns” on page 132.

1. Press SEWING.

2. Embroider according to the color order on the right side of the screen.

3. Embroider.

→ When “WELCOME” is completed, the message “Finished sewing” appears. Press OK to return to the previous screen.

USING THE MEMORY FUNCTION

In the same way that embroidery patterns are saved and retrieved in chapter 5, you can save edited embroidery patterns to the machine’s memory and retrieve them later. In addition, these edited embroidery patterns can be saved to a computer, and embroidery patterns created and edited using other data design systems can be retrieved from the computer.

For details on saving and retrieving embroidery patterns, see “USING THE MEMORY FUNCTION” on page 140.

Retrieving Custom Stitches from the Computer .................. 173
DESIGNING A STITCH

By using the MY CUSTOM STITCH™ function, you can register stitches you have created yourself.

**Memo**
- Stitches that you create with MY CUSTOM STITCH™ can be a maximum of 7 mm (approx. 9/32 inch) wide and 37 mm (approx. 1-1/3 inches) long.
- Stitches can be designed more easily with MY CUSTOM STITCH™ if you first draw the stitch on the included grid sheet.

1. **Draw the stitch design on the grid sheet (part code SA507, X81277-050).**

   ![Grid Sheet](image)

   **Memo**
   - Simplify the design so that it can be sewn as a continuous line. For a more attractive stitch, close the design by intersecting lines.

   ![Simplified Design](image)

   If the design is to be repeated and linked, the start point and end point of the design should be at the same height.

2. **Decide the spacing of the stitch.**

   * By adjusting the spacing of a stitch, you can create various patterns with one stitch.

   ![Spacings](image)

3. **Place points where the pattern intersects with the grid, and connect all the points with a line.**

   ![Intersecting Points](image)

4. **Determine the x and y coordinates of each of the marked points.**

   ![Coordinates](image)

   **Memo**
   - This will determine the stitch design that will be sewn.

## Key Functions

1. This area displays the stitch being created.
2. Displays the number of the present set point over the total number of points in the stitch.
3. Displays the y-coordinate of \( P \) over the x-coordinate of \( Q \).

<table>

</table>
**1** Press \(\text{Characer Decorative Stitch} = \).

**2** Press \(\text{ } \).

**3** Use \(\uparrow \downarrow \leftarrow \rightarrow\) to move \(\) to the coordinates of the first point on the grid sheet.

→ Press \(\) to change the direction of the grid sheet.

**4** Press \(\text{ }\) to add the point indicated by \(\).

**5** Select whether one stitch or three stitches will be sewn between the first two points.

* To sew three stitches, press the key so that it appears as \(\).

**6** Use \(\uparrow \downarrow \leftarrow \rightarrow\) to move \(\) to the second point and press \(\text{ }\).

**7** Repeat the steps above for each point that you have drawn on the grid sheet until the stitch design is drawn on the screen as a continuous line.

* Press \(\text{Point Delete} = \) to delete a selected point entered.

---

**Memo**

You can also use the touch pen to enter data.
**ENTERING STITCH DATA**

8 Press **STITCH**.

- If necessary, adjust any settings, such as the stitch width and stitch length.
  - Press **RETURN** to return to the stitch selection screen.
  - Press **EDIT** to edit the custom stitch being created.

**Memo**

- If you have entered points that are too close together, the fabric may not feed properly. Edit the stitch data to leave a larger space between points.
- If the stitch design is to be repeated and linked, make sure that linking stitches are added so that the stitch designs will not overlap.

1 Moving a Point

- Press **or** **to move** **to the point that you want to move.**
  - To move **to the first point, press **.
  - To move **to the last point, press **.
  - You can also move **by using the touch pen.

