Quick Setup Guide Start Here

Before you can use the machine, read this Quick Setup Guide for the correct setup and installation.

Warnings tell you what to do to prevent possible personal injury.

Important

DO NOT connect the USB cable yet (if you are using a USB cable).

Unpack the machine and check the components

WARNING

b

Plastic bags are used in the packaging of your machine. To avoid danger of suffocation, please keep these bags away from babies and children.

Make sure you have all components.

🖉 Note

- The components included in the box may differ depending on your country.
- Save all packing materials and the box in case for any reason you must ship your machine.
- For a network connection you will need to purchase a network interface cable. Please use the supplied USB cable for a USB connection.
- To ensure safe operation the supplied plug must be inserted only into a standard power outlet that is properly grounded through the standard electrical wiring. Non grounded equipment may cause an electrical shock hazard, and may cause excessive electrical noise radiation.

USB cable

Please make sure you use a USB 2.0 cable (Type A/B) that is no more than 2 metres long.

Network cable

Use a straight-through Category5 (or greater) twisted-pair cable for 10BASE-T or 100BASE-TX Fast Ethernet Network.

Load plain A4 paper

Pull paper tray#1 (the upper tray) 1
 completely out of the machine.

Open the paper tray cover 1.

With both hands, gently press and slide the paper side guides 1 and then the paper length guide 2 to fit the paper size.

Make sure that the triangular marks (3) on the paper side guides (1) and paper length guide (2) line up with the mark for the paper size you are using.

- **C** Fan the stack of paper well to avoid paper jams and misfeeds.
- Gently put the paper into paper tray#1 print side down and top edge first. Check that the paper is flat in the tray.

Important

Do not push the paper in too far.

- **f** Gently adjust the paper side guides to the paper with both hands. Make sure that the paper side guides touch the edges of the paper.
- S Close the paper tray cover. Check that the paper is flat in the tray and below the maximum paper mark 1.

h *Slowly* push the paper tray completely into the machine.

While holding the paper tray in place, pull out the paper support **1** until it clicks, and then unfold the paper support flap **2**.

🖉 Note

For information about tray#2, see Loading paper in paper tray #2 in Chapter 2 of the User's Guide.

Connect the power cord

Important

DO NOT connect the USB cable yet (if you are using a USB cable).

Connect the power cord.

WARNING

The machine must be fitted with an earthed plug.

🖉 Note

The control panel warning LED will stay on until you have installed the ink cartridges.

Choose your language

a

After connecting the power cord, the LCD shows:

Select Language		
English		
Français		
Deutsch		

Press \blacktriangle or \triangledown to display your language and press your language.

Q

b

Q

The languages available may differ depending on your country.

Press Yes or No.

English	
Yes	No

If you set the wrong language, you can change the language after setting the date and time. (For details, see Changing LCD language in Chapter 3 of the User's Guide.)

Install the ink cartridges

WARNING

If ink gets in your eyes, wash them out with water at once, and if irritation occurs consult a doctor.

a Make sure that the power is turned on. The LCD shows:

b

Open the ink cartridge cover 1.

С Remove the green protective part 1.

Do not throw away the green protective part. You will need it if you transport the machine.

- d Unpack the ink cartridge.
- e Turn the green knob on the protective yellow cap clockwise until it clicks to release the vacuum seal, then remove the cap 1.

Take care to match the colour of the lever (1) with the cartridge colour **2**, as shown in the diagram below.

f

q

Gently push the ink cartridge until it clicks. After all the ink cartridges are installed close the ink cartridge cover.

Important

After initial installation of the ink cartridges, the machine will start cleaning the ink tube system. This cleaning process will last approximately four minutes.

DO NOT unplug the machine from the power outlet or attempt to stop the cleaning process. Interruption of cleaning process may cause undesired print quality problems.

