Control Panel Overview

The control panel may vary depending on your model.

1. **On/Off**
   - Turn the machine on by pressing the ![On/Off](Image)
   - Turn the machine off by pressing and holding the ![On/Off](Image). The LCD displays ![Shutting Down](Image) and stays on for a few seconds before turning off.

2. **Function Buttons**
   - **Copy/Scan Options**
     - Press to access temporary settings for scanning or copying.
   - **WiFi (for wireless models)**
     - Press the ![WiFi](Image) button and launch the wireless installer on your computer. Follow the on-screen instructions to set up a wireless connection between your machine and your network.
     - When the ![WiFi](Image) light is on, your Brother machine is connected to a wireless access point. When the ![WiFi](Image) light blinks, the wireless connection is down, or your machine is in the process of connecting to a wireless access point.
   - **Scan**
     - Press to switch the machine to Scan Mode.
   - **2 in 1 (ID) Copy**
     - Press to copy both sides of an identification card onto a single page.
3. Liquid Crystal Display (LCD)
Displays messages to help you set up and use the machine.
If the machine is in Ready Mode or Copy Mode, the LCD displays:

```
□□■□□
ba
cde
100%        Auto 
Stack  Copies:01
```

a. Type of copy  
b. Number of copies  
c. Quality  
d. Contrast  
e. Copy ratio

4. Menu Buttons

**Menu**
Press to access the Menu for programming your machine settings.

**Clear**
- Press to delete entered data.
- Press to cancel the current setting.

**OK**
Press to store your machine settings.

▲ or ▼
Press to scroll up or down through menus and options.

5. Stop/Exit
- Press to stop an operation.
- Press to exit from a menu.

6. Start
- Press to start copying.
- Press to start scanning documents.

Related Information

- Introduction to Your Brother Machine
Control Panel Overview

Related Models: DCP-7195DW/MFC-7895DW

The control panel may vary depending on your model.

1. **Near Field Communication (NFC) (DCP-7195DW/MFC-7895DW)**
   If your Android™ device supports the NFC feature, you can print from your device or scan documents to your device by touching it to the NFC symbol on the control panel.

2. **Touchscreen Liquid Crystal Display (LCD)**
   Access menus and options by pressing them on the touchscreen.

3. **Menu Buttons**
   - **(Back)**
     Press to go back to the previous menu.
   - **(Home)**
     Press to return to the Home screen.
   - **(Cancel)**
     Press to cancel an operation.

4. **Dial Pad (Numerical buttons)**
   Press the numbers on the touchpanel to dial telephone or fax numbers, and to enter the number of copies.

5. **LED Power Indicator**
   The LED lights up depending on the machine’s power status.

6. **Power On/Off**
   - Turn the machine on by pressing ☑️.
   - Turn the machine off by pressing and holding down ☑️. The touchscreen LCD displays [Shutting Down] and stays on for a few seconds before turning off. If you have an external telephone or TAD connected, it is always available.

**Related Information**

- Introduction to Your Brother Machine
When a Home screen is displayed, press ‹ or ‹ to display the other Home screens.
The Home screen displays the machine’s status when the machine is idle. When displayed, this screen indicates that your machine is ready for the next command.
The available features will vary depending on your model.

1. **Date & Time**
   Displays the date and time set on the machine.

2. **Modes**
   - **[Fax]**
     Press to access Fax mode.
   - **[Copy]**
     Press to access Copy mode.
   - **[Scan]**
     Press to access Scan mode.
   - **[Secure Print]**
     Press to access the [Secure Print] option.
   - **[2in1(ID) Copy]**
     Press to access 2in1(ID) Copy option.
   - **[Billings Copy]**
     Press to access the Billings ID Copy option.

3. **Toner**
   Displays the remaining toner life. Press to access the [Toner] menu.
   When the Toner cartridge is near the end of life or has a problem, an error icon ❌ appears on the Toner icon.
4. **[Settings]**

Press to access the [Settings] menu.

