**WARNING**

- Plastic bags are used in the packing of your machine. Plastic bags are not toys. To avoid the danger of suffocation, keep these bags away from babies and children, and dispose of them correctly.
- This machine is heavy and weighs more than 44.1 lb. (20.0 kg). To prevent possible injuries, at least two people should lift the machine. One person should hold the front of the machine, and one person should hold the back, as shown in the illustration below. Be careful not to trap your fingers when you put the machine down.

![Illustration of two people lifting a machine](image)

---

**NOTE**

- Keep a minimum gap around the machine as shown in the illustration.

![Diagram showing gap around the machine](image)

- The components included in the box may differ depending on your country.
- We recommend that you save the original packaging.
- If for any reason you must ship your machine, carefully repack the machine in the original packaging to avoid any damage during transit. The machine should be adequately insured with the carrier. For details on how to repack the machine, see Advanced User's Guide: *Packing and shipping the machine*.
- The interface cable is not a standard accessory. Buy the appropriate interface cable for the connection you want to use.

**USB cable**
- We recommend using a USB 2.0 cable (Type A/B) that is no longer than 6 feet (2 meters).
- **DO NOT** connect the interface cable at this time. Connecting the interface cable is done during the MFL-Pro Suite installation process.
2 Remove the packing material from the machine

⚠️ CAUTION

DO NOT eat the silica gel pack, please throw it away. If ingested, seek medical attention immediately.

IMPORTANT

DO NOT connect the AC power cord yet.

a. Remove the packing tape from the outside of the machine, the silica gel pack on the support flap and the film covering the scanner glass.

b. Fully open the top cover by lifting the handle up 1.

c. Slide all eight yellow drum locks in the direction of the arrows (the locks may require a firm push).

d. Take out all four drum and toner cartridge assemblies.

To avoid print quality problems, DO NOT touch the shaded part shown in the illustration.

e. Remove the orange packing piece from the belt unit.
f Remove the orange packing piece from each drum and toner cartridge assembly.

g Using both hands, hold each drum and toner cartridge assembly level, and gently shake it from side to side several times to distribute the toner evenly inside the assembly.

h Slide all four drum and toner cartridge assemblies into the machine. Make sure the toner cartridge color matches the same color label on the machine.

i Close the top cover of the machine.

---

3 Load paper in the paper tray

a Pull the paper tray completely out of the machine.

b While pressing the green paper-guide release lever 1, slide the paper guides to fit the paper size you are loading in the tray. Make sure the guides are firmly in the slots.

c Fan the stack of paper well to avoid paper jams and misfeeds.

---

BK - Black  
C - Cyan  
M - Magenta  
Y - Yellow
Load paper in the tray and make sure:
- The paper is below the maximum paper mark (□□□). Overfilling the paper tray will cause paper jams.
- The side to be printed on is face down.
- The paper guides touch the sides of the paper so it will feed properly.

Put the paper tray firmly back in the machine. Make sure it is completely inserted into the machine.

Lift the support flap 1 to prevent paper from sliding off the face-down output tray.

Connect the power cord

**IMPORTANT**
DO NOT connect the interface cable yet.

- Connect the AC power cord to the machine and then plug it into an AC power outlet.
- Press \( \) on the control panel.

**IMPORTANT**
DO NOT touch the Touchscreen immediately after plugging in the power cord or turning the machine on. Doing this may cause an error.

Set your language (if needed)

- Press ．
- Press All Settings.
- Swipe up or down, or press \( \) or \( \) to display Initial Setup.
- Press Initial Setup.
- Swipe up or down, or press \( \) or \( \) to display Local Language.
- Press Local Language.
- Press your language.
- Press ．

For information about recommended paper, see Basic User's Guide: *Recommended paper and print media.*
Set the date and time

a. Press [ ].

b. Press [ ]
(Date & Time).

c. Swipe up or down, or press ▲ or ▼ to display Date.
Press Date.

d. Enter the last two digits of the year using the numbers on the Touchscreen, and then press OK.
(e.g., Enter 1, 3 for 2013.)

e. Enter the two digits for the month using the numbers on the Touchscreen, and then press OK.

f. Enter the two digits for the day using the numbers on the Touchscreen, and then press OK.

g. Swipe up or down, or press ▲ or ▼ to display Clock Type.
Press Clock Type.

h. Press 12h Clock or 24h Clock.

i. Swipe up or down, or press ▲ or ▼ to display Time.
Press Time.

j. Enter the time using the numbers on the Touchscreen.
(12h Clock only)
Press AM/PM to choose AM or PM.

k. Press OK.

l. Press [ ]

Automatic Daylight Saving Time

You can set the machine to change automatically for Daylight Saving Time. It will reset itself forward one hour in the spring and backward one hour in the fall.

a. Press [ ]

b. Press [ ]
(Date & Time).

c. Swipe up or down, or press ▲ or ▼ to display Auto Daylight.
Press Auto Daylight.

d. Press On (or Off).

e. Press [ ].