Important

- DO NOT take out ink cartridges if you do not need to replace them. If you do so, it may reduce the ink quantity and the machine will not know the quantity of ink left in the cartridge.
- DO NOT shake the ink cartridges. If ink stains your skin or clothing, wash with soap or detergent at once.
- DO NOT repeatedly insert and remove the cartridges. If you do so, ink may seep out of the cartridge.
- If you mix the colours by installing an ink cartridge in the wrong position, clean the print head several times after correcting the cartridge installation. (See *Cleaning the print head in Appendixes B of the User's Guide.*)
- Once you open an ink cartridge, install it in the machine and use it up within six months of installation. Use unopened ink cartridges by the expiration date written on the cartridge package.
- DO NOT dismantle or tamper with the ink cartridge, this can cause the ink to leak out of the cartridge.
- · Brother multifunction machines are designed to work with ink of a particular specification and will work to a level of optimum performance when used with genuine Brother branded ink cartridges. Brother cannot guarantee this optimum performance if ink or ink cartridges of other specifications are used. Brother does not therefore recommend the use of cartridges other than genuine Brother branded cartridges with this machine or the refilling of empty cartridges with ink from other sources. If damage is caused to the print head or other parts of this machine as a result of using incompatible products with this machine, any repairs required as a result may not be covered by the warranty.

Check the print quality

Important

Make sure you put paper in the upper tray for the initial setup.

When the preparation process has finished, the LCD shows this message

Set Paper and Press Start

Press Colour Start.

Check the quality of the four colour blocks () on the sheet. (black/yellow/cyan/magenta)

	Print Qua	ality Check		
	eming the four colour blocks ar on the control panel to start the			nel.
r gaps are visible select (ivo	on the control panel to start the	e creating process and follow in	ie prompis on the LCD.	
				F
				1

C If all lines are clear and visible, press Yes to finish the quality check.

<black></black>
OK

<Colour> OK

If you can see missing short lines, press ${\tt No}$ and go to ${\bm d}.$

<Black>

<Colour> Poor

Poor

C The LCD asks you if the print quality is OK for black and colour. Press Yes or No.

Black OK?	
No.	
Yes	No

After pressing ${\tt Yes}$ or ${\tt No}$ for both black and colour, the LCD shows:

Start Cleaning?	×
Press Start	

Press **Colour Start**, the machine will then start cleaning the colours.

e

f

After cleaning is finished, press **Colour Start**. The machine starts printing the Print Quality Check Sheet again. Go back to **b**.

If you are having difficulty reading the LCD, try changing the contrast setting.

b	Press ▲ or ▼ to display General Setup. Press General Setup.
С	Press LCD Settings.
d	Press LCD Contrast.
e	Press Light, Med or Dark.
f	Press Stop/Exit.
	Note
	a can also adjust the angle of the display by ng it.

a

Press MENU.

Set the date and time

Setting the date and time allows the machine to clean the print head regularly and maintain optimum print quality. It also allows the machine to name files created when using the Scan to Media feature.

- a Press MENU.
- b **Press** ▲ or ▼ to display Initial Setup. Press Initial Setup.
- С **Press** Date&Time.
- d Enter the last two digits of the year on the Touchscreen, and then press OK.

(e.g. Enter **0** 8 for 2008.)

- e Repeat for Month and Day, and Hours and Minutes in 24-hour format.
- f Press Stop/Exit.

Choose your connection type

Windows[®]

Important

- DO NOT connect the machine to a USB port on a keyboard or a non-powered USB hub.
- Connect the machine directly to your computer.
- Lift the scanner cover into the open position.

Connect the USB cable to the USB socket marked with a e symbol. You will find the USB socket inside the machine on the right as shown below.

Carefully guide the USB cable through the trench as shown below, following the trench around and toward the back of the machine. Then connect the cable to your computer.

Important

Make sure that the cable does not restrict the cover from closing, or an error may occur.

- d
- Gently close the scanner cover using the finger holds on both sides of it.

WARNING

Be careful not to trap your fingers under the scanner cover.

Always use the finger holds provided on both sides of the scanner cover when opening and closing it.

Connect the power cord

Connect the power cord.
 The installation will continue automatically.

The installation screens appear one after another.

Important

DO NOT cancel any of the screens during the installation. It may take a few seconds for all screens to appear.

When the **On-Line Registration** screen is displayed, make your selection and follow the on-screen instructions.

14

Finish and restart

Click Finish to restart your computer. After restarting the computer, you must be logged on with Administrator rights.

