ADS-2600W $\mathsf{C}\,\mathsf{E}\,\textcircled{!}$

Please read the Product Safety Guide first before you set up your machine. Then, please read this Quick Setup Guide for the correct setup and installation.
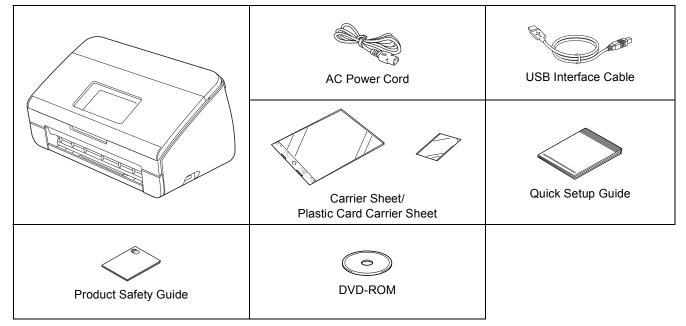

⚠ WARNING	WARNING indicates a potentially hazardous situation which, if not avoided, could result in death or serious injuries.

1 Unpack the machine and check the components

■ *The components included in the box may differ depending on your country.*

	AC Power Cord	USB Interface Cable
	Carrier Sheet/ Plastic Card Carrier Sheet	Quick Setup Guide
Product Safety Guide	DVD-ROM	

⚠ WARNING

- **Plastic bags are used in the packing of your machine. To avoid danger of suffocation, keep these plastic bags away from babies and children. Plastic bags are not toys.**
- **Only use the power cord supplied with this product.**

✎ **Note**
- *We recommend that you save the original packaging in case you must ship your machine.*
- *Please use the supplied USB cable if you wish to connect the machine to a computer.*

USB cable
It is recommended to use a USB 2.0 cable (Type A/B) that is no more than 2 metres long.

Network cable
Use a straight-through Category5 (or greater) twisted-pair cable for 10BASE-T or 100BASE-TX Fast Ethernet Network.

a Remove the protective tape and film covering the machine and the LCD.

**b** Make sure you have all the components.

2 Connect the power cord
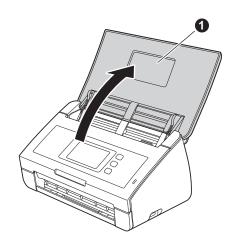

① Important

DO NOT connect the USB cable yet.
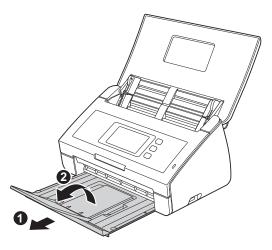

a Connect the power cord.

### ⚠ WARNING

The machine must be fitted with an earthed plug.

b Open the Top Cover ❶.

c Pull the Output Tray out of the machine ❶ and then unfold the Document Stopper ❷.

3 Choose your language (if necessary)

a Press ▮.

b Swipe up or down, or press ▲ or ▼ to display Initial Setup.
Press Initial Setup.

c Press Local Language.

d Swipe up or down, or press ▲ or ▼ to display your language.
Press your language.

e Press 🏠.

4 Set the date and time

The machine displays the date and time.

a Press ⚙.

b Swipe up or down, or press ▲ or ▼ to display Initial Setup.
Press Initial Setup.

c Press Date & Time.

d Press Date.

e Enter the last two digits of the year on the Touchscreen, and then press OK.

f Repeat for month and day.

g Press Time, then press OK.

h Enter the time on the Touchscreen in 24-hour format.

i Press 🏠.

5 Automatic Daylight Savings Time

You can set the machine to change automatically for daylight savings time. It will reset itself forward one hour in the spring and backward one hour in the fall.
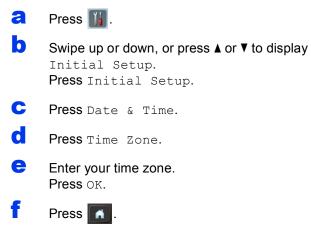

a Press ⚙.

b Swipe up or down, or press ▲ or ▼ to display Initial Setup.
Press Initial Setup.

c Press Date & Time.

d Press Auto Daylight.

e Press On (or Off).

f Press 🏠.

6 Set the Time Zone

You can set the time zone (not summer time but standard time) on the machine for your location.

a Press ⚙.

b Swipe up or down, or press ▲ or ▼ to display `Initial Setup`.
Press `Initial Setup`.

c Press `Date & Time`.

d Press `Time Zone`.
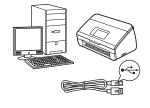

e Enter your time zone.
Press `OK`.

f Press 🏠.

7 Choose your connection type

These installation instructions are for Windows® XP Home, XP Professional, Windows Vista®, Windows® 7, and Mac OS X v10.6.x and 10.7.x.

📝 **Note**

If your computer does not have a DVD-ROM drive you can download the latest drivers, manuals and utilities for your model from the Brother Solutions Center at http://solutions.brother.com/. Some software applications included on the DVD-ROM may not be available as a download.

Macintosh Wired Network

Wireless Network

For USB interface users

(Windows® XP Home/XP Professional/Windows Vista®/Windows® 7)

8 Before you install

Make sure that your computer and machine are on and you are logged on with Administrator rights.