Set the Time Zone

You can set the time zone on the machine for your location. For example, the time zone for Eastern Time in the USA and Canada is UTC-05:00.

a. Press [ ]

b. Press [ ]
(Date & Time).

c. Swipe up or down, or press ▲ or ▼ to display Time Zone.
Press Time Zone.

d. Enter your time zone.
Press OK.

e. Press [ ].
Choose your connection type

These installation instructions are for Windows® XP Home/Windows® XP Professional, Windows® XP Professional x64 Edition, Windows Vista®, Windows® 7, Windows® 8, and Mac OS X v10.6.8, 10.7.x and 10.8.x.

NOTE

• For Windows Server® 2003/2003 x64 Edition/2008/2008 R2/2012 and Linux®, visit solutions.brother.com/windows, select your model, and select your operating system.

• You can visit us at http://solutions.brother.com/ and click Downloads for the latest driver updates and utilities, or click FAQs & Troubleshooting for product support and answers to frequently-asked questions (FAQs).

For USB Interface Cables
Windows®, go to page 8
Macintosh, go to page 10

For Wireless Network
Windows® and Macintosh, go to page 12

NOTE
To connect your iOS device, Android™ device, or Windows® Phone to your Brother machine using Wi-Fi Direct™, visit the Brother Solutions Center at solutions.brother.com/manuals, select your model, and look under Additional Feature Guide for the Wi-Fi Direct™ Guide.
For Windows® USB Interface Users (Windows® XP/XP Professional x64 Edition/Windows Vista®/Windows® 7/Windows® 8)

### Before you install

**IMPORTANT**
- If there are any programs running, close them.
- The screens may differ depending on your operating system.

**NOTE**
The CD-ROM includes Nuance™ PaperPort™ 12SE. This software supports Windows® XP (SP3 or greater), XP Professional x64 Edition (SP2 or greater), Windows Vista® (SP2 or greater), Windows® 7 and Windows® 8. Update to the latest Windows® Service Pack before installing MFL-Pro Suite.

**a** Make sure your computer is ON and you are logged on with Administrator rights.

**b** Press and hold down  to turn off the machine, and make sure the USB interface cable is NOT connected. If you have already connected the cable, disconnect it.

### Install MFL-Pro Suite

**a** Put the CD-ROM into your CD-ROM drive. If the model name screen appears, choose your machine. If the language screen appears, choose your language.

**NOTE**
- If the Brother screen does not appear automatically, go to Computer (My Computer).

(For Windows® 8: click the File Explorer icon on the taskbar, and then go to Computer.) Double-click the CD-ROM icon, and then double-click start.exe.
- If the User Account Control screen appears, click Continue or Yes.

**b** Click Install MFL-Pro Suite, and click Yes in the next two windows if you accept the license agreements.

**NOTE**
If the installation does not continue automatically, restart the installation by ejecting and then reinserting the CD-ROM or by double-clicking the start.exe program from the root folder. Continue from step **b** to install MFL-Pro Suite.

**c** Choose Local Connection (USB), and then click Next.

**NOTE**
To install the PS driver (BR-Script3 printer driver), choose Custom Install, and then follow the on-screen instructions.
Follow the on-screen instructions until the Plug in the USB cable screen appears.

Connect the USB cable to the USB port marked with the symbol on your machine, and then connect the cable to your computer.

Press to turn on the machine.

The installation will automatically continue. The installation screens appear one after another. If prompted, follow any on-screen instructions.

When the On-Line Registration screen appears, make your selection and follow the on-screen instructions. Once you have completed the registration process, click Next.

When the Setup is Complete screen appears, make your selection, and then click Next.

Click Finish to restart your computer. After restarting the computer, you must log on with Administrator rights.

If an error message appears during the software installation, do one of the following:

- For Windows® XP, Windows Vista® and Windows® 7 users: run the Installation Diagnostics located in (Start) > All Programs > Brother > HL-XXXX (where HL-XXXX is your model name).
- For Windows® 8 users: to run Installation Diagnostics, double-click the (Brother Utilities) icon on the desktop, and then click the drop-down list and select your model name (if not already selected). Click Tools in the left navigation bar.

Depending on your security settings when using the machine or its software, a Windows® Security or antivirus software window may appear. Please allow or permit the window to continue.

The installation is now complete.

For Windows® 8 users: if the Brother manuals included on the CD-ROM are in PDF format, use Adobe® Reader® to open them. If Adobe® Reader® is installed on your computer but cannot open the files in Adobe® Reader®, change the file association for PDF (see How to open a PDF file in Adobe® Reader® (Windows® 8) on page 31).

The XML Paper Specification Printer Driver is the most suitable driver for Windows Vista®, Windows® 7 and Windows® 8 when printing from applications that use the XML Paper Specification. Please download the latest driver from the Brother Solutions Center at solutions.brother.com/windows.
For Macintosh USB Interface Users (Mac OS X v10.6.8, 10.7.x, 10.8.x)

Before you install

_**IMPORTANT**_

For Mac OS X v10.6.7 or lower users: upgrade to Mac OS X v10.6.8, 10.7.x, 10.8.x. (For the latest drivers and information for the Mac OS X you are using, visit solutions.brother.com/mac.)

**a** Make sure your machine is connected to an AC power source and your Macintosh is ON. You must be logged on with Administrator rights.

