## ◆ Progress on the Medium-term Business Strategy “CS B2027”

# **Fiscal Year 2025 (ended March 31, 2026) Financial Results**

May 8, 2026

**Brother Industries, Ltd.**

**Akira Nakashima**

**Executive Officer, Responsible for Finance & Accounting Dept.**

Information on this report, other than historical facts, refers to future prospects and performance, and has been prepared by our Management on the basis of information available at the time of the announcement. This covers various risks, including, but not limited to, economic conditions, customer demand, foreign currency exchange rates, tax rules, regulation and other factors. As a result, actual future performance may differ from any forecasts contained on this report.

# Highlights

## Results for FY2025

**Sales revenue** **893.5 billion yen/ +5.3%** (YoY)

- Sales of hardware and consumables were steady, including the impact of price adjustments in the P&S business, and sales of machine tools were strong in the Machinery business. In addition to these results, there were positive FX effects, and sales revenue reached a new record high.

**Business segment profit** **83.6 billion yen/ +10.8%** (YoY)

- Despite an increase in sales promotion and SG&A expenses, business segment profit increased as a result of effects from higher sales revenues from machine tools in the Machinery business, as well as positive FX effects.
- The additional U.S. tariff burden was fully absorbed through price adjustments and control of expenses.

**Operating profit** **77.9 billion yen/ +15.0%** (YoY)

- Despite recording FX losses, operating profit increased due to the recording of temporary proceeds, such as a gain on transfer of the Karaoke Club business.

**Net income\*** **67.6 billion yen/ +23.5%** (YoY)

- Net income reached a new record high with addition of adjustments to tax effects in discontinued operations.

## Forecast for FY2026

**Sales revenue** **910.0 billion yen/ +1.9%** (YoY)

**Business segment profit** **85.0 billion yen/ +1.6%** (YoY)

- Although risks stemming from the situation in the Middle East, soaring parts and materials prices, and the impact of changes in U.S. tariff policies are anticipated, we will increase sales revenue and profits due to business expansion in the industrial area.
- We will steadily execute the growth investments outlined in our medium-term strategy, "CS B2027."

## Shareholder returns

- Annual dividend for FY2025 of 100 yen per share (planned)
- Annual dividend for FY2026 of 100 yen per share (planned)
- In addition, the Company will conduct share repurchases up to 20 billion yen

\* Net income attributable to owners of the parent company

As of the third quarter of FY2025, the N&C (Network & Contents) business has been classified as discontinued operations. The figures from sales revenue to income before tax are the amounts excluding discontinued operations, and the figure for net income attributable to owners of the parent company is the total amount of continuing operations and discontinued operations. Figures for the same period of the previous fiscal year have been reclassified on the same basis for comparison.

## Results for FY2025

# Consolidated Results for FY2025

**Sales revenue and profit increased mainly due to increased sales in the P&S and Machinery businesses. Despite recording FX losses, operating profit increased due to the recording of temporary proceeds, such as a gain on transfer of the Karaoke Club business.**

## ■ FX sensitivity

(Impact on annual results from a one-yen depreciation of the yen)  
(Billions of yen)

| FY25<br>results | Sales<br>revenue | Business<br>Segment<br>Profit |
|-----------------|------------------|-------------------------------|
| USD             | 1.6              | -0.3                          |
| EUR             | 1.1              | 0.8                           |

- Gains on sales of fixed assets (Q2) : +23
- Gain on transfer the Karaoke Club business : +46
- Impairment loss on some fixed assets related to Printing & Automation in the IP business (Q4) : -20
- Structural reform expense for the P&S business (Q4) : -27
- FX losses : -69

• Adjustments to tax effects related to a partial transfer of XING shares in FY26 : +41

As of the third quarter of FY25, the N&C (Network & Contents) business has been classified as discontinued operations. Regarding the actual results of FY25 shown in Column C (and the previous forecast shown in Column D), the figures from sales revenue to income before tax are the amounts excluding discontinued operations, and the figure for net income attributable to owners of the parent company is the total amount of continuing operations and discontinued operations. Figures in Column B for the same period of the previous fiscal year have been reclassified on the same basis.

\* "Other" includes elimination amounts from inter-segment transactions.

• Structural reform expense for the P&S business (Q4) : -27

• Impairment loss on some fixed assets related to Printing & Automation in the IP business (Q4): -20

(100 Millions of yen)

• Gains on sales of fixed assets (Q2): +23  
• Gain on transfer the Karaoke Club business : +46

• FX losses : -69

As the N&C (Network & Contents) business is a discontinued operation, it is excluded from the figures. Figures for results of the previous fiscal year have been reclassified on the same basis.

