## IMPORTANT NOTE

- Most of the illustrations in this User's Guide show the MFC-8950DW.

## Memory storage

Your menu settings are stored permanently, and in the event of a power failure will *not* be lost. Temporary settings (for example, Contrast and Overseas Mode) *will* be lost. Also, during a power failure the machine will retain the date and time and programmed fax timer jobs (e.g. Delayed Fax) for up to 60 hours. Other fax jobs in the machine's memory will not be lost.

## Automatic Daylight Saving Time

You can set the machine to change automatically for Daylight Saving Time. It will set itself forward one hour in the Spring, and back one hour in the Autumn.

- 1 Press **Menu**.
- 2 Press **▲** or **▼** to display **Initial Setup**.  
Press **Initial Setup**.
- 3 Press **▲** or **▼** to display **Date&Time**.  
Press **Date&Time**.
- 4 Press **Auto Daylight**.
- 5 Press **On** or **Off**.

You can choose how long the machine must be idle before it goes into Sleep mode. The timer will restart if any operation is carried out on the machine, such as receiving a fax or a print job. The default setting is 3 minutes.

When the machine goes into Sleep mode, the LCD backlight turns off.

## Deep Sleep mode

If the machine is in Sleep mode and does not receive any jobs for a certain length of time, the machine will go into Deep Sleep mode automatically. Deep Sleep mode uses less power than Sleep mode. The machine will wake up when it receives a fax or a print job.

When the machine is in Deep Sleep mode, the LCD backlight is Off and the Home key is dimmed.

If a wireless network is enabled, the machine will not enter Deep Sleep mode.

For the procedure to disable the wireless network >> Network User's Guide: *Control panel setup*

If the machine has secure print data it will not enter Deep Sleep mode.

## Telephone line services

### BT Call Sign (U.K. only)

The BT Call Sign subscriber service is a way to have a separate number for your machine, it allows you to have at least two separate telephone numbers on one phone line. Each phone number has its own distinctive ringing pattern.

You can set up your machine so that it only responds to the second number.

When you set the BT Call Sign feature to ON, the receive mode is set to **Manual** automatically. **Manual** mode will not respond to incoming telephone calls, since the number you use for telephone calls will use the normal ring pattern. If you turn the feature off, your receive mode will remain on **Manual**.

### To enable the machine to work with BT Call Sign

This feature will only work with your external phone.

- 1 Press **Menu**.
- 2 Press **▲** or **▼** to display **Fax**. Press **Fax**.
- 3 Press **▲** or **▼** to display **Miscellaneous**. Press **Miscellaneous**.
- 4 Press **BT Call Sign**.

## Additional dialling operations

### Combining quick dial numbers

Sometimes you may want to choose from several long distance carriers when you send a fax. Rates may vary depending on the time and destination. To take advantage of low rates, you can store the access codes of long distance carriers and credit card numbers as **One Touch** and **Speed Dial** numbers. You can store these long dialling sequences by dividing them and setting them up as separate **One Touch** and **Speed Dial** numbers in any combination. You can even include manual dialling using the dial pad. (►► Basic User's Guide: *Storing numbers*)

For example, you might have stored '01632' in **Speed Dial #003** and '960555' in **Speed Dial #002**. You can use them both to dial '01632-960555' if you press the following keys:

Press  (Address Book), #003 and Send a fax.

Press **Address Book**, #002, Send a fax and **Start**.

Numbers can be added manually by entering them on the dial pad:

Press  (Address Book), #003, Send a fax, **960556** (on the dial pad), and **Start**.

This would dial '01632-960556'. You can also add a pause by pressing the **Redial/Pause** key.

# Packing and shipping the machine

## WARNING

This machine is heavy and weighs more than 17.7 kg. To prevent possible injuries at least two people should lift the machine. Be careful not to pinch your fingers when you put the machine down.

If you use a Lower Tray, DO NOT carry the machine with the Lower Tray as you may be injured or cause damage to the machine because it is not attached to the Lower Tray.

## Note

If for any reason you must ship your machine, carefully repack the machine in the original packaging to avoid any damage during transit. The machine should be adequately insured with the carrier.

- 1 Turn off the machine. Leave the machine turned off for at least 10 minutes to cool down.
- 2 Disconnect all the cables, and then unplug the power cord from the electrical socket.
- 3 Put the packing material (1) into the carton.

- 4 Wrap the machine in a plastic bag, then put it on the bottom packing material (1).

- 5 Put the packing material (2) marked "RIGHT" on the right of the machine. Put the packing material (3) marked "LEFT" on the left of the machine. Put the AC power cord and printed materials in the original carton as shown in the illustration.

- 6 Close the carton and tape it shut.

- 7 <If you have a Lower Tray>  
Repack the lower tray as shown in the illustration.

## Optional paper tray (LT-5400)

An optional lower tray can be installed on the MFC-8950DW<sup>1</sup>, and it can hold up to 500 sheets of 80 g/m<sup>2</sup> paper.