⚠ Important

- *DO NOT connect the USB cable yet.*
- *If there are any programs running, close them.*

📝 Note

- *The screens may differ depending on your operating system.*
- *The DVD-ROM includes Nuance™ PaperPort™12SE. This software supports Windows® XP Home (SP3 or greater), XP Professional (SP3 or greater), Windows Vista® (SP2 or greater) and Windows® 7. Update to the latest Windows® Service Pack before installing MFL-Pro Suite.*

9 Install MFL-Pro Suite

a Put the supplied DVD-ROM into your DVD-ROM drive. If the model name screen appears, choose your machine. If the language screen appears, choose your language.

📝 Note

If the Brother screen does not appear automatically, go to Computer (My Computer), double-click the DVD-ROM icon, and then double-click start.exe.

b The DVD-ROM Top Menu will appear. Click **Install MFL-Pro Suite** and click **Yes** if you accept the license agreements. Follow the on-screen instructions.

📝 Note

For Windows Vista® and Windows® 7, when the User Account Control screen appears, click Allow or Yes.

c Choose **Local Connection (USB)**, and then click **Next**. The installation continues.

📝 Note

For Windows Vista® and Windows® 7, when the Windows® Security screen appears, click the check box and click Install to complete the installation correctly.

**d** When this screen appears, go to the next step.

10 Connect the USB cable

a Connect the USB cable to the USB port marked with a ⟨USB⟩ symbol on your machine, and make sure to connect the other end of the cable to your computer.

b The installation will continue automatically.

Multiple screens will appear during the installation.

❶ Important

DO NOT cancel any of the screens during the installation. It may take a few seconds for all screens to appear.

c When the **On-Line Registration** screen is displayed, make your selection and follow the on-screen instructions.

11 Finish and restart

a Click **Finish** to restart your computer. After restarting the computer, you must log on with Administrator rights.

✎ Note

- *If an error message appears during the software installation, run the **Installation Diagnostics** located in ⊞ (Start)/ All Programs/Brother/ADS-2600W.*

- *Depending on your security settings, a Windows® Security or antivirus software window may appear when using the machine or its software. Please allow or permit the window to continue.*

b The following screens will appear.
- When the **Software Update Setting** screen appears, choose the software update setting you want and click **OK**.
- When the Brother Product Research & Support Program starts up, follow the on-screen instructions.

✎ Note

Internet access is required for the software update and the Brother Product Research & Support Program.

Finish | **The installation is now complete.**

Now go to

Proceed to Install Optional Applications on page 33.

7

For USB interface users (Mac OS X v10.6.x, 10.7.x)

8 Before you install

Make sure your machine is connected to the power and your Macintosh is on. You must be logged on with Administrator rights.
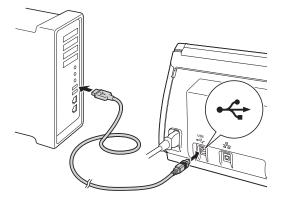

> 📝 **Note**
>
> *For Mac OS X v10.5.x users, upgrade to Mac OS X v10.6.x - 10.7.x before installation.*

9 Connect the USB cable

> ⚠ **Important**
> - *DO NOT connect the machine to a USB port on a keyboard or a USB hub.*
> - *Connect the machine directly to your Macintosh.*

a Connect the USB cable to the USB port marked with a ⟶ symbol on your machine, and make sure to connect the other end of the cable to your computer.

10 Install MFL-Pro Suite

a Put the supplied installer DVD-ROM into your DVD-ROM drive.

b Double-click the **Start Here OSX** icon to install. If the model name screen appears, choose your machine.

c Choose **Local Connection (USB)**, and then click **Next**. Follow the on-screen instructions.

d Please wait for the software to install. After the installation, the Brother software will search for the Brother device. This will take a few moments to complete.

e Choose your machine from the list, and then click **Next**.

OK! **The installation of MFL-Pro Suite is now complete.**
Go to step 11.

11 Install Presto! PageManager and Presto! BizCard

a Click **Presto! PageManager** or **Presto! BizCard** and follow the on-screen instructions.

Finish **The installation is now complete.**

For wired network interface users

(Windows® XP Home/XP Professional/Windows Vista®/Windows® 7)

8 Before you install

Make sure that your computer and machine are on and you are logged on with Administrator rights.

❶ Important

If there are any programs running, close them.

✎ Note

- *The screens may differ depending on your operating system.*

- *The DVD-ROM includes Nuance™ PaperPort™ 12SE. This software supports Windows® XP Home (SP3 or greater), XP Professional (SP3 or greater), Windows Vista® (SP2 or greater) and Windows® 7. Update to the latest Windows® Service Pack before installing MFL-Pro Suite.*

- *If you have previously set up your machine for a wireless network and then want to set it up on a wired network, you should check that the machine's `Wired Enable` is set to `On`. The wireless network interface will become inactive with this setting.*

  On your machine, press ▧ and `Network`. Swipe up or down, or press ▲ or ▼ to display `Wired LAN`, and then press `Wired LAN`. Swipe up or down, or press ▲ or ▼ to display `Wired Enable`, and then press `Wired Enable`. Press `On`.
  Press ⌂ .

9 Connect the network cable

a You will find the Ethernet port marked with a ▧ symbol on the back of the machine as shown below. Remove the protective cap and connect the network cable to the Ethernet port.

b Connect the cable to your network.

10 Install MFL-Pro Suite

a Put the supplied DVD-ROM into your DVD-ROM drive. If the model name screen appears, choose your machine. If the language screen appears, choose your language.

