C  Index
Using the documentation

Thank you for buying a Brother machine! Reading the documentation will help you make the most of your machine.

Symbols and conventions used in the documentation

The following symbols and conventions are used throughout the documentation.

- **Bold**: Bold typeface identifies specific buttons on the machine’s control panel, or on the computer screen.

- **Italics**: Italicized typeface emphasizes an important point or refers you to a related topic.

- **Courier New**: Text in the Courier New font identifies messages on the LCD of the machine.

- **WARNING**
  WARNING indicates a potentially hazardous situation which, if not avoided, could result in death or serious injuries.

- **CAUTION**
  CAUTION indicates a potentially hazardous situation which, if not avoided, may result in minor or moderate injuries.

- **IMPORTANT**
  IMPORTANT indicates a potentially hazardous situation which, if not avoided, may result in damage to property or loss of product functionality.

  - Notes tell you how you should respond to a situation that may arise or give tips about how the operation works with other features.

  - Electrical Hazard icons alert you to possible electrical shocks.
Chapter 1

This Basic User’s Guide does not contain all the information about the machine, such as how to use the advanced features of the Fax, Copy, Printer, Scanner, PC-Fax, and Network. When you are ready to learn detailed information about these operations, you can read the Advanced User’s Guide, Software User’s Guide, Network User’s Guide, and Network Glossary that are on the CD-ROM.

Viewing Documentation

Viewing Documentation (Windows®)

To view the documentation, from the Start menu, select Brother, MFC-XXXX (where XXXX is your model name) from the programs list, and then choose User’s Guides.

If you have not installed the software, you can find the documentation on the CD-ROM by following the instructions below:

1. Turn on your PC. Insert the Brother CD-ROM into your CD-ROM drive.

Note

If the Brother screen does not appear automatically, go to My Computer (Computer), double-click the CD-ROM icon, and then double-click start.exe.

2. If the model name screen appears, click your model name.

3. If the language screen appears, click your language. The CD-ROM Top Menu will appear.

4. Click Documentation.

5. Click PDF documents. If the country screen appears, choose your country. After the list of User’s Guides appears, choose the guide you want to read.
Viewing Documentation (Macintosh)

1 Turn on your Macintosh. Insert the Brother CD-ROM into your CD-ROM drive. The following window will appear.

   ![Documentation Window]

2 Double-click the Documentation icon.
3 Double-click your language folder.
4 Double-click top.pdf. If the country screen appears, choose your country.
5 After the list of User’s Guides appears, choose the guide you want to read.

How to find Scanning instructions

There are several ways you can scan documents. You can find the instructions as follows:

Software User’s Guide

- Scanning
- ControlCenter
- Network Scanning

ScanSoft™ PaperPort™12SE with OCR How-to-Guides

(Windows® users)
(Not available in Hong Kong and Taiwan)

- The complete ScanSoft™ PaperPort™12SE with OCR How-to-Guides can be viewed from the Help section in the ScanSoft™ PaperPort™12SE application.

Presto! PageManager User’s Guide

(Windows® users)
(Hong Kong and Taiwan users only)

- Instructions for scanning directly from Presto! PageManager. The complete Presto! PageManager User’s Guide can be viewed from the Help section in the Presto! PageManager application.

Presto! PageManager User’s Guide (Macintosh users)

Note

Presto! PageManager must be downloaded and installed before use. See Accessing Brother Support (Macintosh) page 5 for further instructions.

- The complete Presto! PageManager User’s Guide can be viewed from the Help section in the Presto! PageManager application.
How to find Network setup instructions

Your machine can be connected to a wireless network.

Basic setup instructions

Quick Setup Guide

If your wireless access point or router supports Wi-Fi Protected Setup or AOSS™ Quick Setup Guide

Network setup Network User’s Guide

Accessing Brother Support (Windows®)

You can find all the contacts you will need, such as Web support (Brother Solutions Center) on the CD-ROM.

- Click **Brother Support** on the **Top Menu**.
  The following screen will appear:

  ![Top Menu Screen](image)

  - To access our website (http://www.brother.com/), click **Brother Home Page**.
  - For the latest news and product support information (http://solutions.brother.com/), click **Brother Solutions Center**.
  - To visit our website for original Brother Supplies (http://www.brother.com/original/), click **Supplies Information**.
  - To access the Brother CreativeCenter (http://www.brother.com/creativecenter/) for FREE photo projects and printable downloads, click **Brother CreativeCenter**.
  - To return to the top menu, click **Back** or if you have finished, click **Exit**.
Accessing Brother Support (Macintosh)

You can find all the contacts you will need, such as Web support (Brother Solutions Center) on the CD-ROM.

- Double-click the **Brother Support** icon. The following screen will appear:

![Brother Support Icon](image)

- To download and install Presto! PageManager, click **Presto! PageManager**.

- For the latest news and product support information ([http://solutions.brother.com/](http://solutions.brother.com/)), click **Brother Solutions Center**.

- To visit our website for original Brother Supplies ([http://www.brother.com/original/](http://www.brother.com/original/)), click **Supplies Information**.
Control panel overview

MFC-J430W and MFC-J432W have the same control panel keys.

1 Mode keys:
- **Fax**
  Lets you access the FAX mode.
- **Scan**
  Lets you access the SCAN mode.
- **Copy**
  Lets you access the COPY mode.

2 Telephone keys:
- **Redial/Pause**
  Redials one of the last 30 numbers called. It also inserts a pause when dialling.
- **Hook**
  Press before dialling if you want to make sure a fax machine will answer, and then press Mono Start or Colour Start.
  Also, press this key after picking up the handset of an external telephone during the F/T pseudo/double-ring.

3 Start keys:
- **Mono Start**
  Lets you start sending faxes or making copies in monochrome. Also lets you start a scanning operation (in colour or mono depending on the scan setting in the ControlCenter software).
- **Colour Start**
  Lets you start sending faxes or making copies in full colour. Also lets you start a scanning operation (in colour or mono, depending on the scan setting in the ControlCenter software).

4 **Stop/Exit**
  Stops an operation or exits the menu.

5 **Dial Pad**
  Use these keys to dial telephone and fax numbers and as a keyboard for entering information into the machine.
6 Menu keys:
- **Volume keys**
  - While the machine is idle, you can press these keys to adjust the ring volume.
- **Speed Dial key**
  - Lets you store, look up, and dial numbers that are stored in the memory.
- **or**
  - Press or to move the selected area left or right on the LCD.
- **or**
  - Press or to scroll through the menus and options.
- **Menu**
  - Access the main menu.
- **Clear**
  - Press to delete characters or to go back to the previous menu level.
- **OK**
  - Lets you choose a setting.

7 **LCD (Liquid Crystal Display)**
Displays messages on the screen to help you set up and use your machine.

8 You can turn the machine on and off.
- Press to turn the machine on.

Press and hold down to turn the machine off. The LCD will show Shutting Down and will stay on for a few seconds before going off. If you have connected an external telephone or TAD, it is always available.

If you turn the machine off using the button, it will still periodically clean the print head to maintain print quality. To prolong print head life, provide the best ink cartridge economy, and maintain print quality, you should keep your machine connected to the power at all times.

*Note* Most of the illustrations in this User’s Guide show the MFC-J430W.
LCD screen indications

The LCD shows the current machine status when the machine is idle.

1 Wireless Status
A four level indicator shows the current wireless signal strength if you are using a wireless connection.

![Wireless Status Icon]

2 Current Receive Mode
Lets you see the current Receive Mode.
- Fax (Fax Only)
- F/T (Fax/Tel)
- TAD (External TAD)
- Mnl (Manual)

Note
(For Australia, Singapore and Hong Kong)
When the Distinctive Ring feature is turned on, the LCD shows D/R. For details, see Distinctive Ring page 32 and 37 for your relevant country.

(For New Zealand)
When the FaxAbility feature is turned on, the LCD shows D/R. For details, see FaxAbility page 35.

3 Memory Status
Lets you see the available memory in the machine.

4 Ink indicator
Lets you see the available ink volume.

The warning icon ! appears when there is an error or maintenance message. For details, see Error and Maintenance messages page 59.

Basic Operations

The following steps show how to change a setting in the machine. In this example the Receive Mode setting is changed from Fax Only to Fax/Tel.

1 Press Menu.
2 Press ▲ or ▼ to choose Initial Setup.
   Press OK.
3 Press ▲ or ▼ to choose Receive Mode.
   Press OK.
4 Press ▲ or ▼ to choose Fax/Tel.

Press OK.
You can see the current setting on the LCD:

<table>
<thead>
<tr>
<th>Initial Setup</th>
<th>Receive Mode</th>
<th>Date&amp;Time</th>
<th>Station ID</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Fax Only</td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td>Fax/Tel</td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td>External TAD</td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td>Manual</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Press ▲ or ▼ to choose Fax/Tel.

5 Press Stop/Exit.

---

**Volume Settings**

**Ring Volume**

You can choose from a range of ring volume levels, from High to Off.

While the machine is idle, press ▲ or ▼ to adjust the volume level. The LCD shows the current setting, and each key press will change the volume to the next level. The machine will keep the new setting until you change it.

You can also change the volume through the menu, by following the instructions below:

**Setting the Ring Volume from the menu**

1. Press Menu.
2. Press ▲ or ▼ to choose General Setup. Press OK.
3. Press ▲ or ▼ to choose Volume. Press OK.
4. Press ▲ or ▼ to choose Ring. Press OK.
5. Press ▲ or ▼ to choose Low, Med, High or Off. Press OK.
6. Press Stop/Exit.
**Beeper Volume**

When the beeper is on, the machine will beep when you press a key, make a mistake, or after you send or receive a fax.

You can choose from a range of beeper volume levels, from High to Off.

1. Press Menu.
2. Press ▲ or ▼ to choose General Setup. Press OK.
3. Press ▲ or ▼ to choose Volume. Press OK.
4. Press ▲ or ▼ to choose Beeper. Press OK.
5. Press ▲ or ▼ to choose Low, Med, High or Off. Press OK.
6. Press Stop/Exit.

**Speaker Volume**

You can choose a range of speaker volume levels, from High to Off.

1. Press Menu.
2. Press ▲ or ▼ to choose General Setup. Press OK.
3. Press ▲ or ▼ to choose Volume. Press OK.
4. Press ▲ or ▼ to choose Speaker. Press OK.
5. Press ▲ or ▼ to choose Low, Med, High or Off. Press OK.
6. Press Stop/Exit.

**LCD display**

**Setting the backlight brightness**

If you are having difficulty reading the LCD, try changing the brightness setting.

1. Press Menu.
2. Press ▲ or ▼ to choose General Setup. Press OK.
3. Press ▲ or ▼ to choose LCD Settings. Press OK.
4. Press ▲ or ▼ to choose Backlight. Press OK.
5. Press ▲ or ▼ to choose Light, Med or Dark. Press OK.
6. Press Stop/Exit.
Loading paper and other print media

Load only one size of paper and one type of paper in the paper tray at any one time.

1. Pull the paper tray completely out of the machine.

2. Lift the output paper tray cover (1).

3. With both hands, gently press and slide the paper side guides (1) and then the paper length guide (2) to fit the paper size.
   Make sure that the triangular marks (3) on the paper side guides (1) and paper length guide (2) line up with the marks for the paper size you are using.

Note

If the paper support flap (1) is open, close it, and then close the paper support (2).
When you are using Legal size paper, press and hold the universal guide release button (1) as you slide out the front of the paper tray. (Only available for some countries.)

Fan the stack of paper well to avoid paper jams and misfeeds.

Gently put the paper into the paper tray print side down and top edge in first. Check that the paper is flat in the tray.

Be careful not to push the paper in too far; it may lift at the back of the tray and cause paper feed problems.

When there are only a few sheets of paper left in the paper tray, the machine may start to misfeed. Load at least 10 sheets of paper into the paper tray.

Always make sure that the paper is not curled or wrinkled.
6 Gently adjust the paper side guides (1) to fit the paper using both hands. Make sure the paper side guides touch the sides of the paper.

7 Close the output paper tray cover.

8 Slowly push the paper tray completely into the machine.

9 While holding the paper tray in place, pull out the paper support (1) until it clicks, and then unfold the paper support flap (2).

**IMPORTANT**

DO NOT use the paper support flap for Legal size paper. (Only available for some countries.)
Loading envelopes and postcards

About envelopes

- Use envelopes that weigh between 80 to 95 gsm.
- Some envelopes need margin settings to be set in the application. Make sure you do a test print first before printing many envelopes.

