</tbody>
</table>

- This machine must be grounded. If in doubt, call a qualified electrician.
- To ensure safe operation the supplied plug must be inserted only into a standard power outlet that is properly grounded through the standard electrical wiring. Non grounded equipment may cause an electrical shock hazard, and may cause excessive electrical noise radiation.
WARNING

- Plastic bags are used in the packing of your machine. To avoid danger of suffocation, keep these plastic bags away from babies and children. Plastic bags are not toys.
- This machine is heavy and weighs more than 20.0 kg. To prevent possible injuries, at least two people should lift the machine. One person should hold the front of the machine, and one person should hold the back, as shown in the illustration below. Be careful not to trap your fingers when you put the machine down.

CAUTION

- The components included in the box may differ depending on your country.
- If for any reason you must ship your machine, carefully repack the machine in the original packaging to avoid any damage during transit. The machine should be adequately insured with the carrier. For details on how to repack the machine: Advanced User's Guide: Packing and shipping the machine.
- Illustrations in this Quick Setup Guide are based on the MFC-9340CDW.
- The interface cable is not a standard accessory. Buy the appropriate interface cable for the connection you want to use (USB or Network).

USB cable
- We recommend using a USB 2.0 cable (Type A/B) that is no longer than 2 metres.
- DO NOT connect the interface cable at this time. Connecting the interface cable is done during the MFL-Pro Suite installation process.

Network cable
Use a straight-through Category 5 (or greater) twisted-pair cable for 10BASE-T or 100BASE-TX Fast Ethernet Network.
2 Remove the packing material from the machine

**CAUTION**

DO NOT eat the silica gel pack, please throw it away. If ingested, seek medical attention immediately.

**IMPORTANT**

DO NOT connect the AC power cord yet.

a. Remove the packing tape from the outside of the machine, the silica gel pack on the support flap and the film covering the scanner glass.

b. Fully open the top cover by lifting the handle up ①.

c. Slide all eight yellow drum locks in the direction of the arrows (the locks may require a firm push).

d. Take out all four drum and toner cartridge assemblies.

**IMPORTANT**

To avoid print quality problems, DO NOT touch the shaded part shown in the illustration.

e. Remove the orange packing piece from the belt unit.
f  Remove the orange packing piece from each drum and toner cartridge assembly.

g  Using both hands, hold each drum and toner cartridge assembly level, and gently shake it from side to side several times to distribute the toner evenly inside the assembly.

h  Slide all four drum and toner cartridge assemblies into the machine. Make sure the toner cartridge colour matches the same colour label on the machine.

i  Close the top cover of the machine.

3 Load paper in the paper tray

a  Pull the paper tray completely out of the machine.

b  While pressing the green paper-guide release lever 1, slide the paper guides to fit the paper size you are loading in the tray. Make sure the guides are firmly in the slots.

C  Fan the stack of paper well to avoid paper jams and misfeeds.

BK - Black  C - Cyan  M - Magenta  Y - Yellow
Load paper in the tray and make sure:
- The paper is below the maximum paper mark (↓↓↓ 1). Overfilling the paper tray will cause paper jams.
- The side to be printed on is face down.
- The paper guides touch the sides of the paper so it will feed correctly.

Put the paper tray firmly back in the machine. Make sure it is completely inserted into the machine.

Lift the support flap 1 to prevent paper from sliding off the face-down output tray.

Connect the power cord and telephone line

**IMPORTANT**
DO NOT connect the interface cable yet.

**a** Connect the AC power cord to the machine and then plug it into an electrical socket.

**b** Press  on the control panel.

**IMPORTANT**
DO NOT touch the Touchscreen immediately after plugging in the power cord or turning the machine on. Doing this may cause an error.

**c** Connect the telephone line cord: connect one end of the telephone line cord to the socket on the machine marked `LINE` and the other end to a telephone wall socket.

**IMPORTANT**
The telephone line cord MUST be connected to the socket on the machine marked `LINE`. 
WARNING

The machine must be grounded using an earthed plug.
Since the machine is grounded through the electrical socket, you can protect yourself from potentially hazardous electrical conditions on the telephone network by keeping the power cord connected to your machine when you connect it to a telephone line. Similarly, you can protect yourself when you want to move your machine by disconnecting the telephone line first and then disconnecting the power cord.

NOTE

If you are sharing one telephone line with an external telephone, connect it as shown below. Before you connect the external telephone, remove the protective cap from the EXT. socket on the machine.

NOTE

If you are sharing one telephone line with an external telephone answering machine, connect it as shown below. Before you connect the external telephone answering machine, remove the protective cap from the EXT. socket on the machine.

Set the receive mode to **External TAD** if you have an external answering machine (see *Choose a Receive Mode* page 7). For additional details: **Basic User’s Guide: Connecting an external TAD.**
Set your country (for Australia/New Zealand customer only)

You must set your country so that the machine works correctly on local telecommunication lines in each country.

a. Check that the power is turned on by plugging in the power cord and turn the power on.

b. Press your country on the Touchscreen, when the LCD shows countries.
   Press OK.

The LCD prompts you to make sure of the country again.
Do one of the following:
- If the LCD shows the correct country, press Yes to go to step d.
- OR —
- Press No to go back to step b to choose the country again.

d. After the LCD shows Accepted, the machine will restart automatically.

Choose a Receive Mode

There are four possible receive modes: Fax, Fax/Tel, Manual and External TAD.

Do you want to use the telephone features of your machine (if available) or an external telephone or external telephone answering device connected on the same line as the machine?

- Yes
  Are you using the voice message function of an external telephone answering device?

- No
  Do you want the machine to answer fax and telephone calls automatically?

Fax
Your machine automatically answers every call as a fax.

Fax/Tel
Your machine controls the line and automatically answers every call. If the call is not a fax, the phone will ring for you to pick up the call.

Manual
You control the phone line and must answer every call yourself.

External TAD
Your external telephone answering device (TAD) automatically answers every call. Voice messages are stored on the external TAD. Fax messages are automatically printed.

a. Press .

b. Press All Settings.

c. Swipe up or down, or press ▲ or ▼ to display Fax.
   Press Fax.

d. Swipe up or down, or press ▲ or ▼ to display Setup Receive.
   Press Setup Receive.

e. Swipe up or down, or press ▲ or ▼ to display Receive Mode.
   Press Receive Mode.
Press your preferred receive mode.

For more details: Basic User’s Guide: Receiving a fax.

7 Set the date and time

The Touchscreen displays the date and time. You can also add the current date and time to each fax you send by setting your Station ID (see step 8).

a Press .

b Press (Date & Time).

c Press Date.

d Enter the last two digits of the year using the numbers on the Touchscreen, and then press OK.

