Start Here

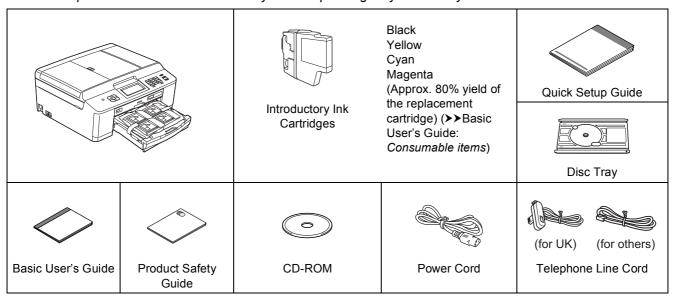

Please read the Product Safety Guide first before you set up your machine. Then, please read this Quick Setup Guide for the correct setup and installation.

▲ WARNING	WARNING indicates a potentially hazardous situation which, if not avoided, could result in death or serious injuries.
▲ CAUTION	<u>CAUTION</u> indicates a potentially hazardous situation which, if not avoided, may result in minor or moderate injuries.

Unpack the machine and check the components

■ The components included in the box may differ depending on your country.

WARNING

Plastic bags are used in the packing of your machine. Plastic bags are not toys. To avoid the danger of suffocation, keep these bags away from babies and children and dispose of them correctly.

- Save all packing materials and the box in case for any reason you must ship your machine.
- You need to purchase the correct interface cable for the interface you want to use (for USB or wired network connection).

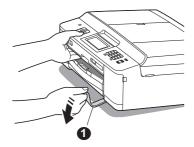

USB cable

It is recommended to use a USB 2.0 cable (Type A/B) that is no more than 2 metres long (cable not included).

Network cable

Use a straight-through Category5 (or greater) twisted-pair cable for 10BASE-T or 100BASE-TX Fast Ethernet Network.

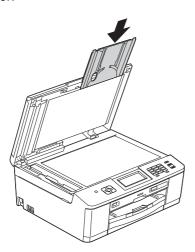

- Remove the protective tape and film covering the machine, and also from the LCD.
- Remove the orange protective part
 by lifting the front of the machine and then pulling down on the packing part.

Remove the plastic bag ② containing the ink cartridges from on top of the paper tray.

- d Make sure you have all the components.
- Open the scanner cover, insert the Disc Tray into the storage space on the right side of the scanner cover, and then close the scanner cover.

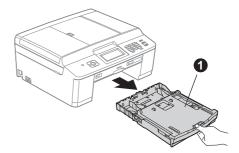

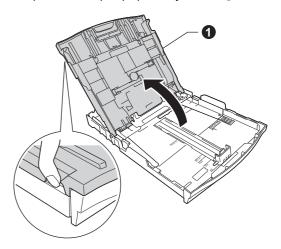

When using the Disc Print feature make sure that there is over 10 cm of free space behind the machine.

2 Load plain A4 paper

Pull the paper tray ① completely out of the machine.

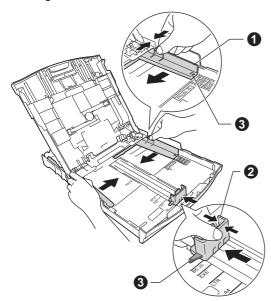

Open the output paper tray cover ①.

With both hands, gently press and slide the paper side guides ① and then the paper length guide ② to fit the paper size.

Make sure that the triangular marks ③ on the paper side guides ① and paper length guide ② line up with the mark for the paper size you are using.

Fan the stack of paper well to avoid paper jams and misfeeds.

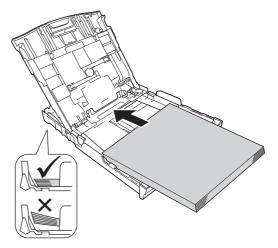

Always make sure that the paper is not curled or wrinkled.

Gently put the paper into the paper tray print side down and top edge first. Check that the paper is flat in the tray.

IMPORTANT

Be careful that you do not push the paper in too far; it may lift at the back of the tray and cause paper feed problems.

- Gently adjust the paper side guides to the paper with both hands. Make sure that the paper side guides touch the edges of the paper.
- Close the output paper tray cover.
- Slowly push the paper tray completely into the machine.

While holding the paper tray in place, pull out the paper support 1 until it clicks, and then unfold the paper support flap 2.

Connect the power cord and telephone line

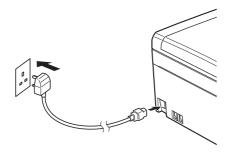

⚠ WARNING

- The machine must be fitted with an earthed plug.
- Since the machine is grounded through the power outlet, you can protect yourself from potentially hazardous electrical conditions on the telephone network by keeping the power cord connected to your machine when you connect it to a telephone line. Similarly, you can protect yourself when you want to move your machine by disconnecting the telephone line first and then the power cord.

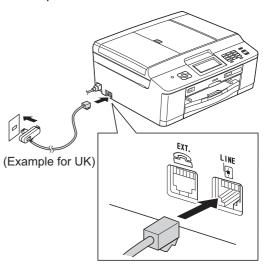

• IMPORTANT

DO NOT connect the USB cable yet (if you are using a USB cable).

Connect the power cord.

Connect the telephone line cord. Connect one end of the telephone line cord to the socket on the machine marked **LINE** and the other end to a telephone wall socket.

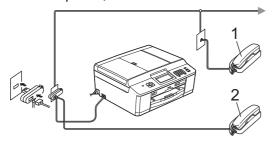

IMPORTANT

The telephone line cord MUST be connected to the socket on the machine marked LINE.

Note

If you are sharing one telephone line with an external telephone, connect it as shown below.

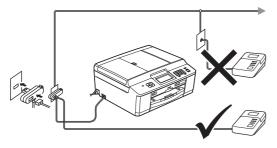

- 1 Extension telephone
- 2 External telephone

Please make sure you use an external telephone with a cable no more than 3 metres long.

Note

If you are sharing one telephone line with an external telephone answering machine, connect it as shown below.

Set the receive mode to External TAD if you have an external answering machine. See Choose a Receive Mode on page 7. (Detailed information >>Basic User's Guide: Connecting an external TAD (telephone answering device))

4

Install the ink cartridges

A CAUTION

If ink gets in your eyes, wash it out with water at once and call a doctor if you are concerned.

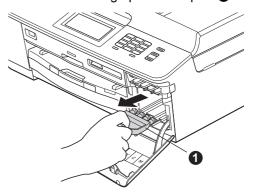

Make sure you install the Introductory ink cartridges included with your machine first.

- Make sure that the power is turned on.
 The LCD will show No Ink Cartridge.
- Open the ink cartridge cover ①.

Remove the orange protective part 1

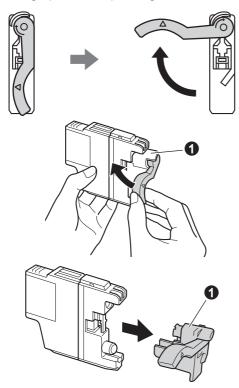

Do not throw away the orange protective part. You will need it if you transport the machine.

Unpack the ink cartridge.

Turn the green release lever on the orange protective packing ① clockwise until it clicks to release the vacuum seal. Then remove the orange protective packing ① as shown.