⚠️ IMPORTANT
DO NOT use any of the following types of envelopes, as they will cause paper feed problems:

- That are of a baggy construction.
- That have windows.
- That are embossed (have raised writing on them).
- That have clasps or staples.
- That are pre-printed on the inside.

Glue | Double flaps
---|---
![Glue envelope](image1.png) | ![Double flap envelope](image2.png)

Occasionally you may experience paper feed problems caused by the thickness, size and flap shape of the envelopes you are using.

Loading envelopes and postcards

1. Before loading, press the corners and sides of envelopes or postcards to make them as flat as possible.

⚠️ IMPORTANT
If envelopes or postcards are “double-feeding”, put one envelope or postcard in the paper tray at a time.
Put envelopes or postcards in the paper tray with the address side down and the leading edge (top of the envelopes) in first as shown in the illustration. Using both hands, gently press and slide the paper side guides (1) and paper length guide (2) to fit the size of the envelopes or postcards.

If you have problems printing on envelopes with the flap on the short edge, try the following:

1. Open the envelope flap.
2. Put the envelope into the paper tray with the address side down and the flap positioned as shown in the illustration.

3. Select **Reverse Print** in the printer driver’s dialog box and then adjust the size and margin in your application.

   - Software User’s Guide: *Printing* (Windows®)
   - Software User’s Guide: *Printing and Faxing* (Macintosh)
## Printable area

The printable area depends on the settings in the application you are using. The figures below show the unprintable areas on cut sheet paper and envelopes. The machine can print in the shaded areas of cut sheet paper when the Borderless print feature is available and turned on.

> Software User's Guide: *Printing and Faxing* (Macintosh)

</tbody>
</table>

**Envelopes**

![Envelopes Diagram](image)

**Note**

The Borderless feature is not available for envelopes.
Paper settings

**Paper Type**

To get the best print quality, set the machine for the type of paper you are using.

1. Press Menu.
2. Press ▲ or ▼ to choose General Setup. Press OK.
3. Press ▲ or ▼ to choose Paper Type. Press OK.
4. Press ▲ or ▼ to choose Plain Paper, Inkjet Paper, Brother BP71, Brother BP61, Other Glossy or Transparency. Press OK.
5. Press Stop/Exit.

**Note**

The machine ejects the paper with the printed surfaces face up, onto the paper tray at the front of the machine. When you use transparencies or glossy paper, remove each sheet at once to prevent smudging or paper jams.

**Paper Size**

You can use five sizes of paper for printing copies: A4, A5, Letter, Legal ¹ and 10 × 15 cm and three sizes for printing faxes: A4, Letter and Legal ¹. When you change the size of paper you load in the machine, you will need to change the paper size setting at the same time so your machine can fit an incoming fax on the page.

1. Press Menu.
2. Press ▲ or ▼ to choose General Setup. Press OK.
3. Press ▲ or ▼ to choose Paper Size. Press OK.
4. Press ▲ or ▼ to choose A4, A5, 10x15cm, Letter or Legal ¹. Press OK.
5. Press Stop/Exit.

¹ Only available for some countries.
Acceptable paper and other print media

The print quality can be affected by the type of paper you use in the machine.

To get the best print quality for the settings you have chosen, always set the Paper Type to match the type of paper that is loaded in the tray.

You can use plain paper, inkjet paper (coated paper), glossy paper, transparencies and envelopes.

We recommend testing various paper types before buying large quantities.

For best results, use Brother paper.

- When you print on inkjet paper (coated paper), transparencies and glossy paper, be sure to choose the correct print media in the "Basic" tab of the printer driver or in the Paper Type setting of the menu. (See Paper Type ➤ page 17.)

- When you print on Brother Photo paper, load one extra sheet of the same photo paper in the paper tray. An extra sheet has been included in the paper package for this purpose.

- When printing on to transparencies, load one extra sheet in the paper tray.

- When you use transparencies or photo paper, remove each sheet at once to prevent smudging or paper jams.

- Avoid touching the printed surface of the paper immediately after printing; the surface may not be completely dry and may stain your fingers.

Recommended print media

To get the best print quality, we suggest using Brother paper. (See the table below.)

If Brother paper is not available in your country, we recommend testing various papers before purchasing large quantities.

We recommend using "3M Transparency Film" when you print on transparencies.

Brother paper

<table>

</tr>
</tbody>
</table>
Handling and using print media

- Store paper in its original packaging and keep it sealed. Keep the paper flat and away from moisture, direct sunlight and heat.
- Avoid touching the shiny (coated) side of photo paper. Load photo paper with the shiny side facing down.
- Avoid touching either side of transparencies because they absorb water and perspiration easily, and this may cause decreased output quality. Transparencies designed for laser printers/copiers may stain your next document. Use only transparencies recommended for inkjet printing.

IMPORTANT
DO NOT use the following kinds of paper:

- Damaged, curled, wrinkled, or irregularly shaped paper

1 2 mm or greater curl may cause jams to occur.

- Extremely shiny or highly textured paper
- Paper that cannot be arranged uniformly when stacked
- Short grain paper

Paper capacity of the output paper tray cover
Up to 50 sheets of 80 gsm A4 paper.
- Transparencies and photo paper must be picked up from the output paper tray cover one page at a time to avoid smudging.

<sup>1</sup> Up to 100 sheets of 80 gsm paper.

<sup>2</sup> BP71 (260 gsm) paper is especially designed for Brother inkjet machines.
How to load documents

You can send a fax, make copies, and scan from the ADF (automatic document feeder) and from the scanner glass.

Using the ADF

The ADF can hold up to 15 pages and feeds each sheet individually. Use 90 gsm paper and always fan the edges of the pages before placing them in the ADF.

1 The ADF can hold up to 20 pages, if you stagger the pages and meet the following conditions:
   - Temperature: 20 - 26 °C
   - Humidity: 40 - 50% without condensation
   - Paper: XEROX4200 75 gsm

How to load documents

**IMPORTANT**

- DO NOT pull on the document while it is feeding.
- DO NOT use paper that is curled, wrinkled, folded, ripped, stapled, paper clipped, pasted or taped.
- DO NOT use cardboard, newspaper or fabric with the ADF. Instead use the scanner glass.

Make sure documents written with ink or modified with correction fluid are completely dry.

1 Unfold the ADF Document Support (1) and the ADF Document Support Flap (2).

2 Fan the pages well.

3 Adjust the paper guides (1) to fit the width of your documents. Stagger the pages of the documents and place them **face down, top edge first** in the ADF underneath the guides until you feel them touch the feed rollers. The screen will display **ADF Ready**.
IMPORTANT

DO NOT leave thick documents on the scanner glass. If you do this, the ADF may jam.

4 After using the ADF, close the ADF Document Support Flap and push the upper-left portion of the ADF Document Support to close it completely.

How to load documents

Note
To use the scanner glass, the ADF must be empty.

1 Lift the document cover.

2 Using the document guidelines on the left and top, place the document face down in the upper left corner of the scanner glass.

3 Close the document cover.

Using the scanner glass

You can use the scanner glass to fax, copy or scan pages of a book or one page at a time.

Document Sizes Supported

How to send a fax

The following steps show how to send a fax.

1. When you want to send a fax or change the settings for sending or receiving faxes, press the (FAX).

   - The LCD shows:

2. Do one of the following to load your document:
   - Place the document face down in the ADF. (See Using the ADF page 22.)
   - Load your document face down on the scanner glass. (See Using the scanner glass page 23.)

   - Note
   - To send colour faxes with multiple pages use the ADF.
   - If you send a mono fax from the ADF when the memory is full, it will be sent in real time.
   - You can use the scanner glass to fax pages of a book one at a time. The documents can be up to A4 or Letter size.
   - Since you can only scan one page at a time, it is easier to use the ADF if you are sending a multiple-page document.

3. You can change the following fax sending settings. Press ▲ or ▼ to scroll through the fax settings. When the setting you want is displayed, press OK and choose your option.

   - Glass ScanSize
   - Colour Fax Transmission

4. Enter the fax number.

   - Using the dial pad
   - Using Speed Dial
   - Using call history

Advanced User's Guide: Sending a fax

- Choosing multiple settings
- Contrast
- Fax Resolution
- Set New Defaults
- Factory Reset
- Dual Access
- Faxing at End of Call
- Broadcasting
- Real Time Transmission
- Overseas Mode
- Cancelling Waiting Jobs
Press Mono Start or Colour Start.

Faxing from the ADF
- The machine starts scanning the document to be sent.

Faxing from the scanner glass
- If you pressed Mono Start, the machine starts scanning the first page. Go to step 6.
- If you pressed Colour Start, the LCD asks if you want to send a colour fax. Press 1 to choose Yes (Send) to confirm. The machine starts scanning and sending the document.

6 When the LCD asks you Next Page?, do one of the following:
- To send a single page, press 2 to choose No (Send) (or press Mono Start again).
  The machine starts sending the document.
- To send more than one page, press 1 to choose Yes and go to step 7.

7 Place the next page on the scanner glass.
Press OK.
The machine starts scanning the page.
(Repeat steps 6 and 7 for each additional page.)

8 After all the pages have been scanned, press 2 or Mono Start to start.

Stop faxing
To stop faxing, press Stop/Exit.

Setting scanner glass size for faxing
When documents are Letter size, you need to set Scan Size to Letter. If you do not, the side portion of the faxes will be missing.

1 Press (FAX).
2 Press ▲ or ▼ to choose Advanced Settings. Press OK.
3 Press ▲ or ▼ to choose Glass ScanSize. Press OK.
4 Press ▲ or ▼ to choose A4 or Letter. Press OK.

Note
- You can save the setting you use most often by setting it as the default. (Advanced User's Guide: Setting your changes as a new default)
- This setting is only available for sending documents from the scanner glass.

Colour fax transmission
Your machine can send a colour fax to machines that support this feature.

Colour faxes cannot be stored in the memory. When you send a colour fax, the machine will send it in real time (even if Real Time TX is set to Off).

Cancelling a fax in progress
If you want to cancel a fax while the machine is scanning, dialling or sending, press Stop/Exit.
Transmission Verification Report

You can use the Transmission Verification Report as proof that you sent a fax. This report lists the sender's name or fax number, the time and date of transmission, duration of transmission, number of pages sent, and whether or not the transmission was successful.

There are several settings available for the Transmission Verification Report:

- **On**: Prints a report after every fax you send.
- **On+Image**: Prints a report after every fax you send. A portion of the fax's first page appears on the report.
- **Off**: Prints a report if your fax is unsuccessful due to a transmission error. Off is the default setting.
- **Off+Image**: Prints a report if your fax is unsuccessful due to a transmission error. A portion of the fax's first page appears on the report.

1. Press Menu.
2. Press ▲ or ▼ to choose Fax. Press OK.
3. Press ▲ or ▼ to choose Report Setting. Press OK.
4. Press ▲ or ▼ to choose Transmission. Press OK.
5. Press ▲ or ▼ to choose On, On+Image, Off or Off+Image. Press OK.
6. Press Stop/Exit.

**Note**

- If you choose **On+Image** or **Off+Image**, the image will only appear on the Transmission Verification Report if Real Time Transmission is set to Off. (Advanced User's Guide: Real Time Transmission)
- If your transmission is successful, "OK" will appear next to "RESULT" on the Transmission Verification Report. If the transmission is not successful, "ERROR" will appear next to "RESULT".

• If you choose **On+Image** or **Off+Image**, the image will only appear on the Transmission Verification Report if Real Time Transmission is set to Off. (Advanced User's Guide: Real Time Transmission)

• If your transmission is successful, "OK" will appear next to "RESULT" on the Transmission Verification Report. If the transmission is not successful, "ERROR" will appear next to "RESULT".
Receive Modes

You must choose a Receive Mode depending on the external devices and telephone services you have on your line.

Choose the Receive Mode

By default, your machine will automatically receive any faxes that are sent to it. The diagram below will help you choose the correct mode.

For more detailed information on the Receive Modes, see Using Receive Modes page 29.

To set a Receive Mode follow the instructions below:

1. Press Menu.
2. Press ▲ or ▼ to choose Initial Setup. Press OK.
3. Press ▲ or ▼ to choose Receive Mode. Press OK.
4. Press ▲ or ▼ to choose Fax Only, Fax/Tel, External TAD or Manual. Press OK.
5. Press Stop/Exit.
   The LCD will display the current Receive Mode.
Using Receive Modes

Some Receive Modes answer automatically (Fax Only and Fax/Tel). You may want to change the ring delay before using these modes. (See Ring Delay page 30.)

Fax Only

Fax Only mode will automatically answer every call as a fax call.

