## Memory Storage

Your menu settings are stored permanently, and in the event of a power failure will *not* be lost. Temporary settings (for example, Contrast, Overseas Mode) *will* be lost.

(For MFC-7470D / MFC-7860DN)

During a power failure the machine will retain the date and time and programmed fax timer jobs (fx. Delayed Fax) for approximately 60 hours. Other fax jobs in the machine's memory will not be lost.

(For MFC-7360)

During a power failure the machine will retain the date and time for approximately 2 hours. The fax jobs in the machine's memory will be lost.

## Ecology features

### Toner Save

---

You can save toner using this feature. When you set Toner Save to **On**, prints appear lighter. The default setting is **Off**.

- 1 Press **Menu**, **1**, **4**, **1**.
- 2 Press **▲** or **▼** to choose **On** or **Off**. Press **OK**.
- 3 Press **Stop/Exit**.

#### Note

---

We do not recommend Toner Save for printing Photo or Greyscale images.

---

### Sleep Mode

---

The Sleep Mode Setting can reduce power consumption. When the machine is in Sleep Mode (Power Save mode) it acts as though it were turned off. Receiving data or starting an operation wakes up the machine from Sleep mode to Ready mode.

You can choose how long the machine must be idle before it goes into sleep mode. When the machine receives a fax, computer data or makes a copy, the timer will be reset. The default setting is 3 minutes.

While the machine is in sleep mode the LCD will show **Sleep**.

- 1 Press **Menu**, **1**, **4**, **2**.
- 2 Enter the length of time the machine is idle before entering sleep mode. Press **OK**.
- 3 Press **Stop/Exit**.

## Deep Sleep mode

---

If the machine is in Sleep mode and does not receive any jobs for a certain length of time, the machine will automatically enter Deep Sleep mode, and the LCD will show `Deep Sleep`. Deep Sleep mode uses less power than Sleep mode. The machine will wake up and start warming up when the machine receives computer data or when you press a key on the control panel.

## Toner Settings

### Toner Setting (Continue Mode)

---

You can set the machine to continue printing after the LCD shows `Replace Toner`. The machine will continue printing until the LCD shows `Toner Ended`. The default setting is `Stop`.

- 1 Press **Menu**, **1**, **8**.
- 2 Press **▲** or **▼** to choose `Continue` or `Stop`. Press **OK**.
- 3 Press **Stop/Exit**.

#### Note

---

- If you continue printing in the Continue mode, we cannot guarantee the print quality.
  - While using Continue mode the print may appear faint.
  - After replacing the toner cartridge with a new one, the Continue mode will go back to the default setting (`Stop`).
-

## Receiving faxes in Continue Mode

The machine can store received faxes in the memory if you choose Continue mode when the LCD shows **Replace Toner**. When received faxes are printed in Continue mode the LCD will ask if the print quality of the fax is OK. If the quality is not good, choose **2 . No**. The machine will keep the faxes stored in the memory so you can reprint them after you replace the toner cartridge with a new one. If the print quality is good, choose **1 . Yes**. The LCD will ask if you want to delete the printed faxes from the memory. If you choose not to delete them, you will be asked again after you replace the toner cartridge with a new one.

### Note

- The MFC-7360 can store up to 400 faxes in memory and the MFC-7470D / MFC-7860DN can store up to 500 faxes in memory.
- (MFC-7360)  
If you turn off the power switch faxes in memory will be lost.
- The machine will keep faxes stored in Continue Mode even if you change the **Continue** setting to **Stop**.
- If you install a new toner cartridge when the LCD shows **Toner Ended**, the machine will ask if you want to print the stored faxes. Choose **1 . Print** to print stored faxes.

## Toner End in Continue Mode

When the LCD shows **Toner Ended** the machine will stop printing. If the memory is full and you want to continue receiving faxes, you must install a new toner cartridge.

## LCD Contrast

You can change the contrast to make the LCD look lighter or darker.

- 1 Press **Menu**, **1**, **5**.
- 2 Press **▶** to make the LCD darker. Or, press **◀** to make the LCD lighter. Press **OK**.
- 3 Press **Stop/Exit**.

## Mode Timer

The machine has three mode keys on the control panel: **FAX**, **SCAN**, and **COPY**.

You can set how much time the machine takes after the last Copy or Scan operation to return to Fax mode. If you choose **Off**, the machine will stay in the mode you used last.

This setting also sets the time the machine will change from individual user to the Public mode when using Secure Function Lock. (See *Switching Users* on page 10.)

- 1 Press **Menu**, **1**, **1**.
- 2 Press **▲** or **▼** to choose 0 Sec, 30 Secs, 1 Min, 2 Mins, 5 Mins or Off. Press **OK**.
- 3 Press **Stop/Exit**.

## Setting the Fax Logic (sending and receiving sequence)

You can broadcast up to 258 different numbers. This will depend on how many Groups, access codes or credit card numbers you have stored, and on how many delayed or stored faxes in memory.

### Before you begin the broadcast

One Touch and Speed Dial numbers must be stored in the machine's memory before they can be used in a broadcast. (See *Storing One Touch Dial numbers* and *Storing Speed Dial numbers* in Chapter 7 of the *Basic User's Guide*.)

Group numbers must also be stored in the machine's memory before they can be used in a broadcast. Group numbers include many stored One Touch Dial and Speed Dial numbers for easier dialling. (See *Setting up Groups for Broadcasting* on page 33.)

## Telephone line services

The caller ID feature of this machine lets you use the caller ID subscriber service offered by certain telephone companies.

### Caller ID (Caller Identification) (not available in certain area)

Caller ID is a telephone service that allows the subscriber to see a display of the caller's phone number as the telephone ring. It is a fast way to screen your calls. You can respond quickly to calls you missed, because caller IDs are received and stored in your fax machine memory. Besides the standard Caller ID feature, you can also choose a single caller's phone number and call back.

#### Note

- To get the Caller ID service, you have to apply for it at your local telephone company.
- FSK and DTMF are the two modes for displaying your calls.

The default mode of this machine is **Auto**. Please ask your local telephone company for whether your mode is FSK or DTMF.

- Please switch your mode following instructions of the **Setup Method**. Contact your local telephone company or Brother dealer in the case that the feature does not work normally.

Caller ID feature is not available in the following situation:

- 1 You have not applied for it at your local telephone company.
- 2 The fax machine is connected to an internal switchboard or other switch device.

- 3 Due to the switchboard problems or line problems of local telephone companies, the feature may not work in some areas.

- You will see the number (or name) on the LCD.
- The ID `Unknown` message means the call originated outside your Caller ID service area.
- The ID `Withheld` message means the caller has intentionally blocked transmission of information.

You can print a list of the Caller ID information received by your machine. (See *Printing the Caller ID List* on page 32.)

### Note

The Caller ID service varies with different carriers. Call your local telephone company to find out about the kind of service available in your area.

## Additional dialling operations

### Combining quick dial numbers

You can combine more than one Quick Dial number when you dial. This feature may be useful if you need to dial an access code for a cheaper rate from another long distance carrier.

For example, you might have stored '555' on Speed Dial #003 and '7000' on Speed Dial #002. You can use them both to dial '555-7000' if you press the following keys:

Press  (**Address Book**) **003**.

Numbers can be added manually by entering them on the dial pad:

This would dial '555-7001'. You can also add a pause by pressing **Redial/Pause** key.
