## Overview

AirPrint is a wireless technology that allows you to print from your iPhone, iPod touch, iPad, or other iOS device without installing a printer driver.

# Hardware requirements

## Supported operating systems

---

AirPrint is compatible with Apple devices running iOS 4.2 or later. Refer to the Apple website (example for iPhone: <http://www.apple.com/support/iphone/assistant/airprint/>) for more information about compatible operating systems.

## Network settings

---

In order to use AirPrint, your mobile device must connect using Wi-Fi to the network that your Brother machine is connected to. AirPrint supports wireless connections that use infrastructure mode or ad-hoc mode.

To configure your mobile device for a Wi-Fi connection, please refer to your mobile device's user's guide. A link to your mobile device's user's guide, which can be viewed on the Apple website, can be found in the Bookmarks folder of Safari by default.

To configure your Brother machine for a Wi-Fi connection, please refer to your machine's Quick Setup and Network User's Guide.

### Ad-hoc mode

Connect your mobile device to your machine without a wireless access point/router.

- 1 Mobile device
- 2 Wireless network machine (your machine)

### Infrastructure mode

Connect your mobile device to your machine through a wireless access point/router.

- When the Brother machine is connected to the wireless access point/router using Wi-Fi:

- 1 Mobile device**
- 2 Wireless access point/router**
- 3 Wireless network machine (your machine)**

- When the Brother machine is connected to the wireless access point/router using a network cable:

- 1 Mobile device**
- 2 Wireless access point/router**
- 3 Network cable**
- 4 Wireless network machine (your machine)**

## Printing using AirPrint

The procedure used to print may vary by application. Safari is used in the example below.

- 1 Make sure your machine is turned on.
- 2 Use Safari to open the page that you want to print.
- 3 Tap .
- 4 Tap **Print**.
- 5 Make sure your machine is selected.  
If a different machine is selected or if no printer is selected, tap the displayed printer name or **Select Printer**.  
A list of available machines will be displayed. Tap your machine.
- 6 Select any available options, such as the number of pages to print, duplex printing (if supported by your machine).
- 7 Tap **Print**.

### Note

---

- Paper size and paper type are specified depending on the iOS application.
- (Laser models)

If the machine supports the Secure Function Lock feature, printing via AirPrint is possible even if PC print for each user is restricted. If you want to restrict printing via AirPrint, disable AirPrint using Web Based Management or set the Secure Function Lock feature to Public Mode and then restrict PC print for public. For more details, refer to the Network User's Guide and the Advanced User's Guide.

(Inkjet models)

If the machine supports the Secure Function Lock feature, printing via AirPrint is not available if PC print is restricted. For details about the Secure Function Lock, refer to the Network User's Guide and the Advanced User's Guide.

## Troubleshooting

This chapter explains how to resolve typical problems you may encounter when using AirPrint with your Brother machine. If, after reading this chapter, you are unable to resolve your problem, please visit the Brother Solutions Center at: <http://solutions.brother.com/>.

### If you are having difficulty with your machine

Difficulty	Suggestions
The machine is not displayed in the printer list.	Make sure your machine is turned on.
	Confirm the network settings. ( <i>Network settings</i> >> page 2)
	Move the mobile device closer to the wireless access point/router, or your machine.
Cannot print.	Make sure your machine is turned on.
	Confirm the network settings. ( <i>Network settings</i> >> page 2)

## How to Disable/Enable AirPrint using Web Based Management (web browser)

A standard web browser can be used to enable and disable the machine's AirPrint feature (it is enabled by default).

### Note

The screens in this section are example of Inkjet machine.

- 1 Confirm that the machine is connected to the same network as the computer.
- 2 Open the web browser on your computer.
- 3 Type “`http://machine's IP address/`” into your browser's address bar (where “`machine's IP address`” is the machine's IP address).

- For example:

```
http://192.168.1.2/
```

### Note

- You can see your machine's IP address on the control panel's network menu. For more details, please refer to your machine's Network User's Guide.
- If you have set the login password for the Web Based Management, enter the password in the **Login** box, then click .

- 4 Depending on your machine, one of the following screens is displayed. Do one of the following:
- If screen (A) is displayed
    - 1 Click **Network**.
    - 2 Click **Protocol**.
    - 3 Deselect **AirPrint** if you want to disable AirPrint; select **AirPrint** if you want to enable AirPrint.
    - 4 Click **Submit**.
  - If screen (B) is displayed
    - 1 Click **AirPrint**.
    - 2 Select **Disabled** if you want to disable AirPrint; select **Enabled** if you want to enable AirPrint.
    - 3 Click **Submit**.

(A)

(B)

- 5 Restart the machine.