📝 Note

If the Brother screen does not appear automatically, go to Computer (My Computer), double-click the DVD-ROM icon, and then double-click start.exe.

b The DVD-ROM Top Menu will appear. Click **Install MFL-Pro Suite** and click **Yes** if you accept the license agreements. Follow the on-screen instructions.

📝 Note

For Windows Vista® and Windows® 7, when the User Account Control screen appears, click Allow or Yes.

c Choose **Wired Network Connection (Ethernet)**, and then click **Next**.

d When this screen appears, choose **Change the Firewall port settings to enable network connection and continue with the installation. (Recommended)** and click **Next**.

If you are using a firewall other than the Windows® Firewall or the Windows® Firewall is off, this screen may appear.

See the instructions provided with your firewall software for information on how to add the following network ports.

■ For network scanning, add UDP port 54925.
■ If you still have trouble with your network connection, add UDP port 137 and 161.

📝 Note

• *If your machine is not found over the network, confirm your settings by following the on-screen instructions.*

• *If there is more than one of the same model connected on your network, the IP Address and Node Name will be displayed to help you identify the machine.*

e The installation of the Brother drivers will automatically start. The installation screens appear one after another.

❶ Important

DO NOT cancel any of the screens during the installation. It may take a few seconds for all screens to appear.
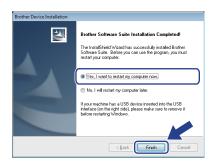

📝 Note

For Windows Vista® and Windows® 7, when the Windows® Security screen appears, click the check box and click Install to complete the installation correctly.

f When the **On-Line Registration** screen is displayed, make your selection and follow the on-screen instructions.

11 Finish and restart

a Click **Finish** to restart your computer. After restarting the computer, you must log on with Administrator rights.

📝 Note

If an error message appears during the software installation, run the Installation Diagnostics located in 🪟 (Start)/All Programs/Brother/ADS-2600W LAN.

b The following screens will appear.

- When the **Software Update Setting** screen appears, choose the software update setting you want and click **OK**.

- When the Brother Product Research & Support Program starts up, follow the on-screen instructions.

📝 Note

Internet access is required for the software update and the Brother Product Research & Support Program.

12 Install MFL-Pro Suite on additional computers (if necessary)

If you want to use your machine with multiple computers on the network, install MFL-Pro Suite on each computer. Go to step **10** on page 11. Also see step **8** on page 10 before you install.

📝 Note

Network license (Windows®)
This product includes a PC license for up to 2 users. This license supports the installation of the MFL-Pro Suite including Nuance™ PaperPort™ 12SE on up to 2 PCs on the network. If you want to use more than 2 PCs with Nuance™ PaperPort™ 12SE installed, please purchase the Brother NL-5 pack which is a multiple PC license agreement pack for up to 5 additional users. To purchase the NL-5 pack, contact Brother customer service or your local Brother dealer.

Finish **The installation is now complete.**

Now go to

Proceed to Install Optional Applications on page 33.

For wired network interface users (Mac OS X v10.6.x, 10.7.x)

8 Before you install

Make sure your machine is connected to the power and your Macintosh is on. You must be logged on with Administrator rights.

📝 **Note**

• *For Mac OS X v10.5.x users, upgrade to Mac OS X v10.6.x - 10.7.x before installation.*

• *If you have previously set up your machine for a wireless network and then want to set it up on a wired network, you should check that the machine's* `Wired Enable` *is set to* `On`*. The wireless network interface will become inactive with this setting.*

On your machine, press 🔧 *and* `Network`*. Swipe up or down, or press ▲ or ▼ to display* `Wired LAN`*, and then press* `Wired LAN`*. Swipe up or down, or press ▲ or ▼ to display* `Wired Enable`*, and then press* `Wired Enable`*. Press* `On`*.*

Press 🏠 *.*

9 Connect the network cable

a You will find the Ethernet port marked with a 🖧 symbol on the back of the machine as shown below. Remove the protective cap and connect the network cable to the Ethernet port.

b Connect the cable to your network.

13

10 Install MFL-Pro Suite

a Put the supplied installation DVD-ROM into your DVD-ROM drive.

b Double-click the **Start Here OSX** icon to install. If the model name screen appears, choose your machine.

c Choose **Wired Network Connection (Ethernet)**, and then click **Next**. Follow the on-screen instructions.

d Please wait for the software to install. After the installation, the Brother software will search for the Brother device. This will take a few moments to complete.

e If the machine is configured for your network, choose your machine from the list, and then click **Next**.

✎ Note

• *If your machine is not found over the network, confirm your network settings.*

• *You can find your machine's MAC Address (Ethernet Address) and IP Address from the control panel of the machine.*

• *If this screen appears, enter a name for your Macintosh up to 15 characters long, and then click* **Next**.

The name you enter will appear on the machine's LCD when you choose a scan option. (➤➤User's Guide: Scan from the Control Panel of the Machine)

OK! **The installation of MFL-Pro Suite is now complete.**
Go to step **11**.

11 Install Presto! PageManager and Presto! BizCard

a   Click **Presto! PageManager** or **Presto! BizCard** and follow the on-screen instructions.

12 Install MFL-Pro Suite on additional computers (if necessary)

If you want to use your machine with multiple computers on the network, install MFL-Pro Suite on each computer. Go to step **10** on page 14. Also see step **8** on page 13 before you install.