If Secure Function Lock or Setting Lock has been turned on, a lock icon appears on the LCD. You must unlock the machine to use Settings.

5. **WiFi or 📡**

(Wireless Status for wireless models)

Press to configure wireless settings.

If you are using a wireless connection, a four-level indicator in each of the Home screens displays the current wireless signal strength.

![Wireless signal strength](image)

- 0 Max
- Wireless LAN Disabled

6. **[Shortcuts]**

Press to create Shortcuts for frequently-used operations, such as sending a fax, making a copy, scanning and using Web Connect.

- Three Shortcuts screens are available with up to four Shortcuts on each Shortcuts screen. A total of 12 Shortcuts are available.
- To display the other Shortcuts screens, press ◀ or ▶.

**Stored Fax(es)**

![Fax screen](image)

The number of received faxes in memory appears at the top of the screen.

Press 📞, and then press [Yes] to print the faxes.

**Warning icon**

![Warning icon](image)
The warning icon 🚨 appears when there is an error or maintenance message; press the message area to view it, and then press 🗑️ to return to Ready Mode.

**NOTE**

- This product adopts the font of ARPHIC TECHNOLOGY CO., LTD.

How to Navigate the Touchscreen LCD

Press your finger on the LCD to operate it. To display and access all the options, press ◀ or ▲ on the LCD to scroll through them.

The following steps explain how to navigate through changing a machine setting. In this example, the LCD Backlight setting is changed from [Light] to [Med].

IMPORTANT

DO NOT press the LCD with a sharp object such as a pen or stylus. It may damage the machine.

NOTE

DO NOT touch the LCD immediately after plugging in the power cord or turning on the machine. Doing this may cause an error.

1. Press ([Settings]).
2. Press [All Settings].
3. Press ▲ or ▼ to display the [General Setup] option, and then press [General Setup].

4. Press ▲ or ▼ to display the [LCD Settings] option, and then press [LCD Settings].

5. Press [Backlight].

7. Press button.

- Uninstall the Brother Software and Drivers (Windows)
**Uninstall the Brother Software and Drivers (Windows)**

1. Do one of the following:
   - (Windows 7)
     Click (Start) > All Programs > Brother > Brother Utilities.
   - (Windows 8)
     Tap or click (Brother Utilities) either on the Start screen or the desktop.
   - (Windows 8.1)
     Move your mouse to the lower left corner of the Start screen and click (if you are using a touch-based device, swipe up from the bottom of the Start screen to bring up the Apps screen).
     When the Apps screen appears, tap or click (Brother Utilities).
   - (Windows 10)
     Click > Brother > Brother Utilities.

2. Select your model from the drop-down list (if it is not already selected).

3. Click Tools in the left navigation bar.
   - If the Software Update Notification icon is visible, select it, and then click Check now > Check for Software Updates > Update. Follow the on-screen instructions.
   - If the Software Update Notification icon is not visible, go to the next step.

4. Click Uninstall in the Tools section of Brother Utilities.
   Follow the instructions in the dialog box to uninstall the software and drivers.

Load Paper in the Paper Tray

- If the Check Size setting is set to On and you pull the paper tray out of the machine, a message appears on the LCD asking if you want to change the paper size and paper type. Change the paper size and paper type settings if needed, following the LCD instructions.
- When you load a different size and type of paper in the tray, you must also change the Paper Size and Paper Type settings in the machine, or on your computer.

1. Pull the paper tray completely out of the machine.

2. Press and slide the paper guides to fit the paper.
   Press the green release levers to slide the paper guides.

3. Fan the stack of paper well.

4. Load paper in the paper tray with the printing surface face down.

5. Make sure the paper is below the maximum paper mark (▼▼▼). Overfilling the paper tray will cause paper jams.

6. Slowly push the paper tray completely into the machine.
7. Lift the support flap to prevent paper from sliding off the output tray.