(e.g., Enter 1, 3 for 2013.)

e Enter the two digits for the month using the numbers on the Touchscreen, and then press OK.

f Enter the two digits for the day using the numbers on the Touchscreen, and then press OK.

g Press Time.

h Enter the time in 24-hour format using the numbers on the Touchscreen, and then press OK.

i Press .

8 Enter personal information (Station ID)

Set the machine’s Station ID if you want the date and time to appear on each fax you send.

a Press .

b Press All Settings.

c Swipe up or down, or press ↑ or ↓ to display Initial Setup.

Press Initial Setup.

d Swipe up or down, or press ↑ or ↓ to display Station ID.

Press Station ID.

e Enter your fax number (up to 20 digits) using the numbers on the Touchscreen, and then press OK.

f Enter your telephone number (up to 20 digits) using the numbers on the Touchscreen, and then press OK. If your telephone number and fax number are the same, enter the same number again.

g Enter your name (up to 20 characters), and then press OK.

i Use the Touchscreen to enter your name (up to 20 characters), and then press OK.

NOTE
• To enter numbers or special characters, press repeatedly until the character you want to enter appears, then press the character you want.
• If you entered a character incorrectly and want to change it, press ← or → to move the cursor to the incorrect character, then press .
• To enter a space, press Space.
• For more details, see Entering Text page 33.

k Press .
**Fax Transmission Report**

Your Brother machine is equipped with a Transmission Verification Report that can be used as confirmation that you sent a fax. This report lists the name or fax number of the receiving party, the date, time and duration of the transmission, the number of pages transmitted, and whether or not the transmission was successful. If you want to use the Fax Transmission Report feature: > Advanced User's Guide: Printing reports.

**Set tone or pulse dialling mode (not available in New Zealand)**

Your machine comes set for a Tone dialling service. If you have a Pulse dialling (rotary) service, you need to change the dialling mode.

**a** Press \[\]

**b** Press All Settings.

**c** Swipe up or down, or press ▲ or ▼ to display Initial Setup.
Press Initial Setup.

**d** Swipe up or down, or press ▲ or ▼ to display Tone/Pulse.
Press Tone/Pulse.

**e** Press Pulse (or Tone).

**f** Press \[\].

**Set the telephone line compatibility**

If you are connecting the machine to a VoIP service (over the Internet) you need to change the compatibility setting.

**NOTE**
If you are using an analogue telephone line, skip this step.

**a** Press \[\].

**b** Press All Settings.

**c** Swipe up or down, or press ▲ or ▼ to display Initial Setup.
Press Initial Setup.

**d** Swipe up or down, or press ▲ or ▼ to display Compatibility.
Press Compatibility.

**e** Press Basic(for VoIP).

**f** Press \[\].
12 Dial Prefix

The dial prefix setting will automatically dial a predefined number before every fax number you dial. For example: If your phone system requires a 9 to dial an outside number, this setting will automatically dial 9 for every fax you send.

a Press [1].
b Press All Settings.
c Swipe up or down, or press ▲ or ▼ to display Initial Setup.
Press Initial Setup.
d Swipe up or down, or press ▲ or ▼ to display Dial Prefix.
Press Dial Prefix.
e Press On.
f Press Dial Prefix.
g Enter the prefix number (up to five digits) using the buttons on the Touchscreen, and then press OK.

NOTE

• You can use the numbers 0 to 9, and the characters #, *, and !.
• You cannot use ! with any other numbers or characters.
• If your telephone system requires a timed break recall (hookflash), press ! on the Touchscreen.
• If the pulse dialing mode is on, # and * are not available to use.
h Press [1].

13 Set Daylight Saving Time

You can set the machine to change for Daylight Saving Time. If you choose Forward Hour, it will reset the time forward one hour and if you choose Backward Hour, it will reset the time backward one hour.

a Press [1].
b Press [00:00 01.01.2014] (Date & Time).
c Press Daylight Save.
d Press Forward Hour or Backward Hour.
e Press [1].

14 Set the Time Zone

You can set the time zone on the machine for your location.

a Press [1].
b Press [00:00 01.01.2014] (Date & Time).
c Press Time Zone.
d Enter your time zone.
Press OK.
e Press [1].
Choose your connection type

These installation instructions are for Windows® XP Home/Windows® XP Professional, Windows® XP Professional x64 Edition, Windows Vista®, Windows® 7, Windows® 8, and Mac OS X v10.6.8, 10.7.x and 10.8.x.

NOTE

• You can visit us at http://solutions.brother.com/ where you can get product support, the latest driver updates and utilities, and answers to frequently asked questions (FAQs).

For USB Interface Cables
Windows®, go to page 12
Macintosh, go to page 14

For Wired Network
Windows®, go to page 16
Macintosh, go to page 19

For Wireless Network
Windows® and Macintosh, go to page 21

NOTE
To connect your iOS device, Android™ device, or Windows® Phone to your Brother machine using Wi-Fi Direct™, please download the Wi-Fi Direct™ Guide at http://solutions.brother.com/.
For Windows® USB Interface Users
(Windows® XP/XP Professional x64 Edition/Windows Vista®/
Windows® 7/Windows® 8)

16 Before you install

IMPORTANT
• If there are any programs running, close them.
• The screens may differ depending on your operating system.

NOTE
The CD-ROM includes Nuance™ PaperPort™ 12SE. This software supports Windows® XP (SP3 or greater), XP Professional x64 Edition (SP2 or greater), Windows Vista® (SP2 or greater), Windows® 7 and Windows® 8. Update to the latest Windows® Service Pack before installing MFL-Pro Suite.

a Make sure your computer is ON and you are logged on with Administrator rights.

b Press and hold down  to turn off the machine, and make sure the USB interface cable is NOT connected. If you have already connected the cable, disconnect it.

17 Install MFL-Pro Suite

a Put the CD-ROM into your CD-ROM drive. If the model name screen appears, choose your machine. If the language screen appears, choose your language.

NOTE
• If the Brother screen does not appear automatically, go to Computer (My Computer).
  (For Windows® 8: click the (File Explorer) icon on the taskbar, and then go to Computer.)
  Double-click the CD-ROM icon, and then double-click start.exe.
• If the User Account Control screen appears, click Continue or Yes.

b Click Install MFL-Pro Suite, and click Yes in the next two windows if you accept the license agreements.

NOTE
If the installation does not continue automatically, restart the installation by ejecting and then reinserting the CD-ROM or by double-clicking the start.exe program from the root folder. Continue from step b to install MFL-Pro Suite.