Finish   **The installation is now complete.**

For wireless network interface users

8 Before you begin

First you must configure the wireless network settings of your machine to communicate with your network access point/router. After the machine is configured to communicate with your access point/router, computers on your network will have access to the machine. To use the machine from these computers, you will need to install the drivers and software. The following steps will guide you through the configuration and installation process.

To achieve optimum results with normal everyday document scanning, place the Brother machine as close to the network access point/router as possible with minimal obstructions. Large objects and walls between the two devices as well as interference from other electronic devices can affect the data transfer speed of your documents.

Due to these factors, wireless may not be the best method of connection for all types of documents and applications.

Although your Brother machine can be used in both a wired and wireless network, only one of the connection methods can be used at a time.
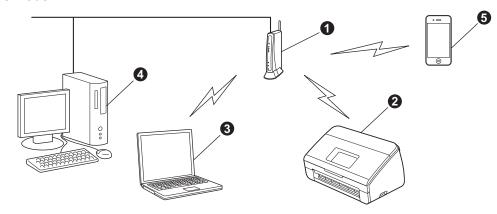

Note

If you have previously configured the wireless settings of the machine you must reset the network settings before you can configure the wireless settings again.

On your machine, press ![icon] *and* `Network`.
Swipe up or down, or press ▲ or ▼ to display `Network Reset`, *and then press* `Network Reset`.
Press `Yes` *to accept. Hold down* `Yes` *for 2 seconds to confirm.*

The following instructions are for infrastructure mode (connected to a computer through an access point/router).

Infrastructure Mode

❶ Access point/router
❷ Wireless Network machine (your machine)
❸ Wireless capable computer connected to the access point/router
❹ Wired computer connected to the access point/router
❺ Mobile Device connected to the wireless access point/router

Please make sure the wireless network settings of the machine match the access point/router.

Note

To set up your machine in Ad-hoc mode (connected to a wireless capable computer without an access point/router) you can find instructions in the Network User's Guide *on the DVD-ROM.*
You can view the Network User's Guide *by following the instructions below.*
1 Turn on your computer. Insert the DVD-ROM into your DVD-ROM drive.
For Windows®:
2 Choose your model and the language. The DVD-ROM top menu will appear.
3 Click **User's Guides**, *and then click* **HTML documents**. *The top page will appear.*
4 Click Network User's Guide.
For Macintosh:
2 Double-click **User's Guides**. *Choose your model and the language.*
3 Click **User's Guides**.

9 Choose your wireless setup method

The following instructions will offer three methods for setting up your Brother machine on a wireless network. Choose the method you prefer for your environment.

a **Setup using the installation DVD-ROM and a USB cable (Windows® & Macintosh)**

You need to temporarily use a USB cable during configuration.

It is recommended that you use a computer wirelessly connected to your network for this method.

- **If you are using Windows® XP, or currently using a computer connected to an access point/router by network cable, you need to know your wireless settings. Please write down your wireless network settings in the area below.**

- **Please do not contact Brother Customer Service for assistance without the wireless security information. We cannot assist you in locating your network security settings.**

Item	Record the current wireless network settings
SSID (Network Name)	
Network Key	

* The Network Key may also be described as the Password, Security Key or Encryption Key.

Note

If you do not know this information (SSID and Network Key), you cannot continue the wireless setup.

How can I find this information?

1) You should see the documentation provided with your wireless access point/router.

2) The default SSID could be the manufacturer's name or the model name.

3) If you do not know the security information, please consult the router manufacturer, your system administrator, or internet provider.

Wireless Network

17

b **Manual setup from the control panel using the Setup Wizard (Macintosh, mobile devices and Windows®)**

- If your wireless access point/router does not support WPS (Wi-Fi Protected Setup™) or AOSS™, **write down the wireless network settings** of your wireless access point/router in the area below.

Please do not contact Brother Customer Service for assistance without the wireless security information. We cannot assist you in locating your network security settings.

Item	Record the current wireless network settings
SSID (Network Name)	
Network Key	

* The Network Key may also be described as the Password, Security Key or Encryption Key.

Note

If you do not know this information (SSID and Network Key), you cannot continue the wireless setup.

How can I find this information?

1) You should see the documentation provided with your wireless access point/router.

2) The default SSID could be the manufacturer's name or the model name.

3) If you do not know the security information, please consult the router manufacturer, your system administrator, or internet provider.

Now go to **page 22**

c **One-push setup using WPS or AOSS™ (Windows® & Macintosh)**
If your wireless access point/router supports automatic wireless (one-push) setup (WPS or AOSS™)

Now go to **page 24**

18

10 Setup using the installation DVD-ROM and a USB cable (Windows® & Macintosh)

✎ Note

*This example shows Windows® installation. For Mac installation, insert the installation DVD-ROM into your DVD-ROM drive and double-click **Start Here OSX** to install. Select Wireless installation and follow the Wireless Device Setup instructions on your computer screen.*

You need to temporarily use a USB cable during configuration.

a Put the supplied DVD-ROM into your DVD-ROM drive. If the model name screen appears, choose your machine. If the language screen appears, choose your language.

✎ Note

*If the Brother screen does not appear automatically, go to **Computer (My Computer)**, double-click the DVD-ROM icon, and then double-click **start.exe**.*

b The DVD-ROM Top Menu will appear. Click **Install MFL-Pro Suite** and click **Yes** if you accept the license agreements. Follow the on-screen instructions.