Fax/Tel

Fax/Tel mode helps you automatically manage incoming calls, by recognising whether they are fax or voice calls and dealing with them in one of the following ways:

- Faxes will be automatically received.
- Voice calls will start the F/T Ring to tell you to pick up the line. The F/T Ring is a fast double-ring made by your machine.

(See F/T Ring Time (Fax/Tel mode only) page 30 and Ring Delay page 30.)

Manual

To receive a fax in Manual mode lift the handset of an external telephone. When you hear fax tones (short repeating beeps), press Mono Start or Colour Start, and then press 2 to choose Receive. You can also use the Fax Detect feature to receive faxes by lifting a handset on the same line as the machine.

(See Fax Detect page 31.)

External TAD

External TAD mode lets an external answering device manage your incoming calls. Incoming calls will be dealt with in one of the following ways:

- Faxes will be automatically received.
- Voice callers can record a message on the external TAD.

(For more information see Connecting an external TAD (telephone answering device) page 39.)
Receive Mode settings

Ring Delay

The Ring Delay sets the number of times the machine rings before it answers in Fax Only or Fax/Tel mode. If you have external or extension telephones on the same line as the machine choose the maximum number of rings.

(See Operation from external and extension telephones page 41 and Fax Detect page 31.)

1. Press Menu.
2. Press ▲ or ▼ to choose Fax. Press OK.
3. Press ▲ or ▼ to choose Setup Receive. Press OK.
4. Press ▲ or ▼ to choose Ring Delay. Press OK.
5. Press ▲ or ▼ to choose how many times you want the machine to ring before it answers (2-10 for Australia, 1-10 for New Zealand, 0-2 for Taiwan, 0-10 for some countries). Because the restriction of Taiwan's Telecommunication law, the products sold in this area cannot be set to more than 3 cycle rings. Press OK. If you choose 0, the machine will answer immediately and the line will not ring at all.
6. Press Stop/Exit.

F/T Ring Time

(Fax/Tel mode only)

When somebody calls your machine, you and your caller will hear the normal telephone ring. The number of rings is set by the Ring Delay setting.

If the call is a fax, then your machine will receive it; however, if it is a voice call the machine will sound the F/T Ring (a fast double-ring) for the time you have set in the F/T Ring Time setting. If you hear the F/T Ring it means that you have a voice caller on the line.

Because the F/T Ring is made by the machine, extension and external telephones will not ring; however, you can still answer the call on any telephone by using a remote code. (For more information see Using remote codes page 41.)

1. Press Menu.
2. Press ▲ or ▼ to choose Fax. Press OK.
3. Press ▲ or ▼ to choose Setup Receive. Press OK.
4. Press ▲ or ▼ to choose F/T Ring Time. Press OK.
5. Press ▲ or ▼ to choose how long the machine will ring to alert you that you have a voice call (20, 30, 40 or 70 seconds for Australia and some countries, 20, 30, 40 or 55 seconds for New Zealand). Press OK.
6. Press Stop/Exit.

Note

Even if the caller hangs up during the fast double-ring, the machine will continue to ring for the set time.
Fax Detect

If Fax Detect is On:
Fax Detect is turned On as default.

The machine receives a fax call automatically, even if you answer the call. When you see Receiving on the LCD or when you hear “chirps” through the handset you are using, just replace the handset. Your machine will do the rest.

If Fax Detect is Off:
If you are at the machine and answer a fax call by lifting the handset, press Mono Start or Colour Start, then press 2 to receive the fax.

If you answered at an extension or external telephone, press * 5 1 (* 9 1 for New Zealand). (See Operation from external and extension telephones page 41.)

Note
• If this feature is set to On, but your machine does not connect a fax call when you lift an extension or external telephone handset, press the remote activation code * 5 1 (* 9 1 for New Zealand).
• If you send faxes from a computer on the same telephone line and the machine intercepts them, set Fax Detect to Off.

1 Press Menu.

2 Press ▲ or ▼ to choose Fax. Press OK.

3 Press ▲ or ▼ to choose Setup Receive. Press OK.

4 Press ▲ or ▼ to choose Fax Detect. Press OK.

5 Press ▲ or ▼ to choose On (or Off). Press OK.

6 Press Stop/Exit.
Voice operations

Tone or pulse (Not Available for New Zealand)

If you have a Pulse dialling service, but need to send tone signals (for example, for telephone banking), follow the instructions below:

1. Press Hook.
2. Press # on the machine’s control panel. Any digits dialled after this will send tone signals.

When you are finished with the call, the machine will return to the Pulse dialling service.

Fax/Tel mode

When the machine is in Fax/Tel mode, it will use the F/T Ring (fast double-ring) to alert you to pick up a voice call.

If you are at an external telephone, lift the handset of the external telephone, and then press Hook to answer.

If you are at an extension telephone, you’ll need to lift the handset during the F/T Ring Time and then press # 5 1 (# 9 1 for New Zealand) between the fast double-rings. If no one is on the line, or if someone wants to send you a fax, send the call back to the machine by pressing * 5 1 (* 9 1 for New Zealand).

Telephone Service for Australia

Distinctive Ring

Distinctive Ring 1 is a function of your Brother machine that allows a person with one line to receive fax and voice calls through two different phone numbers on that one line.

Brother uses the term “Distinctive Ring”, but telephone companies market the service under a variety of names. This service establishes a second telephone number on the same line as your existing telephone number, and each number has its own ring pattern. Typically, the original number rings with the standard ring pattern and is used for receiving voice calls, and the second number rings with a different ring pattern and is used for receiving faxes. Only one call can be answered (or made) at any one time and while this call is in progress, incoming calls to either number will be presented with a busy tone.

Note

1 Contact your Telephone Service Provider to determine availability and any other related details.

After you have set the Distinctive Ring feature to On, the receive mode is set to Manual automatically. Your Distinctive Ring Number does not allow Voice calls - only Faxes. You can not change the receive mode from Manual mode while the Distinctive Ring is set to on.
How does your telephone company’s “Distinctive Ring” service work?

Using “Distinctive Ring” service of your telephone company is the most efficient way to receive both fax and telephone calls on the same line. When the voice call comes in, all phones (extension and external) and the fax machine will ring to alert you to pick it up. If a fax call comes in, the fax machine will answer automatically without ringing, whereas the extension and external phones will ring twice with a Distinctive Ring pattern. It is also a more efficient way of operating a Fax machine with an extension phone as you do not have to use the remote activation codes. It gives you two independent numbers without the higher cost of a second line.

What does Brother’s “Distinctive Ring” do?

The Brother machine has a Distinctive Ring feature that allows you to use your machine to take full advantage of the telephone company’s Distinctive Ring service. The new telephone number on your line can just receive faxes.

Turning on Distinctive Ring

**Very Important!**

After you have set the Distinctive Ring feature to on, the receive mode is set to Manual automatically. Your Distinctive Ring Number does not allow Voice calls - only Faxes. You cannot change the receive mode to another mode while the Distinctive Ring is set to on. When Distinctive Ring is on, the LCD will show D/R as the Receive Mode.

1. Press Menu.
2. Press ▲ or ▼ to choose Fax. Press OK.
3. Press ▲ or ▼ to choose Miscellaneous. Press OK.
4. Press ▲ or ▼ to choose Distinctive. Press OK.
5. Press ▲ or ▼ to choose On. Press OK.
6. Press Stop/Exit. Distinctive Ring is now set to on.

Turning off Distinctive Ring

1. Press Menu.
2. Press ▲ or ▼ to choose Fax. Press OK.
3. Press ▲ or ▼ to choose Miscellaneous. Press OK.
4. Press ▲ or ▼ to choose Distinctive. Press OK.
5. Press ▲ or ▼ to choose Off. Press OK.
6. Press Stop/Exit.
Note
If you turn off Distinctive Ring, the machine will stay in Manual receive mode. You will need to set the Receive Mode again. (See Choose the Receive Mode page 28.)

Caller ID

Caller ID is a telephone service that allows the subscriber to see a display of the caller’s phone number or name as the telephone rings. It is a fast way to screen your calls. You can respond quickly to calls you missed, because Caller IDs are received and stored in your machine memory.

Note
To get the Caller ID Service: apply for the Caller ID service at your local telephone company, if available.

Advantages of Caller ID

For Business
All businesses profit from a quicker response to customer calls. Businesses that provide mail order services, money-lending services or provide confidential information, can protect themselves from false orders or acceptance of false identification.

At Home
Residential customers can protect themselves from unwanted calls.

How Does the Caller ID Work?

The Caller ID Appears on the Display When Your Telephone Rings
As your telephone rings, the display shows you the caller’s phone number or name if the name has been stored as Speed Dial. Once you answer the call, the caller’s ID disappears.

Note
• If ID Unknown appears on the display, it means that the call came from outside your caller ID service area or a public phone. ¹
• If ID Withheld appears on the display, it means the caller intentionally blocked the transmission of his/her ID. ¹

¹ Depends on network function.

The Caller ID is Stored in Your Machine Memory

The machine can store a maximum of the last 30 incoming caller IDs in the memory, along with the time and date of reception. The 31st call will cause the oldest ID to be erased.

The Caller ID information stored in the memory can be used for the following.

Printing the Caller ID List.
You can review calls you received by checking the Caller IDs in memory. This report will list the Date, Time, Phone Number (Caller ID) name, and type of Call (Comment) if available.

Advanced User’s Guide: How to print a report
Telephone Service for New Zealand

FaxAbility

FaxAbility is a service offered by Telecom that allows you to have an additional number on one phone line, with its own distinctive ring pattern. This way, when you get an incoming call, you can identify the number being called by its ring.

How Will the Fax Machine Treat All Other Numbers?

FaxAbility mode ensures that the machine will answer calls to the FaxAbility (secondary) number. When a call comes in to your main number, all the phones will ring. You can set an external answering device (TAD) to answer calls on the other number(s). (See the chart in this page.)

What is the Advantage of Using the FaxAbility Function?

Using FaxAbility is the most efficient way to receive both fax and telephone calls on the same line. It is much easier for your callers who dial manually. The fax machine will answer with receiving tones so they will not have to press an activation code. And the people who call to talk on your main number will not have to talk to your fax machine. Basically, it gives you two independent numbers without the higher cost of a second line.

How Does FaxAbility Work?

Your telephone number will have the standard ring pattern of long, long tone, while the new number will have a ring pattern of long, silence, long, etc. When FaxAbility is On, you will not hear the first ring of all incoming calls on the fax machine. Extension phones will ring as usual. If the fax machine recognizes the ring pattern, all ringing will stop and the fax machine will answer and automatically receive the fax message. Otherwise, you will hear the extension phones and the fax machine continue to ring. The fax machine always listens to the ring pattern before it answers, so do not pick up the phone during that time. You will quickly learn to recognize the ring pattern for faxes, so you will not be tempted to answer that number. Either you or a telephone answering device can answer the main number(s).

Flowchart Sequence of Incoming call

```
Incoming Call (either Voice or Fax)

Main number (Voice Number)

Fax machine begins ringing on third ring.

Telephone Answering Device (TAD) answers the call.

Fax machine automatically receives and prints fax message without ringing.

You answer the call at an external phone or an extension phone or at the machine's handset.

Registered Fax Number

All extension phones ring twice, fax machine is silent.

Fax machine automatically receives and prints fax message without ringing.

Registered Fax Number

Main number (Voice Number)
```

Incoming Call (either Voice or Fax)

All extension phones ring twice, fax machine is silent.

Registered Fax Number

Main number (Voice Number)

Fax machine begins ringing on third ring.

Telephone Answering Device (TAD) answers the call.

Received Fax Message

Fax machine automatically receives and prints fax message without ringing.

You answer the call at an external phone or an extension phone or at the machine’s handset.
After you have set the FaxAbility feature to On, the receive mode is set to Manual automatically. Unless you have a TAD or Voice Mail set up on the FaxAbility number, Manual mode means you must answer all the call yourself. You can not change the receive mode to the other mode while the FaxAbility is set to on. When FaxAbility is on, the LCD will show D/R as the Receive Mode.

How to Turn FaxAbility OFF or ON

The FaxAbility function is designed to accommodate the FaxAbility service provided by Telecom. To change the setting, repeat steps 1-8. Step 6 is where you can choose either On or Off.

Call Waiting beeps caused by incoming calls on your main number can affect fax transmissions. If you have FaxAbility Service but don’t have Call Waiting, you need do nothing at this stage. If you do have Call Waiting as well as FaxAbility, set the Call Waiting menu option to On, See below.