## Review of FY2025 by Business Segment (on a results basis excluding FX effects)

(Blue indicates positive change from the previous year; red indicates negative change.)

|           |                          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
|-----------|--------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| P&S       | Sales revenue            | <b>[Communications &amp; printing equipment]</b><br>Hardware : Revenue increased due to higher sales volumes in each regions compared to the previous year, which was affected by supply constraints, as well as the effect from price adjustments<br>Consumables : Revenue increased as sales were firm overall due to the effect from price adjustments and other factors<br><b>[Labeling]</b> Revenue increased as sales of both hardware and consumables were firm in all regions except Europe |
|           | Profit                   | Although business segment profit increased due to price adjustments and other factors, operating profit declined due to the recording of foreign exchange losses and other items                                                                                                                                                                                                                                                                                                                    |
| IP        | Sales revenue            | <b>[Domino]</b> Although demand for capital investment was soft, consumables sales were firm and revenue increased<br><b>[Printing &amp; automation]</b> Revenue decreased due to intensified competition and lower sales of both hardware and consumables.                                                                                                                                                                                                                                         |
|           | Profit                   | Business segment profit decreased due to the impact of reduced revenue from Printing & Automation, as well as increases in SG&A expenses and U.S. tariff costs among other factors<br>Operating profit posted a loss due to the recording of impairment losses in Printing & Automation and foreign exchange losses                                                                                                                                                                                 |
| Machinery | Sales revenue            | <b>[Machine tools]</b> Revenue increased as demand for capital investment in the automotive and general machinery markets expanded, mainly in China and Asia<br><b>[Industrial sewing machines]</b> Revenue decreased due to postponed of capital investment in the apparel market caused by U.S. tariffs                                                                                                                                                                                           |
|           | Profit                   | Profit increased significantly due to increased revenue from machine tools                                                                                                                                                                                                                                                                                                                                                                                                                          |
| Nissei    | Sales revenue/<br>Profit | With signs of a recovery in demand for capital investment in some markets, sales of both reducers and gears remained steady, resulting in increased revenue and profit                                                                                                                                                                                                                                                                                                                              |
| P&H       | Sales revenue            | Sales of low- and middle-end models remained steady across all regions, resulting in increased revenue                                                                                                                                                                                                                                                                                                                                                                                              |
|           | Profit                   | Profit decreased from the previous year, which benefited from effects from new high-end models                                                                                                                                                                                                                                                                                                                                                                                                      |

# FY2025

## Main Factors for Changes in Sales Revenue

Sales revenue increased due to steady sales of both hardware and consumables in the P&S business, including the impact of price adjustments, strong sales of machine tools in the Machinery business, and positive FX effects.

As the N&C (Network & Contents) business is a discontinued operation, it is excluded from the figures. Figures for results of the previous fiscal year have been reclassified on the same basis for comparison.

# FY2025

## Main Factors for Changes in Business Segment Profit

Despite an increase in sales promotion and SG&A expenses, business segment profit increased as a result of effects from higher sales revenues from machine tools in the Machinery business, as well as positive FX effects. The additional tariff burden was fully absorbed through price adjustments and control of expenses.

As the N&C (Network & Contents) business is a discontinued operation, it is excluded from the figures. Figures for results of the previous fiscal year have been reclassified on the same basis for comparison.

## Forecast for FY2026

# Changes in Disclosed Segments

As of the third quarter of FY2025, the N&C (Network & Contents) business has been classified as discontinued operations. From FY2026, results from MUTOH HOLDINGS will be included in the Printing & Automation segment of the IP business for disclosure purposes.

\*Sub-businesses within P&S, IP and Machinery businesses disclose sales revenue only.

# Forecast for FY2026

Although risks stemming from the situation in the Middle East, soaring parts and materials prices, and the impact of changes in U.S. tariff policies are anticipated, we will increase sales revenue and profits due to business expansion in the industrial area.