Related Information

- Load and Print Using the Paper Tray
You can load thin paper, thick paper, recycled paper, bond paper, labels, up to 30 sheets of plain paper, or up to 2 envelopes in the MP tray.

Load Paper in the Multi-purpose Tray (MP Tray)

When you load a different size and type of paper in the tray, you must also change the Paper Size and Paper Type settings in the machine, or on your computer.

Acceptable paper types:
- Plain Paper
- Thin Paper
- Thick Paper
- Recycled Paper
- Bond

1. Lift the support flap to prevent paper from sliding off the face down output tray.

2. Open the MP tray and lower it gently.

When using paper smaller than A6/A5 (Long Edge), you can skip the next step.

3. Pull out the MP tray support (1).
When using Legal or Folio size paper, pull out the paper support (1).

4. Slide the MP tray paper guides to fit the width of the paper you are using.

5. Load paper with the printing surface face up in the MP tray.

• Make sure the paper is below the maximum paper mark (1).

Related Information

• Load and Print Using the Multi-purpose Tray (MP Tray)
When the back cover (face up output tray) is pulled down, the machine has a straight paper path from the MP tray through to the back of the machine. Use this paper feed and output method when you print on labels. When you load a different size and type of paper in the tray, you must also change the Paper Size and Paper Type settings in the machine, or on your computer.

1. Open the machine's back cover (the face up output tray).

2. On the front of the machine, open the MP tray and lower it gently.

When using paper smaller than A6/A5 (Long Edge), you can skip the next step.

3. Pull out the MP tray support (1).

When using Legal or Folio size paper, pull out the paper support (1).

4. Slide the MP tray paper guides to fit the width of the paper you are using.
5. Load paper with the printing surface *face up* in the MP tray.

- Make sure the paper is below the maximum paper mark (1).

6. Change your print preferences in the Print screen before sending the print job from your computer.
7. Send your print job to the machine.
8. Close the back cover (the face up output tray) until it locks in the closed position.

**Related Information**

- Load and Print Using the Multi-purpose Tray (MP Tray)
Load and Print Envelopes Using the MP Tray

You can load up to two envelopes in the MP tray. Before loading, press the corners and sides of the envelopes to make them as flat as possible.

When you load a different size and type of paper in the tray, you must also change the Paper Size and Paper Type settings in the machine, or on your computer.

1. Open the machine’s back cover (the face up output tray).

2. Pull down the two green levers, one on the left side and one on the right side, as shown in the illustration.

3. On the front of the machine, open the MP tray and lower it gently.

4. Pull out the MP tray support (1).

5. Slide the MP tray paper guides to fit the width of the envelopes that you are using.
6. Load paper with the printing surface *face up* in the MP tray.

7. Change your print preferences in the Print dialog box before sending the print job from your computer.

• Load and Print on Thick Paper and Labels in the Manual Feed Slot

• Load and Print on Envelopes in the Manual Feed Slot
Load and Print Plain Paper, Thin Paper, Recycled Paper and Bond Paper in the Manual Feed Slot

When you load a different paper size in the tray, you must change the Paper Size setting in the machine or on your computer at the same time.

1. Lift the support flap to prevent paper from sliding off the face down output tray.

2. Open the manual feed slot cover.

3. Use both hands to slide the manual feed slot paper guides to fit the width of the paper you are using.

4. Using both hands, put one full sheet of paper in the manual feed slot until the front edge touches the paper feed roller. When you feel the machine pull it in, let go.
• Load paper into the manual feed slot with the printing surface facing up.
• Make sure the paper is straight and in the correct position in the manual feed slot. If it is not, the paper may not be fed correctly, resulting in a skewed printout or a paper jam.
• To remove a small printout from the output tray, use both hands to lift up the scanner cover.

[Image]

• You can still use the machine while the scanner cover is up. To close the scanner cover, push it down with both hands.

