brother.

Setting Up the Machine

Windows NT[®] 4.0 Parallel

Windows[®] Network

Macintosh[®] USB

Installing the Driver & Software

Before you can use the MFC, you must set up the hardware and install the driver. To help you get started in setting up the machine and installing the driver and software, please read this "Setup Guide" and follow the simple instructions.

Step 2

Installing the Driver & Software

Setup is Complete!

For the latest drivers and to find the best solution for your problem or question, access the Brother Solutions Center directly from the driver or go to http://solutions.brother.com Keep this "Quick Setup Guide", User's Guide and supplied CD-ROM in a convenient place for quick and easy reference at all times.

Getting Started

Carton components may differ from one country to another. Save all packing materials and the carton.

The interface cable is not a standard accessory. Please purchase the appropriate interface cable for the interface you intend to use (Parallel or USB).

- For Parallel use a bi-directional shield interface cable that is IEEE 1284-compliant, and not longer than 6 feet (2 meters).
- For USB use a Hi-Speed USB 2.0 interface cable that is not longer than 6 feet (2 meters).
- Please make sure that you use a Hi-Speed USB 2.0 certified cable if your computer uses a Hi-Speed USB 2.0 interface.
- Even if your computer has a USB 1.1 interface, you can connect the MFC.

Control Panel

MFC-8420 and MFC-8820D have similar control panel keys.

1. One Touch keys	5. Print keys	9. Copy keys (Temporary Settings)
2. Shift	6. Status LED (Light-Emitting Diode)	10. Dial Pad
3. Fax and telephone keys	7. 5-Line Liquid Crystal Display (LCD)	11. Stop/Exit
4. Mode keys	8. Navigation keys	12. Start

For the details of the control panel, see "Control panel overview" in Chapter 1 of the User's Guide.

A Warning

When you move the MFC, grasp the side handholds that are under the scanner. Do NOT carry the MFC by holding it at the bottom.

Step 1 Setting Up the Machine

Setting Up the Machine

Windows[®] USB

>

Windows NT[®] 4.0 Parallel

Windows[®] Network

sh[®] Macintosh[®] ork USB

Macintosh[®] Network

For Administrators

3 Rock it from side to side several times to distribute the toner evenly inside the assembly.

4 Push the drum unit assembly into the machine (until it snaps into place).

3 Load Paper in the Paper Tray

Pull the paper tray completely out of the machine.

2 While pressing the paper guide release lever, slide the adjusters to fit the paper size. Check that the guides are firmly in the slots on the tray.

For Legal size paper, press the universal guide release button and pull out the rear of the paper tray.

Setting Up the Machine

- 3 Fan

Step 1

3 Fan the stack of paper well to avoid paper jams and misfeeds.

4 Put paper in the paper tray. Check that the paper is flat in the tray and below the maximum paper mark.

5 Put the paper tray firmly back in the machine and unfold the support flap before you use the machine.

For details on supported paper specifications, see "Paper" in Chapter 2 (User's Guide).

4 Release the Scanner Lock

Push the lever up to unlock the scanner. (The gray scanner lock lever is located at the back left under side of the document cover.)

Scanner Lock Lever

Setting Up the Machine

Macintosh[®] Network

For Administrators

Install Power Cord and Phone Line

 \bigcirc

5

Do not connect the Parallel or USB cable yet.

1 Make sure that the power switch is off. Connect the AC power cord to the machine.

- If Check Scan Lock appears on the LCD, immediately release the scanner lock and press **Stop/Exit**.
- Connect one end of the telephone line cord to the socket on the MFC marked **LINE** and the other end to a modular wall socket.

À Warning

- The MFC must be fitted with an earthed plug.
- Since the MFC is grounded through the power outlet, you can protect yourself from potentially hazardous electrical conditions on the telephone network by keeping the power to your MFC on when you connect it to a telephone line. Similarly, you can protect yourself when you want to move your MFC by disconnecting the telephone line first and then the power cord.

If you are sharing one phone line with an external telephone, connect it as shown below.

(Example for the U.K.)

If you are sharing one phone line with an external telephone answering device, connect it as shown below.

Please set the receive mode to External TAD. For more details, see "Connecting the MFC" in Chapter 1 of the User's Guide.

(Example for the U.K.) Step 1

Setting Up the Machine

MFC-8420 and MFC-8820D have similar control panel keys.

6 Selecting a Receive Mode

Choose the **Receive** mode which best suits your needs.

2 Press 🕡 key.

- Press or to select the mode.
- 5 Press the Set key.
- 6 Press the Stop/Exit key.