✎ Note

*For Windows Vista® and Windows® 7, when the User Account Control screen appears, click **Allow** or **Yes**.*

c Choose **Wireless Network Connection**, and then click **Next**.

d When this screen appears, choose **Change the Firewall port settings to enable network connection and continue with the installation. (Recommended)** and click **Next**.

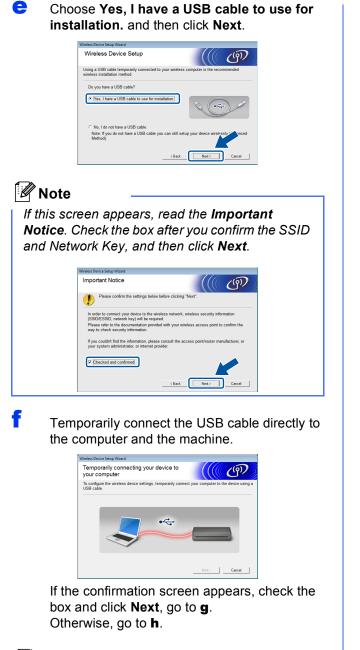

If you are using a firewall other than the Windows® Firewall or the Windows® Firewall is off, this screen may appear.

See the instructions provided with your firewall software for information on how to add the following network ports.

■ For network scanning, add UDP port 54925.
■ If you still have trouble with your network connection, add UDP port 137 and 161.

Wireless Network

e Choose **Yes, I have a USB cable to use for installation.** and then click **Next**.

Note

*If this screen appears, read the **Important Notice**. Check the box after you confirm the SSID and Network Key, and then click **Next**.*

f Temporarily connect the USB cable directly to the computer and the machine.

If the confirmation screen appears, check the box and click **Next**, go to **g**.
Otherwise, go to **h**.

Note

For instructions on connecting the USB cable to the USB port of your machine, see Connect the USB cable *on page 7.*

g When the following screen appears, check **Yes** if you want to connect to the listed SSID. Click **Next** and go to **j**.

h When the following screen appears, the wizard will search for wireless networks available to your machine. Choose the SSID that you wrote down for your network in step **9-a** on page 17, and then click **Next**.

Note

• *If the list is blank, check that the access point has power and is broadcasting the SSID, and then see if the machine and the access point are within range for wireless communication. Then click **Refresh**.*

• *If your access point is set to not broadcast the SSID you can manually add it by clicking the **Advanced** button. Follow the on-screen instructions for entering the **Name (SSID)**, and then click **Next**.*

20

i Enter the **Network Key** you wrote down in step **9-a** on page 17, and then click **Next**.

📝 Note

*If your network is not configured for Authentication and Encryption, the following screen will appear. To continue configuration, click **OK** and go to **j**.*

j Click **Next**. The settings will be sent to your machine.

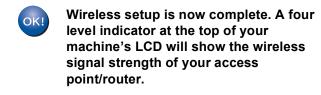

📝 Note

- *The settings will remain unchanged if you click **Cancel**.*

- *If you want to manually enter the IP address settings of your machine, click **Change IP Address** and enter the necessary IP address settings for your network.*

- *If the wireless setup failure screen appears, click **Retry** and try starting from step **h** again.*

k Disconnect the USB cable between the computer and the machine.

l Click **Next** to continue to install MFL-Pro Suite.

OK! **Wireless setup is now complete. A four level indicator at the top of your machine's LCD will show the wireless signal strength of your access point/router.**

To install MFL-Pro Suite

For Windows® users:

Now go to

For Macintosh users:

Now go to

Wireless Network

10 Manual setup from the control panel using the Setup Wizard (Macintosh, mobile devices and Windows®)

You cannot configure an enterprise wireless network using the Setup Wizard from the control panel. If you choose the SSID for configuring an enterprise wireless network after searching the available SSIDs, the message dialog about Enterprise Authentication Method will appear.
To configure an enterprise wireless network, use installer DVD-ROM and follow the instructions.

a Press 🔧.
Swipe up or down, or press ▲ or ▼ to display `Network`, and then press `Network`.
Swipe up or down, or press ▲ or ▼ to display `WLAN`, and then press `WLAN`.
Swipe up or down, or press ▲ or ▼ to display `Setup Wizard`, and then press `Setup Wizard`.

When `Enable WLAN?` is displayed, press `Yes` to accept.
This will start the wireless setup wizard.
To cancel, press `No`.

b The machine will search for available SSIDs. It will take several seconds to display a list of available SSIDs.
If a list of SSIDs is displayed, swipe up or down, or press ▲ or ▼ to choose the SSID you wrote down in step **9-b** on page 18. Select the SSID you want to connect with, then press `OK`.

If the wireless access point/router of the selected SSID supports WPS and the machine asks to use WPS, go to **c**.
If the machine asks you to enter a Network Key, go to **d**.
Otherwise, go to **e**.

📝 Note
- If a list of SSIDs is not displayed, make sure your access point is on. Move your machine closer to the access point and try starting from **a** again.
- If your access point is set to not broadcast the SSID, you will have to manually add the SSID name. For details, see the Network User's Guide.

c Press `Yes` to connect your machine using WPS. (If you choose `No (Manual)` to continue manual configuration, go to **d** to enter a Network Key.)

When the LCD shows `Start WPS`, press the WPS button on your wireless access point/router, and then press `Next` to proceed.

Go to **e**.

d Enter the Network Key you wrote down in step **9-b** on page 18 using the Touchscreen.