C Choose Local Connection (USB), and then click Next.

NOTE
To install the PS driver (BR-Script3 printer driver), choose Custom Install, and then follow the on-screen instructions.
Follow the on-screen instructions until the Plug in the USB cable screen appears.

Connect the USB cable to the USB port marked with the symbol on your machine, and then connect the cable to your computer.

Press to turn on the machine.

The installation will automatically continue. The installation screens appear one after another. If prompted, follow any on-screen instructions.

When the On-Line Registration screen appears, make your selection and follow the on-screen instructions. Once you have completed the registration process, click Next.

When the Setup is Complete screen appears, make your selection, and then click Next.

Click Finish to restart your computer. After restarting the computer, you must log on with Administrator rights.

NOTE
• If an error message appears during the software installation, do one of the following:
  - For Windows® XP, Windows Vista® and Windows® 7 users: run the Installation Diagnostics located in (Start) > All Programs > Brother > MFC-XXXX (where MFC-XXXX is your model name).
  - For Windows® 8 users: to run Installation Diagnostics, double-click the (Brother Utilities) icon on the desktop, and then click the drop-down list and select your model name (if not already selected). Click Tools in the left navigation bar.
• Depending on your security settings when using the machine or its software, a Windows® Security or antivirus software window may appear. Please allow or permit the window to continue.

The installation is now complete.

NOTE
• For Windows® 8 users: if the Brother manuals included on the CD-ROM are in PDF format, use Adobe® Reader® to open them. If Adobe® Reader® is installed on your computer but cannot open the files in Adobe® Reader®, change the file association for PDF (see How to open a PDF file in Adobe® Reader® (Windows® 8) page 40).
• XML Paper Specification Printer Driver
The XML Paper Specification Printer Driver is the most suitable driver for Windows Vista®, Windows® 7 and Windows® 8 when printing from applications that use the XML Paper Specification. Please download the latest driver from the Brother Solutions Center at http://solutions.brother.com/.
For Macintosh USB Interface Users (Mac OS X v10.6.8, 10.7.x, 10.8.x)

16 Before you install

**IMPORTANT**
For Mac OS X v10.6.7 or lower users: upgrade to Mac OS X v10.6.8, 10.7.x, 10.8.x. (For the latest drivers and information for the Mac OS X you are using, visit http://solutions.brother.com/.)

a Make sure your machine is connected to an AC power source and your Macintosh is ON. You must be logged on with Administrator rights.

b Connect the USB cable to the USB port marked with the symbol on your machine, and then connect the cable to your Macintosh.

c Make sure your machine is turned on.

17 Install MFL-Pro Suite

a Put the CD-ROM into your CD-ROM drive, and then double-click the BROTHER icon on your desktop.

b Double-click the Start Here OSX icon. If prompted, select your model.

c (MFC-9330CDW / MFC-9340CDW) Choose Local Connection (USB), and then click Next.

d The installation screens appear one after another. If prompted, follow any on-screen instructions.

**IMPORTANT**
DO NOT cancel any of the screens during the installation. It may take a few minutes for the installation to complete.

e Choose your machine from the list, and then click Next.

f When the Add Printer screen appears, click Add Printer.

g Choose your machine from the list, click Add, and then click Next.

**NOTE**
To add the PS driver (BR-Script3 printer driver), select it from the Print Using (Use) pop-up menu.

The installation of MFL-Pro Suite is now complete.
Go to step 18 on page 15.
18 Download and install Presto! PageManager

When Presto! PageManager is installed, OCR capability is added to Brother ControlCenter2. You can easily scan, share and organize photos and documents using Presto! PageManager.

On the Brother Support screen, click Presto! PageManager and follow the on-screen instructions.

Finish The installation is now complete.
For Windows® Wired Network Interface Users
(Windows® XP/XP Professional x64 Edition/Windows Vista®/Windows® 7/Windows® 8)

**16 Before you install**

**IMPORTANT**
- If there are any programs running, close them.
- The screens may differ depending on your operating system.

**NOTE**
- The CD-ROM includes Nuance™ PaperPort™ 12SE. This software supports Windows® XP (SP3 or greater), XP Professional x64 Edition (SP2 or greater), Windows Vista® (SP2 or greater), Windows® 7 and Windows® 8. Update to the latest Windows® Service Pack before installing MFL-Pro Suite.
- Disable all personal firewall software (other than Windows® Firewall), anti-spyware, or antivirus applications for the duration of the installation.

**a** Make sure your computer is ON and you are logged on with Administrator rights.

**b** Remove the protective cap from the Ethernet port marked with a symbol on your machine.

**c** Connect the network interface cable to the Ethernet port on your machine, and then connect it to a free port on your hub.

**d** Make sure your machine is turned on.

**17 Install MFL-Pro Suite**

**a** Put the CD-ROM into your CD-ROM drive. If the model name screen appears, choose your machine. If the language screen appears, choose your language.

**b** Click Install MFL-Pro Suite, and click Yes in the next two windows if you accept the license agreements.

**NOTE**
- If the Brother screen does not appear automatically, go to Computer (My Computer).
(For Windows® 8: click the (File Explorer) icon on the taskbar, and then go to Computer.)
Double-click the CD-ROM icon, and then double-click start.exe.
- If the User Account Control screen appears, click Continue or Yes.

**b** Click Install MFL-Pro Suite, and click Yes in the next two windows if you accept the license agreements.

**NOTE**
If the installation does not continue automatically, restart the installation by ejecting and then reinserting the CD-ROM or by double-clicking the start.exe program from the root folder. Continue from step b to install MFL-Pro Suite.
c  Choose **Wired Network Connection (Ethernet)**, and then click **Next**.

**NOTE**
To install the PS driver (BR-Script3 printer driver), choose **Custom Install**, and then follow the on-screen instructions.

d  When the **Firewall/AntiVirus detected** screen appears, choose **Change the Firewall port settings to enable network connection and continue with the installation. (Recommended)** and click **Next**.

If you are not using the Windows® Firewall, see the user’s guide for your software for information on how to add the following network ports:
- For network scanning, add UDP port 54925.
- For network PC-Fax receiving, add UDP port 54926.
- If you still have trouble with your network connection, add UDP ports 161 and 137.

e  The installation will automatically continue. The installation screens appear one after another. If prompted, follow any on-screen instructions.

**IMPORTANT**
DO NOT cancel any of the screens during the installation. It may take a few minutes for all screens to appear.