When an optional tray is installed, the machine can hold up to 1050 sheets of plain paper.

For setup, see the Instructions that we have supplied with the lower tray unit.

<sup>1</sup> Tray 2 is standard on MFC-8950DWT.

### WARNING

If you use a Lower Tray, DO NOT carry the machine with the Lower Tray as you may be injured or cause damage to the machine because it is not attached to the Lower Tray.

## Memory board

MFC-8950DW(T) has 128 MB of standard memory. The machine has one slot for optional memory expansion. You can increase the memory up to maximum of 384 MB by installing one SO-DIMM (Small Outline Dual In-line Memory Module).

### SO-DIMM Types

You can install the following SO-DIMMs:

- 256 MB Kingston KTH-LJ2015/256
- 256 MB Transcend TS256MHP423A

#### Note

- For more information, visit the Kingston Technology website at <http://www.kingston.com/>.
- For more information, visit the Transcend website at <http://www.transcend.com.tw/>.

In general, the SO-DIMM must have the following specifications:

Type	144-pin and 16-bit output
CAS latency	4
Clock frequency	267 MHz (533 Mb/S/Pin) or more
Capacity	256 MB
Height	30.0 mm
DRAM type	DDR2 SDRAM

#### Note

- There might be some SO-DIMMs that will not work with the machine.
- For more information, call the dealer you bought the machine from or Brother Customer Service.

## Installing extra memory

- 1 Turn off the machine's power switch. Unplug the telephone line cord.
- 2 Disconnect the interface cable from the machine, and then unplug the power cord from the electrical socket.

### Note

Be sure to turn off the machine's power switch before you install or remove the SO-DIMM.

- 3 Remove the plastic SO-DIMM cover (1).

- 4 Unpack the SO-DIMM and hold it by its edges.

### Important

To prevent damage to the machine from static electricity, DO NOT touch the memory chips or the board surface.

- 5 Hold the SO-DIMM by the edges and align the notches in the SO-DIMM with the protrusions in the slot. Insert the SO-DIMM diagonally (1), then tilt it toward the interface board until it clicks into place (2).

- 6 Put the plastic SO-DIMM cover (1) back on.

- 7 Plug the machine's power cord back into the electrical socket first, and then connect the interface cable.
- 8 Plug in the telephone line cord. Turn on the machine's power switch.

**Note**

To make sure that you have installed the SO-DIMM correctly, you can print the User Settings List that shows the current RAM SIZE. (See *How to print a report* >> page 45.)

This is a comprehensive list of features and terms that appear in Brother manuals. Availability of these features depends on the model you purchased.

**ADF (automatic document feeder)**

The document can be placed in the ADF and scanned one page at a time automatically.

**Auto Reduction**

**Automatic fax transmission**

Sending a fax without picking up the handset of the external telephone.

**Automatic Redial**

A feature that enables your machine to redial the last fax number after five minutes if the fax did not go through because the line was busy.

**Backup Print**

Your machine prints a copy of every fax that is received and stored in memory. This is a safety feature so you will not lose messages during a power failure.

**Batch Transmission**

As a cost saving feature, all delayed faxes to the same fax number will be sent as one transmission.

**Beeper Volume**

Volume setting for the beep when you press a key or make an error.

**Broadcasting**

The ability to send the same fax message to more than one location.

**BT Call Sign**

A subscriber service purchased from the telephone company in the U.K. that gives you another phone number on an existing phone line. The Brother machine uses the new number to simulate a dedicated fax line.

**Cancel Job**

Cancels a programmed print job and clears it from the machine's memory.

**CNG tones**

The special tones (beeps) sent by fax machines during automatic transmission to tell the receiving machine that a fax machine is calling.

**Coding method**

Method of coding the information contained in the document. All fax machines must use a minimum standard of Modified Huffman (MH). Your machine is capable of greater compression methods, Modified Read (MR), Modified Modified Read (MMR) and JBIG, if the receiving machine has the same capability.

**Communication error (or Comm. Error)**

An error during fax sending or receiving, usually caused by line noise or static.

**Compatibility group**

The ability of one fax unit to communicate with another. Compatibility is assured between ITU-T Groups.

**Contrast**

Setting to compensate for dark or light documents, by making faxes or copies of dark documents lighter and light documents darker.

**Delayed Fax**

Sends your fax at a specified later time that day.

**Dual Access**

Your machine can scan outgoing faxes or scheduled jobs into memory at the same time it is sending a fax or receiving or printing an incoming fax.

**ECM (Error Correction Mode)**

Detects errors during fax transmission and resends the pages of the fax that had an error.

**Extension telephone**

A telephone on the fax number that is plugged into a separate wall socket.

**External phone**

A TAD (telephone answering device) or telephone that is connected to your machine.

**F/T Ring Time**

The length of time that the Brother machine fast double-rings (when the Receive Mode setting is Fax/Tel) to notify you to pick up a voice call that it answered.

**Fax Detect**

Enables your machine to respond to CNG tones if you interrupt a fax call by answering it.

**Fax Forwarding**