2 Use **to move the point.**

**Linking stitches**

- If you have entered points that are too close together, the fabric may not feed properly. Edit the stitch data to leave a larger space between points.
- If the stitch design is to be repeated and linked, make sure that linking stitches are added so that the stitch designs will not overlap.
Moving Part or All of the Design

1. Press \( \uparrow \) or \( \downarrow \) to move \( \leftrightarrow \) to the first point of the section that you want to move.
   - To move \( \leftrightarrow \) to the first point, press \( \uparrow \).
   - To move \( \leftrightarrow \) to the last point, press \( \downarrow \).
   - You can also move \( \leftrightarrow \) by using the touch pen.

2. Press \( \text{MOVE} \).

3. Press \( \uparrow \) or \( \downarrow \) to move the section.

4. Press \( \text{SET} \).

\( \rightarrow \) The selected point and all points that were entered after it are selected.

\( \rightarrow \) The section will be moved.
■ Inserting New Points

1. Press ▲ or ▼ to move ● to a place on the design where you want to add a new point.
   * To move ● to the first point, press ▲ .
   * To move ● to the last point, press ▼ .
   * You can also move ● by using the touch pen.

2. Press INSERT .

→ A new point is entered and ● moves to it.

3. Use ← → ↑ ↓ to move the point.
USING STORED CUSTOM STITCHES

Saving Custom Stitches in the Machine’s Memory

Stitch patterns created using the MY CUSTOM STITCH™ function can be saved for later use. The machine’s memory can hold up to 16 custom stitches.

Note
- Do not turn off the machine while the "Saving" screen is displayed, otherwise you may lose the custom stitches that you are saving.

Memo
- It takes a few seconds to save a custom stitch in the machine’s memory.
- See page 173 for information on retrieving a saved stitch pattern.

1. Press \( \text{SAVE} \).

2. Press \( \text{SAVE} \).
   - Press \( \text{CLOSE} \) to return to the previous screen without saving the custom stitch.

\( \rightarrow \) The “Saving” screen appears. When the custom stitch is saved, the previous screen appears automatically.

If the Memory Is Full

If this screen appears while you are trying to save a custom stitch on the machine’s memory, the memory is too full to hold the currently selected custom stitch. To save the custom stitch in the machine’s memory, you have to delete a previously saved custom stitch.

1. Press \( \text{DELETE} \).
   - Press \( \text{CANCEL} \) to return to the previous screen without saving the custom stitch.

Note
Do not turn off the machine while the “Saving” screen is displayed, otherwise you may lose the custom stitches that you are saving.

Memo
It takes a few seconds to save a custom stitch in the machine’s memory.

See page 173 for information on retrieving a saved stitch pattern.
2 Select a custom stitch to be deleted.

* Press \( \text{Check} \) to display the custom stitch saved in that pocket. If the entire saved custom stitch cannot be displayed, press \( \text{Check} \) to view the entire custom stitch.

* Press \( \text{Close} \) if you do not want to delete the custom stitch.

3 Press \( \text{Delete} \).

\( \rightarrow \) A confirmation message appears.

4 Press \( \text{OK} \).

* If you decide not to delete the custom stitch, press \( \text{Cancel} \).

\( \rightarrow \) The old custom stitch is deleted, and the new custom stitch is automatically saved.

Saving Custom Stitches to the Computer

Using the included USB cable, connect the sewing machine to your computer so that custom stitches can be saved to your computer.

For details on saving custom stitches, see “Saving Stitch Patterns to the Computer” on page 105.
Retrieving Custom Stitches from the Machine’s Memory

1 Press [ ].

→ The pocket selection screen appears.

2 Select a custom stitch to be retrieved.

* Press [ ] so that the custom stitch saved in that pocket appears. If the entire saved custom stitch cannot be displayed, press [ ] to view the entire custom stitch.
* Press [ ] to return to the previous screen without saving the custom stitch.

3 Press [ ].

* Press [ ] to delete the custom stitch.

→ The selected custom stitch is retrieved and the sewing screen appears.

Retrieving Custom Stitches from the Computer

Using the included USB cable, connect the sewing machine to your computer so that custom stitches can be retrieved from your computer.

For details on retrieving custom stitches, see “Retrieving Stitch Patterns from the Computer” on page 107.