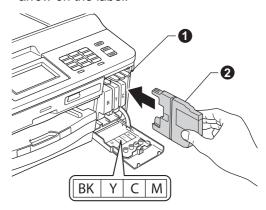

IMPORTANT

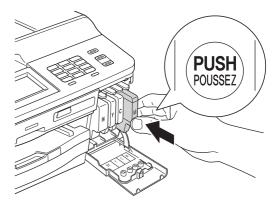

DO NOT shake the ink cartridges. If ink stains your skin or clothing, wash with soap or detergent at once.

Take care to match the colour of the lever with the cartridge colour 2, as shown in the diagram below.

Install each ink cartridge in the direction of the arrow on the label.

Gently push the back of the ink cartridge marked "PUSH" until it clicks. After all the ink cartridges are installed close the ink cartridge cover.

The machine will prepare the ink tube system for printing. This process will take approximately four minutes. Do not turn off the machine.

5

Check the print quality

- When the preparation process has finished, the LCD shows Set Paper and Press Start.

 Press Colour Start.
- Check the quality of the four colour blocks on the sheet. (black/yellow/cyan/magenta)
- If all lines are clear and visible, press Yes to finish the quality check and go to step **6**.

OK

If you can see missing short lines, press ${\tt No}$ and follow the steps on the LCD.

Pool

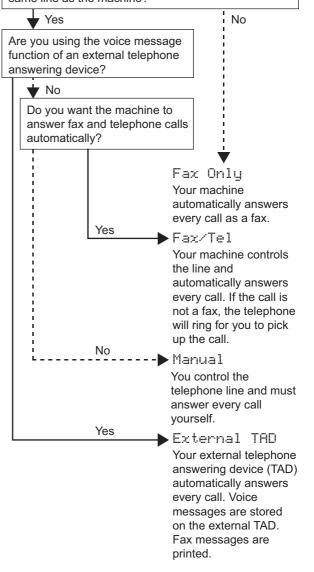

6

Choose a Receive Mode

There are four possible receive modes: Fax Only, Fax/Tel, Manual and External TAD.

➤➤Basic User's Guide: Using Receive Modes

Do you want to use the telephone features of your machine (if available) or an external telephone or external telephone answering device connected on the same line as the machine?

- Press Menu.
- Press ▲ or ▼ to display Initial Setup.
- Press Initial Setup.
- Press Receive Mode.
- Press Fax Only, Fax/Tel, External TAD or Manual.
- f Press Stop/Exit.

7

Set the date and time

The machine displays the date and time, and if you set up the station ID, it will add it to each fax you send.

- **Press** Menu.
- Press ▲ or ▼ to display Initial Setup.
- C Press Initial Setup.
- Press Date&Time.
- Enter the last two digits of the year on the Touchscreen, and then press OK.

(e.g. Enter 1 2 for 2012.)

- Repeat for month/day/time in 24-hour format.
- Press Stop/Exit.

8

Enter personal information (Station ID)

You should store your name and fax number to be printed on all fax pages that you send. Information on how to enter text ➤➤ Basic User's Guide: Entering Text

- Press Menu.
- Press ▲ or ▼ to display Initial Setup.
- C Press Initial Setup.
- Press Station ID.
- Enter your fax number (up to 20 digits) on the Touchscreen, and then press OK.
- Enter your name (up to 20 characters) using the Touchscreen, and then press OK.

- Press to cycle between letters, numbers and special characters. (The characters available may differ depending on your country.)
- If you need to enter a character that is on the same button as the character before, press ▶ to move the cursor to the right.
- If you entered a character incorrectly and want to change it, press ◀ or ▶ to move the cursor to the incorrect character, and then press ☒.
- Press Stop/Exit.

If you make a mistake and want to start again, press **Stop/Exit** and go back to **a**.

Fax Transmission Report

Your Brother machine is equipped with a Transmission Verification Report that can be used as confirmation that you sent a fax. This report lists the name or fax number of the receiving party, the date, time, and duration of the transmission, the number of pages transmitted, and whether or not the transmission was successful.

Instructions on using this feature ➤➤Basic User's Guide: *Transmission Verification Report*

10

Set Tone or Pulse dialling mode

Your machine comes set for Tone dialling service. If you have Pulse dialling service (rotary), you need to change the dialling mode.

- **Press** Menu.
- Press ▲ or ▼ to display Initial Setup.
- C Press Initial Setup.
- Press ▲ or ▼ to display Tone/Pulse.
- Press Tone/Pulse.
- Press Pulse (or Tone).
- Press Stop/Exit.

11

Set the telephone line type

If you are connecting the machine to a line that features PBX or ISDN to send and receive faxes, it is necessary to change the telephone line type accordingly by completing the following steps.

- Press Menu.
- Press ▲ or ▼ to display Initial Setup.
- Press Initial Setup.
- Press ▲ or ▼ to display Phone Line Set.
- e Press Phone Line Set.
- f Press Normal, PBX or ISDN.
- Press Stop/Exit.

PBX and TRANSFER

The machine is initially set to Normal, which lets the machine connect to a standard PSTN (Public Switched Telephone Network) line. However, many offices use a central telephone system or Private Branch Exchange (PBX). Your machine can be connected to most types of PBX. The machine's recall feature supports timed break recall only (TBR). TBR will work with most PBX systems allowing you to gain access to an outside line, or transfer calls to another extension. The feature works when the **Tel/R** key is pressed.

Set the telephone line compatibility (VoIP)

If you are connecting the machine to a VoIP service (over the Internet) you need to change the compatibility setting.

If you are using an analogue telephone line you can skip this step.

- Press Menu.
- Press ▲ or ▼ to display Initial Setup.
- C Press Initial Setup.
- Press ▲ or ▼ to display Compatibility.
- Press Compatibility.
- **f** Press Basic (for VoIP).
- Press Stop/Exit.

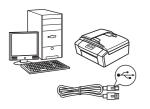

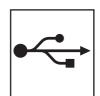

Choose your connection type

These installation instructions are for Windows[®] XP Home/XP Professional (x32/x64 Edition), Windows Vista[®], Windows[®] 7, and Mac OS X (versions 10.4.11, 10.5.x and 10.6.x).

- For Windows Server[®] 2003/2008/2008 R2, the drivers can be found from your model's download page at http://solutions.brother.com/.
- If your computer does not have a CD-ROM drive you can download the latest drivers, manuals and utilities for your model from the Brother Solutions Center at http://solutions.brother.com/. Some software applications included on the CD-ROM may not be available as a download.

For USB interface cable

Windows[®], go to page 12 Macintosh, go to page 15

For Wired Network

Windows[®], go to page 18 Macintosh, go to page 22

For Wireless Network

Windows[®] and Macintosh, go to page 25

For USB interface users

(Windows® XP Home/XP Professional/Windows Vista®/Windows® 7)

Before you install

Make sure that your computer is ON and you are logged on with Administrator rights.

! IMPORTANT

- DO NOT connect the USB cable yet.
- If there are any programs running, close them.

- The screens may differ depending on your operating system.
- The CD-ROM includes ScanSoft™
 PaperPort™12SE. This software supports
 Windows® XP Home (SP3 or greater), XP
 Professional (SP3 or greater), XP Professional
 x64 Edition (SP2 or greater), Windows Vista®
 (SP2 or greater) and Windows® 7. Update to
 the latest Windows® Service Pack before
 installing MFL-Pro Suite.

15

Install MFL-Pro Suite

Put the supplied installer CD-ROM into your CD-ROM drive. If the model name screen appears, choose your machine. If the language screen appears, choose your language.

