

## List of ISO 14001-certified facilities

Manufacturing and sales facilities of the Brother Group listed in the table below have acquired ISO 14001 certification in accordance with the Brother Group Environmental Policy. Environmental conservation activities are undertaken based on the requirements of ISO 14001. As of April 1, 2020, the percentage of ISO 14001:2015-certified facilities accounted for 86% of the entire Brother Group. When a new business site is established, in principle, activities are implemented in compliance with ISO 14001 upon commencement of operations. ISO 14001 certification is immediately obtained and environmental conservation activities are undertaken at a high level.