- Alarm ....................................................................................................................... 187
SPECIFICATIONS ...................................................................................................... 188
UPGRADING YOUR MACHINE’S SOFTWARE ......................................................... 189
Cleaning the LCD
If the surface of the LCD is dirty, lightly wipe it with a soft dry cloth. Do not use organic solvents or detergents.

Cleaning the Machine Casing
If the surface of the machine is dirty, dampen a cloth with a neutral detergent, wring it out firmly, and then wipe the surface. Then, wipe again with a dry cloth.

Cleaning the Race
If dust or dirt collects in the race or bobbin case, the machine will not run well, and the bobbin thread detection function may not operate. Keep the machine clean for best results.

1 Press the “Needle Position” button to raise the needle.
2 Lower the presser foot.
3 Turn off the machine.
4 Remove the needle and the presser foot holder (see page 33 through 35).
5 Remove the flat bed attachment or the embroidery unit if either is attached.
6 Grasp both sides of the needle plate cover, and then slide it toward you.
7 Grasp the bobbin case, and then pull it out.
8 Use the included cleaning brush or a vacuum cleaner to remove any lint and dust from the race and its surrounding area.

Note
Do not apply oil to the race.
9. Insert the bobbin case so that the projection on the bobbin case aligns with the spring.

10. Insert the tabs on the needle plate cover into the needle plate, and then slide the cover back into place.

Note

- Never use a bobbin case that is scratched; otherwise, the upper thread may become tangled, the needle may break, or sewing performance may suffer.
- For a new bobbin case (part code: XC3153-151 (green marking on the screw) (for sewing and embroidering with bobbin thread recommended by Brother) or XC8167-151 (pink marking on the screw) (for embroidering with bobbin threads from other manufacturers)), contact your nearest authorized dealer (see page 131).
- Be sure that the bobbin case is correctly installed. Otherwise, the needle may break.
ADJUSTING THE SCREEN

Screen Visibility Is Low
If the screen is difficult to read when the machine is turned on, follow the procedure described below.

1. Turn off the machine, hold your finger anywhere on the screen, and then turn the machine on.

   → The BRIGHTNESS OF LCD screen appears.

2. Press – or + to adjust the brightness of the screen.

   → The touch panel adjustment screen appears.

3. Turn the machine off, then on again.

Memo
Continue touching the LCD until the screen shown below appears.

Touch Panel Is Malfunctioning
If the screen does not respond correctly when a key is pressed (the machine does not perform the operation or performs a different operation), follow the procedure described below to make the proper adjustments.

1. Turn off the machine, hold your finger anywhere on the screen, and then turn the machine on.

   → The BRIGHTNESS OF LCD screen appears.

2. Press the “Presser Foot Lifter” button.

   → The touch panel adjustment screen appears.
3 Using the included touch pen, lightly touch the center of each ×, in order from 1 to 5.
* If the buzzer sounds one time after you press number 5, the operation is finished, and “SUCCESS” appears on the screen.
If the buzzer sounds twice, there was an error. In this case, repeat the steps above.

Note
Only use the included touch pen to touch the screen. Do not use a mechanical pencil, screwdriver or any other hard or sharp object. Do not apply a strong force to the display, otherwise damage to the display may result.

4 After making the necessary touch panel adjustment, turn the machine off, then on again.

Note
If you finish the touch panel adjustment and the screen still does not respond, or if you cannot complete the adjustment, contact your authorized dealer.
### Troubleshooting

If you have a minor problem with your sewing machine, check the following solutions. If the solutions suggested do not correct the problem, contact your authorized dealer.

**Memo**

This machine is equipped with a simple troubleshooting feature that can be used in case minor problems occur during sewing. Press \[ \text{TROUBLESHOOTING} \] and then press \[ \text{memo} \] to display a list of problems. Press the key for the appropriate problem, and then check for the causes that are displayed.