If the Brother screen does not appear automatically, go to **My Computer (Computer)**, double-click the CD-ROM icon, and then double-click **start.exe**.

The CD-ROM Top Menu will appear. Click Install MFL-Pro Suite and click Yes if you accept the license agreements. Follow the on-screen instructions.

For Windows Vista[®] and Windows[®] 7, when the User Account Control screen appears, click **Allow** or **Yes**.

Choose Local Connection (USB), and then click **Next**. The installation continues.

d When this screen appears, go to the next step.

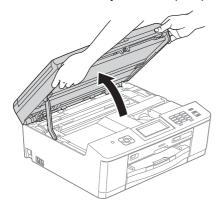

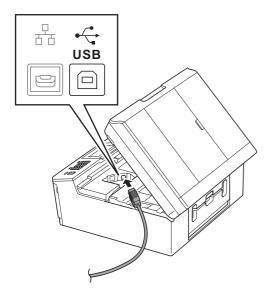

Connect the USB cable

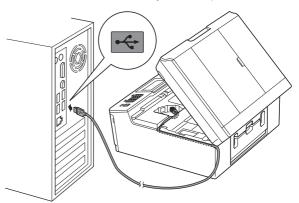

Using both hands, use the plastic tabs on both sides of the machine to lift the scanner cover until it locks securely into the open position.

b Connect the USB cable to the USB port marked with a symbol. You will find the USB port inside the machine on the right as shown below.

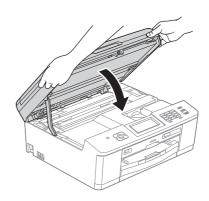

Carefully guide the USB cable into the cable channel and out the back of the machine. Connect the cable to your computer.

IMPORTANT

Make sure that the cable does not restrict the cover from closing, or an error may occur.

d Using both hands, grasp the plastic tabs on both sides of the machine and gently close the scanner cover.

The installation will continue automatically. The installation screens appear one after another.

IMPORTANT

DO NOT cancel any of the screens during the installation. It may take a few seconds for all screens to appear.

For Windows Vista® and Windows® 7, when the Windows® Security screen appears, click the check box and click Install to complete the installation correctly.

- When the On-Line Registration screen is displayed, make your selection and follow the on-screen instructions.
- If you do not want to set your machine as the Default printer, uncheck **Set as Default Printer** and then click **Next**.

We recommend you try the **Trial Photo Print** selection to see the high quality output available from your Brother machine.

The **Trial Photo Print** screen appears only once after restarting.

17

Finish and restart

Click **Finish** to restart your computer.

After restarting the computer, you must be logged on with Administrator rights.

- If an error message appears during the software installation, run the Installation Diagnostics located in Start/All Programs/ Brother/MFC-JXXX (where MFC-JXXX is your model name).
- Depending on your security settings, a Windows[®] Security or antivirus software window may appear when using the machine or its software. Please allow or permit the window to continue.

- The following screens will appear.
 - When the Check for Firmware Updates screen appears, choose the firmware update setting you want and click OK.
 - When the Brother Product Research & Support Program starts up, follow the on-screen instructions.
 - When the Trial Photo Print screen appears, follow the on-screen instructions to print a test photo.

Internet access is required for the firmware update and the **Brother Product Research & Support Program**.

The installation is now complete.

Now go to

Proceed to Install Optional Applications on page 40.

XML Paper Specification Printer Driver
The XML Paper Specification Printer Driver is the
most suitable driver for Windows Vista® and
Windows® 7 when printing from applications that
use the XML Paper Specification documents.
Please download the latest driver by accessing
the Brother Solutions Center at
http://solutions.brother.com/.

For USB interface users (Mac OS X 10.4.11, 10.5.x, 10.6.x)

14

Before you install

Make sure your machine is connected to the power and your Macintosh is ON. You must be logged on with Administrator rights.

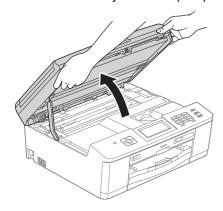

For Mac OS X 10.4.0 to 10.4.10 users, upgrade to Mac OS X 10.4.11 - 10.6.x.

15

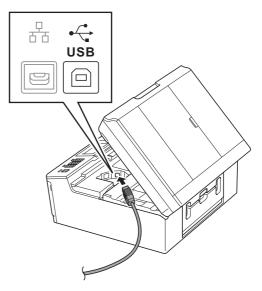

Connect the USB cable

IMPORTANT

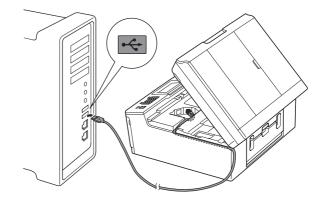

- DO NOT connect the machine to a USB port on a keyboard or a non-powered USB hub.
- Connect the machine directly to your Macintosh.
- Using both hands, use the plastic tabs on both sides of the machine to lift the scanner cover until it locks securely into the open position.

Connect the USB cable to the USB port marked with a symbol. You will find the USB port inside the machine on the right as shown below.

Carefully guide the USB cable into the cable channel and out the back of the machine.
Connect the cable to your Macintosh.

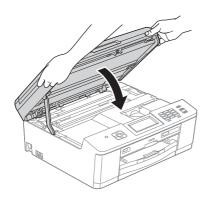

IMPORTANT

Make sure that the cable does not restrict the cover from closing, or an error may occur.

Using both hands, grasp the plastic tabs on both sides of the machine and gently close the scanner cover.

16 Install MFL-Pro Suite

- Put the supplied installer CD-ROM into your CD-ROM drive.
- Double-click the **Start Here OSX** icon to install.

Choose Local Connection (USB), and then click Next. Follow the on-screen instructions.

- Please wait for the software to install. After the installation, the Brother software will search for the Brother device. This will take a few moments to complete.
- Choose the machine from the list, and then click **OK**.

When this screen appears, click **Next**.

A dialog box will appear and ask if you want to download **NewSoft CD Labeler**. Follow the on-screen instructions. You can also install **NewSoft CD Labeler** from the **Brother Support** screen.

The installation of MFL-Pro Suite is now complete.
Go to step 17.

Install NewSoft CD Labeler and Presto! PageManager

The NewSoft CD Labeler application is an easy to use application for printing directly on to printable disc media. The NewSoft CD Labeler application offers templates for creating disc labels along with matching jacket covers or create your own custom disc labels.

When Presto! PageManager is installed OCR capability is added to Brother ControlCenter2. You can easily scan, share and organize photos and documents using Presto! PageManager.

On the **Brother Support** screen, click the **NewSoft CD Labeler** icon, and follow the on-screen instructions.

On the **Brother Support** screen, click the **Presto! PageManager** icon to go to the Presto! PageManager download site, and follow the on-screen instructions.

The installation is now complete.

To use Image Capture for scanning on Mac OS X 10.6.x, please install the CUPS Printer Driver, which can be downloaded from your model page on the Brother Solutions Center at http://solutions.brother.com/.

For wired network interface users

(Windows® XP Home/XP Professional/Windows Vista®/Windows® 7)

Before you install

Make sure that your computer is ON and you are logged on with Administrator rights.

IMPORTANT

If there are any programs running, close them.