For more details, see "Setup Receive" in Chapter 5 of the User's Guide.

	The software you are installing for this hardware:
•	Printers
	has not passed Windows Logo testing to verify its compatibility with Windows XP. (<u>Tell me why this testing is important</u> .)
	Continuing your installation of this software may impair or destabilize the correct operation of your system either immediately or in the future. Microsoft stongly recommends that you stop this installation now and contact the hardware vendor for software the hardware passed Windows Loop testing.

There will be two Brother printer drivers listed in the Printers selection. The driver with "Printer" after the model name (ex. Brother MFC-8820D Printer) is the Brother Native Driver.

The Brother Native Drivers have been installed and the installation is now complete.

For Parallel Interface Cable Users (For Windows[®] 95/98/98SE/Me/2000 Professional/XP)

Make sure that you have completed the instructions from Step 1 "Setting Up the Machine" on pages 2 - 8.

 Switch off and unplug the MFC from the AC outlet and disconnect it from your computer, if you already connected an interface cable.

2 Turn on your computer. (For Windows[®] 2000 Professional/XP, you must be logged on as the administrator.)

Insert the supplied CD-ROM for Windows[®] into your CD-ROM drive. If the model name screen appears, select your machine. If the language screen appears, select your language.

The CD-ROM main menu will appear. Click Install Software.

If this window does not appear, use Windows[®] Explore to run the **setup.exe** program from the root directory of the Brother CD-ROM. 5 Click **MFL-Pro Suite** in Main Application.

brother	Install Software
	To install a software application click on the bar for that application.

	< Back Finish Cancel

After the computer restarts, click Yes to have the Control Center load each time Windows[®] is started. The Control Center will appear as an icon in the task tray. If you click No the Scan keys on the MFC will be disabled.

<u>×</u>
Would you like the Brother MFL Pro Control Center automatically loaded when you reboot your system?
If you select No, the 'Scan to File' and 'Scan to Email' buttons will be disabled.
Yes No

Even if you select **No**, you will be able to launch the Brother Control Center later to use the **Scan** key by double clicking the Smart UI icon on the desktop. This loads the Brother Control Center to the task tray. See AutoLoad the Brother Control Center, Chapter 14 in the Documentation (User's Guide) located on the CD-ROM.

The Brother PC-FAX, Printer and Scanner drivers have been installed and the installation is now complete.

For Administrators

Installing the Driver & Software

For Network Interface Cable Users (For Windows[®] 95/98/98SE/Me/NT/2000 Professional/XP)

Make sure that you have completed the instructions from Step 1 "Setting Up the Machine" on pages 2 - 8.

- 1 Make sure that the NC-9100h (Network Print/Fax Server) is installed into the MFC. (See Optional accessories in Chapter 23 of the User's Guide.)
- Connect the network cable to the MFC, and then connect it to a free port on your hub. Turn on the MFC by plugging in the power cord. Turn the power switch on.

- 3 Turn on your computer. (For Windows[®] 2000 Professional/XP/ Windows NT 4.0, you must be logged on as the administrator.)
- 4 Insert the supplied CD-ROM for Windows[®] into your CD-ROM drive. If the model neme screen appears, select your machine. If the language screen appears, select your language.

5 The CD-ROM main menu will appear. Click Install Software.

If this window does not appear, use Windows[®] Explorer to run the **setup.exe** program from the root directory of the Brother CD-ROM.

MFL-Pro Suite includes Printer Driver, Scanner Driver, ScanSoft[®] PaperPort[®], ScanSoft[®] TextBridge[®], PC-FAX software, and True Type fonts. PaperPort[®] is a document management application for viewing scanned documents. ScanSoft[®] TextBridge[®], which is integrated into PaperPort[®], is an OCR application that converts an image into text and inserts it into your default word processor.

If you see the following screen, click **OK** to install the Windows[®] updates. After the updates are installed your PC may restart. Note: If it does the installation will automatically continue.

INST32	×
⚠	Some Windows updates need to be installed before the MFL-Pro Suite installation. To install the updates dick OK.
	If prompted, dick OK to complete installation.
	Note: The PC may restart. If it does the installation will continue automatically.
	(OK

If the installation does not continue automatically, please open the installer menu again by double-clicking the **setup.exe** program from the root directory of the Brother CD-ROM, and continue from Step **4**. 8 When the PaperPort[®] 8.0 SE Setup window is displayed, click **Next**.

After reading and accepting the ScanSoft[®] License Agreement, enter your user information and click Next.