**NOTE**
- If prompted, choose your machine from the list, and then click **Next**.
- If your machine is not found over the network, confirm your settings by following the on-screen instructions.
- If there is more than one of the same model connected on your network, the IP Address and Node Name will be displayed to help you identify the machine.
- You can find your machine’s IP address and the Node Name by printing out the Network Configuration Report (see *Print the Network Configuration Report ➤ ➤ page 39*).
- If the **Windows Security** screen appears, select the check box and click **Install** to complete the installation correctly.

f  When the **On-Line Registration** screen appears, make your selection and follow the on-screen instructions. Once you have completed the registration process, click **Next**.

g  When the **Setup is Complete** screen appears, make your selection, and then click **Next**.

**18 Finish and restart**

a  Click **Finish** to restart your computer. After restarting the computer, you must log on with Administrator rights.

**NOTE**
- If an error message appears during the software installation, do one of the following:
  - For Windows® XP, Windows Vista® and Windows® 7 users: run the **Installation Diagnostics** located in (Start) > All Programs > Brother > MFC-XXXX LAN (where MFC-XXXX is your model name).
  - For Windows® 8 users: to run **Installation Diagnostics**, double-click the (Brother Utilities) icon on the desktop, and then click the drop-down list and select your model name (if not already selected). Click **Tools** in the left navigation bar.
- Depending on your security settings when using the machine or its software, a Windows® Security or antivirus software window may appear. Please allow or permit the window to continue.
**Install MFL-Pro Suite on additional computers (if needed)**

If you want to use your machine with multiple computers on the network, install MFL-Pro Suite on each computer. Go to step 16 on page 16.

**NOTE**

**Network license (Windows®)**

This product includes a PC license for up to five users. This license supports the installation of the MFL-Pro Suite including Nuance™ PaperPort™ 12SE on up to five PCs on the network. If you want to use more than five PCs with Nuance™ PaperPort™ 12SE installed, please purchase the Brother NL-5 pack which is a multiple PC license agreement pack for up to five additional users. To purchase the NL-5 pack, contact your authorized Brother dealer or contact Brother customer service.

**Finish**

The installation is now complete.

**NOTE**

- For Windows® 8 users: if the Brother manuals included on the CD-ROM are in PDF format, use Adobe® Reader® to open them. If Adobe® Reader® is installed on your computer but cannot open the files in Adobe® Reader®, change the file association for PDF (see How to open a PDF file in Adobe® Reader® (Windows® 8) page 40).

- **XML Paper Specification Printer Driver**

  The XML Paper Specification Printer Driver is the most suitable driver for Windows Vista®, Windows® 7 and Windows® 8 when printing from applications that use the XML Paper Specification. Please download the latest driver from the Brother Solutions Center at http://solutions.brother.com/.
**For Macintosh Wired Network Interface Users**
(Mac OS X v10.6.8, 10.7.x, 10.8.x)

### Before you install

**IMPORTANT**
For Mac OS X v10.6.7 or lower users: upgrade to Mac OS X v10.6.8, 10.7.x, 10.8.x. (For the latest drivers and information for the Mac OS X you are using, visit http://solutions.brother.com/.)

- **a** Make sure your machine is connected to an AC power source and your Macintosh is ON. You must be logged on with Administrator rights.
- **b** Remove the protective cap from the Ethernet port marked with a symbol on your machine.
- **c** Connect the network interface cable to the Ethernet port on your machine, and then connect it to a free port on your hub.
- **d** Make sure your machine is turned on.

### Install MFL-Pro Suite

- **a** Put the CD-ROM into your CD-ROM drive, and then double-click the **BROTHER** icon on your desktop.
- **b** Double-click the **Start Here OSX** icon. If prompted, select your model.
- **c** (MFC-9330CDW / MFC-9340CDW) Choose **Wired Network Connection (Ethernet)**, and then click **Next**.
- **d** The installation screens appear one after another. If prompted, follow any on-screen instructions.

**IMPORTANT**
DO NOT cancel any of the screens during the installation. It may take a few minutes for the installation to complete.

- **e** Choose your machine from the list, and then click **Next**.

**NOTE**
If your machine is not found over the network, confirm your network settings (see Before you install page 19).
When the Add Printer screen appears, click Add Printer.

Choose your machine from the list, click Add, and then click Next. (OS X v10.8.x)

Select MFC-xxxx CUPS driver from the Use pop-up menu (where xxxx is your model name).

NOTE
To add the PS driver (BR-Script3 printer driver), select it from the Print Using (Use) pop-up menu.

The installation of MFL-Pro Suite is now complete.
Go to step 18 on page 20.

18 Download and install Presto! PageManager

When Presto! PageManager is installed, OCR capability is added to Brother ControlCenter2. You can easily scan, share and organize photos and documents using Presto! PageManager.

a On the Brother Support screen, click Presto! PageManager and follow the on-screen instructions.

19 Install MFL-Pro Suite on additional computers (if needed)

If you want to use your machine with multiple computers on the network, install MFL-Pro Suite on each computer. Go to step 16 on page 19.

Finish
The installation is now complete.
For Wireless Network Users

For Wireless Network Interface Users
(MFC-9330CDW / MFC-9340CDW)

Before you begin

First you must configure the wireless network settings of your machine to communicate with your wireless access point/router. After the machine is configured to communicate with your wireless access point/router, the computers and mobile devices on your network will have access to the machine. To use the machine from a computer, you must install the drivers and software. The following steps will guide you through the configuration and installation process:

**IMPORTANT**

- If you are going to connect the machine to your network, we recommend that you contact your system administrator prior to installation. You must know your wireless network settings before you proceed with this installation.
- If you have previously configured the wireless settings of the machine, you must reset the network settings before you can configure the wireless settings again.

1. On your machine, press \[ \] and All Settings.
2. Swipe up or down, or press \[ \] or \[ \] to display Network, and press Network.
3. Swipe up or down, or press \[ \] or \[ \] to display Network Reset, and press Network Reset.
4. Press Yes.
5. Press Yes for two seconds.

**NOTE**

- To achieve optimum results with normal everyday document printing, place the Brother machine as close to the wireless access point/router as possible, with minimal obstructions. Large objects and walls between the two devices and interference from other electronic devices can affect the data transfer speed of your documents. Due to these factors, wireless may not be the best method of connection for all types of documents and applications. If you are printing large files, such as multi-page documents with mixed text and large graphics, you may want to consider choosing wired Ethernet for a faster data transfer or USB for the fastest throughput speed.
- Although the Brother MFC-9330CDW and MFC-9340CDW can be used in both a wired and a wireless network, only one of the connection methods can be used at a time.
- If you use your machine in an IEEE 802.1x supported wireless network: Network User's Guide: Using IEEE 802.1x authentication.