**b** Connect the USB cable to the USB port marked with the symbol on your machine, and then connect the cable to your Macintosh.

**c** Make sure your machine is turned on.

Install MFL-Pro Suite

**a** Put the CD-ROM into your CD-ROM drive, and then double-click the BROTHER icon on your desktop.

**b** Double-click the **Start Here OSX** icon. If prompted, select your model.

**c** Choose **Local Connection (USB)**, and then click **Next**.

**d** The installation screens appear one after another. If prompted, follow any on-screen instructions.

_**IMPORTANT**_

DO NOT cancel any of the screens during the installation. It may take a few minutes for the installation to complete.

**e** Choose your machine from the list, and then click **Next**.

**f** When the **Add Printer** screen appears, click **Add Printer**.

**g** Choose your machine from the list, click **Add**, and then click **Next**.

_**NOTE**_

To add the PS driver (BR-Script3 printer driver), select it from the **Print Using (Use)** pop-up menu.

The installation of MFL-Pro Suite is now complete. Go to step 12 on page 11.
Download and install Presto! PageManager

When Presto! PageManager is installed, OCR capability is added to Brother ControlCenter2. You can easily scan, share and organize photos and documents using Presto! PageManager.

On the Brother Support screen, click Presto! PageManager and follow the on-screen instructions.

Finish

The installation is now complete.
For Wireless Network Users

For Wireless Network Interface Users

10 Before you begin

First you must configure the wireless network settings of your machine to communicate with your wireless access point/router. After the machine is configured to communicate with your wireless access point/router, the computers and mobile devices on your network will have access to the machine. To use the machine from a computer, you must install the drivers and software. The following steps will guide you through the configuration and installation process:

**IMPORTANT**
- If you are going to connect the machine to your network, we recommend that you contact your system administrator prior to installation. You must know your wireless network settings before you proceed with this installation.
- If you have previously configured the wireless settings of the machine, you must reset the network settings before you can configure the wireless settings again.

1. On your machine, press [All Settings].
2. Swipe up or down, or press [a] or [b] to display Network, and press Network.
3. Swipe up or down, or press [a] or [b] to display Network Reset, and press Network Reset.
4. Press Yes.
5. Press Yes for two seconds.

**NOTE**
- To achieve optimum results with normal everyday document printing, place the Brother machine as close to the wireless access point/router as possible, with minimal obstructions. Large objects and walls between the two devices and interference from other electronic devices can affect the data transfer speed of your documents. Due to these factors, wireless may not be the best method of connection for all types of documents and applications. If you are printing large files, such as multi-page documents with mixed text and large graphics, you may want to consider choosing USB for the fastest throughput speed.
- If you use your machine in an IEEE 802.1x supported wireless network, see Network User's Guide: *Using IEEE 802.1x authentication*.

Infrastructure Mode

1. Wireless access point/router
2. Wireless Network machine (your machine)
3. Wireless capable computer connected to the wireless access point/router
4. Wired computer connected to the wireless access point/router
5. Mobile device connected to the wireless access point/router
Choose your wireless setup method

The following instructions will offer three methods for setting up your Brother machine on a wireless network. Choose the method you prefer for your environment.

For methods b and c, start your wireless setup by pressing the button on the Touchscreen.

### a Setup using the CD-ROM and temporarily using a USB cable (Windows® and Macintosh)

We recommend using a computer wirelessly connected to your network for this method.

**IMPORTANT**
- You need to temporarily use a USB cable during configuration (cable not included).
- If you are using Windows® XP, or using a network cable to connect your computer to your wireless access point/router, you need to know the SSID (Network Name) and Network Key of your wireless access point/router before you proceed. Please write down your wireless network settings in the area below.
- If you need assistance during setup and want to contact Brother Customer Service, make sure you have your SSID and Network Key ready. We cannot assist you in locating this information.

#### Item Record the current wireless network settings

<table>
<thead>
<tr>
<th>Item</th>
<th>Record the current wireless network settings</th>
</tr>
</thead>
<tbody>
<tr>
<td>SSID (Network Name)</td>
<td></td>
</tr>
<tr>
<td>Network Key* (Security Key/Encryption Key)</td>
<td></td>
</tr>
</tbody>
</table>

* The Network Key may also be described as the Password, Security Key, or Encryption Key.

**NOTE**
- If you do not know this information (SSID and Network Key), you cannot continue the wireless setup.
- To find this information (SSID and Network Key):
  1. Check the documentation provided with your wireless access point/router.
  2. The default SSID could be the access point/router manufacturer's name or the model name.
  3. If you do not know the security information, please consult the router manufacturer, your system administrator, or your internet provider.

Now go to page 15
b  Manual setup from the control panel using the Setup Wizard (Windows®, Macintosh and mobile devices)

If your wireless access point/router does not support WPS (Wi-Fi Protected Setup™) or AOSS™, write down the wireless network settings of your wireless access point/router in the area below.

**IMPORTANT**

If you need assistance during setup and want to contact Brother Customer Service, make sure you have your SSID (Network Name) and Network Key ready. We cannot assist you in locating this information.

