

**Assurance Statement related to
GHG Emissions Inventory 2014
prepared for Brother Industries, Ltd.**

Terms of Engagement

This Assurance Statement has been prepared for Brother Industries, Ltd.

Lloyd's Register Quality Assurance Ltd. (LRQA) was commissioned by Brother Industries, Ltd. (BIL) to assure its GHG Emissions Inventory for the fiscal year 2014 (1 April 2014 to 31 March 2015) (hereafter referred to as "the Report").

The Report relates to direct GHG emissions (Scope 1¹), energy indirect GHG emissions (Scope 2¹) and other indirect GHG emissions (Scope 3²).

Scope 1 and Scope 2 include GHG emissions associated with the operations and activities of BIL and Brother Group's manufacturing sites in Japan and overseas, while Scope 3 only includes those associated with Mie Brother Precision Industries, Ltd. and BIL's domestic activities.

Management Responsibility

BIL's management was responsible for preparing the Report and for maintaining effective internal controls over the data and information disclosed. LRQA's responsibility was to carry out an assurance engagement on the Report in accordance with our contract with BIL.

Ultimately, the Report has been approved by, and remains the responsibility of BIL.

LRQA's Approach

Our verification has been conducted in accordance with ISO 14064–3:2006 *Specification with guidance for validation and verification of greenhouse gas assertions* to provide limited assurance that GHG data as presented in the Report have been prepared in conformance with ISO 14064–1:2006 *Specification with guidance at the organizational level for quantification and reporting of greenhouse gas emissions and removals*.

To form our conclusions the assurance engagement was undertaken as a sampling exercise and covered the following activities:

- conducted site tours of the facilities and reviewed processes related to the control of GHG emissions data and records at Kariya and Hoshizaki factories in Japan;
- reviewed the management system documents for GHG emissions data, information and records, covering all the processes up to the preparation of the GHG Inventory;
- interviewed relevant staff of the organization responsible for managing GHG emissions data and records;
- assessed effectiveness of implementation of the GHG management system and the internal data verification; and
- verified historical GHG emissions data and records at an aggregated level for the fiscal year 2014.

Level of Assurance & Materiality

The opinion expressed in this Assurance Statement has been formed on the basis of a limited level of assurance and at a materiality of the professional judgment of the Verifier.

¹ Scope 1 and 2 emissions are as defined in The Greenhouse Gas Protocol – A Corporate Accounting and Reporting Standard.

² The categories of Scope 3 emissions are as defined in the Greenhouse Gas Protocol – Corporate Value Chain (Scope 3) Accounting and Reporting Standard, Table 5.3.

LRQA's Opinion

Based on LRQA's approach nothing has come to our attention that would cause us to believe that the total direct GHG emissions and energy indirect GHG emissions and other indirect GHG emissions disclosed in the Report as summarized in Table 1 below are not materially correct and that the Report has not been prepared in conformance with ISO 14064-1:2006.

LRQA's Recommendations

Whilst the Brother Group implements the plan to expand the scope and organizational boundary for GHG emissions, BIL should:

- review the choice of emission factors, applied to electricity consumption, to ensure that it is appropriate considering its impact on the total GHG emissions,
- maintain an up-to-date site-level information about emission sources and monitoring. This is particular to how each site applies the monitoring systems based on their GHG information management procedures,
- further reduce the amount of uncertainty in measuring devices to improve accuracy of GHG emissions. This is particularly relevant to overseas factories, and
- strengthen the roles and functions of internal data verification processes and staff support activities to assure the credibility of data received from overseas group companies.

Signed

Dated: 2 June 2015

Table 1. Summary of BIL, GHG Emissions Inventory 2014

Scope of GHG emissions	Tonnes CO ₂ e
Direct GHG emissions (Scope 1)	29,389
Energy indirect GHG emissions (Scope 2)	88,939
Other indirect GHG emissions (Scope 3) ³	204,719
Total GHG emissions	323,048

³ The Category 1 (Purchased goods and services) covers direct procurement related to the production of BIL's products.

This Assurance Statement is subject to the provisions of this legal section:

This Assurance Statement is only valid when published with the Report to which it refers. It may only be reproduced in its entirety.

Lloyd's Register Group Limited, its affiliates and subsidiaries, including Lloyd's Register Quality Assurance Ltd. (LRQA), and their respective officers, employees or agents are, individually and collectively, referred to in this Legal Section as 'Lloyd's Register'. Lloyd's Register assumes no responsibility and shall not be liable to any person for any loss, damage or expense caused by reliance on the information or advice in this document or howsoever provided, unless that person has signed a contract with the relevant Lloyd's Register entity for the provision of this information or advice and in that case any responsibility or liability is exclusively on the terms and conditions set out in that contract.

Due to inherent limitations in any internal control, it is possible that fraud, error, or non-compliance with laws and regulations may occur and not be detected. Further, the verification was not designed to detect all weakness or errors in internal controls so far as they relate to the requirements set out above as the verification has not been performed continuously throughout the period and the verification carried out on the relevant internal controls were on a test basis. Any projection of the evaluation of control to future periods is subject to the risk that the processes may become inadequate because of changes in conditions, or that the degree of compliance with them may deteriorate.

The English version of this Assurance Statement is the only valid version. Lloyd's Register assumes no responsibility for versions translated into other languages.

In the case of any conflict between the English and Japanese versions of this legal section, the English version shall prevail.