Press ⇧aA to cycle between lower case and upper case. Press A1@ to cycle between letters, numbers and special characters. (The characters available may differ depending on your country.) To move the cursor to the left or right, press ◄ or ►.
(For more information, see *Entering Text for Wireless Settings* on page 35.)

Press `OK` when you have entered all the characters, then press `Yes` to apply your settings.

e Your machine will now try to connect to your wireless network. It may take a few minutes.

f A connection result message appears until the `OK` button is pressed on the LCD.
If your wireless device is connected successfully, the LCD shows `Connected`.
If the connection failed, the LCD shows an error code. Make a note of the error code, see *Troubleshooting* on page 25, and correct the error.

OK! Wireless setup is now complete. A four level indicator at the top of your machine's LCD will show the wireless signal strength of your access point/router.

To install MFL-Pro Suite, continue to step 11.

For Windows® users:

Now go to

**Page 28**

For Macintosh users:

Now go to

Page 31

Note

For Mobile Device users, please go to the User's Guide for the application you are using (e.g. Brother iPrint&Scan or other applications) for additional details on how to use your machine with the application. To download the User's Guide for the application you are using, please go to the manuals download section on your model's home page on the Brother Solutions Center at http://solutions.brother.com/.

Wireless Network

10 One-push setup using WPS or AOSS™ (Windows® & Macintosh)

a Confirm your wireless access point/router has the WPS or AOSS™ symbol as shown below.

b Place the Brother machine within range of your WPS or AOSS™ access point/router. The range may differ depending on your environment. Refer to the instructions provided with your access point/router.

c Press ⚙️.
Swipe up or down, or press ▲ or ▼ to display `Network`, and then press `Network`.
Swipe up or down, or press ▲ or ▼ to display `WLAN`, and then press `WLAN`.
Swipe up or down, or press ▲ or ▼ to display `WPS/AOSS`, and then press `WPS/AOSS`.

When `Enable WLAN?` is displayed, press `Yes` to accept.

✎ Note

If your wireless access point/router supports WPS (PIN Method), you can also configure your machine using the PIN (Personal Identification Number) Method. ▸▸*Network User's Guide:* Configuration using the PIN Method of WPS (Wi-Fi Protected Setup)

d When the LCD shows to start WPS or AOSS™, press the WPS or AOSS™ button on your wireless access point/router. See the user's guide of your wireless access point/router for instructions.

Then press `OK` and your machine will now automatically detect which mode (WPS or AOSS™) your wireless access point/router uses and try to connect to your wireless network.

e A connection result message appears until the `OK` button is pressed on the LCD.
If your wireless device is connected successfully, the LCD shows `Connected`.
If the connection failed, the LCD shows an error code. Make a note of the error code, see *Troubleshooting* on page 25, and correct the error.

OK! **Wireless setup is now complete. A four level indicator at the top of your machine's LCD will show the wireless signal strength of your access point/router.**

To install MFL-Pro Suite, continue to step 11.

For Windows® users:

Now go to

Troubleshooting

Please do not contact Brother Customer Service for assistance without the wireless security information. We cannot assist you in locating your network security settings.

How can I find the wireless security information (SSID and Network Key)

1) You should see the documentation provided with your wireless access point/router.

2) The default SSID could be the manufacturer's name or the model name.

3) If you do not know the security information, please consult the router manufacturer, your system administrator, or internet provider.

* The Network Key may also be described as the Password, Security Key or Encryption Key.
* If the WLAN access point/router is not broadcasting the SSID, the SSID will not automatically be detected. You will have to manually enter the SSID name. See *Configuring your machine when the SSID is not broadcasting* in the *Network User's Guide*.

Error codes

If the LCD shows an error code in the table below, refer to the following instructions and correct the error.

Error code	Recommended Solutions
TS-01	The wireless setting is not activated, turn the wireless setting to ON. - If a network cable is connected to your machine, disconnect it and turn the wireless setting of your machine to ON. 1. On your machine, press 🔧 and `Network`. 2. Press `WLAN`, and then `Setup Wizard`. 3. When `Enable WLAN?` is displayed, press `Yes`. This will start the wireless setup wizard.

TS-02	The wireless access point/router cannot be detected.
	
	1. Check the following 4 points.
	
	  - Make sure that the wireless access point/router is powered on.
	  - Move your machine to an obstruction-free area, or closer to the wireless access point/router.
	  - Temporarily place your machine within about one metre from the wireless access point when you are configuring the wireless settings.
	  - If your wireless access point/router is using MAC address filtering, confirm the MAC address of the Brother machine is allowed in the filter.
	
	2. If you manually entered the SSID and security information (SSID/authentication method/encryption method/Network Key), the information may be incorrect. Reconfirm the SSID and security information and re-enter the correct information as necessary.
	
	See *How can I find the wireless security information (SSID and Network Key)* on page 25 to confirm.