<table>
<thead>
<tr>
<th>Item</th>
<th>Record the current wireless network settings</th>
</tr>
</thead>
<tbody>
<tr>
<td>SSID (Network Name)</td>
<td></td>
</tr>
<tr>
<td>Network Key* (Security Key/Encryption Key)</td>
<td></td>
</tr>
</tbody>
</table>

* The Network Key may also be described as the Password, Security Key, or Encryption Key.

**NOTE**

- If you do not know this information (SSID and Network Key), you cannot continue the wireless setup.
- To find this information (SSID and Network Key):
  1. Check the documentation provided with your wireless access point/router.
  2. The default SSID could be the access point/router manufacturer’s name or the model name.
  3. If you do not know the security information, please consult the router manufacturer, your system administrator, or your internet provider.

Now go to page 18

---

C  One-push setup using WPS or AOSS™ (Windows®, Macintosh and mobile devices)

Use this method if your wireless access point/router supports automatic wireless (one-push) setup (WPS or AOSS™).

Now go to page 20
Setup using the CD-ROM and temporarily using a USB cable (Windows® and Macintosh)

12 Set up the wireless settings

IMPORTANT
- You need to temporarily use a USB cable during configuration (cable not included).
- If you are using Windows® XP, or using a network cable to connect your computer to your wireless access point/router, you need to know the SSID and Network Key of your wireless access point/router that you wrote down in step 11-a on page 13 before you proceed.

NOTE
- If you use your machine in an IEEE 802.1x supported wireless network, see Network User's Guide: Using IEEE 802.1x authentication.
- The screens in this step are from Windows®. The screens on your computer will vary depending on your operating system.

a Put the CD-ROM into your CD-ROM drive.

NOTE
(Windows®)
- If the model name screen appears, choose your machine. If the language screen appears, choose your language.
- If the Brother screen does not appear automatically, go to Computer (My Computer).
  (For Windows® 8: click the (File Explorer) icon on the taskbar, and then go to Computer.) Double-click the CD-ROM icon, and then double-click start.exe.
- If the User Account Control screen appears, click Continue or Yes.

b (Windows®)
Click Install MFL-Pro Suite, and click Yes in the next two windows if you accept the license agreements.

NOTE
If the installation does not continue automatically, restart the installation by ejecting and then reinserting the CD-ROM or by double-clicking the start.exe program from the root folder. Continue from step b to install MFL-Pro Suite.

(Macintosh)
Double-click the BROTHER icon on your desktop, and then double-click the Start Here OSX icon on the screen. If prompted, select your model.

c Choose Wireless Network Connection, and then click Next.
- For Windows®, go to d
- For Macintosh, go to e

NOTE
(Windows®)
To install the PS driver (BR-Script3 printer driver), choose Custom Install, and then follow the on-screen instructions.
When the Firewall/AntiVirus detected screen appears, choose Change the Firewall port settings to enable network connection and continue with the installation. (Recommended) and click Next.

If you are not using the Windows® Firewall, see the user’s guide for your software for information on how to add the following network ports:
- For network scanning, add UDP port 54925.
- If you still have trouble with your network connection, add UDP ports 161 and 137.

Choose Yes, I have a USB cable to use for installation, and then click Next.

Temporarily connect the USB cable (not included) directly to the computer and the machine.

Do one of the following:
- If the Installation confirmation screen appears, check the box and click Next, and then go to h.
- If the Installation confirmation screen does not appear, go to i.

Check Yes if you want to connect with the listed SSID. Click Next, and then go to k.

The wizard will search for available wireless networks from your machine. Choose the SSID that you wrote down for your network in step 11-a on page 13, and then click Next.

Enter the Network Key you wrote down in step 11-a on page 13, and then click Next.

Check Yes if you want to connect with the listed SSID. Click Next, and then go to k.

NOTE
If the list is blank, check that the wireless access point/router has power and is broadcasting the SSID. See if the machine and the wireless access point/router are within range for wireless communication. Click Refresh.
- If your wireless access point/router is set to not broadcast the SSID, manually add it by clicking the Advanced button. Follow the on-screen instructions for entering the Name(SSID), and then click Next.

NOTE
- If the list is blank, check that the wireless access point/router has power and is broadcasting the SSID. See if the machine and the wireless access point/router are within range for wireless communication. Click Refresh.
- If your wireless access point/router is set to not broadcast the SSID, manually add it by clicking the Advanced button. Follow the on-screen instructions for entering the Name(SSID), and then click Next.

NOTE
If your network is not configured for Authentication and Encryption, the ATTENTION! screen will appear. To continue configuration, click OK.
Confirm the wireless network settings, and then click **Next**. The settings will be sent to your machine.

**NOTE**
- The settings will remain unchanged if you click **Cancel**.
- To manually enter the IP address settings of your machine, click **Change IP Address** and enter the necessary IP address settings for your network.
- If the wireless setup failure screen appears, click **Retry**.

Disconnect the USB cable between the computer and the machine, and then click **Next**.

**OK!**

Wireless setup is now complete. A four-level indicator at the top right of your machine’s Touchscreen will show the wireless signal strength of your wireless access point/router.

To install the MFL-Pro Suite, continue to step 14.