5. Send your print job to the machine.

[Image]

Change your print preferences in the Print screen before sending the print job from your computer.

6. After the printed page comes out from the machine, load the next sheet of paper in the manual feed slot. Repeat for each page that you want to print.

Related Information

Load Documents

You can send a fax, make copies and scan from the Automatic Document Feeder (ADF) and from the scanner glass.

- Load Documents in the Automatic Document Feeder (ADF)
- Load Documents on the Scanner Glass
Use the ADF when copying or scanning multiple-page, standard-sized documents.

- The ADF can hold up to 50 pages and feed each sheet individually.
- Use standard 80 g/m² paper.
- Make sure documents with correction fluid or written in ink are completely dry.

**IMPORTANT**

- DO NOT leave thick documents on the scanner glass. If you do this, the ADF may jam.
- DO NOT use paper that is curled, wrinkled, folded, ripped, stapled, paper-clipped, pasted, or taped.
- DO NOT use cardboard, newspaper, or fabric.
- To avoid damaging your machine while using the ADF, DO NOT pull on the document while it is feeding.

**Document Sizes Supported**

<table>
<thead>
<tr>
<th>Length</th>
<th>147.3 to 355.6 mm</th>
</tr>
</thead>
<tbody>
<tr>
<td>Width</td>
<td>105 to 215.9 mm</td>
</tr>
<tr>
<td>Weight</td>
<td>60 to 105 g/m²</td>
</tr>
</tbody>
</table>

1. Unfold the ADF document output support flap.

2. Fan the pages well.

3. Stagger the pages of your document and load it face up and top edge first, into the ADF as shown in the illustration.

4. Adjust the paper guides to fit the width of your document.

**Related Information**

- Load Documents

- Paper Handling
Using Special Paper

Always test paper samples before purchasing them to ensure desirable performance.

- **DO NOT** use inkjet paper; it may cause a paper jam or damage your machine.
- If you use bond paper, paper with a rough surface, or paper that is wrinkled or creased, the paper may exhibit degraded performance.

Store paper in its original packaging and keep it sealed. Keep the paper flat and away from moisture, direct sunlight and heat.

**IMPORTANT**

Some types of paper may not perform well or may cause damage to your machine.

**DO NOT** use paper:

- that is highly textured
- that is extremely smooth or shiny
- that is curled or warped
- that is coated or has a chemical finish
- that is damaged, creased or folded
- that exceeds the recommended weight specification in this guide
- with tabs and staples
- with letterheads using low temperature dyes or thermography
- that is multipart or carbonless
- that is designed for inkjet printing

If you use any of the types of paper listed above, they may damage your machine. This damage is not covered under any Brother warranty or service agreement.

Use Printer Halftone
Select this option to use the printer driver to express halftones.

Brightness
Specify the brightness.

Contrast
Specify the contrast.

Graphics Quality
Select either Graphics or Text for the best print quality, based on the type of document you are printing.

Improve Grey Printing
Select this option to improve the image quality of shaded areas.

Improve Pattern Printing
Select this option to improve the pattern printing if printed fills and patterns are different from the fills and patterns you see on your computer screen.

Improve Thin Line
Select this option to improve the image quality of thin lines.

Use System Halftone
Select this option to use Windows to express halftones.

TrueType Mode

Mode
Select how the fonts are processed for printing.

7. Multiple Page
Select this option to print multiple pages on a single sheet of paper or print one page of your document on multiple sheets.

Page Order
Select the page order when printing multiple pages on a single sheet of paper.

Border Line
Select the type of border to use when printing multiple pages on a single sheet of paper.

8. 2-sided / Booklet
Select this option to print on both sides of the paper or print a document in booklet format using 2-sided printing.

2-sided Settings button
Click this button to select the type of 2-sided binding. Four types of 2-sided bindings are available for each orientation.