**Infrastructure Mode**

1. Wireless access point/router
2. Wireless Network machine (your machine)
3. Wireless capable computer connected to the wireless access point/router
4. Wired computer connected to the wireless access point/router
5. Mobile device connected to the wireless access point/router
Choose your wireless setup method

The following instructions will offer three methods for setting up your Brother machine on a wireless network. Choose the method you prefer for your environment.

For methods b and c, start your wireless setup by pressing the button on the Touchscreen.

**a**  Setup using the CD-ROM and temporarily using a USB cable (Windows® and Macintosh)

We recommend using a computer wirelessly connected to your network for this method.

**IMPORTANT**

- You need to temporarily use a USB cable during configuration (cable not included).
- If you are using Windows® XP, or using a network cable to connect your computer to your wireless access point/router, you need to know the SSID (Network Name) and Network Key of your wireless access point/router before you proceed. Please write down your wireless network settings in the area below.
- If you need assistance during setup and want to contact Brother Customer Service, make sure you have your SSID and Network Key ready. We cannot assist you in locating this information.

<table>
<thead>
<tr>
<th>Item</th>
<th>Record the current wireless network settings</th>
</tr>
</thead>
<tbody>
<tr>
<td>SSID (Network Name)</td>
<td></td>
</tr>
<tr>
<td>Network Key* (Security Key/Encryption Key)</td>
<td></td>
</tr>
</tbody>
</table>

* The Network Key may also be described as the Password, Security Key, or Encryption Key.

**NOTE**

- If you do not know this information (SSID and Network Key), you cannot continue the wireless setup.
- To find this information (SSID and Network Key):
  1. Check the documentation provided with your wireless access point/router.
  2. The default SSID could be the access point/router manufacturer's name or the model name.
  3. If you do not know the security information, please consult the router manufacturer, your system administrator, or your internet provider.

Now go to page 24
b Manual setup from the control panel using the Setup Wizard (Windows®, Macintosh and mobile devices)

If your wireless access point/router does not support WPS (Wi-Fi Protected Setup™) or AOSS™, write down the wireless network settings of your wireless access point/router in the area below.

**IMPORTANT**

If you need assistance during setup and want to contact Brother Customer Service, make sure you have your SSID (Network Name) and Network Key ready. We cannot assist you in locating this information.

<table>
<thead>
<tr>
<th>Item</th>
<th>Record the current wireless network settings</th>
</tr>
</thead>
<tbody>
<tr>
<td>SSID (Network Name)</td>
<td></td>
</tr>
<tr>
<td>Network Key* (Security Key/Encryption Key)</td>
<td></td>
</tr>
</tbody>
</table>

* The Network Key may also be described as the Password, Security Key, or Encryption Key.

**NOTE**

- If you do not know this information (SSID and Network Key), you cannot continue the wireless setup.
- To find this information (SSID and Network Key):
  1. Check the documentation provided with your wireless access point/router.
  2. The default SSID could be the access point/router manufacturer's name or the model name.
  3. If you do not know the security information, please consult the router manufacturer, your system administrator, or your internet provider.

Now go to page 27

---

C One-push setup using WPS or AOSS™ (Windows®, Macintosh and mobile devices)

Use this method if your wireless access point/router supports automatic wireless (one-push) setup (WPS or AOSS™).

Now go to page 29
For Wireless Network Users

Setup using the CD-ROM and temporarily using a USB cable (Windows® and Macintosh)

18 Set up the wireless settings

IMPORTANT
• You need to temporarily use a USB cable during configuration (cable not included).
• If you are using Windows® XP, or using a network cable to connect your computer to your wireless access point/router, you need to know the SSID and Network Key of your wireless access point/router that you wrote down in step 17-a on page 22 before you proceed.

NOTE
• If you use your machine in an IEEE 802.1x supported wireless network: Network User’s Guide: Using IEEE 802.1x authentication.
• The screens in this step are from Windows®. The screens on your computer will vary depending on your operating system.

a Put the CD-ROM into your CD-ROM drive.

NOTE
(Windows®)
• If the model name screen appears, choose your machine. If the language screen appears, choose your language.
• If the Brother screen does not appear automatically, go to Computer (My Computer).
  (For Windows® 8: click the (File Explorer) icon on the taskbar, and then go to Computer.)
  Double-click the CD-ROM icon, and then double-click start.exe.
• If the User Account Control screen appears, click Continue or Yes.

b (Windows®)
Click Install MFL-Pro Suite, and click Yes in the next two windows if you accept the license agreements.

NOTE
If the installation does not continue automatically, restart the installation by ejecting and then reinserting the CD-ROM or by double-clicking the start.exe program from the root folder. Continue from step b to install MFL-Pro Suite.

(Macintosh)
Double-click the BROTHER icon on your desktop, and then double-click the Start Here OSX icon on the screen. If prompted, select your model.

c Choose Wireless Network Connection, and then click Next.
  ■ For Windows®, go to d
  ■ For Macintosh, go to e

NOTE
(Windows®)
To install the PS driver (BR-Script3 printer driver), choose Custom Install, and then follow the on-screen instructions.
d When the **Firewall/AntiVirus detected** screen appears, choose **Change the Firewall port settings to enable network connection and continue with the installation.** *(Recommended)* and click Next.

If you are not using the Windows® Firewall, see the user’s guide for your software for information on how to add the following network ports:
- For network scanning, add UDP port 54925.
- For network PC-Fax receiving, add UDP port 54926.
- If you still have trouble with your network connection, add UDP ports 161 and 137.

e Choose **Yes, I have a USB cable to use for installation.**, and then click Next.

**NOTE**
If the **Important Notice** screen appears, read the notice. Check the box after you confirm the SSID and Network Key, and then click Next.

f Temporarily connect the USB cable (not included) directly to the computer and the machine.

g Do one of the following:
- If the **Installation confirmation** screen appears, check the box and click Next, and then go to h.
- If the **Installation confirmation** screen does not appear, go to i.

h Check **Yes** if you want to connect with the listed SSID. Click Next, and then go to k.

i The wizard will search for available wireless networks from your machine. Choose the SSID that you wrote down for your network in step 17-a on page 22, and then click Next.

**NOTE**
- If the list is blank, check that the wireless access point/router has power and is broadcasting the SSID. See if the machine and the wireless access point/router are within range for wireless communication. Click Refresh.
- If your wireless access point/router is set to not broadcast the SSID, manually add it by clicking the Advanced button. Follow the on-screen instructions for entering the Name(SSID), and then click Next.

j Enter the **Network Key** you wrote down in step 17-a on page 22, and then click Next.