1. Press Menu.
2. Press ▲ or ▼ to choose Fax. Press OK.
3. Press ▲ or ▼ to choose Miscellaneous. Press OK.
4. Press ▲ or ▼ to choose FaxAbility. Press OK.
5. Press ▲ or ▼ to choose On (or Off). If you have FaxAbility service, choose On. Press OK.
6. Press ▲ or ▼ to choose Call Waiting. Press OK.
7. Press ▲ or ▼ to choose On (or Off). If you have Call Waiting service, choose On to avoid the trouble caused by Call Waiting. Press OK.
8. Press Stop/Exit.

Caller ID

Caller ID is a telephone service that allows the subscriber to see a display of the caller’s phone number and name as available as the telephone rings. It is a fast way to screen your calls. You can respond quickly to calls you missed, because Caller IDs are received and stored in your machine memory.

To get the Caller ID Service, apply for the Caller ID service at your local telephone company, if available.

Advantages of Caller ID

For Business

All businesses profit from a quicker response to customer calls. Businesses that provide mail order services, money-lending services or provide confidential information, can protect themselves from false orders or acceptance of false identification.

At Home

Residential customers can protect themselves from unwanted calls.
How Does the Caller ID Work?

The Caller ID Appears on the Display When Your Telephone Rings

As your telephone rings, the display shows you the caller’s phone number or name if available. Once you answer the call, the caller’s ID disappears. You can print a list of the Caller ID information received by your machine.

Advanced User’s Guide: How to print a report

Note

• If ID Unknown appears on the display, it means that the call came from outside your caller ID service area. ¹
• If ID Withheld appears on the display, it means the caller intentionally blocked the transmission of his/her ID. ¹

¹ Depends on network function.

Telephone Service for Some Countries

Distinctive Ring (For Singapore and Hong Kong)

This machine feature lets you use the Distinctive Ring subscriber service offered by some telephone companies, which allows you to have several telephone numbers on one phone line. Each phone number has its own Distinctive Ring pattern, so you will know which phone number is ringing. This is one way you can have a separate phone number for your machine.

Your machine has a Distinctive Ring function, allowing you to dedicate one phone number just for receiving faxes. You will need to set Distinctive Ring to On.

Note

You can switch it off temporarily, then turn it back on. When you get a new fax number, make sure you reset this function.

• The machine will answer only calls to the Distinctive Ring number.

Turning on Distinctive Ring

Very Important!

After you have set the Distinctive Ring feature to on, the receive mode is set to Manual automatically. Unless you have a TAD or Voice Mail set up on the Distinctive Ring number, Manual mode means you must answer all the calls yourself. You cannot change the receive mode to another mode while the Distinctive Ring is set to on. When Distinctive Ring is on, the LCD will show D/R as the Receive Mode.

1. Press Menu.
2. Press ▲ or ▼ to choose Fax. Press OK.
3. Press ▲ or ▼ to choose Miscellaneous. Press OK.

4. Press ▲ or ▼ to choose Distinctive. Press OK.

5. Press ▲ or ▼ to choose On. Press OK.

6. Press Stop/Exit. Distinctive Ring is now set to on.

Turning off Distinctive Ring

1. Press Menu.

2. Press ▲ or ▼ to choose Fax. Press OK.

3. Press ▲ or ▼ to choose Miscellaneous. Press OK.

4. Press ▲ or ▼ to choose Distinctive. Press OK.

5. Press ▲ or ▼ to choose Off. Press OK.

6. Press Stop/Exit.

Note

If you turn off Distinctive Ring, the machine will stay in Manual receive mode. You will need to set the Receive Mode again. (See Choose the Receive Mode page 28.)

Caller ID (For Singapore and Hong Kong)

The Caller ID feature of this machine lets you use the Caller ID subscriber service offered by many local phone companies. Call your telephone company for details. This service provides you, by means of the screen display, the telephone number (or name) of your caller as the line rings.

After a few rings, the screen displays the telephone number of your caller (or name, if available). Once you answer the call, the Caller ID information disappears from the screen, but the call information remains stored in the Caller ID memory.

- ID Unknown display means call originates outside your Caller ID service area.
- ID Withheld display means the caller has intentionally blocked transmission of information.

Note

You can print a list of Caller ID information received by your machine.

Advanced User’s Guide: How to print a report

Caller ID service varies with different carriers. Call your local phone company to determine the kind of service available in your area.
Connecting an external TAD (telephone answering device)

You may choose to connect an external answering device. However, when you have an external TAD on the same telephone line as the machine, the TAD answers all calls and the machine “listens” for fax calling (CNG) tones. If it hears them, the machine takes over the call and receives the fax. If it does not hear CNG tones, the machine lets the TAD continue playing your outgoing message so your caller can leave you a voice message.

The TAD must answer within two rings (the recommended setting is two rings). The machine cannot hear CNG tones until the TAD has answered the call, and with four rings there are only 8 to 10 seconds of CNG tones left for the fax “handshake”. Make sure you carefully follow the instructions in this guide for recording your outgoing message. We do not recommend using the toll saver feature on your external answering machine if it exceeds five rings.

Note
If you do not receive all your faxes, shorten the Ring Delay setting on your external TAD.

Directions

1 TAD
2 Protective Cap

When the TAD answers a call, the LCD shows Telephone.

! IMPORTANT
DO NOT connect a TAD elsewhere on the same telephone line.

Connections settings

The external TAD must be connected as shown in the previous illustration.

1 Set your external TAD to one or two rings. (The machine’s Ring Delay setting does not apply.)

2 Record the outgoing message on your external TAD.

3 Set the TAD to answer calls.

4 Set the Receive Mode to External TAD. (See Choose the Receive Mode ▶▶ page 28.)
Recording an outgoing message (OGM) on an external TAD

Timing is important in recording this message.

1. Record 5 seconds of silence at the beginning of your message. (This allows your machine time to listen for the fax CNG tones of automatic transmissions before they stop.)

2. Limit your speaking to 20 seconds.

**Note**

We recommend beginning your OGM with an initial 5-second silence because the machine cannot hear fax tones over a resonant or loud voice. You may try omitting this pause, but if your machine has trouble receiving, then you must re-record the OGM to include it.

Multi-line connections (PABX)

Most offices use a central telephone system. Brother recommends that all our machines be connected to a discreet (dedicated) line. Although a particular PABX may appear to work with a particular model of fax machine, we cannot guarantee that the unit will operate correctly.

While it is often relatively simple to connect a fax machine to a PABX, (Private Automatic Branch Exchange), we suggest that you contact the company that installed your telephone system and ask them to connect the fax machine for you.

Brother does not recommend the use of a PABX line. PABX limitations in general can cause some functions of the fax machine not to work correctly.

External and extension telephones

Connecting an external or extension telephone

You can connect a separate telephone to your machine as shown in the diagram below.
Operation from external and extension telephones

If you answer a fax call on an extension or an external telephone, you can make your machine take the call by using the Remote Activation Code. When you press the Remote Activation Code * 5 1 (* 9 1 for New Zealand), the machine starts to receive the fax.

If the machine answers a voice call and fast double-rings for you to take over, use the Remote Deactivation Code # 5 1 (# 9 1 for New Zealand) to take the call at an extension telephone. (See F/T Ring Time (Fax/Tel mode only) page 30.)

If you answer a call and no one is on the line:

You should assume that you’re receiving a manual fax.

Press * 5 1 (* 9 1 for New Zealand) and wait for the chirp or until the LCD shows Receiving, and then hang up.

Note

You can also use the Fax Detect feature to make your machine automatically take the call. (See Fax Detect page 31.)

Using a cordless external telephone

Once the base unit of the cordless telephone has been connected to the same telephone line as the machine (see External and extension telephones page 40), it is easier to answer calls during the Ring Delay if you carry the cordless handset around with you.

If you let the machine answer first, you will have to go to the machine and press Hook to send the call to the cordless handset.

Using remote codes

Remote Activation Code

If you answer a fax call on an extension or external telephone, you can tell your machine to receive it by dialling the Remote Activation Code * 5 1 (* 9 1 for New Zealand). Wait for the chirping sounds then replace the handset. (See Fax Detect page 31.)

If you answer a fax call at the external telephone, you can make the machine receive the fax by pressing Mono Start and 2 to choose Receive.

Remote Deactivation Code

If you receive a voice call and the machine is in Fax/Tel mode, it will start to sound the F/T Ring (fast double-ring), after the initial Ring Delay. If you pick up the call on an extension telephone you can turn the F/T Ring off by pressing # 5 1 (# 9 1 for New Zealand) (make sure you press this between the rings).

If the machine answers a voice call and fast double-rings for you to take over, you can take the call at the external telephone by pressing Hook.
Changing the remote codes

If you want to use Remote Activation, you have to turn on the remote codes. The preset Remote Activation Code is * 5 1 (* 9 1 for New Zealand). The preset Remote Deactivation Code is # 5 1 (# 9 1 for New Zealand). If you want to, you can replace them with your own codes.

1. Press Menu.
2. Press ▲ or ▼ to choose Fax. Press OK.
3. Press ▲ or ▼ to choose Setup Receive. Press OK.
4. Press ▲ or ▼ to choose Remote Codes. Press OK.
5. Press ▲ or ▼ to choose On (or Off). Press OK.
6. Enter the new Remote Activation Code. Press OK.
7. Enter the new Remote Deactivation Code. Press OK.
8. Press Stop/Exit.

Note

- If you are always disconnected when accessing your external TAD remotely, try changing the Remote Activation Code and Remote Deactivation Code to another three-digit code using the numbers 0-9, *, #.
- Remote Codes might not work with some telephone systems.
How to dial

Manual dialling

Press all of the digits of the fax or telephone number.

Press all of the digits of the fax or telephone number.

Speed Dialling

1. Press Speed Dial (Speed Dial). You can also choose Speed Dial by pressing Fax (FAX).

2. Press ▲ or ▼ to choose Search. Press OK.

3. Do one of the following:
   - Press ▲ or ▼ to choose Alphabetical Order or Numerical Order. Press OK.
   - Press the 2-digit Speed Dial number using the dial pad. (See Storing Speed Dial numbers ➞ page 46.)

4. Press ▲ or ▼ to choose the number you want to dial. Press OK.

5. Press OK to choose Send a fax.

Search

You can search for names you have stored in the Speed Dial memory.

1. Press Speed Dial (Speed Dial).

2. Press ▲ or ▼ to choose Search. Press OK.

3. Press ▲ or ▼ to choose Alphabetical Order or Numerical Order. Press OK.

4. If you chose Alphabetical Order in step 3, use the dial pad to enter the first letter of the name, and then press ▲ or ▼ to choose the name and number you want to call. Press OK.

Note

If the LCD shows Not Registered when you enter or search a Speed Dial number that has not been stored at this location.
Fax Redial

If you are sending a fax manually and the line is busy, press **Hook, Redial/Pause**, and then press **Mono Start** or **Colour Start** to try again.

**Redial/Pause** only works if you dialled from the control panel. *If you are sending a fax automatically* and the line is busy, the machine will automatically redial up to three times at five minute intervals.

1. Press **Redial/Pause**.
2. Press ▲ or ▼ to choose the number you want to redial. Press **OK**.
3. Press ▲ or ▼ to choose **Send a fax**. Press **OK**.
4. Press **Mono Start** or **Colour Start**.

**Note**

In Real Time Transmission the automatic redial feature does not work when using the scanner glass.

Additional Dialling Operations

Outgoing Call history

The last 30 numbers you sent a fax to will be stored in the outgoing call history. You can choose one of these numbers to fax to, add to Speed Dial, or delete from the history.

1. Press **Redial/Pause**. You can also choose **Outgoing Call** by pressing (FAX).
2. Press ▲ or ▼ to choose the number you want. Press **OK**.
3. Do one of the following:
   - To send a fax, press ▲ or ▼ to choose **Send a fax**. Press **OK**.
   - Press **Mono Start** or **Colour Start**.
   - If you want to store the number, press ▲ or ▼ to choose **Add to Speed Dial**. Press **OK**.
   - (Advanced User's Guide: Storing Speed Dial numbers from Outgoing Calls)
     - If you want to delete the number from the Outgoing Call history list, press ▲ or ▼ to choose **Delete**. Press **OK**.
     - Press 1 to confirm.
4. Press **Stop/Exit**.
**Caller ID history**

This feature requires the Caller ID subscriber service offered by many local telephone companies. (See *Caller ID* page 34, 36 and 38 for your relevant country.)

The numbers, or names if available, from the last 30 faxes and telephone calls you received will be stored in the Caller ID history. You can view the list or choose one of these numbers to fax to, add to Speed Dial, or delete from the history. When the thirty-first call comes into the machine, it replaces information about the first call.

**Note**

If you are not a Caller ID subscriber, you can still view call dates from the Caller ID history, and delete entries from the list.