(100 Millions of Yen)

The effects of risks stemming from the situation in the Middle East, soaring parts and materials prices, and changes in U.S. tariff policies have been factored into the forecasts for FY2026 based on the following assumptions. We plan to continue closely monitoring the situation, assessing impacts, and will update the forecasts for the year as necessary.

|                                                                                           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |                                                                                      |

| <b>Impacts of the situation in the Middle East and soaring parts and materials prices</b> | <p>Assuming the situation in the Middle East will continue for about six months, and soaring parts and materials prices will continue whole year, the following factors are factored into the forecast.</p> <p><b>[Risk factors] -25 billion yen</b></p> <ul style="list-style-type: none"> <li>• Increased parts and materials costs, primarily for resin and memory</li> <li>• Increased logistics costs</li> <li>• Decreased sales in the Middle East</li> <li>• Decline in factory utilization due to difficulties in procuring parts and materials, and a decrease in sales volume due to subsequent product supply shortages</li> </ul> <p><b>[Countermeasures] +11 billion yen</b></p> <ul style="list-style-type: none"> <li>• Reduction of expenses, control of promotional expenses, cost cutting</li> </ul> | <p><b>Profit impact</b><br/>Approx.<br/><b>-14billion yen</b><br/>(YoY) expected</p> |
| <b>Impacts of U.S. tariff policy</b>                                                      | <ul style="list-style-type: none"> <li>• Assuming a flat <b>10%</b> additional tariff rate until late July and a flat <b>15%</b> rate thereafter until the end of the fiscal year, the additional tariff burden is expected to decrease compared to the previous year.</li> <li>• A certain extent of IEEPA tariff refunds is also factored in.</li> </ul>                                                                                                                                                                                                                                                                                                                                                                                                                                                             | <p><b>Profit impact</b><br/>Approx.<br/><b>+8billion yen</b><br/>(YoY) expected</p>  |
| <b>Comprehensive risks</b>                                                                | <ul style="list-style-type: none"> <li>• The outlook for profit and loss in the event that the above assumptions do not hold is factored in to a certain extent.</li> </ul>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |                                                                                      |

While negative impacts on profit, such as rising costs and declining sales, are anticipated due to the situation in the Middle East and soaring parts and materials prices, these effects will be minimized through the implementation of countermeasures and a review of additional U.S. tariffs.

# Forecast for FY2026 by Business Segment

While impact from the situation in the Middle East and soaring parts and materials prices is expected, particularly in the P&S business, we will pursue further growth for machine tools in the Machinery business and expand the IP business including MUTOH HOLDINGS.

# Shareholder Returns

An annual dividend for FY2025 of 100 yen per share and also an annual dividend for FY2026 of 100 yen per share are planned.

## CS B2027 Shareholder return policy

Basic  
policy

Implement stable and continuous shareholder returns

### Dividend

- Minimum annual dividend of **100 yen** per share.
- Target **dividend payout ratio of 40%**.

### Repurchase of our own shares

- Plan to **repurchase a total of 60 billion yen (3-year total)** of our own shares during the CS B2027 period.

### Additional shareholder returns

- **Consider additional shareholder returns depending on factors such as business performance.**  
(increase in dividend level and flexible repurchase of our own shares additionally.)

## Dividend

- Annual dividend for FY2025 of **100 yen** per share planned
- Annual dividend for FY2026 of **100 yen** per share planned

### Dividend per share (yen)

■ Interim ■ Year-end ■ Annual

Repurchase our own shares up to 20 billion yen from May 2026 in order to improve shareholder return, capital efficiency and to implement flexible capital policies.  
All treasury shares acquired from May 2025 onward will be cancelled.

| Treatment of shares after the share repurchase | Cancel the shares after the share repurchase in order to eliminate concerns over dilution       |

\*The treasury shares acquired from May 12, 2025 to April 30, 2026 (about 20 billion yen) are scheduled to be cancelled on June 1, 2026.

# Appendix

## **Results for FY2025 Q4 (Jan.-Mar., 2026)**

# Consolidated Results for FY2025 Q4

Sales revenue and profit both increased mainly due to higher sales of consumables in the P&S business and higher sales in the Machinery business. For operating profit, restructuring costs in the P&S business and an impairment loss on Printing & Automation in the IP business were recorded.

- Structural reform expense for the P&S business (Q4) : -27
- Impairment loss on some fixed assets related to Printing & Automation in the IP business (Q4) : -20

As of the current third quarter of FY25, the N&C (Network & Contents) business has been classified as discontinued operations. Regarding the actual results of the current quarter shown in Column C, the figures from sales revenue to income before tax are the amounts excluding discontinued operations, and the figure for net income attributable to owners of the parent company is the total amount of continuing operations and discontinued operations. Figures in Column B for the same period of the previous fiscal year have been reclassified on the same basis.