🖉 Note

If an error message appears during the software installation, run the **Installation Diagnostics** located in **Start/All Programs/Brother**/ **DCP-XXXX** (where DCP-XXXX is your model name).

The installation is now complete.

Now go to

Proceed to Install Optional Applications on page 39.

USB

For USB Interface Users (For Mac OS[®] X 10.2.4 or greater)

Before you install

USB

Make sure your machine is connected to the power and your Macintosh[®] is ON. You must be logged on with Administrator rights.

Important

- For Mac OS[®] X 10.2.0 to 10.2.3 users, upgrade to Mac OS[®] X 10.2.4 or greater. (For the latest information for Mac OS[®] X, visit <u>http://solutions.brother.com/</u>)
- Make sure there are no memory cards or a USB Flash memory drive inserted.

Connect the USB cable

Important

- DO NOT connect the machine to a USB port on a keyboard or a non-powered USB hub.
- Connect the machine directly to your Macintosh[®].
- **a** Lift the scanner cover into the open position.

Connect the USB cable to the USB socket marked with a symbol. You will find the USB socket inside the machine on the right as shown below.

Carefully guide the USB cable through the trench as shown below, following the trench around and toward the back of the machine. Then connect the cable to your Macintosh[®].

Important

Make sure that the cable does not restrict the cover from closing, or an error may occur.

Macintosh[®]

Gently close the scanner cover using the finger holds on both sides of it.

WARNING

Be careful not to trap your fingers under the scanner cover.

Always use the finger holds provided on both sides of the scanner cover when opening and closing it.

Put the supplied CD-ROM into your CD-ROM drive.

Double-click the Start Here OSX icon to install.

Macintosh[®]

Macintosh[®]

13 Install Presto![®] PageManager[®]

When Presto![®] PageManager[®] is installed OCR capability is added to Brother ControlCenter2. You can easily scan, share and organize photos and documents using Presto![®] PageManager[®].

Double-click the Presto! PageManager icon and follow the on-screen instructions.

For Mac $OS^{\textcircled{B}} X$ 10.2.4 to 10.3.8 users, when this screen appears, click **Go** to download the software from the Brother Solutions Center website.

Install MFL-Pro Suite on additional computers (If needed)

If you want to use your machine with multiple computers on the network, install MFL-Pro Suite on each computer. Go to step **12** on page 23. Also see step **10-a** on page 22 before you install.

The installation is now complete.

For Wireless Network Interface Users

First you must configure the wireless network settings of your machine to communicate with your network access point (router). After the machine is configured to communicate with your access point (router) computers on your network will have access to the machine. To use the machine from these computers, you will need to install the drivers and software. The following steps will guide you through the configuration and installation process.

To achieve optimum results with normal everyday document printing, place the Brother machine as close to the network access point (router) as possible with minimal obstructions. Large objects and walls between the two devices as well as interference from other electronic devices can affect the data transfer speed of your documents.

Although the Brother DCP-6690CW can be used in a both wired and wireless network, only one of the connection methods can be used at a time.

Important

If you have previously configured the wireless settings of the machine you must reset the network (LAN) settings before you can configure the wireless settings again. On your machine, press MENU. Press ▲ or ▼ to display Network and press Network. Press ▲ or ▼ to display Factory Reset, and then press Factory Reset. Press Yes to accept. Hold down Yes for 2 seconds to confirm.

🖉 Note

The following instructions are for infrastructure mode.

To set up your machine in any other wireless environment you can find instructions in the Network User's Guide on the CD-ROM.

You can view the Network User's Guide by following the instructions below.

1 Turn on your computer/Macintosh[®]. Insert the Brother CD-ROM into your CD-ROM drive.

- For Windows[®]:
- 2 Choose your model and the language. The CD-ROM main menu will appear.
- 3 Click Documentation, and then click HTML documents.
- For Macintosh[®]:
- 2 Double-click Documentation, and then double-click your language folder.
- 3 Double-click top.html.

Infrastructure Mode

- 1 Access Point (router)
- 2 Wireless Network machine (your machine)
- 3 Wireless capable computer connected to the access point
- Wired computer connected to the access point

Confirm your network environment (Infrastructure Mode)

The following instructions will offer two methods for installing your Brother machine in a wireless network environment. Both methods are for infrastructure mode, using a wireless router or access point that uses DHCP to assign IP addresses. Choose a configuration method and proceed to the page indicated.

a	If your wireless router/access point does not support SecureEasySetup™, Wi-Fi Protected Setup™
	or AOSS™, write down the wireless network settings of your access point or wireless router.