1. Press Redial/Pause and press *. You can also choose Caller ID hist. by pressing (FAX).
2. Press ▲ or ▼ to choose the number you want. Press OK.
3. Do one of the following:
   - To send a fax, press ▲ or ▼ to choose Send a fax. Press OK. Press Mono Start or Colour Start.
   - If you want to store the number, press ▲ or ▼ to choose Add to Speed Dial. Press OK.
     (Advanced User’s Guide: Storing Speed Dial numbers from the Caller ID history)
   - If you want to delete the number from the Caller ID history list, press ▲ or ▼ to choose Delete. Press OK. Press 1 to confirm.

4. Press Stop/Exit.

**Note**

You can print the Caller ID list. (Advanced User’s Guide: How to print a report)
Storing numbers

You can set up your machine to do the following types of easy dialling: Speed Dial and Groups for broadcasting faxes. When you dial a Quick Dial number, the LCD shows the number.

Note

If you lose electrical power, the Quick Dial numbers that are in the memory will not be lost.

Storing a pause

Press Redial/Pause to put a 3.5 second pause between numbers. If you are dialling overseas, you can press Redial/Pause as many times as needed to increase the length of the pause.

Storing Speed Dial numbers

You can store up to 40 2-digit different Speed Dial numbers with a name, and each name has one number. When you dial you will only have to press a few keys (for example: (Speed Dial), Search, OK, the two-digit number, and Mono Start or Colour Start).

1. Press (Speed Dial).
2. Press ▲ or ▼ to choose Set Speed Dial. Press OK.
3. Press ▲ or ▼ to choose the 2-digit Speed Dial location where you want to store the number in. Press OK.

4. Do one of the following:
   ■ Enter the name (up to 16 characters) using the dial pad. Press OK.
   (To help you enter letters, see Entering Text page 92.)
   ■ To store the number without a name, press OK.
5. Enter the fax or telephone number (up to 20 digits). Press OK.
6. Press ▲ or ▼ to choose Complete. Press OK.
7. Do one of the following:
   ■ To store another Speed Dial number, go to step 3.
   ■ If you are finished storing numbers, press Stop/Exit.

Changing Speed Dial names or numbers

You can change a Speed Dial name or number that has already been stored.

1. Press (Speed Dial).
2. Press ▲ or ▼ to choose Set Speed Dial. Press OK.
3. Press ▲ or ▼ to choose the 2-digit Speed Dial location you want to change. Press OK.
4. Do one of the following:
   ■ Press ▲ or ▼ to choose Change. Press OK.
   ■ Press ▲ or ▼ to choose Delete. Press OK.
   Press 1 to confirm. Go to step 3.
**Note**

How to change the stored name or number:

If you want to change a character, press ◄ or ► to position the cursor under the character you want to change, and then press Clear. Re-enter the character.

5. If you want to change the name, press ▲ or ▼ to choose Name, then press OK and enter the new name using the dial pad (up to 16 characters). Press OK.

(See Entering Text page 92.)

6. If you want to change the fax or telephone number, press ▲ or ▼ to choose Fax/Tel:, then press OK and enter the new fax or telephone number using the dial pad (up to 20 digits). Press OK.

7. Press ▲ or ▼ to choose Complete. Press OK.

8. Press Stop/Exit.
How to copy

The following steps show the basic copy operation.

1. Make sure you are in copy mode, press (COPY).

   - The LCD shows:

   ![LCD Screen with Copy Settings]

   1. **No. of Copies**
      - You can enter the number of copies you want by using the dial pad.

2. Do one of the following to load your document:
   - Place the document **face down** in the ADF.
     (See Using the ADF >> page 22.)
   - Place the document **face down** on the scanner glass.
     (See Using the scanner glass >> page 23.)

3. If you want more than one copy, enter the number (up to 99).

4. Press Mono Start or Colour Start.

Stop copying

To stop copying, press Stop/Exit.

Copy settings

You can change the following copy settings. Press COPY and then press ▲ or ▼ to scroll through the copy settings. When the setting you want is highlighted, press OK.

(Basic User’s Guide)

For details about changing the following copy settings >> page 49.
   - Paper Type
   - Paper Size

(Advanced User’s Guide)

For details about changing the following copy settings >>Advanced User’s Guide: Copy settings
   - Quality
   - Enlarge/Reduce

   - 2in1(ID)
   - Stack/Sort
   - Density
   - Set New Default
   - Factory Reset

Note

If you want to sort copies, use the ADF.
Making copies

Paper Options

Paper Type
If you are copying on a special type of paper, set the machine for the type of paper you are using to get the best print quality.

1. Press (COPY).
2. Load your document.
3. Enter the number of copies you want.
4. Press ▲ or ▼ to choose Paper Type. Press OK.
5. Press ▲ or ▼ to choose Plain Paper, Inkjet Paper, Brother BP71, Brother BP61, Other Glossy or Transparency. Press OK.
6. If you do not want to change additional settings, press Mono Start or Colour Start.

Paper Size
If you are copying on paper other than A4 size, you will need to change the Paper Size setting. You can copy only on A4, A5, Photo 10 x 15 cm, Letter or Legal ¹ paper.

1. Press (COPY).
2. Load your document.
3. Enter the number of copies you want.
4. Press ▲ or ▼ to choose Paper Size. Press OK.
5. Press ▲ or ▼ to choose A4, A5, 10x15cm, Letter or Legal ¹. Press OK.
6. If you do not want to change additional settings, press Mono Start or Colour Start.

¹ Only available for some countries.
Printing a document

The machine can receive data from your computer and print it. To print from a computer, you must install the printer driver.

Software User's Guide: Printing
(Windows®)
Software User's Guide: Printing and Faxing (Macintosh)

1. Install the Brother printer driver from the CD-ROM. (Quick Setup Guide)

2. From your application, choose the Print command.

3. Choose the name of your machine in the Print dialog box and click Preferences.

4. Choose the settings you want to change in the Properties dialog box.
   - Media Type
   - Print Quality
   - Paper Size
   - Orientation
   - Colour/Greyscale
   - Ink Save Mode
   - Scaling

5. Click OK.

6. Click Print to begin printing.
Scanning a document

There are several ways to scan documents. You can use the SCAN key on the machine or the scanner drivers on your computer.

1. To use the machine as a scanner, you must install a scanner driver. If the machine is on a Network, configure it with a TCP/IP address.
   - Install the scanner drivers from the CD-ROM. (Quick Setup Guide)
   - Configure the machine with a TCP/IP address if network scanning does not work.
     - Software User’s Guide: Configuring Network Scanning for Windows®
     - Software User’s Guide: Configuring network scanning for Macintosh

2. Load your document. (See How to load documents page 22.)
   - Use the ADF to scan multiple pages of documents. It feeds each sheet automatically.
   - Use the scanner glass to scan a page of a book or one sheet at a time.

3. Do one of the following:
   - To scan using the SCAN key, go to Scanning using the SCAN key.
   - To scan using a scanner driver at your computer, go to Scanning using a scanner driver.

Scanning using the SCAN key

For more information
- Software User’s Guide: Using the Scan key

1. Press (SCAN).
2. Choose the scan mode you want.
   - Scan to File
   - Scan to E-mail
   - Scan to OCR
   - Scan to Image
   - Web Service (Web Services Scan)

1 (Macintosh users)
   Presto! PageManager must be downloaded and installed before use. See Accessing Brother Support (Macintosh) page 5 for further instructions.

2 (Windows® users only)
   (Software User’s Guide: Using Web Services for scanning on your network (Windows Vista® SP2 or later and Windows® 7))

3 (For network users)
   Choose the computer you want to send the data to.

4. Press Start to begin scanning.
Scanning using a scanner driver

1. Start a scanning application and click the Scan button.
2. Adjust the settings such as Resolution, Brightness and Scan Type in the Scanner Setup dialog box.
3. Click Start or Scan to begin scanning.

Scanning using the ControlCenter

1. Start a scanning application and click the Scan button.
2. Adjust the settings such as Resolution, Brightness and Scan Type in the Scanner Setup dialog box.
3. Click Start or Scan to begin scanning.
Replacing the ink cartridges

Your machine is equipped with an ink dot counter. The ink dot counter automatically monitors the level of ink in each of the four cartridges. When the machine detects an ink cartridge is running out of ink, the machine will display a message on the LCD.

Note

For example, when one of the ink cartridges is nearly empty, the LCD will display **Ink low (name of colour)**.

You should purchase a replacement cartridge in preparation for when the machine indicates the colour is completely empty.

When one of the ink cartridges is empty, the LCD will display **Cannot Print** or **B&W Print Only**.

You should only replace the actual ink cartridge when this message **Cannot Print** or **B&W Print Only** appears on the LCD.

The LCD will show which ink cartridge is low or needs replacing. Be sure to follow the LCD prompts to replace the ink cartridges in the correct order.

Even though the machine tells you to replace an ink cartridge, there will be a small amount of ink left in the ink cartridge. It is necessary to keep some ink in the ink cartridge to prevent air from drying out and damaging the print head assembly.

**CAUTION**

If ink gets in your eyes, wash it out with water at once and call a doctor if you are concerned.

**IMPORTANT**

Brother multifunction machines are designed to work with ink of a particular specification and will work to a level of optimum performance and reliability when used with Brother Original ink cartridges. Brother cannot guarantee this optimum performance and reliability if ink or ink cartridges of other specifications are used. Brother does not therefore recommend the use of cartridges other than Brother Original cartridges or the refilling of used cartridges with ink from other sources. If damage is caused to the print head or other parts of this machine as a result of using incompatible products with this machine, any repairs required as a result may not be covered by the warranty.

1. Open the ink cartridge cover.

   If one or more of the ink cartridges have reached the end of their life, the LCD shows **B&W Print Only** or **Cannot Print**.
2 Press the lock release lever as shown to release the cartridge indicated on the LCD. Remove the cartridge from the machine.

3 Open the new ink cartridge bag for the colour shown on the LCD, and then take out the ink cartridge.

4 Turn the green release lever on the orange protective packing (1) clockwise until it clicks to release the vacuum seal. Then remove the orange protective packing as shown.

5 Each colour has its own correct position. Insert the ink cartridge in the direction of the arrow on the label.
6 Gently push the back of the ink cartridge marked “PUSH” until it clicks, and then close the ink cartridge cover.

7 The machine will automatically reset the ink dot counter.

**Note**
- If you replaced an ink cartridge, for example Black, the LCD may ask you to verify that it was a brand new one (for example, Did You Change BK Black). For each new cartridge you installed, press 1 (Yes) to automatically reset the ink dot counter for that colour. If the ink cartridge you installed is not a brand new one, be sure to press 2 (No).
- If the LCD shows No Ink Cartridge or Cannot Detect after you install the ink cartridges, check that the ink cartridges are brand new Original Brother and that they are installed correctly.

**IMPORTANT**
- DO NOT take out ink cartridges if you do not need to replace them. If you do so, it may reduce the ink quantity and the machine will not know the quantity of ink left in the cartridge.
- DO NOT touch the cartridge insertion slots. If you do so, the ink may stain your skin.
- If ink gets on your skin or clothing immediately wash it off with soap or detergent.
- If you mix the colours by installing an ink cartridge in the wrong position, clean the print head several times after correcting the cartridge installation.
- Once you open an ink cartridge, install it in the machine and use it up within six months of installation. Use unopened ink cartridges by the expiration date written on the cartridge package.
- DO NOT dismantle or tamper with the ink cartridge; this can cause the ink to leak out of the cartridge.
Cleaning and checking the machine

Cleaning the scanner glass

1. Unplug the machine from the electrical socket.

2. Lift the document cover (1). Clean the scanner glass (2) and the white plastic (3) with a soft lint-free cloth moistened with a non-flammable glass cleaner.

3. In the ADF unit, clean the white bar (1) and the glass strip (2) with a lint-free cloth moistened with a non-flammable glass cleaner.

Note
In addition to cleaning the glass strip with a non-flammable glass cleaner, run your finger tip over the glass strip to see if you can feel anything on it. If you feel dirt or debris, clean the glass strip again concentrating on that area. You may need to repeat the cleaning process three or four times. To test, make a copy after each cleaning attempt.

When there is a spot of dirt or correction fluid on the glass strip the printed sample shows a vertical line. After the glass strip is cleaned the vertical line is gone.
Cleaning the print head

To maintain good print quality, the machine will automatically clean the print head when needed. You can start the cleaning process manually if there is a print quality problem.

Clean the print head if you get a horizontal line in the text or graphics, or blank text on your printed pages. You can clean Black only, three colours at a time (Yellow/Cyan/Magenta), or all four colours at once.

Cleaning the print head consumes ink. Cleaning too often uses ink unnecessarily.