## TROUBLESHOOTING

### Needle breaks
1. **The needle is installed incorrectly.**
   - Reinstall the needle correctly.
   - Page: 34
2. **The needle clamp screw is not tightened.**
   - Tighten the needle clamp screw.
   - Page: 35
3. **The needle is bent or blunt.**
   - Replace the needle with a new one.
   - Page: 34
4. **The thread or needle is not suitable for the type of fabric being sewn.**
   - Check the table of fabric, thread and needle combinations, and select the appropriate combination.
   - Page: 36
5. **The wrong presser foot was used.**
   - Attach the correct presser foot.
   - Page: 191
6. **The upper thread tension is too strong.**
   - Adjust the thread tension.
   - Page: 43
7. **The fabric is pulled during sewing.**
   - Do not pull the fabric during sewing.
   - Page: –
8. **The spool is installed incorrectly.**
   - Reinstall the spool correctly.
   - Page: 29
9. **There are scratches around the hole in the needle plate.**
   - Replace the needle plate, or consult your authorized retailer.
   - Page: –
10. **There are scratches around the hole(s) in the presser foot.**
    - Replace the presser foot, or consult your authorized retailer.
    - Page: –
11. **There are scratches on the race.**
    - Replace the race, or consult your authorized retailer.
    - Page: –
12. **The needle is defective.**
    - Replace the needle.
    - Page: 34

### Fabric does not feed through the machine
1. **The feed dogs are lowered.**
   - Use the feed dog position switch to raise the feed dogs.
   - Page: 81
2. **The stitches are too close together.**
   - Lengthen the stitch length.
   - Page: 42
3. **The wrong presser foot was used.**
   - Attach the correct presser foot.
   - Page: 191
4. **The needle is bent or blunt.**
   - Replace the needle with a new one.
   - Page: 34
5. **The thread is tangled.**
   - Use scissors, etc., to cut the tangled thread and remove it from the race, etc.
   - Page: –

### Machine does not operate
1. **There is no pattern selected.**
   - Select a pattern.
   - Page: 48, 88, 114, 151
2. **The “Start/Stop” button was not pressed.**
   - Press the “Start/Stop” button.
   - Page: 38
3. **The main power switch is not turned on.**
   - Turn the main power to on.
   - Page: 16
4. **The presser foot is not lowered.**
   - Lower the presser foot.
   - Page: 38
5. **The “Start/Stop” button was pressed while the foot controller is connected.**
   - Remove the foot controller, or use the foot controller to operate the machine.
   - Page: 11, 39
6. **The foot controller was pressed to begin embroidering.**
   - Remove the foot controller and use the “Start/Stop” button to operate the machine.
   - Page: 11

### Embroidery unit does not operate
1. **There is no pattern selected.**
   - Select a pattern.
   - Page: 48, 88, 114, 151
2. **The main power switch is not turned on.**
   - Turn the main power to on.
   - Page: 16
3. **The embroidery unit is not attached correctly.**
   - Reattach the embroidery unit correctly.
   - Page: 112
4. **The embroidery frame was attached before the unit was initialized.**
   - Perform the initialization process correctly.
   - Page: 113

### LCD cannot be read
1. **The LCD contrast is not properly adjusted.**
   - Adjust the LCD contrast.
   - Page: 21, 178

---

### CAUTION

- This machine is equipped with a thread detection device. If the “Start/Stop” button is pushed before the upper threading is done, the machine will not operate properly. Also, depending on the pattern selected, the machine may feed the fabric even if the needle is raised. This is due to the needle bar release mechanism. At these times, the machine will make a sound different from that made during normal sewing. This is not the sign of a malfunction.
- If the power is disconnected during sewing:
  - Turn the main power to OFF and unplug the machine.
  - If you restart the machine, follow the instructions for operating the machine correctly.
ERROR MESSAGES

If the “Start/Stop button” or the “Reverse/Reinforcement Stitch” button is pressed before the machine is correctly set up or if an incorrect operation is performed, the machine stops and informs you of the error with an alarm and an error message. If an error message appears, correct the problem according to the instructions in the message.