For Windows® Users:

Now go to

step 14-e on page 26

For Macintosh Users:

Now go to

step 14-d on page 28
Manual setup from the control panel using the Setup Wizard
(Windows®, Macintosh and mobile devices)

12 Set up the wireless settings

**IMPORTANT**
You must have the wireless settings you wrote down for your network in step 11-b on page 14 before you proceed.

**NOTE**
If you use your machine in an IEEE 802.1x supported wireless network, see Network User's Guide: Using IEEE 802.1x authentication.

**a** On your machine, press .
Press **Setup Wizard**.

**b** When **Enable WLAN?** is displayed, press **Yes**.
This will start the wireless setup wizard.

**c** The machine will search for available SSIDs. It will take a few minutes to display a list of available SSIDs.
If a list of SSIDs is displayed, swipe up or down, or press ▲ or ▼ to choose the SSID you wrote down in step 11-b on page 14.
Press **OK**.

**NOTE**
• If the list is blank, check that the wireless access point/router has power and is broadcasting the SSID. Move your machine closer to the wireless access point/router and try starting from **a** again.
• If your wireless access point/router is set to not broadcast the SSID you have to manually add the SSID name. For details, see Network User's Guide: Configuring your machine when the SSID is not broadcast.

**d** Do one of the following:
- If the wireless access point/router of the selected SSID supports WPS and the machine asks to use WPS, go to **e**.
- If you are using an authentication and encryption method that requires a Network Key, go to **f**.
- If your authentication method is Open System and your encryption mode is None, go to **g**.

**e** To connect your machine using the automatic wireless mode, press **Yes**. (If you choose **No (Manual)**, go to **f** to enter the Network Key.)
When the Touchscreen instructs you to start WPS, press the WPS button on your wireless access point/router, and then press **Next** on the Touchscreen. Go to **g**.

**f** Enter the Network Key you wrote down in step 11-b on page 14 using the numbers and characters on the Touchscreen.

**NOTE**
- If you entered a character incorrectly and want to change it, press ▲ or ▼ to move the cursor to the incorrect character, then press **X**.
- To enter a space, press **Space**.
- For more details, see Entering Text on page 24.

Press **OK** when you have entered all the characters, and then press **Yes** to apply your settings.

**g** Your machine will now try to connect to your wireless network using the information you have entered.
A connection result message appears on the Touchscreen and a WLAN report will automatically print.
If the connection failed, check the error code on the printed report and refer to Troubleshooting on page 21.
Press **OK**.

Wireless setup is now complete.
A four-level indicator at the top right of your machine’s Touchscreen will show the wireless signal strength of your wireless access point/router.
To install the MFL-Pro Suite, continue to step 13.

For Windows® Users:

Now go to
page 25

For Macintosh Users:

Now go to
page 28

NOTE

For mobile device users, see the Advanced Network User's Guides for details on how to use your machine with your mobile device(s). To download the User's Guide for the application you are using, visit the Brother Solutions Center at solutions.brother.com/manuals and select your model.
One-push setup using WPS (Wi-Fi Protected Setup) or AOSS™ (Windows®, Macintosh and mobile devices)

12 Configure the wireless settings

a Confirm that your wireless access point/router has the WPS or AOSS™ symbol as shown below.

b Place the Brother machine within range of your WPS or AOSS™ access point/router. The range may differ depending on your environment (see the instructions provided with your wireless access point/router).

c On your machine, press .

Press WPS/AOSS.

d When Enable WLAN? is displayed, press Yes. This will start the wireless setup wizard.

e When the Touchscreen instructs you to start WPS or AOSS™, press the WPS or AOSS™ button on your wireless access point/router (for more information, see the instructions provided with your wireless access point/router), and then press OK on your machine.

This feature will automatically detect which mode (WPS or AOSS™) your wireless access point/router uses to configure your machine.

f A connection result message appears on the Touchscreen and a WLAN report will automatically print.

If the connection failed, check the error code on the printed report and refer to Troubleshooting on page 21.

Press OK.

Wireless setup is now complete. A four-level indicator at the top right of your machine’s Touchscreen will show the wireless signal strength of your wireless access point/router.

To install the MFL-Pro Suite, continue to step 13.

For Windows® Users:

Now go to page 25

For Macintosh Users:

Now go to page 28

NOTE

For mobile device users, see the Advanced Network User’s Guides for details on how to use your machine with your mobile device(s). To download the User’s Guide for the application you are using, visit the Brother Solutions Center at solutions.brother.com/manuals and select your model.

NOTE

If your wireless access point/router supports WPS and you want to configure your machine using the PIN (Personal Identification Number) Method, see Network User’s Guide: Configuration using the PIN Method of WPS (Wi-Fi Protected Setup).
Troubleshooting

**IMPORTANT**
If you need assistance during setup and want to contact Brother Customer Service, make sure you have your SSID (Network Name) and Network Key ready. We cannot assist you in locating this information.

**To find the wireless settings (SSID (Network Name) and Network Key)**

1. Check the documentation provided with your wireless access point/router.
2. The default SSID could be the access point/router manufacturer's name or the model name.
3. If you do not know the security information, please consult the router manufacturer, your system administrator, or your internet provider.