Important

If you do not know this information (Network Name, WEP key or WPA2-PSK (Pre-Shared Key)), you cannot continue the wireless setup. You should see the documentation provided with your access point or wireless router, consult the router manufacturer, or your system administrator.

SSID (Service Set ID or Network name)

Authentication (Open System or Shared Key)/Encryption Type (None or WEP) WEP Key (if needed)¹

WPA/WPA2-PSK Encryption type (TKIP or AES) (if needed)² WPA/WPA2-PSK (Pre-Shared Key) (if needed)²

¹ The WEP key is for 64-bit encrypted networks or 128-bit encrypted networks and can contain both numbers and letters. If you do not know this information you should see the documentation provided with your access point or wireless router. This key is a 64-bit or 128-bit value that must be entered in an ASCII or HEXADECIMAL format.

For example: 64-bit ASCII: 64-bit Hexadecimal: 128-bit ASCII:

128-bit Hexadecimal:

Uses 5 text characters e.g. "Hello" (this is case sensitive) Uses 10 digits of hexadecimal data e.g. "71f2234aba" Uses 13 text characters e.g. "Wirelesscomms" (this is case sensitive) Uses 26 digits of hexadecimal data e.g. "71f2234ab56cd709e5412aa3ba"

² WPA/WPA2-PSK is a Wi-Fi[®] Protected Access Pre-Shared Key, which lets the Brother wireless machine associate with access points using TKIP or AES encryption (WPA-Personal). WPA/WPA2-PSK (TKIP or AES) uses a Pre-Shared Key (PSK) that is 8 or more characters in length, up to a maximum of 63 characters. See the Network User's Guide for more details.

Now go to

page	28
------	----

If your wireless router/access point supports automatic wireless (one-push) setup (SecureEasySetup™, Wi-Fi Protected Setup™ or AOSS™)

Connecting the Brother machine to the wireless network

f

12 Configure the wireless settings (Typical Wireless Setup in infrastructure mode)

> When Switch Network interface to wireless? is displayed, press Yes to accept. This will start the wireless setup wizard. To cancel, press No.

The machine will search for available SSIDs. If a list of SSIDs is displayed, press ▲ or ▼ to choose the SSID you wrote down in step **11** on page 27. Go to **f**.

🖉 Note

It will take several seconds to display a list of available SSIDs.

If your access point is set to not broadcast the SSID you will have to manually add the SSID name. Go to \mathbf{c} .

- C Press <New SSID>. Go to d.
- Enter the SSID you wrote down in step **11** on page 27 on the Touchscreen.

You can use the ◀ and ► keys to move the cursor left and right.

The letters appear in this order: upper case and then lower case.

To enter numbers or special letters, press are repeatedly until the character you want to enter appears.

(For more information, see *Entering Text for Wireless Settings* on page 43.)

Press OK when you have entered all the characters.

Press Infrastructure.

Choose one of the options below: If your network is configured for Authentication and Encryption you must match the settings used for your network.

- No Authentication or Encryption: Press Open System, then press None for Encryption Type? Then press Yes to apply your settings. Go to i.
- No Authentication with WEP Encryption: Press Open System, then press WEP for the Encryption Type? Go to g.
- Authentication with WEP Encryption: Press Shared Key. Go to g.
- Authentication with WPA/WPA2-PSK (TKIP or AES) Encryption: Press WPA/WPA2-PSK. Go to h.
- Choose the appropriate key number. Enter the WEP key you wrote down in step **11** on page 27 on the Touchscreen.

You can use the ◀ and ► keys to move the cursor left and right.

The letters appear in this order: upper case and then lower case.

To enter numbers or special letters, press Ateria repeatedly until the character you want to enter appears.

(For more information, see *Entering Text for Wireless Settings* on page 43.)

Press OK when you have entered all the characters, then press ${\tt Yes}$ to apply your settings. Go to i.