(The message that is displayed can be cancelled either by pressing **CLOSE** or performing the operation correctly.)

- **A malfunction occurred.**
  - Turn the machine off, then on again.

- **Cannot embroider since the embroidery unit is not attached.**
  - Turn off the machine, and then attach the embroidery unit.

- **Attach the embroidery frame.**

- **Can not embroider.**
  - The embroidery unit is not attached.

- **Attach the embroidery frame.**

- **Can not recognize the data for the selected pattern.**
  - The data may be corrupted.

- **Before embroidering, make sure embroidery frame is moved as far back as possible and the frame-securing lever is locked down.**
  - Then, press "Start/Stop" button to embroider.

- **Select the embroidery frame.**

- **Cannot change the configuration of the characters.**

- **Change to a larger embroidery frame.**

- **Change to the extra large embroidery frame.**

- **This message is displayed when a malfunction occurred.**

- **This message is displayed when the "Start/Stop" button is pressed, but the embroidery unit is not attached.**

- **This message is displayed when there is a possibility that the data for the selected pattern is corrupted.**

- **This confirmation message appears after the machine is turned on and the carriage of the embroidery unit has moved to its initial position.**

- **This message is displayed when the pattern selected in embroidery mode is larger than the embroidering area of the small embroidery frame while the small embroidery frame is attached.**

- **This message is displayed when there are too many characters to be arranged in the curved character configuration.**

- **This message is displayed when the pattern selected in embroidery mode is larger than the embroidering area of the large embroidery frame while the small, medium or large embroidery frame is attached.**
ERROR MESSAGES

This message is displayed when the pattern selected in embroidery mode is larger than the embroidering area of the medium embroidery frame while the small or medium embroidery frame is attached.

This message is displayed when the "Start/Stop" button is pressed while a pattern is being edited in embroidery edit mode.

This message is displayed when the "Start/Stop" button and the "Reverse/Reinforcement Stitch" button is pressed while the buttonhole lever is raised.

This message is displayed when you try to combine more than 70 patterns.

Check and rethread the upper thread.

In twin needle mode, the needle threader lever cannot be used.

This message is displayed when you try to use the needle threader lever while twin needle sewing is set.

This message is displayed when you are editing too many patterns for the memory.

This message is displayed when you try to download information from PC to machine.

CAUTION

- Be sure to rethread the machine. If you press the "Start/Stop" button without rethreading the machine, the thread tension may be wrong or the needle may break and cause injury.

Be sure to rethread the machine. If you press the "Start/Stop" button without rethreading the machine, the thread tension may be wrong or the needle may break and cause injury.

Connected to PC. Do not disconnect the USB cable.

Lower the buttonhole lever.

Lower the presser foot lever.

No more patterns can be added to this combination.
**ERROR MESSAGES**

1. **No more than 12 patterns can be used. Reduce the number of patterns used.**

   This message is displayed when more than 12 patterns have been saved in "Removable Disk".

2. **Raise the buttonhole lever.**

   This message is displayed when a stitch other than a buttonhole stitch is selected and the “Start/Stop” button or the “Reverse/Reinforcement Stitch” button is pressed while the buttonhole lever is lowered.

3. **Not enough available memory to save the pattern. Delete another pattern?**

   This message is displayed when the memory is full and the stitch or pattern cannot be saved.

4. **Remove the embroidery frame.**

   This message is displayed when the embroidery unit tries to initialize in embroidery mode while an embroidery frame is attached.

5. **OK to automatically lower the presser foot?**

   This message is displayed when is pressed while the presser foot is raised.

6. **Retrieving the pattern. Wait a moment.**

   This message is displayed when a previously saved pattern is being retrieved in embroidery edit mode.

7. **OK to delete the selected pattern?**

   This message is displayed when is pressed after a pattern is selected.

8. **Deleting the selected pattern.**

   This message is displayed while upgrade file is being downloaded to machine.