9. Paper Source
Select the paper source setting according to your print conditions or purpose.
First Page
Select the paper source to use for printing the first page.

Other Pages
Select the paper source to use for printing the second and subsequent pages.

Advanced Tab

1. Scaling
Select these options to enlarge or reduce the size of the pages in your document.

   • Fit to Paper Size
     Select this option to enlarge or reduce the document pages to fit a specified paper size. When you select this option, select the paper size you want from the drop-down list.

   • Free [25 - 400%]
     Select this option to enlarge or reduce the document pages manually. When you select this option, type a value into the field.

2. Reverse Print
Select this option to rotate the printed image 180 degrees.

3. Use Watermark
Select this option to print a logo or text on your document as a watermark. Select one of the preset watermarks, add a new watermark, or use an image file you have created.
4. **Header-Footer Print**  
   Select this option to print the date, time and PC login user name on the document.

5. **Toner Save Mode**  
   Select this feature to conserve toner by using less toner to print documents; printouts appear lighter, but are still legible.

6. **Secure Print (Available only for certain models)**  
   This feature ensures that confidential or sensitive documents do not print until you enter a password on the machine's control panel.

7. **Administrator**  
   This feature allows you to change the administrator password and restrict various printing functions.

8. **User Authentication (Available only for certain models)**  
   This feature allows you to confirm the restrictions for each user.

9. **Other Print Options button**

   - **Sleep Time**  
     Select this option to set the machine to enter sleep mode immediately after printing.

   - **Macro (Available only for certain models)**  
     Select this feature to print an electronic form (macro), which you have stored in your machine's memory, as an overlay on the print job.

   - **Density Adjustment**  
     Specify the print density.

   - **Improve Print Output**  
     Select this option to reduce the amount of paper curling and improve the toner fixing.

   - **Skip Blank Page**  
     Select this option to allow the printer driver to automatically detect blank pages and exclude them from printing.

   - **Print Text in Black**  
     Select this option when you want to print colour text in black.

   - **Print Archive**  
     Select this option to save the print data as a PDF file to your computer.

   - **Eco settings**  
     Select this option to reduce printing noise.

Change the Default Print Settings (Windows)

When you change an application's print settings, the changes only apply to documents printed with that application. To change print settings for all Windows applications, you must configure the printer driver properties.

1. Do one of the following:
   - For Windows Server 2008
     Click (Start) > Control Panel > Hardware and Sound > Printers.
   - For Windows 7 and Windows Server 2008 R2
     Click (Start) > Devices and Printers.
   - For Windows 8
     Move your mouse to the lower right corner of your desktop. When the menu bar appears, click Settings, and then click Control Panel. In the Hardware and Sound group, click View devices and printers.
   - For Windows 10, Windows Server 2016 and Windows Server 2019
     Click > Windows System > Control Panel. In the Hardware and Sound group, click View devices and printers.
   - For Windows Server 2012
     Move your mouse to the lower right corner of your desktop. When the menu bar appears, click Settings, and then click Control Panel. In the Hardware group, click View devices and printers.
   - For Windows Server 2012 R2
     Click Control Panel on the Start screen. In the Hardware group, click View devices and printers.

2. Right-click the Brother XXX-XXXX icon (where XXXX is your model name), and then select Printer properties. If printer driver options appear, select your printer driver.

3. Click the General tab, and then click the Printing Preferences... or Preferences... button.
   The printer driver dialog box appears.
   • To configure the tray settings, click the Device Settings tab (Available only for certain models).
   • To change the printer port, click the Ports tab.

4. Select the print settings you want to use as defaults for all of your Windows programs.

5. Click OK.

6. Close the printer properties dialog box.

Print a Document Using the BR-Script3 Printer Driver (PostScript® 3™ Language Emulation) (Windows)

Related Models: DCP-L2550DW/DCP-7190DW/DCP-7195DW/MFC-7895DW

The BR-Script3 printer driver lets you print PostScript® data more clearly.