* The Network Key may also be described as the Password, Security Key, or Encryption Key.
* If the wireless access point/router is set not to broadcast the SSID, the SSID will not be detected automatically. You must manually enter the SSID name (see Network User's Guide: Configuring your machine when the SSID is not broadcast).

**WLAN report**
If the printed WLAN report shows that the connection failed, check the error code on the printed report and refer to the following instructions:

<table>
<thead>
<tr>
<th>Error Code</th>
<th>Recommended Solutions</th>
</tr>
</thead>
</table>
| TS-01      | The wireless setting is not activated, turn the wireless setting to ON.  
1. On your machine, press .  
2. Press Network.  
3. Press WLAN, and then press Setup Wizard.  
4. When Enable WLAN? is displayed, press Yes. This will start the wireless setup wizard. |
| TS-02      | The wireless access point/router cannot be detected.  
- Check the following four points:  
1. Make sure the wireless access point/router is powered on.  
2. Move your machine to an obstruction-free area, or closer to the wireless access point/router.  
3. Temporarily place your machine within about 3.3 feet (one meter) from the wireless access point/router when you are configuring the wireless settings.  
4. If your wireless access point/router is using MAC address filtering, confirm that the MAC address of the Brother machine is allowed in the filter (see Print the Network Configuration Report on page 30).  
- If you manually entered the SSID and security information (SSID/authentication method/encryption method/Network Key), the information may be incorrect. Confirm the SSID and security information (see To find the wireless settings (SSID (Network Name) and Network Key)* on page 21). Re-enter the correct information, if necessary. |
| TS-03      | The wireless network and security setting you entered may be incorrect.  
Confirm that the wireless network settings are correct (see To find the wireless settings (SSID (Network Name) and Network Key)* on page 21).  
* Check if the entered or selected SSID/authentication method/encryption method/Network Key are correct. |
For Wireless Network Users

<tbody>
<tr>
<td>TS-04</td>
<td>The Authentication/Encryption methods used by the selected wireless access point/router are not supported by your machine. For infrastructure mode, change the authentication and encryption methods of the wireless access point/router. Your machine supports the following authentication methods WPA™, WPA2™, OPEN and Shared key. WPA supports TKIP or AES encryption methods. WPA2 supports AES for the encryption method. OPEN and Shared key correspond to WEP encryption. If your problem is not solved, the SSID or network settings you entered may be incorrect. Confirm that the wireless network settings are correct (see To find the wireless settings (SSID (Network Name) and Network Key)* on page 21).</td>

For ad-hoc mode, change the authentication and encryption methods of your computer for the wireless setting. Your machine supports OPEN authentication method only, with optional WEP encryption.

| TS-05 | The security information (SSID/Network Key) is incorrect. Confirm that the SSID and security information (Network Key) are correct (see To find the wireless settings (SSID (Network Name) and Network Key)* on page 21). If your router uses WEP encryption, enter the key used as the first WEP key. Your machine supports the use of the first WEP key only. |

| TS-06 | The wireless security information (Authentication method/Encryption method/Network Key) is incorrect. Confirm the wireless security information as shown in the “Combined table of authentication and encryption methods” table in error TS-04. If your router uses WEP encryption, enter the key used as the first WEP key. Your machine supports the use of the first WEP key only. Confirm the Network Key (see To find the wireless settings (SSID (Network Name) and Network Key)* on page 21). |
### Error Code TS-07

The machine cannot detect a wireless access point/router that has WPS or AOSS™ enabled.

To configure your wireless settings using WPS or AOSS™, you must operate both your machine and the wireless access point/router. Confirm your wireless access point/router supports WPS or AOSS™ and try starting again.

If you do not know how to operate your wireless access point/router using WPS or AOSS™, see the documentation provided with your wireless access point/router, ask the manufacturer of your wireless access point/router, or ask your network administrator.

### Error Code TS-08

Two or more wireless access points/routers that have WPS or AOSS™ enabled are detected.

- Confirm that only one wireless access point/router within range has WPS or AOSS™ active and try again.
- Try starting again after a few minutes in order to avoid interference from other wireless access points/routers.
For Wireless Network Users

**Entering Text**

When you are setting certain menu selections, you may need to enter text into the machine.
Press `A1` repeatedly to choose between letters, numbers and special characters.
Press `aA` to change between upper case and lower case.

---

**Inserting spaces**
To enter a space, press `Space`.

**Making corrections**
If you entered a character incorrectly and want to change it, press `<` or `>` to move the cursor under the incorrect character, and then press `x`. Enter the correct character.

---

**NOTE**
- The characters available may differ depending on your country.
- The keyboard layout may differ depending on the function you are setting.
Install the Drivers and Software
(Windows® XP/XP Professional x64 Edition/Windows Vista®/
Windows® 7/Windows® 8)

13 Before you install

**IMPORTANT**
- If there are any programs running, close them.
- The screens may differ depending on your operating system.

**NOTE**
- The CD-ROM includes Nuance™ PaperPort™
  12SE. This software supports Windows® XP
  (SP3 or greater), XP Professional x64 Edition
  (SP2 or greater), Windows Vista® (SP2 or
  greater), Windows® 7 and Windows® 8. Update
  to the latest Windows® Service Pack before
  installing MFL-Pro Suite.
- Disable all personal firewall software (other
  than Windows® Firewall), anti-spyware, or
  antivirus applications for the duration of the
  installation.