9. **OK to save the current settings?**

   This message is displayed when is pressed while a utility stitch is selected.

10. **Select a pattern.**

    This message is displayed when the “Start/Stop” button, “Reverse/Reinforcement Stitch” button or is pressed while no pattern is selected.
This message is displayed when the bobbin thread is running out.

The pattern combination is too large for the extra large embroidery frame. If you plan to add more patterns, rotate the pattern combination.

This message is displayed when the combined character pattern in embroidery mode is too large for the embroidery frame. You can rotate the pattern 90 degrees to continue combining characters.

This message is displayed when you try to retrieve a pattern downloaded as one for a different machine.

The pattern is too large for the extra large embroidery frame.

This message is displayed when the combined character pattern in embroidery mode is too large for the embroidery frame.

The bobbin thread is almost empty.

This message is displayed when the bobbin is being wound, and the motor locks because the thread is tangled, etc.

The bobbin winder safety device has activated. Is the thread tangled?

This message is displayed when the embroidered unit will move. Keep your hands, etc. away from the carriage.

The carriage of the embroidery unit is initializing.

This message is displayed when the foot controller is pressed while the embroidery unit is attached.

The foot controller can not be used when the embroidery unit is attached. Remove the foot controller.

This message is displayed when there is no embroidery card in card unit. Insert an embroidery card.

This message is displayed when the needle is down. Press the needle position button to raise the needle.

The needle is down. Press the needle position button to raise the needle.

This message is displayed when the "Start/Stop" button is pressed while the foot controller is connected.

The "Start/Stop" button does not operate with the foot controller attached. Remove the foot controller.

This message is displayed when the "Start/Stop" button is pressed without an embroidery card inserted.

There is no embroidery card in card unit. Insert an embroidery card.

This message is displayed when the embroidery unit is initialized.

The pattern is too large for the embroidery frame.

This message is displayed when the embroidery unit is attached.

The embroidery unit is initializing.

This message is displayed when the "Start/Stop" button is pressed while the foot controller is connected.

The combined character pattern in embroidery mode is too large for the embroidery frame.
Alarm

If an incorrect operation is performed, the machine beeps two or four times.

Memo

To turn the alarm on or off, press . For details, see page 21.

</table>
You can use a computer to download software upgrades for your sewing machine.

**Note**
There are two upgrade files. Be sure to download both files successively.

**Memo**
- When the machine’s software is upgraded, saved combinations of character and decorative stitches are erased. However, saved embroidery patterns are not erased.
- While the software is being upgraded, the buzzer will not sound when a key is pressed.

1. **While holding the “Presser Foot Lifter” button pressed, turn on the machine.**
   → The following screen appears.

   ![Press LOAD after saving the upgrade file in the machine.](image)

2. **Plug the USB cable connectors into the corresponding USB ports on the computer and on the machine.**
   → The “Removable Disk” icon appears in “My Computer” on the computer.

3. **Copy the upgrade file to “Removable Disk”.**

   ![Copy the second upgrade file to “Removable Disk”](image)

4. **When the screen shown in step 1 appears again, press **LOAD**.**
   → The message “Saving the upgrade file. Do not turn main power to OFF.” appears. The download takes about 3 minutes.

5. **When the following screen appears, the first upgrade file is downloaded.**

   ![Press LOAD after saving the upgrade file in the machine.](image)

6. **Copy the second upgrade file to “Removable Disk”.**

7. **When the screen shown in step 1 appears again, press **LOAD**.**
   → The message “Saving the upgrade file. Do not turn main power to OFF.” appears. The download takes about 3 minutes.
When the following screen appears, upgrading is completed.

Press LOAD after saving the upgrade file in the machine.

Upgrade complete.

Note
If an error occurred, an error message appears in red. At this time, turn the machine off, and then start the procedure again from step 4.

Disconnect the USB cable, and turn the machine off, then on again.
**STITCH SETTING CHART**

*Note*  
When using the twin needle (see page 31), be sure to attach presser foot “J”.