# Results for FY2025 Q4 by Business Segment

• Structural reform expense for the P&S business (Q4) : -27

(100 Millions of yen)

\* "Other" includes elimination amounts from inter-segment transactions.

• Impairment loss on some fixed assets related to Printing & Automation in the IP business (Q4) : -20

As the N&C (Network & Contents) business is a discontinued operation, it is excluded from the figures. Figures for the same period of the previous fiscal year have been reclassified on the same basis.

# FY2025 Q4

## Main Factors for Changes in Sales Revenue

Sales revenue increased due to higher sales, mainly in the P&S and Machinery businesses, and positive FX effects.

As the N&C (Network & Contents) business is a discontinued operation, it is excluded from the figures. Figures for the same period of the previous fiscal year have been reclassified on the same basis for comparison.

Although sales promotion expenses increased, business segment profit increased due to higher sales of consumables in the P&S business, the effects of higher sales revenue in the Machinery business, control of expenses, and positive FX effects. The increased in additional tariff burden was absorbed through price adjustments.

As the N&C (Network & Contents) business is a discontinued operation, it is excluded from the figures. Figures for the same period of the previous fiscal year have been reclassified on the same basis for comparison.

## Progress on the Medium-term Business Strategy

# CS B2027

May 8, 2026

**Brother Industries, Ltd.**

**Kazufumi Ikeda**

**Representative Director & President**

# CS B2027 outline and progress

# CS B2027

The Brother Group  
Medium-Term Business Strategy

# Creating our Future. Boldly.

**We will accelerate business portfolio transformation for the enhancement of our corporate value over the long term, improving profit-generating capabilities.**

- Aim to achieve an operating profit of 100 billion yen by clarifying the role of each business and executing strategies based on key indicators.
- We will steadily execute growth investments of approximately 200 billion yen over the next three years, driving growth in the industrial area.
- Strengthen the technological and talent foundations that support transformation.
- Enhance shareholder value by implementing management with a focus on cost of capital and share prices.

**Aiming to improve profit-generating capabilities by accelerating business portfolio transformation.**

**Clarification of the role of  
each business and  
investment policies**

**Solid execution of growth  
investments**

**Enhancement of the  
management foundation**

**Financial strategy to support  
growth and transformation**

Absorbed the impacts of U.S. tariff policies through countermeasures, resulting in steady business performance.

Business portfolio transformation is accelerating alongside concrete implementation.

\*1: TSR: Total Shareholder Return. An indicator that measures the overall return to investors (capital gains + dividends).

\*2: As of the third quarter of 2025, the N&C (Network & Contents) business has been classified as discontinued operations and has been excluded from the figures retroactively from the beginning of FY2025. Figures for FY2024 have been reclassified on the same basis.

The roles and key indicators of each business were clarified. In FY2025, the Industrial Equipment, P&S and P&H businesses performed steadily.

<sup>\*1</sup>: Operating profit of the P&S business, including Commercial & Industrial Labeling

<sup>\*2</sup>: As of the third quarter of 2025, classified as discontinued operations and excluded from the figures retroactively from the beginning of FY2025

# Business strategy progress

# Industrial Equipment | Key indicators and themes

In addition to significantly expanding the product lineup that meet automation and labor-saving needs, a focus of the previous medium-term business strategy, and enhancing the sales and service network, sales revenue grew substantially due to a recovery in demand for capital investment, particularly in China.

FY2025 progress

Strengthen value proposition to customers

- Reinforced sales and service facilities and human resources in key regions. In addition to China, India, and Japan, also expanded facilities in newly designated key regions such as Europe and Southeast Asia
- Launched multiple new products to meet process consolidation and automation needs and strengthened product lineup, thereby capturing existing customers' needs for upgrades and expansions while expanding the reach market to enable outreach to new customers

# Industrial Equipment | Strengthen value proposition to customers

Expansion of sales and service facility network serving as touchpoints with customers, including the newly designated key regions of Europe and Southeast Asia, is proceeding as planned, enhancing ability to make proposals quickly and respond promptly and thus expanding opportunities to secure business deals.

## Sales facility network in key regions

**Introduced new products to meet the diversifying needs of customers and eliminate barriers.**

## Major products launched in FY2025

### Increased tool-capacity model S700Xd2-100T/ U500Xd2-100T

S700Xd2-100T

The world's first\* 100-tool magazine for a compact machining center, capable of mounting 100 tools. It supports high-mix, small-lot production and meets process consolidation and automation needs.