**a** Make sure your computer is ON and you are
logged on with Administrator rights.

14 Install MFL-Pro Suite

**b** Click Install MFL-Pro Suite, and click Yes in
the next two windows if you accept the license
agreements.

**NOTE**
If the Brother screen does not appear
automatically, go to Computer (My
Computer).
(For Windows® 8: click the (File Explorer)
icon on the taskbar, and then go to Computer.)
Double-click the CD-ROM icon, and then
double-click start.exe.
- If the User Account Control screen appears,
click Continue or Yes.

**c** Choose Wireless Network Connection, and
then click Next.

**NOTE**
To install the PS driver (BR-Script3 printer driver),
choose Custom Install, and then follow the
on-screen instructions.

**d** When the Firewall/Antivirus detected screen
appears, choose Change the Firewall port
settings to enable network connection and
continue with the installation.
(Recommended) and click Next.

If you are not using the Windows® Firewall, see
the user’s guide for your software for
information on how to add the following
network ports:
- For network scanning, add UDP port 54925.
- If you still have trouble with your network
  connection, add UDP ports 161 and 137.
Choose the machine from the list, and then click Next.

The installation will automatically continue. The installation screens appear one after another. If prompted, follow any on-screen instructions.

When the On-Line Registration screen appears, make your selection and follow the on-screen instructions. Once you have completed the registration process, click Next.

When the Setup is Complete screen appears, make your selection, and then click Next.

Click Finish to restart your computer. After restarting the computer, you must log on with Administrator rights.

Finish and restart

NOTE
• If your wireless settings fail, click the Wireless Setup button and follow the on-screen instructions to complete the wireless configuration.
• If you are using WEP and the Touchscreen displays Connected but your machine is not found, make sure you entered the WEP key correctly. The WEP key is case-sensitive.

The installation will automatically continue. The installation screens appear one after another. If prompted, follow any on-screen instructions.

IMPORTANT
DO NOT cancel any of the screens during the installation. It may take a few minutes for all screens to appear.

NOTE
If the Windows Security screen appears, select the check box and click Install to complete the installation correctly.

When the On-Line Registration screen appears, make your selection and follow the on-screen instructions. Once you have completed the registration process, click Next.

NOTE
Network license (Windows®)
This product includes a PC license for up to five users. This license supports the installation of the MFL-Pro Suite including Nuance™ PaperPort™ 12SE on up to five PCs on the network. If you want to use more than five PCs with Nuance™ PaperPort™ 12SE installed, please purchase the Brother NL-5 pack which is a multiple PC license agreement pack for up to five additional users. To purchase the NL-5 pack, contact your authorized Brother dealer or contact Brother customer service.

Install MFL-Pro Suite on additional computers (if needed)

If you want to use your machine with multiple computers on the network, install MFL-Pro Suite on each computer. Go to step 13 on page 25.
The installation is now complete.

NOTE

- For Windows® 8 users: if the Brother manuals included on the CD-ROM are in PDF format, use Adobe® Reader® to open them. If Adobe® Reader® is installed on your computer but cannot open the files in Adobe® Reader®, change the file association for PDF (see How to open a PDF file in Adobe® Reader® (Windows® 8) on page 31).

- XML Paper Specification Printer Driver
The XML Paper Specification Printer Driver is the most suitable driver for Windows Vista®, Windows® 7 and Windows® 8 when printing from applications that use the XML Paper Specification. Please download the latest driver from the Brother Solutions Center at solutions.brother.com/windows.
Install the Drivers and Software (Mac OS X v10.6.8, 10.7.x, 10.8.x)

13 Before you install

IMPORTANT
For Mac OS X v10.6.7 or lower users: upgrade to Mac OS X v10.6.8, 10.7.x, 10.8.x. (For the latest drivers and information for the Mac OS X you are using, visit solutions.brother.com/mac.)

a Make sure your machine is connected to an AC power source and your Macintosh is ON. You must be logged on with Administrator rights.

14 Install MFL-Pro Suite

a Put the CD-ROM into your CD-ROM drive, and then double-click the BROTHER icon on your desktop.

b Double-click the Start Here OSX icon. If prompted, select your model.

c Choose Wireless Network Connection, and then click Next.

NOTE
If your wireless settings fail, the Wireless Device Setup Wizard screen appears. Follow the on-screen instructions to complete the wireless configuration.

d Choose your machine from the list, and then click Next.

NOTE
- If there is more than one of the same model connected on your network, the IP Address will be displayed to help you identify the machine.
- You can find your machine’s IP Address by printing out the Network Configuration Report (see Print the Network Configuration Report on page 30).

The installation screens appear one after another. If prompted, follow any on-screen instructions.

NOTE
DO NOT cancel any of the screens during the installation. It may take a few minutes for the installation to complete.

If the Setup Network "Scan to" name screen appears, follow the instructions below:

1) Enter a name for your Macintosh (up to 15 characters long).
2) Click Next. Go to f.