For Wireless Network Users

Press TKIP or AES for Encryption Type? Enter the WPA/WPA2-PSK password you wrote down in step 11 on page 27 on the Touchscreen.

You can use the \blacktriangleleft and \blacktriangleright keys to move the cursor left and right.

The letters appear in this order: upper case and then lower case.

To enter numbers or special letters, press A10 repeatedly until the character you want to enter appears.

(For more information, see *Entering Text for Wireless Settings* on page 43.)

Press OK when you have entered all the characters, then press ${\tt Yes}$ to apply your settings. Go to i.

Your machine will now try to connect to your wireless network using the information you have entered. If successful, Connected will appear briefly on the LCD.

If your machine does not successfully connect to your network, verify your network settings collected in step **11** on page 27 then repeat **a** to **h** to make sure you have entered the correct information.

If your access point does not have DHCP enabled you will need to manually configure the IP address, subnet mask and gateway of the machine to suit your network. See the Network User's Guide for details.

i

Wireless setup is now complete. A four level indicator at the top of your machine's LCD will show the wireless signal strength of your access point or router.

To install MFL-Pro Suite, continue to step **13**.

For Windows[®] Users:

Page 32

For Mac OS[®] Users:

Now go to

Page 36

e

Confirm your wireless router or access point has the SecureEasySetup[™], Wi-Fi Protected Setup[™] or AOSS[™] symbol as shown below.

Place the Brother machine within range of a SecureEasySetup[™], Wi-Fi Protected Setup[™] or AOSS[™] access point/router. The range may differ depending on your environment. Refer to the instructions provided with your access point/router.

C Push the SecureEasySetup[™], Wi-Fi Protected Setup[™] or AOSS[™] button on your wireless router or access point. See the user's guide for your wireless router or access point for instructions.

On your machine, press MENU.
 Press ▲ or ▼ to display Network and press Network.
 Press WLAN.
 Press SES/WPS/AOSS.

When Switch Network interface to wireless? is displayed, press Yes to accept. This will start the wireless setup wizard. To cancel, press No.

This feature will automatically detect which mode (SecureEasySetup[™], Wi-Fi Protected Setup[™] or AOSS[™]) your access point uses to configure your machine.

🖉 Note

If your wireless access point supports Wi-Fi Protected Setup™ (PIN Method) and you want to configure your machine using the PIN (Personal Identification Number) Method, see Using the PIN Method of Wi-Fi Protected Setup™ in the Network User's Guide on the CD-ROM. If the LCD shows Connected, the machine has successfully connected to your router or access point. You can now use your machine in a wireless network.

If the LCD shows Setting WLAN, Connecting SES (Connecting WPS or Connecting AOSS), then Connection Failed, the machine has not successfully connected to your router or access point. Try starting from **c** again. If the same message is indicated again, reset the machine back to the default factory settings and try again. For resetting, see *Restore the network settings to factory default* on page 43.

If the LCD shows Setting WLAN, then Connection Failed or Incorrect Mode, a session overlap or connection failure was detected. (see the table below), the machine has detected 2 or more routers or access points on your network that have the SecureEasySetup[™], Wi-Fi Protected Setup[™] mode or AOSS[™] mode enabled. Make sure that only one router or access point has the SecureEasySetup[™], Wi-Fi Protected Setup[™] mode or AOSS[™] mode enabled and try starting from **c** again.

LCD messages when using the SES/WPS/AOSS control panel menu

	•
Setting WLAN	Searching or accessing the access point and downloading settings from the access point.
Connecting SES/WPS/AOSS	Connecting to the access point.
Connection Failed	Connection failed. If this is shown after the LCD shows Connecting SES/WPS/AOSS, a session overlap was detected.
Incorrect Mode	A session overlap was detected.
Connected	The machine has successfully connected.

🖉 Note

If you encounter a problem during setup, temporarily place your machine closer to the wireless access point, and go back to **c**.

Wireless setup is now complete.

(a) For Wireless Network Users

Wireless setup is now complete. To install MFL-Pro Suite, continue to step **13**.

Page 36

Install the Drivers & Software

(For Windows[®] 2000 Professional/XP/XP Professional x64 Edition/ Windows Vista[®])

Before you install MFL-Pro Suite

A Make sure that your computer is ON and you are logged on with Administrator rights.