**NOTE**
If your network is not configured for Authentication and Encryption, the **ATTENTION!** screen will appear. To continue configuration, click OK.
For Wireless Network Users

k Confirm the wireless network settings, and then click **Next**. The settings will be sent to your machine.

![Wireless Network Settings Confirmation](image)

**NOTE**
- The settings will remain unchanged if you click **Cancel**.
- To manually enter the IP address settings of your machine, click **Change IP Address** and enter the necessary IP address settings for your network.
- If the wireless setup failure screen appears, click **Retry**.

l Disconnect the USB cable between the computer and the machine, and then click **Next**.

Wireless setup is now complete. A four-level indicator at the top right of your machine’s Touchscreen will show the wireless signal strength of your wireless access point/router.

To install the MFL-Pro Suite, continue to step 20.

For Windows® Users:

**Now go to**
step 20-e on page 35

For Macintosh Users:

**Now go to**
step 20-d on page 37
18 Set up the wireless settings

**IMPORTANT**
You must have the wireless settings you wrote down for your network in step 17-b on page 23 before you proceed.

**NOTE**
If you use your machine in an IEEE 802.1x supported wireless network: >>> Network User’s Guide: Using IEEE 802.1x authentication.

| a | On your machine, press \[WiFi\]. Press Setup Wizard. |
| b | When Enable WLAN? is displayed, press Yes. This will start the wireless setup wizard. |
| c | The machine will search for available SSIDs. It will take a few minutes to display a list of available SSIDs. If a list of SSIDs is displayed, swipe up or down, or press ▲ or ▼ to choose the SSID you wrote down in step 17-b on page 23. Press OK. |

**NOTE**
- If the list is blank, check that the wireless access point/router has power and is broadcasting the SSID. Move your machine closer to the wireless access point/router and try starting from a again.
- If your wireless access point/router is set to not broadcast the SSID you will have to manually add the SSID name. For details: >>> Network User’s Guide: Configuring your machine when the SSID is not broadcast.

| d | Do one of the following: |
|   | - If the wireless access point/router of the selected SSID supports WPS and the machine asks to use WPS, go to e. |
|   | - If you are using an authentication and encryption method that requires a Network Key, go to f. |
|   | - If your authentication method is Open System and your encryption mode is None, go to g. |

| e | To connect your machine using the automatic wireless mode, press Yes. (If you choose No (Manual), go to f to enter the Network Key.) When the Touchscreen instructs you to start WPS, press the WPS button on your wireless access point/router, and then press Next on the Touchscreen. Go to g. |

| f | Enter the Network Key you wrote down in step 17-b on page 23 using the numbers and characters on the Touchscreen. |

**NOTE**
- To enter numbers or special characters, press ▲ or ▼ repeatedly until the character you want to enter appears, then press the character you want.
- If you entered a character incorrectly and want to change it, press ▲ or ▼ to move the cursor to the incorrect character, then press \[Clear\].
- To enter a space, press Space.
- For more details, see Entering Text >>> page 33.

Press OK when you have entered all the characters, and then press Yes to apply your settings.

| g | Your machine will now try to connect to your wireless network using the information you have entered. A connection result message appears on the Touchscreen and a WLAN report will automatically print. If the connection failed, check the error code on the printed report and refer to Troubleshooting >>> page 30. Press OK. |

Wireless setup is now complete. A four-level indicator at the top right of your machine’s Touchscreen will show the wireless signal strength of your wireless access point/router.
To install the MFL-Pro Suite, continue to step 19.

For Windows® Users:

Now go to page 34

For Macintosh Users:

Now go to page 37

NOTE

For mobile device users, see the Advanced Network User’s Guides for details on how to use your machine with your mobile device(s). To download the User’s Guide for the application you are using, visit the Brother Solutions Center at http://solutions.brother.com/ and click Manuals on your model's page.
One-push setup using WPS (Wi-Fi Protected Setup) or AOSS™
(Windows®, Macintosh and mobile devices)

18 Configure the wireless settings

a Confirm that your wireless access point/router has the WPS or AOSS™ symbol as shown below.

b Place the Brother machine within range of your WPS or AOSS™ access point/router. The range may differ depending on your environment (see the instructions provided with your wireless access point/router).

c On your machine, press WiFi. Press WPS/AOSS.

d When Enable WLAN? is displayed, press Yes. This will start the wireless setup wizard.

e When the Touchscreen instructs you to start WPS or AOSS™, press the WPS or AOSS™ button on your wireless access point/router (for more information, see the instructions provided with your wireless access point/router), and then press OK on your machine.

This feature will automatically detect which mode (WPS or AOSS™) your wireless access point/router uses to configure your machine.

f A connection result message appears on the Touchscreen and a WLAN report will automatically print.

If the connection failed, check the error code on the printed report and refer to Troubleshooting page 30.

Press OK.

Wireless setup is now complete.

A four-level indicator at the top right of your machine’s Touchscreen will show the wireless signal strength of your wireless access point/router.

To install the MFL-Pro Suite, continue to step 19.

For Windows® Users:

Now go to page 34

For Macintosh Users:

Now go to page 37

NOTE

If your wireless access point/router supports WPS and you want to configure your machine using the PIN (Personal Identification Number) Method: Network User's Guide: Configuration using the PIN Method of WPS (Wi-Fi Protected Setup).

For mobile device users, see the Advanced Network User's Guides for details on how to use your machine with your mobile device(s). To download the User’s Guide for the application you are using, visit the Brother Solutions Center at http://solutions.brother.com/ and click Manuals on your model's page.
Troubleshooting

IMPORTANT

If you need assistance during setup and want to contact Brother Customer Service, make sure you have your SSID (Network Name) and Network Key ready. We cannot assist you in locating this information.

To find the wireless settings (SSID (Network Name) and Network Key)*

1. Check the documentation provided with your wireless access point/router.
2. The default SSID could be the access point/router manufacturer’s name or the model name.
3. If you do not know the security information, please consult the router manufacturer, your system administrator, or your internet provider.

* The Network Key may also be described as the Password, Security Key, or Encryption Key.
* If the wireless access point/router is set not to broadcast the SSID, the SSID will not be detected automatically. You must manually enter the SSID name (Network User’s Guide: Configuring your machine when the SSID is not broadcast).