\*First for a BT30 spindle compact machining center

### Horizontal 5-axis machining center HU550Xd1/ HU550Xd1-5AX

HU550Xd1

- A model featuring a large tilting rotary table on a horizontal machining center
- Maintaining the high productivity of a BT30 spindle while also handling large parts that require indexing to multiple machined surfaces, thereby contributing to process consolidation

# Industrial Printing | Key indicators and themes

Despite the challenging business environment facing Printing & Automation, strengthened the business foundation by expanding the product lineup and making MUTOH HOLDINGS a consolidated subsidiary. Promoting initiatives to position the entire IP business as a growth engine for the Brother Group.

\*DTF (Direct to Film): A garment printer that prints onto film and then transfers the image onto fabric

## Industrial Printing | Expand product and business areas

In Domino business, expanded customer base by launching products with lower initial setup costs. In Printing & Automation business, aiming for recovery by expanding lineup, including Brother's first DTF\* garment printer.

### Major products launched in FY2025

#### Large character inkjet printer for printing on boxes Cx150i

Cx150i

- A compact, high-resolution piezoelectric inkjet printer designed for both non-porous and porous boxes
- Enables sustainable and efficient packaging processes through reduced environmental impact, reduced waste, and enhanced connectivity

#### Digital label printer N410

N410

- The most compact digital LED inkjet label printer in the N Series with the lowest initial setup costs
- Combines high productivity and environmental performance with a robust support system to help enhance customer competitiveness

#### Industrial DTF\* printer DTRX100

DTRX100

- A roll-to-roll DTF printing solution realizing high-speed, stable production
- Combines in-house industrial print head technology with proprietary inks and advanced maintenance features to deliver high durability and productivity

\*DTF (Direct to Film): A garment printer that prints onto film and then transfers the image onto fabric

Continued initiatives aimed at future growth while maintaining solid revenue based on existing areas.

Initiative status of key themes

FY2025 progress

- Expand businesses with continuous ties to customers
- Expand the Commercial & Industrial Labeling business
- Strengthen profitability in existing areas

- Launched a service platform to maintain continuous ties to customers in Europe and the U.S. and strengthened customer touchpoints to increase LTV\*2
- Promoted solution proposals tailored to key applications and drove application development to expand future sales
- Introduced more competitive new products for the inkjet and color laser printer markets, where there is room for our growth

\*1: Based on the exchange rate used in CS B2027, FY2024 revenue was 518.8 billion yen and operating profit was 50.8 billion yen (Reference values with exchange rate conversion are estimates based on the sensitivity of exchange rates to the JPY based on the sales revenue / cost of sales / SG&A denominated in foreign currencies)

\*2: LTV: Customer lifetime value, which is the value to customers and profits generated for companies over the entire usage period of products and services.

For businesses with continuous ties to customers, launched service with continuous ties to customers for B2C in Europe and the U.S. to increase LTV\*. In existing areas, launched new products in the key areas of inkjet and color laser printer markets, aiming for further growth.

## Launched service with continuous ties to customers for B2C

A system with continuous ties to customers that delivers optimal value based on usage patterns

**connect.**

- Increase in genuine consumable ratio
- Enhancement of understanding about customers

**brother**

- Extended warranties for the product itself and discounts on the official online store
- Improved convenience through the app

\* LTV: Customer lifetime value, which is the value to customers and profits generated for companies over the entire usage period of products and services.

## Updated product lineup of inkjet and color laser printers

MFC-J7610CDW

DCP-J929N-W

DCP-T430W

MFC-L8970CDW

### A3 business inkjet printers

- Achieves both high-speed printing and high durability thanks to Brother's proprietary MAXIDRIVE inkjet printing technology
- Contributes to reducing costs through the use of high-capacity cartridges
- Reduces environmental impact by lowering power consumption

### A4 inkjet printers

- Updates the cartridge model for developed countries and the bottle model for emerging markets
- Achieves a more compact body size than before while maintaining the same cartridge and bottle capacities

### Color laser printers

- This is designed for long-term use with a highly durable body and high-capacity toner
- Reduces environmental impact by lowering CO<sub>2</sub> emissions over the product's lifecycle
- Flexible installation options thanks to a compact design

# Strategic investment progress

**Implemented M&A to enhance profitability and drive business growth while deciding to divest\* the karaoke business. Continuing to accelerate business portfolio transformation, including through M&A.**

# Inkjet Technology | Expand MAXIDRIVE into industrial products

Launch the first industrial garment printer to feature Brother's proprietary MAXIDRIVE printhead technology.  
Continue to accelerate the expansion of diverse applications with proprietary technology at the core.