The name you enter will appear on the machine’s Touchscreen when you press the Scan button and choose a scan option (for more information, see Software User’s Guide).
f  When the **Add Printer** screen appears, click **Add Printer**.

Choose your machine from the list, click **Add**, and then click **Next**.  
(OS X v10.8.x)

Select **HL-XXXX CUPS** driver from the **Use** pop-up menu (where XXXX is your model name).

**NOTE**  
To add the PS driver (BR-Script3 printer driver), select it from the **Print Using (Use)** pop-up menu.

The installation of MFL-Pro Suite is now complete.  
Go to step **15** on page **29**.

---

**15 Download and install Presto! PageManager**

When Presto! PageManager is installed, OCR capability is added to Brother ControlCenter2. You can easily scan, share and organize photos and documents using Presto! PageManager.

On the **Brother Support** screen, click **Presto! PageManager** and follow the on-screen instructions.

---

**16 Install MFL-Pro Suite on additional computers (if needed)**

If you want to use your machine with multiple computers on the network, install MFL-Pro Suite on each computer. Go to step **13** on page **28**.

**Finish**  
The installation is now complete.
Web Based Management (web browser)

The Brother print server is equipped with a web server that allows you to monitor its status or change some of its configuration settings using HTTP (Hypertext Transfer Protocol).

NOTE
We recommend Windows® Internet Explorer® 8.0/9.0 for Windows® and Safari 5.0 for Macintosh. Please also make sure JavaScript and cookies are always enabled in whichever browser you use. To use a web browser, you will need to know the IP address of the print server, which is listed on the Network Configuration Report.

a. Open your browser.
b. Type “http://machine’s IP address/” into your browser’s address bar (where “machine’s IP address” is the IP address of the Brother machine or the print server name).
   ▶ For example: http://192.168.1.2/

Print the Network Configuration Report

You can print the Network Configuration Report to confirm the current network settings.

a. Press \.[

b. Press All Settings.

c. Swipe up or down, or press ▲ or ▼ to display Print Reports.
   Press Print Reports.

d. Swipe up or down, or press ▲ or ▼ to display Network Configuration.
   Press Network Configuration.

e. Press OK.
   The machine will print the current network settings.

Restore the network settings to the factory default

You can restore all network settings of the internal Print/Scan server to the factory default.

a. Press \.[

b. Press All Settings.

c. Swipe up or down, or press ▲ or ▼ to display Network.
   Press Network.

d. Swipe up or down, or press ▲ or ▼ to display Network Reset.
   Press Network Reset.

e. Press Yes.

f. Press Yes for two seconds.
   The machine will restart. Disconnect the cables, and after the machine has restarted, reconnect the cables.

NOTE
If you have configured an optional login password, you must enter it when prompted to access the Web Based Management.

For more information, see Network User’s Guide: Web Based Management.
**Other Information**

### Color Correction

The output density and print position of each color may vary depending on the machine’s environment. Factors like temperature and humidity can affect color. Color calibration and color registration help you to improve the color density and the print position of each color.

### Color Calibration

Calibration helps you to improve the color density.

**NOTE**
- If you print using the BR-Script printer driver, you need to perform the calibration from the control panel (see *Using the control panel* on page 31).
- If you print using the Windows® printer driver, the driver will get the calibration data automatically if both Use Calibration Data and Get Device Data Automatically are on (see Software User's Guide).
- If you print using the Macintosh printer driver, you need to perform the calibration using Status Monitor. After turning Status Monitor on, choose Color Calibration from Control menu (see Software User's Guide).

### Using the control panel

1. **Press** [Toner].
2. **Press** Calibration.
3. **Press** Calibrate.
4. **Press** Yes.
5. **Press** .

### Color Registration

**Auto Registration**

Auto registration helps you to improve the print position of each color.

1. **Press** [Toner].
2. **Press** Auto Regist..
3. **Press** Yes.
4. **Press** .

---

### How to open a PDF file in Adobe® Reader® (Windows® 8)

1. Move your mouse to the lower right corner of your desktop. When the menu bar appears, click **Settings**, and then click **Control Panel**.
2. Click **Programs**, click **Default Programs**, and then click **Associate a file type or protocol with a program**.
3. Select .pdf, and then click on the **Change program...** button.
4. Click **Adobe Reader**. The icon next to .pdf changes to the ‘Adobe Reader’ icon.

Adobe® Reader® is now the default application for reading .pdf files until you change this file association.

### Brother CreativeCenter

Get inspired. If you’re using Windows®, double-click the Brother CreativeCenter icon on your desktop to access our FREE website with many ideas and resources for personal and professional use.

For Windows® 8 users: click **Brother Utilities**, and then click the drop-down list and select your model name (if not already selected). Click **Use More** in the left navigation bar, and then click **Brother Creative Center**.

Mac users can access Brother CreativeCenter at this web address:

http://www.brother.com/creativecenter/
Consumables

When the time comes to replace consumable items such as toner or drums, an error message will appear on your machine’s Touchscreen. For more information about the consumables for your machine, visit us at http://www.brother.com/original/ or contact your local Brother reseller.

**NOTE**
The drum unit and toner cartridge are two separate parts.

<table>
<thead>
<tr>