**IMPORTANT**

DO NOT touch the print head. Touching the print head may cause permanent damage and may void the print head's warranty.

1. Press **Menu**.
2. Press ▲ or ▼ to choose **Ink**. Press **OK**.
3. Press ▲ or ▼ to choose **Cleaning**. Press **OK**.
4. Press ▲ or ▼ to choose **Black, Color or All**. Press **OK**.
   The machine cleans the print head. When cleaning is finished, the machine will go back to the Ready mode automatically.

**Note**

If you clean the print head at least five times and the print has not improved, try installing a new Brother Original Innobella™ ink cartridge for each problem colour. Try cleaning the print head again up to five more times. If the print has not improved call your Brother dealer.

Checking the print quality

If faded or streaked colours and text appear on your printouts, some of the print head nozzles may be clogged. You can check this by printing the Print Quality Check Sheet and looking at the nozzle check pattern.

1. Press **Menu**.
2. Press ▲ or ▼ to choose **Ink**. Press **OK**.
3. Press ▲ or ▼ to choose **Test Print**. Press **OK**.
4. Press ▲ or ▼ to choose **Print Quality**. Press **OK**.
5. Press **Colour Start**.
   The machine begins printing the Print Quality Check Sheet.
6. Check the quality of the four colour blocks on the sheet.
7. The LCD asks you if the print quality is OK.
   Do one of the following:
   - If all lines are clear and visible, press 1 (Yes) to finish the Print Quality check and go to step 8.
   - If you can see missing short lines as shown below, press 2 to choose No.

**Note**

The LCD asks you if the print quality is OK for black and then the three colours. Press 1 (Yes) or 2 (No).
9 The LCD asks you if you want to start cleaning. Press 1 (Yes). The machine starts cleaning the print head.

10 After the cleaning procedure is finished, press Colour Start. The machine starts printing the Print Quality Check Sheet again and repeat the procedure from step 6.

11 Press Stop/Exit. If you repeat this procedure at least five times and the print quality is still poor, replace the ink cartridge for the clogged colour. After replacing the ink cartridge, check the print quality. If the problem still exists, repeat the cleaning and test print procedures at least five times for the new ink cartridge. If ink is still missing, call your Brother dealer.

IMPORTANT

DO NOT touch the print head. Touching the print head may cause permanent damage and may void the print head's warranty.

Note

When a print head nozzle is clogged the printed sample looks like this. After the print head nozzle is cleaned, the horizontal lines are gone.

Checking the print alignment

You may need to adjust the print alignment after transporting the machine, if your printed text becomes blurred or images become faded.

1 Press Menu.

2 Press ▲ or ▼ to choose Ink. Press OK.

3 Press ▲ or ▼ to choose Test Print. Press OK.

4 Press ▲ or ▼ to choose Alignment. Press OK.

5 Press Mono Start or Colour Start. The machine starts printing the Alignment Check Sheet.

6 For the “A” pattern, press the number of the test print that has the least visible vertical stripes (1-9).

7 For the “B” pattern, press the number of the test print that has the least visible vertical stripes (1-9).

8 For the “C” pattern, press the number of the test print that has the least visible vertical stripes (1-9).

9 For the “D” pattern, press the number of the test print that has the least visible vertical stripes (1-9).

10 Press Stop/Exit.
Error and Maintenance messages

As with any sophisticated office product, errors may occur and consumable items may need to be replaced. If this happens, your machine identifies the error and shows an error message. The most common error and maintenance messages are shown in the following table.

You can correct most errors and routine maintenance by yourself. If you need more help, the Brother Solutions Center offers the latest FAQs and troubleshooting tips.

<table>
<thead>
<tr>
<th>Error Message</th>
<th>Cause</th>
<th>Action</th>

</thead>
</table>
| B&W Print Only Replace Ink | One or more of the colour ink cartridges have reached the end of their life.  
You can use the machine in monochrome mode for approximately four weeks depending on the number of pages you print.  
While this message appears on the LCD, each operation works in the following way:  
  - **Printing**  
    If you choose **Greyscale** in the **Advanced** tab of the printer driver you can use the machine as a monochrome printer.  
  - **Copying**  
    If the paper type is set to **Plain Paper** you can make copies in monochrome.  
  - **Faxing**  
    If the paper type is set to **Plain Paper** or **Inkjet Paper**, the machine will receive and print the faxes in monochrome.  
    If a sending machine has a colour fax, the machine’s “handshake” will ask that the fax be sent as monochrome.  
    If the paper type is set to **Other Glossy**, **Brother BP71** or **Brother BP61** the machine will stop all print operations. | Replace the ink cartridges. (See Replacing the ink cartridges page 53.)  
If you unplug the machine or take out the ink cartridge, you cannot use the machine until you change to a new ink cartridge. |

<tr>
<td>Ink Absorber Full</td>
<td>The ink absorber box or flushing box is full. These components are periodic maintenance items that may require replacement after a period of time to ensure optimum performance from your Brother machine. Because these components are periodic maintenance items, the replacement is not covered under the warranty. The need to replace these items and the time period before replacement is dependent on the number of purges and flushes required to clean the ink system. These boxes acquire amounts of ink during the different purging and flushing operations. The number of times a machine purges and flushes for cleaning varies depending on different situations. For example, frequently powering the machine on and off will cause numerous cleaning cycles since the machine automatically cleans upon power up. The use of non-Brother ink may cause frequent cleanings because non-Brother ink could cause poor print quality which is resolved by cleaning. The more cleaning the machine requires the faster these boxes will fill up.</td>
<td>The ink absorber box or flushing box will need to be replaced. Contact Brother Customer Service or your local Brother Authorised Service Centre to have your machine serviced. Other reasons for cleaning are: 1 After a paper jam has been cleared, the machine automatically cleans itself before the next received fax is printed. 2 The machine automatically cleans itself after sitting idle for more than 30 days (infrequent use). 3 The machine automatically cleans itself after the ink cartridges for each colour have been replaced 12 times.</td>

| Paper Jam           | Paper is jammed in the machine.                 | Remove the jammed paper by following the steps in *Printer jam or paper jam* page 66.  
|                     |                                                 | Make sure the paper length guide is set to the correct paper size.       
|                     |                                                 | DO NOT extend the paper tray when you load A5 or smaller size paper.     
|                     |                                                 | *(The extendable tray is only available for some countries.)*            |
| Unable to CleanXX   | The machine has a mechanical problem.           | Open the scanner cover and remove any foreign objects and paper scraps from inside the machine. If the error message continues, see *Transferring your faxes or Fax Journal report* page 64 before disconnecting the machine so you will not lose any important messages. Then, disconnect the machine from the power for several minutes and reconnect it. |
| Unable to Init.XX    | OR—A foreign object such as a paper clip or ripped paper is in the machine. |                                                        |
| Unable to PrintXX   |                                                 |                                                         |
| Unable to ScanXX    |                                                 |                                                         |
| Wrong Ink Colour    | A colour ink cartridge has been installed in the Black ink cartridge position. | Check which ink cartridges are not matched by colour to their ink cartridge positions and move them to their correct positions. |
| Wrong Paper Size    | The Paper Size setting does not match the size of paper in the tray. Or, you did not set the paper guides in the tray to the indicators for the paper size you are using. | 1 Check that the paper size you choose matches the size of paper in the tray.  
|                     |                                                 | 2 Make sure you loaded the paper in a Portrait position, by setting the paper guides at the indicators for your paper size.  
|                     |                                                 | 3 After you have checked the paper size and the paper position, press *Mono Start* or *Colour Start*. |
Error animations display

Error animations display step-by-step instructions when paper gets jammed. You can read the steps at your own pace by pressing ▶ to see the next step and ◄ to go back a step.

Transferring your faxes or Fax Journal report

If the LCD shows:
- Unable to CleanXX
- Unable to Init.XX
- Unable to PrintXX
- Unable to ScanXX

We recommend transferring your faxes to another fax machine. (See Transferring faxes to another fax machine ➤ page 64.)

You can also transfer the Fax Journal report to see if there are any faxes you need to transfer. (See Transferring the Fax Journal report to another fax machine ➤ page 64.)

Transferring faxes to another fax machine

If you have not set up your Station ID, you cannot enter fax transfer mode. (Quick Setup Guide: Enter personal information (Station ID))

1. Press Stop/Exit to interrupt the error temporarily.
2. Press Menu.
3. Press ▲ or ▼ to choose Service. Press OK.
4. Press ▲ or ▼ to choose Data Transfer. Press OK.
5. Press ▲ or ▼ to choose Fax Transfer. Press OK.
6. Do one of the following:
   - If the LCD shows No Data, there are no faxes left in the machine’s memory.
     Press Stop/Exit.
   - Enter the fax number to which faxes will be forwarded.
7. Press Mono Start.

Transferring the Fax Journal report to another fax machine

If you have not set up your Station ID, you cannot enter fax transfer mode. (Quick Setup Guide: Enter personal information (Station ID))

1. Press Stop/Exit to interrupt the error temporarily.
2. Press Menu.
3. Press ▲ or ▼ to choose Service. Press OK.
4. Press ▲ or ▼ to choose Data Transfer. Press OK.
5. Press ▲ or ▼ to choose Report Trans. Press OK.
6. Enter the fax number to which the Fax Journal report will be forwarded.
7. Press Mono Start.
Document jam

Documents can jam in the ADF unit if they are not inserted or fed correctly, or if they are too long. Follow the steps below to clear a document jam.

Document is jammed in the top of the ADF unit

1. Take out any paper from the ADF that is not jammed.
2. Open the ADF cover.
3. Remove the jammed document by pulling it upward.
4. Close the ADF cover.
5. Press Stop/Exit.

Document is jammed inside the ADF unit

1. Take out any paper from the ADF that is not jammed.
2. Lift the document cover.
3. Pull the jammed document out to the left.
4. Close the document cover.
5. Press Stop/Exit.

IMPORTANT

To avoid document jams close the ADF cover correctly by pushing it gently in the middle.
Printer jam or paper jam

Take out the jammed paper depending on where it is jammed in the machine.

If the LCD shows Paper Jam follow these steps:

![IMPORTANT](image)

**IMPORTANT**

Before you unplug the machine from the power source, you can transfer your faxes that are stored in the memory to another fax machine so you will not lose any important messages. (See Transferring your faxes or Fax Journal report on page 64.)

1. Unplug the machine from the electrical socket.
2. If the paper support flap is open, close it, and then close the paper support. Pull the paper tray completely out of the machine.
3. Pull the two green levers inside the machine to release the jammed paper.
4. Pull out the jammed paper (1).
5. Lift the Jam Clear Flap, and remove the jammed paper.
6 Open the Jam Clear Cover (1) at the back of the machine.

7 Pull the jammed paper out of the machine.

8 Close the Jam Clear Cover. Make sure the cover is closed correctly.

9 Using both hands, use the plastic tabs on both sides of the machine to lift the scanner cover (1) to the open position.

Move the print head (if necessary) to take out any paper remaining in this area. Make sure that jammed paper is not left in the corners of the machine (2) and (3).
**IMPORTANT**

- If the paper is jammed under the print head, unplug the machine from the power source, and then move the print head to take out the paper.

- If the print head is in the right corner as shown in the illustration, you cannot move it. Re-connect the power cord. Hold down Stop/Exit until the print head moves to the centre. Then unplug the machine from the power source and take out the paper.

- If ink gets onto your skin, immediately wash with soap and plenty of water.

Using both hands, grasp the plastic tabs on both sides of the machine and gently close the scanner cover.

Push the two green levers back to their original positions.

Push the paper tray firmly back into the machine.

While holding the paper tray in place, pull out the paper support (1) until it clicks, and unfold the paper support flap (2).

Make sure you pull out the paper support until it clicks.

**IMPORTANT**

DO NOT use the paper support flap for Legal size paper. (Only available for some countries.)

Re-connect the power cord.
Troubleshooting

If you think there is a problem with your machine, check the chart below and follow the troubleshooting tips.