For Wireless Network Users

TS-03	The wireless network and security setting you entered may be incorrect. Reconfirm the wireless network settings. * Check if the entered or selected SSID/authentication method/encryption method/UserID/Userpass are correct. See *How can I find the wireless security information (SSID and Network Key)* on page 25 to confirm.
TS-04	The Authentication/Encryption methods used by the selected wireless access point/router are not supported by your machine. For infrastructure mode, change the authentication and encryption methods of the wireless access point/router. Your machine supports the following authentication methods: **table below** If your problem is not solved, the SSID or network settings you entered may be incorrect. Reconfirm the wireless network settings. See *How can I find the wireless security information (SSID and Network Key)* on page 25 to confirm. For ad-hoc mode, change the authentication and encryption methods of your computer for the wireless setting. Your machine supports Open authentication method only, with optional WEP encryption.
TS-05	The security information (SSID/Network Key) is incorrect. Reconfirm the SSID and security information (Network Key). If your router uses WEP encryption, enter the key used as the first WEP key. Your Brother machine supports the use of the first WEP key only. See *How can I find the wireless security information (SSID and Network Key)* on page 25 to confirm.
TS-06	The wireless security information (Authentication method/Encryption method/Network Key) is incorrect. Reconfirm the wireless security information (Authentication method/Encryption method/Network Key) in the table of TS-04. If your router uses WEP encryption, enter the key used as the first WEP key. Your Brother machine supports the use of the first WEP key only. See *How can I find the wireless security information (SSID and Network Key)* on page 25 to confirm.

authentication method	encryption method
WPA-Personal	TKIP
	AES
WPA2-Personal	AES
Open	WEP
	None (without encryption)
Shared key	WEP

For Wireless Network Users

TS-07	The machine cannot detect a wireless access point/router that has WPS or AOSS™ enabled. If you would like to configure your wireless settings using WPS or AOSS™, you must operate both your machine and the wireless access point/router. Confirm your wireless access point/router supports WPS or AOSS™ and try starting again. If you do not know how to operate your wireless access point/router using WPS or AOSS™ see the documentation provided with your wireless access point/router, ask the manufacturer of your wireless access point/router or ask your network administrator.
TS-08	Two or more wireless access points that have WPS or AOSS™ enabled are detected. - Confirm that only one wireless access point/router within range has the WPS or AOSS™ method active and try again. - Try starting again after a few minutes in order to avoid interference from other access points.

Note

If the error code TS-20 appears, the machine is still trying to connect to your wireless network. Please wait a few minutes, and then check the WLAN status from the control panel of the machine.

Wireless Network

27

Install the drivers & software

(Windows® XP Home/XP Professional/Windows Vista®/Windows® 7)

11 Before you install

Make sure that your computer and machine are on and you are logged on with Administrator rights.

❶ Important

If there are any programs running, close them.

📝 Note

- *The screens may differ depending on your operating system.*
- *The DVD-ROM includes Nuance™ PaperPort™ 12SE. This software supports Windows® XP Home (SP3 or greater), XP Professional (SP3 or greater), Windows Vista® (SP2 or greater) and Windows® 7. Update to the latest Windows® Service Pack before installing MFL-Pro Suite.*

12 Install MFL-Pro Suite

a Put the supplied DVD-ROM into your DVD-ROM drive. If the model name screen appears, choose your machine. If the language screen appears, choose your language.

📝 Note

If the Brother screen does not appear automatically, go to Computer (My Computer), double-click the CD-ROM icon, and then double-click start.exe.

b The DVD-ROM Top Menu will appear. Click **Install MFL-Pro Suite** and click **Yes** if you accept the license agreements. Follow the on-screen instructions.

📝 Note

For Windows Vista® and Windows® 7, when the User Account Control screen appears, click Allow or Yes.

c Choose **Wireless Network Connection**, and then click **Next**.

d When this screen appears, choose **Change the Firewall port settings to enable network connection and continue with the installation. (Recommended)** and click **Next**.

If you are using a firewall other than the Windows® Firewall or the Windows® Firewall is off, this screen may appear.

See the instructions provided with your firewall software for information on how to add the following network ports.
- For network scanning, add UDP port 54925.
- If you still have trouble with your network connection, add UDP port 137 and 161.

e Choose your machine from the list, and then click **Next**.

✎ Note

- *If your machine is not found over the network, confirm your settings by following the on-screen instructions. If you encounter this failure, go to step* **9-b** *on page 18 and setup the wireless connection again.*

- *If you are using WEP and the LCD displayed* Connected *but your machine is not found on the network, make sure you entered the WEP key correctly. The WEP key is case sensitive.*

f The installation of the Brother drivers will automatically start. The installation screens appear one after another.

❶ Important

DO NOT cancel any of the screens during the installation. It may take a few seconds for all screens to appear.

✎ Note

*For Windows Vista® and Windows® 7, when the Windows® Security screen appears, click the check box and click **Install** to complete the installation correctly.*

g When the **On-Line Registration** screen is displayed, make your selection and follow the on-screen instructions.

Windows®
Wireless Network
Macintosh

29

13 Finish and restart

a Click **Finish** to restart your computer. After restarting the computer, you must log on with Administrator rights.

📝 Note

*If an error message appears during the software installation, run the **Installation Diagnostics** located in* 🪟 *(Start)/All Programs/Brother/ ADS-2600W LAN.*

b The following screens will appear.

- When the **Software Update Setting** screen appears, choose the software update setting you want and click **OK**.

- When the Brother Product Research & Support Program starts up, follow the on-screen instructions.

📝 Note

Internet access is required for the software update and the Brother Product Research & Support Program.

14 Install MFL-Pro Suite on additional computers (if necessary)

If you want to use your machine with multiple computers on the network, install MFL-Pro Suite on each computer. Go to step **11** on page 28.