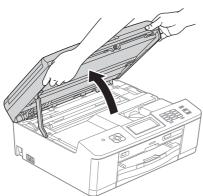

- The screens may differ depending on your operating system.
- The CD-ROM includes ScanSoft™ PaperPort™12SE. This software supports Windows® XP Home (SP3 or greater), XP Professional (SP3 or greater), XP Professional x64 Edition (SP2 or greater), Windows Vista® (SP2 or greater) and Windows® 7. Update to the latest Windows® Service Pack before installing MFL-Pro Suite.

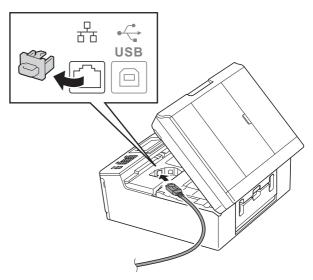

Connect the network

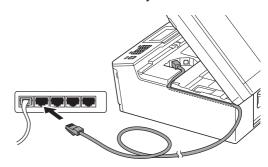

Using both hands, use the plastic tabs on both sides of the machine to lift the scanner cover until it locks securely into the open position.

b You will find the Ethernet port marked with a symbol inside the machine on the left as shown below. Remove the protective cap and connect the network cable to the Ethernet port.

Carefully guide the network cable into the cable channel and out the back of the machine. Connect the cable to your network.

IMPORTANT

Make sure that the cable does not restrict the cover from closing, or an error may occur.

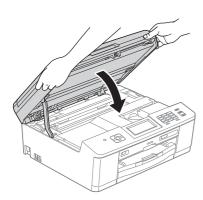

Mote

If both the USB and the LAN cables are being used, guide both cables through the cable channel with one on top of the other.

Using both hands, grasp the plastic tabs on both sides of the machine and gently close the scanner cover.

Wired Network

If you have previously set up your machine for a wireless network and then want to set it up on a wired network, you should check that the machine's Network I/F is set to Wired LAN. The wireless network interface will become inactive with this setting.

On your machine, press Menu.

Press Network.

Press Network I/F.

Press Wired LAN.

Press Stop/Exit.

16

Install MFL-Pro Suite

Put the supplied installer CD-ROM into your CD-ROM drive. If the model name screen appears, choose your machine. If the language screen appears, choose your language.

If the Brother screen does not appear automatically, go to My Computer (Computer), double-click the CD-ROM icon, and then double-click start.exe.

The CD-ROM Top Menu will appear. Click Install MFL-Pro Suite and click Yes if you accept the license agreements. Follow the on-screen instructions.

For Windows Vista[®] and Windows[®] 7, when the User Account Control screen appears, click **Allow** or **Yes**.

Choose Wired Network Connection (Ethernet), and then click Next.

Wired Network

Windows[®]

When this screen appears, choose Change the Firewall port settings to enable network connection and continue with the installation. (Recommended) and click Next.

If you are using a firewall other than the Windows[®] Firewall or the Windows[®] Firewall is off, this screen may appear.

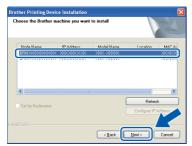

See the instructions provided with your firewall software for information on how to add the following network ports.

- For network scanning, add UDP port 54925.
- For network PC-Fax receiving, add UDP port 54926.
- If you still have trouble with your network connection, add UDP port 137 and 161.

 If there is more than one machine connected to the network, choose your machine from the list, and then click Next.

This window will not appear if there is only one machine connected to the network, the machine will be chosen automatically.

• If your machine is not found over the network, the following screen will appear.

Confirm your settings by following the on-screen instructions.

The installation of the Brother drivers will automatically start. The installation screens appear one after another.

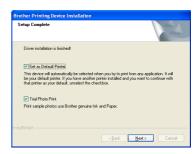

! IMPORTANT

DO NOT cancel any of the screens during the installation. It may take a few seconds for all screens to appear.

Note

For Windows Vista[®] and Windows[®] 7, when the Windows[®] Security screen appears, click the check box and click **Install** to complete the installation correctly.

- When the **On-Line Registration** screen is displayed, make your selection and follow the on-screen instructions.
- If you do not want to set your machine as the Default printer, uncheck **Set as Default Printer** and then click **Next**.

We recommend you try the **Trial Photo Print** selection to see the high quality output available from your Brother machine.

The **Trial Photo Print** screen appears only once after restarting.

Wired Network

Finish and restart

Click **Finish** to restart your computer. After restarting the computer, you must be logged on with Administrator rights.

- If an error message appears during the software installation, run the Installation Diagnostics located in Start/All Programs/ Brother/MFC-JXXX (where MFC-JXXX is your model name).
- · Depending on your security settings, a Windows® Security or antivirus software window may appear when using the machine or its software. Please allow or permit the window to continue.

The following screens will appear.

- When the Check for Firmware Updates screen appears, choose the firmware update setting you want and click OK.
- · When the Brother Product Research & Support Program starts up, follow the on-screen instructions.
- When the **Trial Photo Print** screen appears, follow the on-screen instructions to print a test photo.

Internet access is required for the firmware update and the Brother Product Research & Support Program.

Install MFL-Pro Suite on additional computers (if needed)

If you want to use your machine with multiple computers on the network, install MFL-Pro Suite on each computer. Go to step 16 on page 19. Also see step 14 on page 18 before you install.

Network license (Windows®)

This product includes a PC license for up to 2 Users. This license supports the installation of the MFL-Pro Suite including ScanSoft™ PaperPort™12SE on up to 2 PCs on the network. If you want to use more than 2 PCs with ScanSoft™ PaperPort™12SE installed, please purchase the Brother NL-5 pack which is a multiple PC license agreement pack for up to 5 additional users. To purchase the NL-5 pack. contact your authorized Brother dealer or contact Brother customer service.

The installation is now complete.

Now go to

Proceed to Install Optional Applications on page 40.

XML Paper Specification Printer Driver The XML Paper Specification Printer Driver is the most suitable driver for Windows Vista® and Windows[®] 7 when printing from applications that use the XML Paper Specification documents. Please download the latest driver by accessing the Brother Solutions Center at http://solutions.brother.com/.

For wired network interface users (Mac OS X 10.4.11, 10.5.x, 10.6.x)

Before you install

Make sure your machine is connected to the power and your Macintosh is ON. You must be logged on with Administrator rights.

- For Mac OS X 10.4.0 to 10.4.10 users, upgrade to Mac OS X 10.4.11 - 10.6.x.
- If you have previously set up your machine for a wireless network and then want to set it up on a wired network, you should check that the machine's Network I/F is set to Wired LAN. The wireless network interface will become inactive with this setting.

On your machine, press Menu.

Press Network.

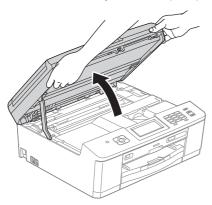

Press Network I/F.

Press Wired LAN.

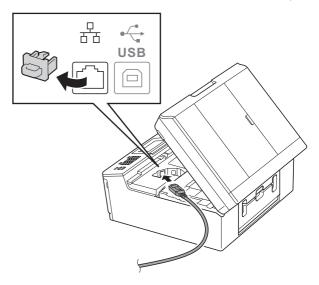

Press Stop/Exit.

Connect the network cable

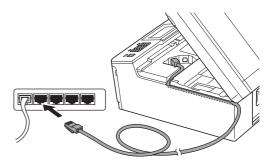

Using both hands, use the plastic tabs on both sides of the machine to lift the scanner cover until it locks securely into the open position.

b You will find the Ethernet port marked with a symbol inside the machine on the left as shown below. Remove the protective cap and connect the network cable to the Ethernet port.