WLAN report

If the printed WLAN report shows that the connection failed, check the error code on the printed report and refer to the following instructions:

<table>
<thead>
<tr>
<th>Error Code</th>
<th>Recommended Solutions</th>
</tr>
</thead>
<tbody>
<tr>
<td>TS-01</td>
<td>The wireless setting is not activated, turn the wireless setting to ON.</td>
</tr>
<tr>
<td></td>
<td>- If a LAN cable is connected to your machine, disconnect it and turn the wireless setting of your machine to ON.</td>
</tr>
<tr>
<td></td>
<td>1. On your machine, press Network.</td>
</tr>
<tr>
<td></td>
<td>2. Press Network.</td>
</tr>
<tr>
<td></td>
<td>3. Press WLAN, and then press Setup Wizard.</td>
</tr>
<tr>
<td></td>
<td>4. When Enable WLAN? is displayed, press Yes. This will start the wireless setup wizard.</td>

</table>
| TS-07      | The machine cannot detect a wireless access point/router that has WPS or AOSS™ enabled.  
To configure your wireless settings using WPS or AOSS™, you must operate both your machine and the wireless access point/router.  
Confirm your wireless access point/router supports WPS or AOSS™ and try starting again.  
If you do not know how to operate your wireless access point/router using WPS or AOSS™, see the documentation provided with your wireless access point/router, ask the manufacturer of your wireless access point/router, or ask your network administrator. |
| TS-08      | Two or more wireless access points/routers that have WPS or AOSS™ enabled are detected.  
- Confirm that only one wireless access point/router within range has WPS or AOSS™ active and try again.  
- Try starting again after a few minutes in order to avoid interference from other wireless access points/routers. |
For Wireless Network Users

Entering Text

When you are setting certain menu selections, you may need to enter text into the machine.
Press repeatedly to choose between letters, numbers and special characters.
Press to change between upper case and lower case.

Inserting spaces
To enter a space, press Space.

Making corrections
If you entered a character incorrectly and want to change it, press or to move the cursor under the incorrect character, and then press . Enter the correct character.

NOTE
• The characters available may differ depending on your country.
• The keyboard layout may differ depending on the function you are setting.
Install the Drivers and Software (Windows® XP/XP Professional x64 Edition/Windows Vista®/Windows® 7/Windows® 8) (MFC-9330CDW / MFC-9340CDW)

19 Before you install

IMPORTANT
- If there are any programs running, close them.
- The screens may differ depending on your operating system.

NOTE
- The CD-ROM includes Nuance™ PaperPort™ 12SE. This software supports Windows® XP (SP3 or greater), XP Professional x64 Edition (SP2 or greater), Windows Vista® (SP2 or greater), Windows® 7 and Windows® 8. Update to the latest Windows® Service Pack before installing MFL-Pro Suite.
- Disable all personal firewall software (other than Windows® Firewall), anti-spyware, or antivirus applications for the duration of the installation.

a Make sure your computer is ON and you are logged on with Administrator rights.

20 Install MFL-Pro Suite

a Put the CD-ROM into your CD-ROM drive. If the model name screen appears, choose your machine. If the language screen appears, choose your language.

NOTE
- If the Brother screen does not appear automatically, go to Computer (My Computer).
  (For Windows® 8: click the (File Explorer) icon on the taskbar, and then go to Computer.) Double-click the CD-ROM icon, and then double-click start.exe.
- If the User Account Control screen appears, click Continue or Yes.

b Click Install MFL-Pro Suite, and click Yes in the next two windows if you accept the license agreements.

c Choose Wireless Network Connection, and then click Next.

NOTE
If the installation does not continue automatically, restart the installation by ejecting and then reinserting the CD-ROM or by double-clicking the start.exe program from the root folder. Continue from step b to install MFL-Pro Suite.

d When the Firewall/AntiVirus detected screen appears, choose Change the Firewall port settings to enable network connection and continue with the installation. (Recommended) and click Next.

NOTE
To install the PS driver (BR-Script3 printer driver), choose Custom Install, and then follow the on-screen instructions.

If you are not using the Windows® Firewall, see the user’s guide for your software for information on how to add the following network ports:
- For network scanning, add UDP port 54925.
- For network PC-Fax receiving, add UDP port 54926.
- If you still have trouble with your network connection, add UDP ports 161 and 137.
e Choose the machine from the list, and then click **Next**.

![Choose the machine from the list](image)

**NOTE**
- If your wireless settings fail, click the **Wireless Setup** button and follow the on-screen instructions to complete the wireless configuration.
- If you are using WEP and the Touchscreen displays **Connected** but your machine is not found, make sure you entered the WEP key correctly. The WEP key is case-sensitive.

f The installation will automatically continue. The installation screens appear one after another. If prompted, follow any on-screen instructions.

**IMPORTANT**
DO NOT cancel any of the screens during the installation. It may take a few minutes for all screens to appear.

**NOTE**
If the **Windows Security** screen appears, select the check box and click **Install** to complete the installation correctly.

g When the **On-Line Registration** screen appears, make your selection and follow the on-screen instructions. Once you have completed the registration process, click **Next**.

h When the **Setup is Complete** screen appears, make your selection, and then click **Next**.

---

**21 Finish and restart**

a Click **Finish** to restart your computer. After restarting the computer, you must log on with Administrator rights.

**NOTE**
- If an error message appears during the software installation, do one of the following:
  - For Windows® XP, Windows Vista® and Windows® 7 users: run the Installation Diagnostics located in **(Start) > All Programs > Brother > MFC-XXXX LAN** (where MFC-XXXX is your model name).
  - For Windows® 8 users: to run Installation Diagnostics, double-click the (Brother Utilities) icon on the desktop, and then click the drop-down list and select your model name (if not already selected). Click **Tools** in the left navigation bar.
- Depending on your security settings when using the machine or its software, a Windows® Security or antivirus software window may appear. Please allow or permit the window to continue.

**22 Install MFL-Pro Suite on additional computers (if needed)**

If you want to use your machine with multiple computers on the network, install MFL-Pro Suite on each computer. Go to step 19 on page 34.

**NOTE**
**Network license (Windows®)**
This product includes a PC license for up to five users. This license supports the installation of the MFL-Pro Suite including Nuance™ PaperPort™ 12SE on up to five PCs on the network. If you want to use more than five PCs with Nuance™ PaperPort™ 12SE installed, please purchase the Brother NL-5 pack which is a multiple PC license agreement pack for up to five additional users. To purchase the NL-5 pack, contact your authorized Brother dealer or contact Brother customer service.
Finish

The installation is now complete.

NOTE

• For Windows® 8 users: if the Brother manuals included on the CD-ROM are in PDF format, use Adobe® Reader® to open them. If Adobe® Reader® is installed on your computer but cannot open the files in Adobe® Reader®, change the file association for PDF (see How to open a PDF file in Adobe® Reader® (Windows® 8) page 40).