To install the PS driver (BR-Script3 printer driver), launch the Brother installation disc, select Custom in the Select Machine section, and then select the PS Driver check box.

1. Select the print command in your application.
2. Select Brother XXX-XXXX BR-Script3 (where XXXX is the name of your model), and then click the printing properties or preferences button.
   The printer driver window appears.

3. Click the Layout, Paper/Quality, or Secure Print tab to change basic print settings. (Available only for certain models)
   Click the Layout or Paper/Quality tab, and then click the Advanced... button to change advanced print settings.

4. Click OK.

5. Complete your print operation.

1. Make sure you have loaded the correct size paper in the paper tray.
2. From an application, such as Apple TextEdit, click the File menu, and then select Print.
3. Select Brother XXX-XXXX (where XXXX is your model name).
4. Type the number of copies you want in the Copies field.
5. Click the Paper Size pop-up menu, and then select your paper size.
6. Select the Orientation option that matches the way you want the document to print.
7. Click the application pop-up menu, and then select Print Settings.
   The Print Settings options appear.
8. Click the Media Type pop-up menu, and then select the type of paper you are using.
9. Change other printer settings, if needed.
10. Click Print.

Related Information

- Print from Your Computer (Mac)

Related Topics:

- Print Options (Mac)
1. **Paper Size**
   Select the size of the paper you want to use. You can either choose from standard paper sizes or create a custom paper size.

2. **Orientation**
   Select the orientation (portrait or landscape) of your printout.
   If your application contains a similar setting, we recommend that you set the orientation using the application.

3. **Scale**
   Type a value into the field to enlarge or reduce the pages in your document to fit the selected paper size.
1. **Pages per Sheet**
   Select the number of pages to print on a single sheet of paper.

2. **Layout Direction**
   Select the page order when printing multiple pages on a single sheet of paper.

3. **Border**
   Select the type of border to use when printing multiple pages on a single sheet of paper.

4. **Two-Sided**
   Select whether to print on both sides of the paper.

5. **Reverse page orientation**
   Select this option to rotate the printed image 180 degrees.

6. **Flip horizontally**
   Select this option to reverse the printed image on the page horizontally from left to right.
1. **Collate pages**
   Select this option to print sets of multi-page documents in the original page order. When this option is selected, one complete copy of your document will print, and then reprint according to the number of copies you choose. If this option is not selected, then each page will print according to the number of copies chosen before the next page of the document is printed.

2. **Pages to Print**
   Select which pages you want to print (even pages or odd pages).

3. **Page Order**
   Select the page order.

4. **Scale to fit paper size**
   Select this option to enlarge or reduce the pages in your document to fit the selected paper size.

5. **Destination Paper Size**
   Select the paper size to print on.

6. **Scale down only**
   Select this option if you want to reduce the pages in your document when they are too large for the selected paper size. If this option is selected and the document is formatted for a paper size that is smaller than the paper size you are using, the document will be printed at its original size.
1. **Media Type**
   Select the type of media you want to use. To achieve the best print results, the machine automatically adjusts its print settings according to the selected media type.

2. **Print Quality**
   Select the print resolution you want. Because print quality and speed are related, the higher the quality, the longer it will take to print the document.

3. **Paper Source**
   Select the paper source setting according to your print conditions or purpose.

4. **Advanced**
   - **Toner Save Mode**
     Select this feature to conserve toner by using less toner to print documents; printouts appear lighter, but are still legible.

   - **Graphics Quality**
     Select either Graphics or Text for the best print quality, based on the type of document you are printing.

   - **Improve Print Output**
     Select this option to reduce the amount of paper curling and improve the toner fixing.

   - **Density Adjustment**
     Specify the print density.

   - **Quiet Mode**
     Select this option to reduce printing noise.