C Carefully guide the network cable into the cable channel and out the back of the machine. Connect the cable to your network.

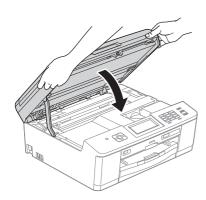

IMPORTANT

Make sure that the cable does not restrict the cover from closing, or an error may occur.

If both the USB and the LAN cables are being used, guide both cables through the cable channel with one on top of the other.

Using both hands, grasp the plastic tabs on both sides of the machine and gently close the scanner cover.

16 Install

Install MFL-Pro Suite

- Put the supplied installer CD-ROM into your CD-ROM drive.
- Double-click the **Start Here OSX** icon to install.

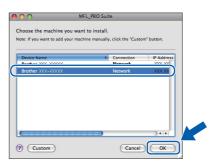

Choose Wired Network Connection (Ethernet), and then click Next. Follow the on-screen instructions.

Please wait for the software to install. After the installation, the Brother software will search for the Brother device. This will take a few moments to complete.

If the machine is configured for your network, choose the machine from the list, and then click **OK**.

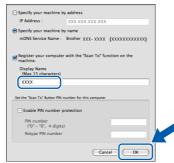

- If your machine is not found over the network, confirm your network settings.
- You can find your machine's MAC Address
 (Ethernet Address) and IP Address by printing
 out the Network Configuration Report.
 ➤ Network User's Guide: Printing the Network
 Configuration Report
- · If this screen appears click OK.

Enter a name for your Macintosh in **Display Name** up to 15 characters long.

If you want to use the machine's SCAN key to scan over the network, you must check the Register your computer with the "Scan To" function on the machine box. Click OK. Go to f.

The name you enter will appear on the machine's LCD when you press the **SCAN** key and choose a scan option. (➤➤ Software User's Guide: Network Scanning)

f

When this screen appears, click Next.

A dialog box will appear and ask if you want to download **NewSoft CD Labeler**. Follow the on-screen instructions. You can also install **NewSoft CD Labeler** from the **Brother Support** screen.

The installation of MFL-Pro Suite is now complete. Go to step **17**.

17

Install NewSoft CD Labeler and Presto! PageManager

The NewSoft CD Labeler application is an easy to use application for printing directly on to printable disc media. The NewSoft CD Labeler application offers templates for creating disc labels along with matching jacket covers or create your own custom disc labels.

When Presto! PageManager is installed OCR capability is added to Brother ControlCenter2. You can easily scan, share and organize photos and documents using Presto! PageManager.

On the **Brother Support** screen, click the **NewSoft CD Labeler** icon, and follow the on-screen instructions.

On the **Brother Support** screen, click the **Presto! PageManager** icon to go to the Presto! PageManager download site, and follow the on-screen instructions.

Install MFL-Pro Suite on additional computers (if needed)

If you want to use your machine with multiple computers on the network, install MFL-Pro Suite on each computer. Go to step **16** on page 23. Also see step **14** on page 22 before you install.

The installation is now complete.

To use Image Capture for scanning on Mac OS X 10.6.x, please install the CUPS Printer Driver, which can be downloaded from your model page on the Brother Solutions Center at http://solutions.brother.com/.

For wireless network interface users

Before you begin

First you must configure the wireless network settings of your machine to communicate with your network access point/router. After the machine is configured to communicate with your access point/router, computers on your network will have access to the machine. To use the machine from these computers, you will need to install the drivers and software. The following steps will guide you through the configuration and installation process.

To achieve optimum results with normal everyday document printing, place the Brother machine as close to the network access point/router as possible with minimal obstructions. Large objects and walls between the two devices as well as interference from other electronic devices can affect the data transfer speed of your documents.

Due to these factors, wireless may not be the best method of connection for all types of documents and applications. If you are printing large files, such as multi-page documents with mixed text and large graphics, you may want to consider choosing wired Ethernet for a faster data transfer or USB for the fastest throughput speed. Although the Brother MFC-J825DW can be used in both a wired and wireless network, only one of the connection

methods can be used at a time.

If you have previously configured the wireless settings of the machine you must reset the network (LAN) settings before you can configure the wireless settings again.

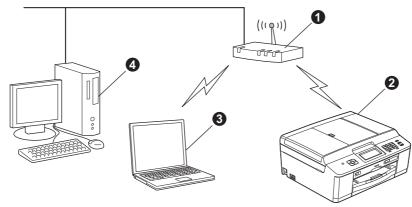

On your machine, press Menu. Press Network.

Press ▲ or ▼ to display Network Reset, and then press Network Reset.

Press Yes to accept. Hold down Yes for 2 seconds to confirm.

The following instructions are for infrastructure mode (connected to a computer through an access point/router).

Infrastructure Mode

- Access point/router
- Wireless Network machine (your machine)
- 3 Wireless capable computer connected to the access point/router
- Wired computer connected to the access point/router

Please make sure the wireless network settings of the machine match the access point/router.

To set up your machine in Ad-hoc mode (connected to a wireless capable computer without an access point/router) you can find instructions in the Network User's Guide on the CD-ROM.

You can view the Network User's Guide by following the instructions below.

- 1 Turn on your computer. Insert the CD-ROM into your CD-ROM drive.
- For Windows[®]:
- 2 Choose your model and the language. The CD-ROM top menu will appear.
- 3 Click **Documentation**, and then click **PDF documents**. The top page will appear.
- 4 Click Network User's Guide.

For Macintosh:

- 2 Double-click **Documentation**, and then double-click your language folder.
- 3 Double-click top.pdf, and then click Network User's Guide.

(19)

For Wireless Network Users

Choose your wireless install method

The following instructions will offer three methods for installing your Brother machine in a wireless network environment.

Configuration using the CD-ROM installer and a USB cable (Windows[®] only)

• You need to temporarily use a USB cable during configuration (cable not included).

It is recommended that you use a PC wirelessly connected to your network for this method.

- If you are using Windows[®] XP, or currently using a computer connected to an access point/router by network cable, you need to know your wireless settings. Please write down your wireless network settings in the area below.
- Please do not contact Brother Customer Service for assistance without the wireless security information. We cannot assist you in locating your network security settings.

Item	Record the current wireless network settings
SSID (Network Name)	
Network Key	

^{*} The Network Key may also be described as the Password, Security Key or Encryption Key.

If you do not know this information (SSID and Network Key), you cannot continue the wireless setup.

How can I find this information?

- 1) You should see the documentation provided with your wireless access point/router.
- 2) The initial network name could be the manufacturer's name or the model name.
- 3) If you do not know the security information, please consult the router manufacturer, your system administrator, or internet provider.

Now go to page 28

b

Manual configuration from the control panel (Windows® and Macintosh)

If your wireless access point/router does not support WPS (Wi-Fi Protected Setup) or AOSS™, write down the wireless network settings of your wireless access point/router in the area below.

Please do not contact Brother Customer Service for assistance without the wireless security information. We cannot assist you in locating your network security settings.

Item	Record the current wireless network settings
SSID (Network Name)	
Network Key	

^{*} The Network Key may also be described as the Password, Security Key or Encryption Key.

If you do not know this information (SSID and Network Key), you cannot continue the wireless setup.