## Features of MAXIDRIVE

### MAXIDRIVE

A proprietary three-layer piezoelectric discharge technology designed to meet demanding industrial printing needs

- A three-layer piezoelectric drive achieves large alternating vertical motion, enabling powerful ink discharge.
- Alternating up-and-down drive reduces expansion and contraction fatigue, delivering the durability required for industrial printing.

**Typical System**  
Deforms only downward

**MAXIDRIVE**  
Large alternating vertical deformation

## Major products announced in FY2025 using MAXIDRIVE

Launched Brother's first products to feature MAXIDRIVE in industrial products

### P&S: Consumer business printers

A3 business inkjet printers

**NEW**

### Industrial Printing: Industrial garment printers

Industrial DTF\*1 printer/DTG\*2 printer

DTRX100

New DTG printer

Accelerating expansion to meet diverse needs by integrating and refining printheads, ink, and manufacturing capabilities, with inkjet technology at the core

\*1: DTF (Direct to Film): A garment printer that prints onto film and then transfers the image onto fabric

\*2: DTG (Direct to Garment): A garment printer that prints by applying ink directly to the fabric

Promote the organizational use of AI in business processes while advancing AI utilization to enhance value provided to customers.

AI utilization strategy

Maximize value provided to customers by leveraging AI to enhance and accelerate BVCM\*

\*Brother Value Chain Management (BVCM): Brother's unique management system that considers customer demands and expectations to be top priority as our guide for all of our business operations, and is designed to quickly provide them with exceptional value

Examples of organizational AI utilization in business

Customer value creation with AI via Artspira creative support app

P&H

- Implemented an image generation feature utilizing AI technology in Artspira

[Input example]

[Output example]

Development of a knowledge base utilizing AI

Commercial & Industrial Labeling

- Built a foundation for accumulating insights and providing better value propositions to customers

# Materiality and sustainability target progress

Activities such as improving the energy efficiency of products and actively introducing electricity generated from renewable energy sources at offices are progressing.

Sustainability targets (environment)

Currently implementing reduction activities as planned to achieve CS B2027 targets

|                        | Reducing CO <sub>2</sub> emissions                        |                                                                                    | Promoting sustainable use of resources                                                                 |
|------------------------|-----------------------------------------------------------|------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------|
|                        | Scope 1, 2                                                | Scope 3                                                                            |                                                                                                        |
| CS B2027 target values | <b>56%</b><br>reduction<br>(compared to the FY2015 level) | Per unit of sales*1<br><b>25.2%</b><br>reduction<br>(compared to the FY2022 level) | New resource volume per unit of sales*1<br><b>16.9%</b><br>reduction<br>(compared to the FY2022 level) |

\*1: CO<sub>2</sub> emissions/Reduction of virgin material usage per unit of sales: An indicator showing CO<sub>2</sub> emissions or virgin material usage relative to sales revenue.  
Formula: CO<sub>2</sub> emissions or virgin material usage per unit of sales = CO<sub>2</sub> emissions or virgin material usage / Sales revenue

Major topics

SPEEDIO S Series of machine tools won the Grand Prize at the Minister of the Environment Awards for Climate Action for the first time

Winning products (from left: S300Xd2, S500Xd2, S700Xd2)

[Reason for winning]

- Achieves significantly higher productivity and energy efficiency through the expansion of new features
- Contributes significantly to technological development that supports the decarbonization of the entire industry

Expanded use of renewable energy at Philippines factory

Brother Industries (Philippines)

- Expanded the proportion of electricity generated from renewable energy sources in total electricity consumption by installing solar power systems on rooftops, among other measures

Planning to transition to a Company with an Audit and Supervisory Committee, subject to approval at the 134th Ordinary General Meeting of Shareholders to be held in June 2026.

Current structure (Company with an Audit & Supervisory Board)

Post-transition structure (Company with an Audit and Supervisory Committee)

- [Purpose]
- Strengthen the Board of Directors' oversight function by granting voting rights to Audit and Supervisory Committee members
  - Promote swift decision-making and enhance corporate value through the appropriate delegation of authority to executive departments

# Financial strategy progress

# Capital cost and share price (current situation and awareness of issues)

**PBR hovered around 1x; while the stock price has performed steadily, it has underperformed the TOPIX. We will continue efforts to further enhance profitability through the transformation of our business portfolio.**