📝 Note

Network license (Windows®)
This product includes a PC license for up to 2 users. This license supports the installation of the MFL-Pro Suite including Nuance™ PaperPort™ 12SE on up to 2 PCs on the network. If you want to use more than 2 PCs with Nuance™ PaperPort™ 12SE installed, please purchase the Brother NL-5 pack which is a multiple PC license agreement pack for up to 5 additional users. To purchase the NL-5 pack, contact Brother customer service or your local Brother dealer.

Finish **The installation is now complete.**

Now go to

Proceed to Install Optional Applications on page 33.

Install the drivers & software (Mac OS X v10.6.x, 10.7.x)

11 Before you install

Make sure your machine is connected to the power and your Macintosh is on. You must be logged on with Administrator rights.

Note

For Mac OS X v10.5.x users, upgrade to Mac OS X v10.6.x - 10.7.x before installation.

12 Install MFL-Pro Suite

a Put the supplied installation DVD-ROM into your DVD-ROM drive.

b Double-click the **Start Here OSX** icon to install. If the model name screen appears, choose your machine.

c Choose **Wireless Network Connection**, and then click **Next**.

d Choose your machine from the list, and then click **Next**.

Note

*If your wireless settings fail, the **Wireless Device Setup Wizard** screen appears. Follow the on-screen instructions to complete the wireless configuration.*

e The installation of the Brother drivers will automatically start. Please wait for the software to install.

📝 Note

- *You can find your machine's MAC Address (Ethernet Address) and IP Address from the control panel of the machine.*

- *If this screen appears, enter a name for your Macintosh up to 15 characters long, and then click **Next**.*

The name you enter will appear on the machine's LCD when you choose a scan option. (▸▸User's Guide: Scan from the Control Panel of the Machine)

OK! **The installation of MFL-Pro Suite is now complete.**
Go to step 13.

13 Install Presto! PageManager and Presto! BizCard

a Click **Presto! PageManager** or **Presto! BizCard** and follow the on-screen instructions.

14 Install MFL-Pro Suite on additional computers (if necessary)

If you want to use your machine with multiple computers on the network, install MFL-Pro Suite on each computer. Go to step **11** on page 31.

Finish **The installation is now complete.**

1 Install optional applications

Nuance PDF Converter Professional 7

Nuance PDF Converter Professional 7 offers a variety of features for handling PDF files. It can unlock and open PDF files for viewing, editing, annotation and re-assembly.
Enter the Nuance serial number that is shown on the sleeve of the MFL-Pro Suite DVD-ROM package when installing Nuance PDF Converter Professional 7.

NewSoft Presto! BizCard 6

Presto! BizCard lets you manage the information from scanned business cards, such as names, companies, mailing addresses, phone/fax numbers and e-mail addresses, on your computer. Simply scan, or import your business cards and Presto! BizCard automatically saves the data and image for each card. Different viewing modes are available for easy searching, editing, creating, and sorting.

📝 **Note**

Make sure you are logged on with Administrator rights.

a Open the top menu again by ejecting and then reinserting the DVD-ROM or by double-clicking the **start.exe** program. If the model name screen appears, choose your machine. If the language screen appears, choose your language.

b The DVD-ROM Top Menu will appear. Click **Additional Applications**.
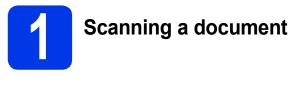

c Click the button for the application you want to install.

d Go back to the **Additional Applications** screen to install more applications.

How to scan to a computer
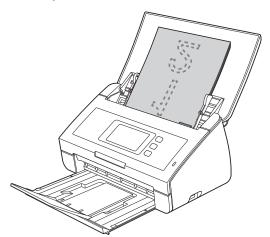

1 Scanning a document

There are various scanning methods (see *Scanning Methods* in the *User's Guide*). With the following Scan to File feature, you can scan and save documents as PDF files.
To scan documents and configure various settings, please ensure you have installed the driver and connected the machine to your computer by following the instructions in this guide.

a Confirm that the machine is connected to your computer.

b Load your document.

c Swipe left or right, or press ◄ or ► to display Scan 1.

d Press to PC.

e Swipe left or right to select to File and then press OK.

f Select the destination computer you want to save to.

g Press Start. The machine starts to feed and scan your document.

The scanned data is saved in PDF format on the computer that is connected to the machine.

Note
• *You can change Scan to PC settings, such as the saved file format, using ControlCenter. For details, see the User's Guide on the DVD-ROM.*

• *You can use ControlCenter or the scanner driver to initiate scanning from the computer, as well as save scanned data onto a USB flash memory drive connected to the machine. For details, see the User's Guide on the DVD-ROM.*

For Wireless Network Users

Reset the network settings to factory default

To restore all network settings of the internal Scan server to factory default, please follow the steps below.

a Make sure the machine is not operating, then disconnect all the cables from the machine (except the power cord).

b Press ![icon].

c Press `Network`.

d Swipe up or down, or press ▲ or ▼ to display `Network Reset`, and then press `Network Reset`.

e Press `Yes`.

f Hold down `Yes` for 2 seconds to confirm.

g The machine will restart, re-connect the cables once this is complete.

Entering Text for Wireless Settings

Press ![icon] to cycle between lower case and upper case.

Press ![icon] to cycle between letters, numbers and special characters. (The characters available may differ depending on your country.)
To move the cursor to the left or right, press ◀ or ▶.

Inserting spaces
To enter a space, press `Space` button.

Making corrections

If you entered a character incorrectly and want to change it, move the cursor to the incorrect character. Press ![icon] and re-enter the correct character. You can also back up and insert a character.