Important

- If there are any programs running, close them.
- Make sure there are no memory cards or a USB Flash memory drive inserted.
- The screens may differ depending on the operating system.
- The supplied CD-ROM includes ScanSoft[™] PaperPort[™] 11SE. This software supports Windows[®] 2000 (SP4 or greater), XP (SP2 or greater), XP Professional x64 Edition and Windows Vista[®]. Update to the latest Windows[®] Service Pack before installing MFL-Pro Suite.

Important

Before installation, if you are using personal firewall software (other than Windows[®] Firewall), anti-spyware or antivirus applications, temporarily disable them.

Install MFL-Pro Suite

Put the supplied CD-ROM into your CD-ROM drive. If the model name screen appears, choose your machine. If the language screen appears, choose your language.

🖉 Note

If the Brother screen does not appear automatically, go to **My Computer (Computer)**, double-click the CD-ROM icon, and then double-click **start.exe**.

The CD-ROM main menu will appear. Click Initial Installation.

Click Install MFL-Pro Suite.

Windows®

🖉 Note

d

 If this screen appears, click **OK** and restart your computer.

- If the installation does not continue automatically, open the main menu again by ejecting and then reinserting the CD-ROM or double-click the start.exe program from the root folder, and continue from b to install MFL-Pro Suite.
- For Windows Vista[®], when the **User Account Control** screen appears, click **Allow**.

When the ScanSoft™ PaperPort™ 11SE License Agreement window appears, click Yes if you agree to the Software License Agreement.

f

For Mac OS[®] X 10.3.x or greater, the installation of MFL-Pro Suite is now complete. Go to step 15 on page 38.

For Mac OS[®] X 10.2.4 to 10.2.8 users. click Add.

h Make the selection shown below.

Choose XXX-XXXX (where XXX-XXXX is your model name), and then click Add.

The installation of MFL-Pro Suite is now complete. Go to step 15 on page 38.

Wireless Network

When Presto![®] PageManager[®] is installed OCR capability is added to Brother ControlCenter2. You can easily scan, share and organize photos and documents using Presto![®] PageManager[®].

Double-click the **Presto! PageManager** icon and follow the on-screen instructions.

For Mac $OS^{\textcircled{8}} X$ 10.2.4 to 10.3.8 users, when this screen appears, click **Go** to download the software from the Brother Solutions Center website.

16 Install MFL-Pro Suite on additional computers (If needed)

If you want to use your machine with multiple computers on the network, install MFL-Pro Suite on each computer. Go to step **13** on page 36.

The installation is now complete.

Install Optional Applications

Windows[®]

Install FaceFilter Studio supported by Reallusion, Inc

FaceFilter Studio is an easy-to-use borderless photo printing application. FaceFilter Studio also lets you edit your photo data and add photo effects such as red eye reduction or skin tone enhancement.

Important

- The machine must be ON and connected to the computer.
- The computer must be connected to the Internet.
- Make sure you are logged on with Administrator rights.
- Open the main menu again by ejecting and then reinserting the CD-ROM or by doubleclicking the start.exe program from the root folder.
- The CD-ROM main menu will appear. Choose your language and then click Additional Applications.

Click the FaceFilter Studio button to install.

Install FaceFilter Studio Help

To get instructions on how to use FaceFilter Studio, download and install FaceFilter Studio Help.

- To run FaceFilter Studio, go to Start/All Programs/Reallusion/ FaceFilter Studio on your computer.
- Click the Dutton on the upper right corner of the screen.
- C Click Check for updates to go to the Reallusion update web page.

- Click the **Download** button and choose a folder to save the file in.
- Close FaceFilter Studio before you start the installer for FaceFilter Studio Help. Double-click the downloaded file from the folder you specified and follow the on-screen instructions for installation.

Note

To view the complete FaceFilter Studio Help, choose **Start/All Programs/Reallusion**/ **FaceFilter Studio/FaceFilter Studio Help** on your computer.

Install Optional Applications

Windows[®]

3

Install BookScan&Whiteboard Suite supported by Reallusion, Inc

You can install **BookScan&Whiteboard Suite**. The **BookScan Enhancer** software can correct your scanned book images automatically. The **Whiteboard Enhancer** software cleans up and enhances text and images from photos taken of your whiteboard. (Internet access required.)