• XML Paper Specification Printer Driver
The XML Paper Specification Printer Driver is the most suitable driver for Windows Vista®, Windows® 7 and Windows® 8 when printing from applications that use the XML Paper Specification. Please download the latest driver from the Brother Solutions Center at http://solutions.brother.com/.
Install the Drivers and Software (Mac OS X v10.6.8, 10.7.x, 10.8.x) (MFC-9330CDW / MFC-9340CDW)

Before you install

19

IMPORTANT
For Mac OS X v10.6.7 or lower users: upgrade to Mac OS X v10.6.8, 10.7.x, 10.8.x. (For the latest drivers and information for the Mac OS X you are using, visit http://solutions.brother.com/.)

a Make sure your machine is connected to an AC power source and your Macintosh is ON. You must be logged on with Administrator rights.

b Put the CD-ROM into your CD-ROM drive, and then double-click the BROTHER icon on your desktop.

c Double-click the Start Here OSX icon. If prompted, select your model.

d Choose your machine from the list, and then click Next.

NOTE
• If there is more than one of the same model connected on your network, the IP Address will be displayed to help you identify the machine.
• You can find your machine’s IP Address by printing out the Network Configuration Report (see Print the Network Configuration Report >> page 39).

e The installation screens appear one after another. If prompted, follow any on-screen instructions.

Install MFL-Pro Suite

20

IMPORTANT
DO NOT cancel any of the screens during the installation. It may take a few minutes for the installation to complete.

NOTE
If the Setup Network “Scan to” name screen appears, follow the instructions below:

1) Enter a name for your Macintosh (up to 15 characters long).
2) Click Next. Go to f.

The name you enter will appear on the machine’s Touchscreen when you press the Scan button and choose a scan option (for more information: Software User’s Guide).
When the Add Printer screen appears, click Add Printer.

Choose your machine from the list, click Add, and then click Next.
(OS X v10.8.x)
Select MFC-XXXX CUPS driver from the Use pop-up menu (where XXXX is your model name).

NOTE
To add the PS driver (BR-Script3 printer driver), select it from the Print Using (Use) pop-up menu.

The installation of MFL-Pro Suite is now complete.
Go to step 21 on page 38.

Download and install Presto! PageManager

When Presto! PageManager is installed, OCR capability is added to Brother ControlCenter2. You can easily scan, share and organize photos and documents using Presto! PageManager.

On the Brother Support screen, click Presto! PageManager and follow the on-screen instructions.

Install MFL-Pro Suite on additional computers (if needed)

If you want to use your machine with multiple computers on the network, install MFL-Pro Suite on each computer. Go to step 19 on page 37.

Finish
The installation is now complete.
Web Based Management (web browser)

The Brother print server is equipped with a web server that allows you to monitor its status or change some of its configuration settings using HTTP (Hypertext Transfer Protocol).

**NOTE**

We recommend Windows® Internet Explorer® 8.0/9.0 for Windows® and Safari 5.0 for Macintosh. Please also make sure JavaScript and cookies are always enabled in whichever browser you use. To use a web browser, you will need to know the IP address of the print server, which is listed on the Network Configuration Report.

- Open your browser.
- Type “http://machine’s IP address/” into your browser’s address bar (where “machine’s IP address” is the IP address of the Brother machine or the print server name).
  - For example: http://192.168.1.2/

**Print the Network Configuration Report**

You can print the Network Configuration Report to confirm the current network settings.

- Press .
- Press All Settings.
- Swipe up or down, or press ▲ or ▼ to display Print Reports.
  - Press Print Reports.
- Swipe up or down, or press ▲ or ▼ to display Network Configuration.
  - Press Network Configuration.
- Press OK.
  - The machine will print the current network settings.

**Restore the network settings to the factory default**

You can restore all network settings of the internal Print/Scan server to the factory default.

- Press .
- Press All Settings.
- Swipe up or down, or press ▲ or ▼ to display Network.
  - Press Network.
- Swipe up or down, or press ▲ or ▼ to display Network Reset.
  - Press Network Reset.
- Press Yes.
- Press Yes for two seconds.
  - The machine will restart. Disconnect the cables, and after the machine has restarted, reconnect the cables.

**NOTE**

If you have configured an optional login password, you must enter it when prompted to access the Web Based Management.

Colour Correction

The output density and print position of each colour may vary depending on the machine’s environment. Factors like temperature and humidity can affect colour. Colour calibration and colour registration help you to improve the colour density and the print position of each colour.

Colour Calibration

Calibration helps you to improve the colour density.

NOTE

- If you print using the Direct Print feature (MFC-9330CDW / MFC-9340CDW) or the BR-Script printer driver, you need to perform the calibration from the control panel (see Using the control panel page 40).
- If you print using the Windows® printer driver, the driver will get the calibration data automatically if both Use Calibration Data and Get Device Data Automatically are on (Software User’s Guide).
- If you print using the Macintosh printer driver, you need to perform the calibration using Status Monitor. After turning Status Monitor on, choose Color Calibration from Control menu (Software User’s Guide).

Using the control panel

a Press (Toner).
b Press Calibration.
c Press Calibrate.
d Press Yes.
e Press .

Colour Registration

Auto Registration

Auto registration helps you to improve the print position of each colour.

a Press (Toner).
b Press Auto Regist..
c Press Yes.
d Press .

How to open a PDF file in Adobe® Reader® (Windows® 8)

a Move your mouse to the lower right corner of your desktop. When the menu bar appears, click Settings, and then click Control Panel.
b Click Programs, click Default Programs, and then click Associate a file type or protocol with a program.
c Select .pdf, and then click on the Change program... button.
d Click Adobe Reader. The icon next to .pdf changes to the ‘Adobe Reader’ icon.

Adobe® Reader® is now the default application for reading .pdf files until you change this file association.

Brother CreativeCentre

Get inspired. If you’re using Windows®, double-click the Brother CreativeCentre icon on your desktop to access our FREE website with many ideas and resources for personal and professional use.

For Windows® 8 users: click (Brother Utilities), and then click the drop-down list and select your model name (if not already selected). Click Use More in the left navigation bar, and then click Brother Creative Center.

Mac users can access Brother CreativeCentre at this web address:

http://www.brother.com/creativecenter/
Consumables

When the time comes to replace consumable items such as toner or drums, an error message will appear on your machine's Touchscreen. For more information about the consumables for your machine, visit us at http://www.brother.com/original/ or contact your local Brother reseller.

**NOTE**

The drum unit and toner cartridge are two separate parts.