Most problems can be easily resolved by yourself. If you need additional help, the Brother Solutions Center offers the latest FAQs and troubleshooting tips. Visit us at http://solutions.brother.com/.

| Poor print quality. | Check the print quality. (See Checking the print quality page 57.) Make sure that the **Media Type** setting in the printer driver or the **Paper Type** setting in the machine’s menu matches the type of paper you are using. See Paper Type page 17. Software User’s Guide: Printing (Windows®) Software User’s Guide: Printing and Faxing (Macintosh) Make sure that your ink cartridges are fresh. The following may cause ink to clog:  
- The expiration date written on the cartridge package has passed. (Brother Original cartridges stay usable for up to two years if kept in their original packaging.)  
- The ink cartridge has been in your machine for over six months.  
- The ink cartridge may not have been stored correctly before use. Make sure you are using Brother Original Innobella™ ink. Brother does not recommend the use of cartridges other than Brother Original cartridges or the refilling of used cartridges with ink from other sources. Try using the recommended types of paper. (See Acceptable paper and other print media page 18.) The recommended environment for your machine is between 20 °C to 33 °C. |
| White horizontal lines appear in text or graphics. | Clean the print head. (See Cleaning the print head page 57.) Make sure you are using Brother Original Innobella™ ink. Try using the recommended types of paper. (See Acceptable paper and other print media page 18.) |
| The machine prints blank pages. | Clean the print head. (See Cleaning the print head page 57.) Make sure you are using Brother Original Innobella™ ink. |
| Characters and lines are blurred. | Check the printing alignment. (See Checking the print alignment page 58.) |
| Printed text or images are skewed. | Make sure the paper is loaded correctly in the paper tray and the paper side guides are adjusted correctly. (See Loading paper and other print media page 11.) Make sure the Jam Clear Cover is closed correctly. Clean the paper pick-up rollers. (Advanced User’s Guide: Cleaning the paper pick-up rollers) |
| Smudge or stain at the top centre of the printed page. | Make sure the paper is not too thick or curled. (Acceptable paper and other print media page 18) |
| Printing appears dirty or ink seems to run. | Make sure you are using the recommended types of paper. (See Acceptable paper and other print media page 18.) Don't handle the paper until the ink is dry. Make sure you are using Brother Original Innobella™ ink. If you are using photo paper, make sure that you have set the correct paper type. If you are printing a photo from your PC, set the **Media Type** of the printer driver. |
| Stains appear on the reverse side or at the bottom of the page. | Make sure the printer platen is not dirty with ink. (Advanced User’s Guide: Cleaning the machine’s printer platen) Make sure you are using Brother Original Innobella™ ink. Make sure you are using the paper support flap. (See Loading paper and other print media page 11.) |
## Troubleshooting

### Printing (continued)

<table>
<thead>
<tr>
<th>Difficulty</th>
<th>Suggestions</th>
</tr>
</thead>
<tbody>
<tr>
<td>The machine prints dense lines on the page.</td>
<td>Check <strong>Reverse Order</strong> in the <strong>Basic</strong> tab of the printer driver.</td>
</tr>
<tr>
<td>The printouts are wrinkled.</td>
<td><em>(Windows® users)</em> In the printer driver <strong>Advanced</strong> tab, click <strong>Colour Settings</strong>, and uncheck <strong>Bi-Directional Printing</strong>.</td>
</tr>
<tr>
<td></td>
<td><em>(Macintosh users)</em> In the printer driver, choose <strong>Print Settings</strong>, click <strong>Advanced</strong>, choose <strong>Other Print Options</strong>, and uncheck <strong>Bi-Directional Printing</strong>. Make sure you are using Brother Original Innobella™ ink.</td>
</tr>
<tr>
<td>Cannot perform “Page Layout” printing.</td>
<td>Check that the paper size setting in the application and in the printer driver are the same.</td>
</tr>
<tr>
<td>Print speed is too slow.</td>
<td>Try changing the printer driver setting. The highest resolution needs longer data processing, sending and printing time. Try the other quality settings in the printer driver <strong>Advanced</strong> tab (Windows®) or <strong>Print Settings</strong> (Macintosh). Also, click <strong>Colour Settings</strong>, and make sure you uncheck <strong>Colour Enhancement</strong>. Turn the borderless feature off. Borderless printing is slower than normal printing.</td>
</tr>
<tr>
<td>Colour Enhancement is not working correctly.</td>
<td>If the image data is not full colour in your application (such as 256 colour), Colour Enhancement will not work. Use at least 24 bit colour data with the Colour Enhancement feature.</td>
</tr>
<tr>
<td>Photo paper does not feed correctly.</td>
<td>When you print on Brother Photo paper, load one extra sheet of the same photo paper in the paper tray. An extra sheet has been included in the paper package for this purpose. Clean the paper pick-up rollers. (Advanced User’s Guide: Cleaning the paper pick-up rollers)</td>
</tr>
<tr>
<td>Machine feeds multiple pages.</td>
<td>Make sure the paper is loaded correctly in the paper tray. (See <a href="">Loading paper and other print media</a>.)</td>
</tr>
<tr>
<td>There is a paper jam.</td>
<td>Make sure the paper length guide is set to the correct paper size. Do not extend the paper tray when you load A5 or smaller size paper. (The extendable tray is only available for some countries.) (See <a href="">Printer jam or paper jam</a>.)</td>
</tr>
<tr>
<td>Printed pages are not stacked neatly.</td>
<td>Make sure you are using the paper support flap. (See <a href="">Loading paper and other print media</a>.)</td>
</tr>
<tr>
<td>Machine does not print from Adobe® Illustrator®.</td>
<td>Try to reduce the print resolution. (Advanced User’s Guide: <a href="Windows%C2%AE">Printing</a>) (Advanced User’s Guide: <a href="Macintosh">Printing and Faxing</a>)</td>
</tr>
<tr>
<td>Ink is smudged or running when using glossy photo paper.</td>
<td>Make sure to check the front and back of the paper. Place the glossy surface (printing surface) face down. (See <a href="">Paper Type</a>.) If you use glossy photo paper, make sure that the paper type setting is correct.</td>
</tr>
</tbody>

<tr>
<td>Vertical black lines when receiving.</td>
<td>The sender’s scanner may be dirty. Ask the sender to make a copy to see if the problem is with the sending machine. Try receiving from another fax machine.</td>
</tr>
<tr>
<td>Received colour fax prints only in black and white.</td>
<td>Replace the colour ink cartridges that have reached the end of their life, and then ask the other person to send the colour fax again. (See Replacing the ink cartridges page 53.)</td>
</tr>
<tr>
<td>Left and Right margins are cut off or a single page is printed on two pages.</td>
<td>Turn on Auto Reduction. (Advanced User’s Guide: Printing a reduced incoming fax)</td>
</tr>
</tbody>
</table>

## Telephone Line or Connections

<table>
<thead>
<tr>
<th>Difficulty</th>
<th>Suggestions</th>
</tr>
</thead>
<tbody>
<tr>
<td>Dialling does not work. (No dial tone)</td>
<td>Make sure the machine is plugged in and turned on. Check the line cord connections. (Not available in New Zealand) Change the Tone/Pulse setting. (Quick Setup Guide) Lift the external telephone’s handset and listen for a dial tone. If there is no dial tone, ask your telephone company to check the line and/or socket.</td>
</tr>
<tr>
<td>The machine does not answer when called.</td>
<td>Make sure the machine is in the correct Receive Mode for your setup. (See Choose the Receive Mode page 28.) Check for a dial tone. If possible, call your machine to hear it answer. If there is still no answer, check the telephone line cord connection. If there is no ringing when you call your machine, ask your telephone company to check the line.</td>
</tr>
</tbody>
</table>

## Sending Faxes

<table>
<thead>
<tr>
<th>Difficulty</th>
<th>Suggestions</th>
</tr>
</thead>
<tbody>
<tr>
<td>Cannot send a fax.</td>
<td>Check all line cord connections. Make sure the telephone line cord is plugged into the telephone wall socket and the LINE socket on the machine. Ask the other party to check that the receiving machine has paper.</td>
</tr>
<tr>
<td>Transmission Verification Report says &quot;RESULT:ERROR&quot;.</td>
<td>There is probably temporary noise or static on the line. Try sending the fax again. If you send a PC FAX message and get &quot;RESULT:ERROR&quot; on the Transmission Verification Report, your machine may be out of memory. If the problem continues, ask the telephone company to check your telephone line. If you often get transmission errors due to possible interference on the telephone line, try changing the menu setting of Compatibility to Basic(for VoIP). (Telephone line interference / VoIP page 76.)</td>
</tr>
<tr>
<td>Poor fax send quality.</td>
<td>Try changing your resolution to Fine or S.Fine. Make a copy to check your machine’s scanner operation. If the copy quality is not good, clean the scanner. (Cleaning the scanner glass page 56.)</td>
</tr>
</tbody>
</table>
Troubleshooting

Sending Faxes (continued)

<table>
<thead>
<tr>
<th>Difficulty</th>
<th>Suggestions</th>
</tr>
</thead>
<tbody>
<tr>
<td>Vertical black lines when sending.</td>
<td>Black vertical lines on faxes you send are typically caused by dirt or correction fluid on the glass strip. Clean the glass strip. (See Cleaning the scanner glass page 56.)</td>
</tr>
</tbody>
</table>

Handling Incoming Calls

<table>
<thead>
<tr>
<th>Difficulty</th>
<th>Suggestions</th>
</tr>
</thead>
<tbody>
<tr>
<td>The machine “hears” a voice as a CNG Tone.</td>
<td>If Fax Detect is set to On, your machine is more sensitive to sounds. It may mistakenly interpret certain voices or music on the line as a fax machine calling and respond with fax-receiving tones. Deactivate the machine by pressing Stop/Exit. Try avoiding this problem by turning Fax Detect to Off. (See Fax Detect page 31.)</td>
</tr>
<tr>
<td>Sending a fax call to the machine.</td>
<td>If you answered on an extension or external telephone, press your Remote Activation Code (the factory default is 51 (91 for New Zealand)). If you answered on an external telephone, press Start to receive the fax. When your machine answers, hang up.</td>
</tr>
<tr>
<td>Custom features on a single line.</td>
<td>If you have Call Waiting, Call Waiting/Caller ID, an alarm system or other custom feature on a single telephone line with your machine, it may create a problem sending or receiving faxes. For example: If you subscribe to Call Waiting or some other custom service and its signal comes through the line while your machine is sending or receiving a fax, the signal can temporarily interrupt or disrupt the faxes. Brother’s ECM (Error Correction Mode) feature should help overcome this problem. This condition is related to the telephone system industry and is common to all devices that send and receive information on a single, shared line with custom features. If avoiding a slight interruption is crucial to your business, a separate telephone line with no custom features is recommended.</td>
</tr>
</tbody>
</table>

Copying Difficulties

<table>
<thead>
<tr>
<th>Difficulty</th>
<th>Suggestions</th>
</tr>
</thead>
<tbody>
<tr>
<td>Poor copy results when using the ADF.</td>
<td>Try using the scanner glass. (See Using the scanner glass page 23.)</td>
</tr>
<tr>
<td>Vertical black lines or streaks appear in copies.</td>
<td>Vertical black lines or streaks on copies are typically caused by dirt or correction fluid on the glass strip. Clean the glass strip. (See Cleaning the scanner glass page 56.)</td>
</tr>
<tr>
<td>Fit to Page does not work correctly.</td>
<td>Make sure your source document is not skewed. Reposition the document and try again.</td>
</tr>
</tbody>

## Scanning Difficulties

<table>
<thead>
<tr>
<th>Difficulty</th>
<th>Suggestions</th>
</tr>
</thead>
<tbody>
<tr>
<td>TWAIN or WIA errors appear when starting to scan. (Windows®)</td>
<td>(Not available in Hong Kong and Taiwan) Make sure the Brother TWAIN or WIA driver is chosen as the primary source in your scanning application. For example, in PaperPort™ 12SE with OCR, click <strong>Scan Settings, Select</strong> to choose the Brother TWAIN/WIA driver. (Hong Kong and Taiwan users only) Make sure the Brother TWAIN/WIA driver is chosen as the primary source. In Presto! PageManager with OCR, click <strong>File, Select Source</strong> and choose the Brother TWAIN/WIA driver.</td>
</tr>
<tr>
<td>TWAIN or ICA errors appear when starting to scan. (Macintosh)</td>
<td>Make sure the Brother TWAIN driver is chosen as the primary source. In PageManager, click <strong>File, Select Source</strong> and choose the Brother TWAIN driver. Mac OS X 10.6.x users can also scan documents using the ICA Scanner Driver.</td>
</tr>
<tr>
<td>Poor scanning results when using the ADF.</td>
<td>Try using the scanner glass. (See <em>Using the scanner glass</em> page 23.)</td>
</tr>
<tr>
<td>OCR does not work.</td>
<td>Try increasing the scanner resolution. (Macintosh users) Presto! PageManager must be downloaded and installed before use. See <em>Accessing Brother Support (Macintosh)</em> page 5 for further instructions.</td>
</tr>
</tbody>
</table>