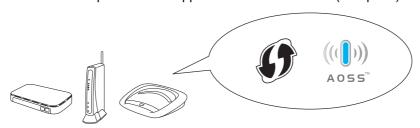

How can I find this information?

- 1) You should see the documentation provided with your wireless access point/router.
- 2) The initial SSID could be the manufacturer's name or the model name.
- 3) If you do not know the security information, please consult the router manufacturer, your system administrator, or internet provider.

Now go to page 31

C One-push configuration using WPS or AOSS™ (Windows® and Macintosh)

If your wireless access point/router supports automatic wireless (one-push) setup (WPS or AOSS™)

Now go to page 32

Configuration using the CD-ROM installer and a USB cable (Windows® only)

You need to temporarily use a USB cable during configuration (cable not included).

Put the supplied installer CD-ROM into your CD-ROM drive. If the model name screen appears, choose your machine. If the language screen appears, choose your language.

If the Brother screen does not appear automatically, go to **My Computer (Computer)**, double-click the CD-ROM icon, and then double-click **start.exe**.

The CD-ROM Top Menu will appear. Click Install MFL-Pro Suite and click Yes if you accept the license agreements. Follow the on-screen instructions.

For Windows Vista[®] and Windows[®] 7, when the User Account Control screen appears, click **Allow** or **Yes**.

Choose Wireless Network Connection, and then click Next.

When this screen appears, choose Change the Firewall port settings to enable network connection and continue with the installation. (Recommended) and click Next.

If you are using a firewall other than the Windows[®] Firewall or the Windows[®] Firewall is off, this screen may appear.

See the instructions provided with your firewall software for information on how to add the following network ports.

- For network scanning, add UDP port 54925.
- For network PC-Fax receiving, add UDP port 54926.
- If you still have trouble with your network connection, add UDP port 137 and 161.
- Choose Use your computer or the control panel directly. and then click Next.

Choose Temporarily use a USB cable (Recommended) and then click Next.

If this screen appears, read the **Important Notice**. Check the box after you confirm the SSID and Network Key, and then click **Next**.

Temporarily connect the USB cable (not included) directly to the computer and the machine.

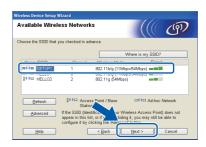

If the confirmation screen appears, check the box and click **Next**, go to **h**. Otherwise, go to **i**.

When the following screen appears, check **Yes** if you want to connect to the listed SSID. Click **Next** and go to **k**.

When the following screen appears, the wizard will search for wireless networks available to your machine. Choose the SSID that you wrote down for your network in step **15-a** on page 26, and then click **Next**.

- If the list is blank, check that the access point has power and is broadcasting the SSID, and then see if the machine and the access point are within range for wireless communication. Then click **Refresh**.
- If your access point is set to not broadcast the SSID you can manually add it by clicking the Advanced button. Follow the on-screen instructions for entering the Name (SSID), and then click Next.

Enter the **Network Key** you wrote down in step **15-a** on page 26 and then enter the key again in **Confirm Network Key**, then click **Next**.

If your network is not configured for Authentication and Encryption, the following screen will appear. To continue configuration, click **OK** and go to **k**.

Click **Next**. The settings will be sent to your machine.

- The settings will remain unchanged if you click Cancel.
- If you want to manually enter the IP address settings of your machine, click Change IP Address and enter the necessary IP address settings for your network.
- If the wireless setup failure screen appears, click Retry and try starting from step i again.

Disconnect the USB cable between the computer and the machine.

Click **Next** to continue to install MFL-Pro Suite.

Wireless setup is now complete. A four level indicator at the upper right of your machine's LCD will show the wireless signal strength of your access point/router.

To install MFL-Pro Suite, continue to step **18-e** on page 36.

Now go to

Page 36

Manual configuration from the control panel (Windows[®] and Macintosh)

On your machine, press Menu.

Press Network.

Press WLAN.

Press Setup Wizard.

When Switch Network interface to wireless? is displayed, press Yes to accept. This will start the wireless setup wizard. To cancel, press \mbox{No} .

The machine will search for available SSIDs. It will take several seconds to display a list of available SSIDs.

If a list of SSIDs is displayed, press ▲ or ▼ to choose the SSID you wrote down in step **15-b** on page 27. Select the SSID you want to connect with.

If the wireless access point/router of the selected SSID supports WPS and the machine asks to use WPS, go to ${\bf c}$.

If the machine asks you to enter a Network Key, go to **d**.

Otherwise, go to e.

- If a list of SSIDs is not displayed, make sure your access point is on. Move your machine closer to the access point and try starting from a again.
- If your access point is set to not broadcast the SSID, you will have to manually add the SSID name. For details, see the Network User's Guide.
- Press Yes to connect your machine using WPS. (If you choose No to continue manual setting, go to d to enter a Network Key.)

 When the LCD shows Start WPS, press the WPS button on your wireless access point/router, and then press Next to proceed.

 Go to e.

Enter the Network Key you wrote down in step **15-b** on page 27 using the Touchscreen.

The letters appear in this order: lower case and then upper case. Press to cycle between letters, numbers and special characters. (The characters available may differ depending on your country.) To move the cursor left or right, press ◀ or ▶.

(For more information, see *Entering Text for Wireless Settings* on page 41.)

Press OK when you have entered all the characters, then press Yes to apply your settings.

- Your machine will now try to connect to your wireless network. It may take a few minutes.
- A connection result message appears for 60 seconds on the LCD and a wireless LAN report will automatically be printed.

 If the connection failed, check the error code on the printed report and refer to *Troubleshooting* on page 33.

Wireless setup is now complete. A four level indicator at the upper right of your machine's LCD will show the wireless signal strength of your access point/router.

To install MFL-Pro Suite, continue to step **17**.

For Windows® Users:

Now go to

Page 38

16

One-push configuration using WPS or AOSS™ (Windows® and Macintosh)

Confirm your wireless access point/router has the WPS or AOSS™ symbol as shown below.

- Place the Brother machine within range of your WPS or AOSS™ access point/router. The range may differ depending on your environment. Refer to the instructions provided with your access point/router.
- On your machine, press Menu.
 Press Network.
 Press WLAN.
 Press WPS/AOSS.

When Switch Network interface to wireless? is displayed, press Yes to accept. This will start the wireless setup wizard. To cancel, press No.

If your wireless access point/router supports WPS (PIN Method), you can also configure your machine using the PIN (Personal Identification Number) Method. ➤➤ Network User's Guide:
Configuration using the PIN Method of Wi-Fi Protected Setup

When the LCD shows Start WPS or AOSS, press the WPS or AOSS™ button on your wireless access point/router. See the user's guide of your wireless access point/router for instructions.

Then press $\bigcirc \mathbb{K}$ and your machine will now automatically detect which mode (WPS or AOSSTM) your wireless access point/router uses and try to connect to your wireless network.

A connection result message appears for 60 seconds on the LCD and a wireless LAN report will automatically be printed.

If the connection failed, check the error code on the printed report and refer to *Troubleshooting* on page 33.

Wireless setup is now complete. A four level indicator at the upper right of your machine's LCD will show the wireless signal strength of your access point/router.

To install MFL-Pro Suite, continue to step **17**.

Troubleshooting

Please do not contact Brother Customer Service for assistance without the wireless security information. We cannot assist you in locating your network security settings.