Important

- The machine must be ON and connected to the computer.
- The computer must be connected to the Internet.
- Open the main menu again by ejecting and then reinserting the CD-ROM or by doubleclicking the start.exe program from the root folder.
- The CD-ROM main menu will appear. Choose your language and then click Additional Applications.

C Click the **BookScan&Whiteboard Suite** button to install.

For Network Users

BRAdmin Light utility (For Windows[®] users)

BRAdmin Light is a utility for initial setup of Brother network connected devices. It also can search for Brother products on your network, view the status and configure basic network settings, such as IP address. For more information on BRAdmin Light, visit us at <u>http://solutions.brother.com/</u>.

🖉 Note

If you require more advanced printer management, use the latest Brother BRAdmin Professional utility version that is available as a download from <u>http://solutions.brother.com/</u>.

Install the BRAdmin Light configuration utility

2 Click **Network Utilities** on the menu screen.

Click **BRAdmin Light** and follow the on-screen instructions.

For Network Users

BRAdmin Light utility (For Mac OS[®] X users)

BRAdmin Light is a utility for initial setup of Brother network connected devices. It also can search for Brother products on your network, view the status and configure basic network settings, such as IP address from a computer running Mac OS[®] X 10.2.4 or greater.

The BRAdmin Light software will be installed automatically when you install the printer driver. If you have already installed the printer driver, you don't have to install BRAdmin Light again. For more information on BRAdmin Light, visit us at http://solutions.brother.com/.

Set your IP address, Subnet Mask and Gateway using BRAdmin Light

- If you have a DHCP/BOOTP/RARP server in your network, you don't have to do the following operation. The machine will automatically obtain its own IP address.
- Make sure that version 1.4.1_07 or later of Java™ client software is installed on your computer.
- The default password for the machine is 'access'. You can use BRAdmin Light to change this password.
- Double-click the Macintosh HD icon on your desktop.

Choose Library, Printers, Brother and then Utilities.

C Double-click the file **BRAdmin Light.jar** and run the software. BRAdmin Light will then search for new devices automatically.

Double-click the unconfigured device.

Choose STATIC for the Boot Method. Enter the IP Address, Subnet Mask and Gateway, and then click OK.

🖯 🔿 Cont	figure TCP/IP Address
Boot Method	
O AUTO	
STATIC	
O DHCP	
O RARP	
O BOOTP	
IP Address	XXX.XXX.XXX
Subnet Mask	255.255.255.0
Gateway	XXX.XXX.XXX
	OK Cancel

The address information will be saved to the machine.

Restore the network settings to factory default

To restore all network settings of the internal Print/Scan server to factory default, please follow the steps below.

- A Make sure the machine is not operating, then disconnect all the cables from the machine (except the power cord).
- **Press** MENU.
- C Press ▲ or V to display Network and press Network.
- Press ▲ or ▼ to display Factory Reset and press Factory Reset.
- Press Yes.
- Hold down Yes for 2 seconds to confirm.
- 9 The machine will restart, re-connect cables once this is complete.

Entering Text for Wireless Settings

When you are setting certain menu selections, you may need to enter text into the machine. Press 40 to choose numbers, characters and special characters. Up to four letters are assigned to each button on the Touchscreen.

By pressing the correct button repeatedly, you can access the character you want.

Inserting spaces

To enter a space, press At to choose special characters, then press the space button ____ or ___.

🖉 Note

The characters available may differ depending on your country.

Making corrections

If you entered an incorrect letter and want to change it, use the arrow buttons to move the cursor under the incorrect character. Then press (a). Re-enter the correct character. You can also insert letters by moving the cursor and entering a character.

Repeating letters

If you need to enter a letter that is on the same button as the letter before, press ► to move the cursor to the right before you press the button again.

Replacement consumables

When the time comes to replace ink cartridges, an error message will be indicated on the LCD. For more information about the ink cartridges for your machine, visit <u>http://www.brother.com/original/</u> or contact your local Brother re-seller.

Ink cartridge

Black	Yellow	Cyan	Magenta