## Software Difficulties

<table>
<thead>
<tr>
<th>Difficulty</th>
<th>Suggestions</th>
</tr>
</thead>
<tbody>
<tr>
<td>Cannot install software or print.</td>
<td>(Windows® users only) Run the <strong>Repair MFL-Pro Suite</strong> program on the CD-ROM. This program will repair and reinstall the software.</td>
</tr>
<tr>
<td>“Device Busy”</td>
<td>Make sure the machine is not showing an error message on the LCD.</td>
</tr>
<tr>
<td>Cannot print images from FaceFilter Studio.</td>
<td>To use FaceFilter Studio, you must install the FaceFilter Studio application from the CD-ROM supplied with your machine. (Quick Setup Guide) Also, before you start FaceFilter Studio for the first time, you must make sure your Brother machine is turned on and connected to your computer. This will allow you to access all the functions of FaceFilter Studio.</td>
</tr>
</tbody>
</table>
## Network Difficulties

<table>
<thead>
<tr>
<th>Difficulty</th>
<th>Suggestions</th>
</tr>
</thead>
<tbody>
<tr>
<td>Cannot print over the network.</td>
<td>Make sure that your machine is powered on, is online and in the Ready mode. Print a Network Configuration Report (Advanced User’s Guide: Reports) and check the current Network settings printed in this list. If you are using a wireless connection or have Network problems, refer to your Network User’s Guide: Troubleshooting.</td>
</tr>
</tbody>
</table>
| The network scanning feature does not work.   | (Windows® users) It is necessary to configure the third-party Security/Firewall Software to allow Network scanning. To add port 54925 for Network scanning, enter the information below:  
   - In Name: Enter any description, for example Brother NetScan.  
   - In Port number: Enter 54925.  
   - In Protocol: UDP is selected.  
   - Please refer to the instruction manual that came with your third-party Security/Firewall Software or contact the software manufacturer.  
   (Macintosh users) Re-select your machine in the Device Selector application located in Macintosh HD/Library/Printers/Brother/Utilities/DeviceSelector or from the model list in ControlCenter2. |
| The Brother software cannot be installed.     | (Windows® users) Allow network access to the following programs if your security software displays an alert message during MFL-Pro Suite installation.  
   (Macintosh users) If you are using a firewall function of anti-spyware or antivirus security software, temporarily disable it and then install the Brother software. |
| Cannot connect to wireless network.           | Investigate the problem using the WLAN Report. Press the Menu key, choose Print Reports and then press OK. Choose WLAN Report. (Network User’s Guide) |
| Reset the network settings.                   | Press the Menu key, choose Network and then press OK. Choose Network Reset. (Network User’s Guide) |
Dial Tone detection

When you send a fax automatically, by default your machine will wait for a fixed amount of time before it starts to dial the number. By changing the Dial Tone setting to Detection you can make your machine dial as soon as it detects a dial tone. This setting can save a small amount of time when sending a fax to many different numbers. If you change the setting and start having problems when dialling, you should change it back to the No Detection setting.

1. Press Menu.
2. Press ▲ or ▼ to choose Initial Setup. Press OK.
3. Press ▲ or ▼ to choose Dial Tone. Press OK.
4. Press ▲ or ▼ to choose Detection or No Detection. Press OK.
5. Press Stop/Exit.

Telephone line interference / VoIP

If you are having problems sending or receiving a fax due to possible interference on the telephone line, you can change the compatibility setting, which reduces the modem speed to minimise errors.

1. Press Menu.
2. Press ▲ or ▼ to choose Initial Setup. Press OK.
3. Press ▲ or ▼ to choose Compatibility. Press OK.
4. Press ▲ or ▼ to choose Normal or Basic(for VoIP). Press OK.

- Basic(for VoIP) cuts the modem speed to 9,600 bps and turns off colour fax receiving and ECM, except for colour fax sending. Unless interference is a recurring problem on your telephone line, you may prefer to use it only when needed.

To improve compatibility with most VoIP services, Brother recommends changing the compatibility setting to Basic(for VoIP).

- Normal sets the modem speed at 14,400 bps.

5. Press Stop/Exit.

Note

- VoIP (Voice over IP) is a type of phone system that uses an internet connection, rather than a traditional phone line.
- Brother does not recommend the use of a VoIP line. VoIP limitations in general can cause some functions of the fax machine not to work correctly.
Machine Information

Checking the serial number

You can see the machine's serial number on the LCD.

1. Press Menu.
2. Press ▲ or ▼ to choose Machine Info. Press OK.
3. Press ▲ or ▼ to choose Serial No. Press OK.
4. Press Stop/Exit.

Reset functions

The following reset functions are available:

1. Network
   You can reset the print server back to its default factory settings, such as the password and IP address information.

2. Speed Dial & Fax
   Speed Dial & Fax resets the following settings:
   - Speed Dial
     (Speed-Dial and Setup Groups)
   - Station ID
     (Name and Number)
   - Report settings
     (Transmission Verification Report, Quick Dial List and Fax Journal)
   - History
     (Caller ID history and Outgoing Call)
   - Faxes in memory

3. All Settings
   You can restore all settings to their factory defaults.
   Brother strongly recommends performing this procedure before handing over or disposing of the machine.

How to reset the machine

1. Press Menu.
2. Press ▲ or ▼ to choose Initial Setup. Press OK.
3. Press ▲ or ▼ to choose Reset. Press OK.
4. Press ▲ or ▼ to choose the type of reset (Network, Speed Dial & Fax or All Settings) you want to use. Press OK.
5. Press 1 to confirm.
6. Press 1 to reboot the machine.
On-screen programming

Your machine is designed to be easy to operate with LCD on-screen programming using the menu keys. User-friendly programming helps you take full advantage of all the menu selections your machine has to offer.

Since your programming is done on the LCD, we have created step-by-step on-screen instructions to help you program your machine. All you need to do is follow the instructions as they guide you through the menu selections and programming options.
# Menu table

The menu table will help you understand the menu selections and options that are found in the machine’s programs. The factory settings are shown in Bold with an asterisk.

Entering Text

When you are setting certain menu selections, such as the Station ID, you may need to enter text into the machine. Most dial pad keys have three or four letters printed on keys. The keys for 0, # and * do not have printed letters because they are used for special characters.

Press the appropriate dial pad key the number of times shown in this reference table to access the character you want.

<table>

Inserting spaces

To enter a space in a fax number, press ▶ once between numbers. To enter a space in a name, press ▶ twice between characters.

Making corrections

If you entered an incorrect letter and want to change it, press ◀ to move the cursor under the incorrect character. Then press Clear. Re-enter the correct character. You can also back up and insert letters.

Repeating letters

If you need to enter a letter that is on the same key as the letter before, press ▶ to move the cursor to the right before you press the key again.

Special characters and symbols

Press *, # or 0 repeatedly until you see the special character or symbol you want.

Press * for (space) ! "$ % & \( ) \* + , - . / €
Press # for ; < = > ? @ [ ] ^ _
Press 0 for Ä È Ö Ü À Ç È Ë 0
## Specifications

### General

9 kg

Noise
Operating: 50 dB or less

Temperature
Operating: 10 to 35 °C
Best Print Quality: 20 to 33 °C

Humidity
Operating: 20 to 80% (without condensation)
Best Print Quality: 20 to 80% (without condensation)

ADF (automatic document feeder)
Up to 15 pages (Paper: 90 gsm A4 or Letter size)
Up to 20 pages with conditions

Document Size
ADF Width: 148 mm to 215.9 mm
ADF Length: 148 mm to 355.6 mm
Scanner Glass Width: Max. 215.9 mm
Scanner Glass Length: Max. 297 mm

1 Noise depends on printing conditions.
2 Using standard 64 to 90 gsm paper.
3 Using XEROX4200 75 gsm paper, temperature 20 - 26 °C, humidity 40 - 50% without condensation.
# Print media

## Paper Input

**Paper Tray**

- **Paper type:**
  - Plain paper, inkjet paper (coated paper), glossy paper\(^1\) and transparency\(^2\)

- **Paper size\(^3\):**
  - A4, Legal\(^4\), Executive, Letter, A5, A6, Envelopes (commercial No.10, DL, C5, Monarch), Photo 10 × 15 cm, Photo 2L 13 × 18 cm, and Index Card 127 × 203 mm
  - Width: 98 mm - 215.9 mm
  - Length: 148 mm - 355.6 mm
  - For more details, see *Paper weight, thickness and capacity* \(>>\) page 21.

- **Maximum paper tray capacity:**
  - Approx. 100 sheets of 80 gsm plain paper

### Paper Output

Up to 50 sheets of A4 plain paper (face up print delivery to the output paper tray)\(^1\)

---

1. For glossy paper or transparencies, remove printed pages from the output paper tray immediately after they exit the machine to avoid smudging.
2. Use only transparencies recommended for inkjet printing.
3. See *Paper type and size for each operation* \(>>\) page 20.
4. Only available for some countries.

Interfaces

USB
A USB 2.0 interface cable that is no longer than 2 m.

Wireless LAN
IEEE 802.11b/g/n (Infrastructure/Ad-hoc Mode)

1
Your machine has a Hi-Speed USB 2.0 interface. The machine can also be connected to a computer that has a USB 1.1 interface.

2
Third party USB ports are not supported.

**Conditions:**

1. For WIA, 1200 x 1200 resolution. Brother Scanner Utility enables to enhance up to 19200 x 19200 dpi.
2. Third party USB ports are not supported.
3. PC Fax supports black and white only. (PC Fax Send is only supported.)
4. PaperPort™12SE supports Windows® XP Home (SP3 or greater), XP Professional (SP3 or greater), XP Professional x64 Edition (SP2 or greater), Windows Vista® (SP2 or greater) and Windows® 7.
Consumable items

**Ink**

The machine uses individual Black, Yellow, Cyan and Magenta ink cartridges that are separate from the print head assembly.

**Service Life of Ink Cartridge**

The first time you install a set of ink cartridges the machine will use an amount of ink to fill the ink delivery tubes for high quality printouts. This process will only happen once. After this process is complete the cartridges provided with your machine will have a lower yield than standard cartridges (80% \(^1\)). With all following ink cartridges you can print the specified number of pages.

### Replacement Consumables

Black, Yellow, Cyan and Magenta - Approximately 600 pages \(^2\)

\(^1\) For India and Indonesia: 65%

\(^2\) Approx. cartridge yield is declared in accordance with ISO/IEC 24711.

For more information about the replacement consumables, visit us at http://www.brother.com/pageyield/.

### What is Innobella™?

Innobella™ is a range of genuine consumables offered by Brother. The name "Innobella™" derives from the words "Innovation" and "Bella" (meaning "Beautiful" in Italian) and is a representation of the "innovative" technology providing you with "beautiful" and "long lasting" print results.

When you print photo images, Brother recommends Innobella™ glossy photo paper (BP71 series) for high quality. Brilliant prints are made easier with Innobella™ Ink and paper.
Network (LAN)

Note

For more information about the Network specifications ➤ Network User's Guide

LAN
You can connect your machine to a network for Network Printing, Network Scanning and PC Fax Send. Also included is Brother BRAdmin Light Network Management software.

For Australia Only:

Support – For technical support of your Brother Product other than what you can resolve through the User’s Guide, please visit our Web Site or Solutions Web Site (see below) to find an answer to FAQs/Troubleshooting, locating Drivers & Software.

Alternatively, please contact the Product Support Centre for any customer care/technical support enquiry.

To contact Brother International (Aust) Pty Ltd for support on a Brother product please see the details listed below:

Product Support Centre: Australia
Brother International (Aust) Pty Ltd

Phone: 02 8875 6000
Fax: 02 9870 7223
Solutions Site: http://solutions.brother.com/
Web Site: www.brother.com.au
Email: To submit an e-mail enquiry, visit www.brother.com.au go to Service and Support area and follow the prompts.

Our Technical Support Consultants are available 5 days a week by phone during the hours of 8.30am to 5.00pm (EST/EDST) Monday to Friday.

For New Zealand Only:

To contact Brother International (NZ) Limited for support with a Brother product please use the following methods.

Phone:
Premium End User Assistance 0900 552 152
Auto Attendant Self Help 0800 652 152
Brother Recycle Assistance 0800 632 467
Fax Assistance 0800 837 822
Email Assistance Please visit www.brother.co.nz and submit a helpdesk enquiry from Online Help
Web Assistance Please visit www.brother.co.nz under Online Help for Frequently Asked Questions, Driver downloads, Warranty information and Service Centres

Our Technical Support Consultants are available 7 days a week by phone during the hours of 8.30am to 5pm Monday to Friday and 9am to 5pm Saturday and Sunday. Outside of these hours you can find assistance from our Auto Attendant Self Help and our Website www.brother.co.nz under Online Help.
Visit us on the World Wide Web