How can I find the wireless security information (SSID and Network Key)

- 1) You should see the documentation provided with your wireless access point/router.
- 2) The initial SSID could be the manufacturer's name or the model name.
- 3) If you do not know the security information, please consult the router manufacturer, your system administrator, or internet provider.
- * The Network Key may also be described as the Password, Security Key or Encryption Key.

Wireless LAN report

If the wireless LAN report that printed shows that the connection failed, check the error code on the printed report and refer to the following instructions.

Error code	Recommended Solutions		
TS-01	The wireless setting is not activated, turn the wireless setting to ON. - If a LAN cable is connected to your machine, disconnect it and turn the wireless setting of your machine to ON. On your machine, press Menu. Press Network. Press Network I/F. Press WLAN. Press Stop/Exit.		
TS-02	The wireless access point/router cannot be detected. 1. Check the following 4 points. - Make sure that the wireless access point/router is powered on. - Move your machine to an obstruction-free area, or closer to the wireless access point/router. - Temporarily place your machine within about one metre from the wireless access point when you are configuring the wireless settings. - If your wireless access point/router is using MAC address filtering, confirm the MAC address of the Brother machine is allowed in the filter. 2. If you manually entered the SSID and security information (SSID/authentication method/encryption method/Network Key), the information may be incorrect. Reconfirm the SSID and security information and re-enter the correct information as necessary. See How can I find the wireless security information (SSID and Network Key) on page 33 to confirm.		

	The Authentication/Encryption methods used by the selected wireless access point/router are not supported by your machine.			
	For infrastructure mode, change the authentication and encryption methods of the wireless access point/router. Your machine supports the following authentication methods:			
	authentication method	encryption method		
	WPA-Personal	TKIP		
		AES		
	WPA2-Personal	AES	_	
TS-04	Open	WEP None (without encryption)	_	
	Shared key	WEP	-	
	If your problem is not solved, the Reconfirm the wireless network	e SSID or network settings you	entered may be incorrect.	
	See How can I find the wireless security information (SSID and Network Key) on page 33 to confirm.			
	For ad-hoc mode, change the authentication and encryption methods of your computer for the wireless setting. Your machine supports Open authentication method only, with optional WEP encryption.			
TS-05	The security information (SSID/Network Key) is incorrect. Reconfirm the SSID and security information (Network Key). If your router uses WEP encryption, enter the key used as the first WEP key. Your Brother machine supports the use of the first WEP key only.			
	See How can I find the wireless security information (SSID and Network Key) on page 33 to confirm.			
TS-06	The wireless security information (Authentication method/Encryption method/Network Key) is incorrect. Reconfirm the wireless security information (Authentication method/Encryption method/Network Key) in the table of TS-04. If your router uses WEP encryption, enter the key used as the first WEP key. Your Brother machine supports the use of the first WEP key only.			
	See How can I find the wireless security information (SSID and Network Key) on page 33 to confirm.			
	The machine cannot detect a wir	eless access point/router that h	as WPS or AOSS™ enabled.	
TS-07	If you would like to configure your wireless settings using WPS or AOSS™, you must operate both your machine and the wireless access point/router. Confirm your wireless access point/router supports WPS or AOSS™ and try starting again.			
	If you do not know how to operate your wireless access point/router using WPS or AOSS™ see the documentation provided with your wireless access point/router, ask the manufacturer of your wireless access point/router or ask your network administrator.			
	Two or more wireless access po	ints that have WPS or AOSS™	enabled are detected.	
TS-08	 Confirm that only one wireless access point/router within range has the WPS or method active and try again. Try starting again after a few minutes in order to avoid interference from other acpoints. 			

Install the drivers & software

(Windows® XP Home/XP Professional/Windows Vista®/Windows® 7)

Before you install

Make sure that your computer is ON and you are logged on with Administrator rights.

If there are any programs running, close them.

- The screens may differ depending on your operating system.
- The CD-ROM includes ScanSoft™ PaperPort™12SE. This software supports Windows® XP Home (SP3 or greater), XP Professional (SP3 or greater), XP Professional x64 Edition (SP2 or greater), Windows Vista® (SP2 or greater) and Windows® 7. Update to the latest Windows® Service Pack before installing MFL-Pro Suite.

Install MFL-Pro Suite

Put the supplied installer CD-ROM into your CD-ROM drive. If the model name screen appears, choose your machine. If the language screen appears, choose your language.

If the Brother screen does not appear automatically, go to My Computer (Computer). double-click the CD-ROM icon, and then double-click start.exe.

b The CD-ROM Top Menu will appear. Click Install MFL-Pro Suite and click Yes if you accept the license agreements. Follow the on-screen instructions.

For Windows Vista® and Windows® 7, when the User Account Control screen appears, click Allow or Yes.

Choose Wireless Network Connection, and then click Next.

Wireless Network

Windows[®]

When this screen appears, choose Change the Firewall port settings to enable network connection and continue with the installation. (Recommended) and click Next.

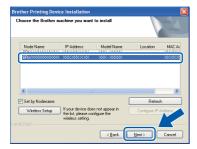

If you are using a firewall other than the Windows[®] Firewall or the Windows[®] Firewall is off, this screen may appear.

See the instructions provided with your firewall software for information on how to add the following network ports.

- For network scanning, add UDP port 54925.
- For network PC-Fax receiving, add UDP port 54926.
- If you still have trouble with your network connection, add UDP port 137 and 161.
- Choose your machine from the list, and then click **Next**.

If you are using WEP and the LCD displayed Connected but your machine is not found on the network, make sure you entered the WEP key correctly. The WEP key is case sensitive.

The installation of the Brother drivers will automatically start. The installation screens appear one after another.

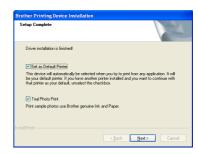

! IMPORTANT

DO NOT cancel any of the screens during the installation. It may take a few seconds for all screens to appear.

Note

For Windows Vista[®] and Windows[®] 7, when the Windows[®] Security screen appears, click the check box and click **Install** to complete the installation correctly.

- When the **On-Line Registration** screen is displayed, make your selection and follow the on-screen instructions.
- If you do not want to set your machine as the Default printer, uncheck **Set as Default Printer** and then click **Next**.

We recommend you try the **Trial Photo Print** selection to see the high quality output available from your Brother machine.

The **Trial Photo Print** screen appears only once after restarting.

Finish and restart

Click Finish to restart your computer. After restarting the computer, you must be logged on with Administrator rights.

- If an error message appears during the software installation, run the Installation Diagnostics located in Start/All Programs/ Brother/MFC-JXXX (where MFC-JXXX is your model name).
- · Depending on your security settings, a Windows® Security or antivirus software window may appear when using the machine or its software. Please allow or permit the window to continue.

The following screens will appear.

- When the Check for Firmware Updates screen appears, choose the firmware update setting you want and click OK.
- · When the Brother Product Research & Support Program starts up, follow the on-screen instructions.
- When the **Trial Photo Print** screen appears, follow the on-screen instructions to print a test photo.

Internet access is required for the firmware update and the Brother Product Research & Support Program.

Install MFL-Pro Suite on additional computers (if needed)

If you want to use your machine with multiple computers on the network, install MFL-Pro Suite on each computer. Go to step 17 on page 35.

Network license (Windows®)

This product includes a PC license for up to 2 Users. This license supports the installation of the MFL-Pro Suite including ScanSoft™ PaperPort[™] 12SE on up to 2 PCs on the network. If you want to use more than 2 PCs with ScanSoft™ PaperPort™12SE installed, please purchase the Brother NL-5 pack which is a multiple PC license agreement pack for up to 5 additional users. To purchase the NL-5 pack, contact your authorized Brother dealer or contact Brother customer service.

The installation is now complete.

Now go to

Proceed to Install Optional Applications on page 40.

XML Paper Specification Printer Driver The XML Paper Specification Printer Driver is the most suitable driver for Windows Vista® and Windows[®] 7 when printing from applications that use the XML Paper Specification documents. Please download the latest driver by accessing the Brother Solutions Center at http://solutions.brother.com/.

Install the drivers & software (Mac OS X 10.4.11, 10.5.x, 10.6.x)

Before you install

Make sure your machine is connected to the power and your Macintosh is ON. You must be logged on with Administrator rights.

For Mac OS X 10.4.0 to 10.4.10 users, upgrade to Mac OS X 10.4.11 - 10.6.x.

18

Install MFL-Pro Suite

- Put the supplied installer CD-ROM into your CD-ROM drive.
- Double-click the **Start Here OSX** icon to install.

Choose Wireless Network Connection, and then click Next.

The Brother software will search for the Brother device in your wireless network. If the machine is configured for your network, choose the device you want to install, and then click **Next**.

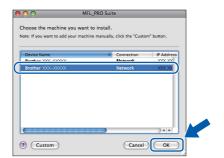

If your wireless settings fail, the **Wireless Device Setup Wizard** screen appears. Follow the
on-screen instructions to complete the wireless
configuration.

Please wait for the software to install. After the installation, this window will appear.

Choose your machine from the list, and then click **OK**.

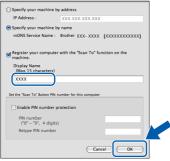

- You can find your machine's MAC Address (Ethernet Address) and IP Address by printing out the Network Configuration Report.
 ➤ Network User's Guide: Printing the Network Configuration Report
- · If this screen appears click OK.

Enter a name for your Macintosh in **Display Name** up to 15 characters long.

If you want to use the machine's **SCAN** key to scan over the network, you must check the **Register your computer with the "Scan To" function on the machine** box. Click **OK**. Go to **f**.

The name you enter will appear on the machine's LCD when you press the **SCAN** key and choose a scan option. (>>Software User's Guide: Network Scanning)

f When this screen appears, click **Next**.

A dialog box will appear and ask if you want to download **NewSoft CD Labeler**. Follow the on-screen instructions. You can also install **NewSoft CD Labeler** from the **Brother Support** screen.

The installation of MFL-Pro Suite is now complete. Go to step **19**.

Install NewSoft CD Labeler and Presto! PageManager

The NewSoft CD Labeler application is an easy to use application for printing directly on to printable disc media. The NewSoft CD Labeler application offers templates for creating disc labels along with matching jacket covers or create your own custom disc labels.

When Presto! PageManager is installed OCR capability is added to Brother ControlCenter2. You can easily scan, share and organize photos and documents using Presto! PageManager.

On the **Brother Support** screen, click the **NewSoft CD Labeler** icon, and follow the on-screen instructions.

On the **Brother Support** screen, click the **Presto! PageManager** icon to go to the Presto! PageManager download site, and follow the on-screen instructions.

Install MFL-Pro Suite on additional computers (if needed)

If you want to use your machine with multiple computers on the network, install MFL-Pro Suite on each computer. Go to step **17** on page 38.

The installation is now complete.

To use Image Capture for scanning on Mac OS X 10.6.x, please install the CUPS Printer Driver, which can be downloaded from your model page on the Brother Solutions Center at http://solutions.brother.com/.

Install Optional Applications

Windows[®]

Install optional applications

FaceFilter Studio/BookScan & Whiteboard Suite supported by Reallusion, Inc

FaceFilter Studio is an easy-to-use borderless photo printing application.

The **BookScan Enhancer** software can correct your scanned book images automatically.

The **Whiteboard Enhancer** software cleans up and enhances text and images from photos taken of your whiteboard.

NewSoft CD Labeler supported by NewSoft ¹

The **NewSoft CD Labeler** application is an easy-to-use application for printing directly on to printable disc media.

Homepage Print 2 supported by Corpus ¹

Homepage Print 2 is an application that helps you capture and edit web pages so that you can print out only the information you need.

¹ See the Software User's Guide for details.

- The machine must be ON and connected to the computer.
- · Some applications require Internet access.
- Make sure you are logged on with Administrator rights.
- This application is not available for Windows Server[®] 2003/2008 series.
- Open the top menu again by ejecting and then reinserting the CD-ROM or by double-clicking the **start.exe** program from the root folder.
- The CD-ROM Top Menu will appear. Choose your language and then click **Additional Applications**.

Click the button for the application you want to install.

Go back to the **Additional Applications** screen to install more applications.

Install FaceFilter Studio Help

To get instructions on how to use FaceFilter Studio, download and install FaceFilter Studio Help.

- To run FaceFilter Studio, go to Start/All Programs/Reallusion/ FaceFilter Studio on your computer.
- Click **Check for updates** on the screen or click the button on the upper right corner of the screen to go to the Reallusion update web page.

- Click the **Download** button and choose a folder to save the file in.
- Close FaceFilter Studio before you start the installer for FaceFilter Studio Help.

 Double-click the downloaded file from the folder you specified and follow the on-screen instructions for installation.

To view the complete FaceFilter Studio Help, choose Start/All Programs/Reallusion/FaceFilter Studio/FaceFilter Studio Help on your computer.

For Network Users

Reset the network settings to factory default

To restore all network settings of the internal Print/Scan server to factory default, please follow the steps below.

- Make sure the machine is not operating, then disconnect all the cables from the machine (except the power cord).
- Press Menu.
- C Press Network.
- Press ▲ or ▼ to display Network Reset and press Network Reset.
- Press Yes.
- f Hold down Yes for 2 seconds to confirm.
- The machine will restart, re-connect cables once this is complete.

Entering Text for Wireless Settings

Up to four letters are assigned to each letter button on the Touchscreen. By pressing the correct button repeatedly, you can access the character you want.

Press to cycle between letters, numbers and special characters. (The characters available may differ depending on your country.)

Inserting spaces

To enter a space, press [10] then press the space button [_____ or _____.

Making corrections

If you entered a character incorrectly and want to change it, press ◀ or ▶ to move the cursor to the incorrect character, press ☒ . Re-enter the correct character. You can also back up and insert a character.

Repeating characters

If you need to enter a character that is on the same button as the character before, press ▶ to move the cursor to the right before you press the button again.

Replacement consumables

When the time comes to replace ink cartridges, an error message will be indicated on the LCD. For more information about the ink cartridges for your machine, visit http://www.brother.com/original/ or contact your local Brother re-seller.

Ink cartridge

Black	Yellow	Cyan	Magenta
LC1220BK (Standard)	LC1220Y (Standard)	LC1220C (Standard)	LC1220M (Standard)
LC1240BK (High Yield)	LC1240Y (High Yield)	LC1240C (High Yield)	LC1240M (High Yield)

What is Innobella™?

Innobella™ is a range of genuine consumables offered by Brother.

The name "Innobella™" derives from the words "Innovation" and "Bella" (meaning

"Beautiful" in Italian) and is a representation of the "innovative" technology providing you with "beautiful" and "long lasting" print results.