   - **Other Print Options**
     - **Skip Blank Page**
       Select this option to allow the printer driver to automatically detect blank pages and exclude them from printing.
1. **Secure Print (Available only for certain models)**
   This feature ensures that confidential or sensitive documents do not print until you enter a password on the machine's control panel.

Scan to FTP

Scan documents directly to an FTP server when you need to share the scanned information. For added convenience, configure different profiles to save your favourite Scan to FTP destinations.

- Set up a Scan to FTP Profile
- Upload Scanned Data to an FTP Server

Related Models: DCP-L2550DW/DCP-7190DW/DCP-7195DW/MFC-7895DW
Set up a Scan to FTP Profile

Related Models: DCP-L2550DW/DCP-7190DW/DCP-7195DW/MFC-7895DW

Set up a Scan to FTP Profile to scan and upload the scanned data directly to an FTP location.

We recommend Microsoft Internet Explorer 11/Edge for Windows and Safari 9/10 for Mac. Make sure that JavaScript and Cookies are always enabled in whichever browser you use.

1. Start your web browser.
   Type "http://machine's IP address" in your browser's address bar (where "machine's IP address" is the IP address of the machine or the print server name). For example: http://192.168.1.2
   No password is required by default. If you have previously set a password, type it, and then click .
2. Click the Scan tab.
3. Click the Scan to FTP/Network menu in the left navigation bar.
4. Select the FTP option, and then click Submit.
5. Click the **Scan to FTP/Network Profile** menu in the left navigation bar.

6. Select the profile you want to set up or change.

7. In the **Profile Name** field, type a name for this server profile (up to 15 alphanumeric characters). The machine will display this name on the LCD.

8. In the **Host Address** field, type the Host Address (for example: ftp.example.com; up to 64 characters) or the IP address (for example: 192.23.56.189).

9. Change the **Port Number** setting used to access the FTP server. The default for this setting is port 21. In most cases this setting does not need to be changed.

10. In the **Username** field, type a user name (up to 32 characters) that has permission to write data to the FTP server.

11. In the **Password** field, type the password (up to 32 characters) associated with the user name you entered in the **Username** field. Type the password again in the **Retype password** field.

12. In the **Store Directory** field, type the path to the folder on the FTP server where you want to send your scanned data. Do not type a slash mark at the beginning of the path (see example).
13. Click the **File Name** drop-down list, and then select a file name prefix from the preset names provided, or from user-defined names. The file name used for the scanned document will be the file name prefix you select, followed by the last six digits of the flatbed/ADF scanner counter and the file extension (for example: "Estimate_098765.pdf").

14. Click the **Quality** drop-down list, and then select a quality setting. If you choose the **User Select** option, the machine will prompt users to select a setting each time they use the scan profile.

15. Click the **File Type** drop-down list, and then select the file type you want to use for the scanned document. If you choose the **User Select** option, the machine will prompt users to select a setting each time they use the scan profile.

16. Click the **Document Size** drop-down list, and then select your document size from the list. This is necessary to make sure the scanned file is the correct size.

17. Click the **File Size** drop-down list, and then select your file size from the list.

18. Click the **Remove Background Color** drop-down list, and then select the level from the list. You can use this feature to remove the background colour of documents to make the scanned data more legible.

19. Set the **Passive Mode** option to off or on depending on your FTP server and network firewall configuration. The default setting is on. In most cases this setting does not need to be changed.

20. Click **Submit**.

Using the following characters: ?, /, \, ", :; <, >, | or * may cause a sending error.

Share scanned information by saving it to your FTP server.

>> DCP-L2550DW/DCP-7190DW
>> DCP-7195DW/MFC-7895DW

**DCP-L2550DW/DCP-7190DW**

1. Load your document.
2. Press (SCAN).
3. Press ▲ or ▼ to select the [Scan to FTP] option, and then press **OK**.
4. Press ▲ or ▼ to select one of the profiles listed, and then press **OK**.
   - If the profile is not complete (for example, if the logon account name and password are missing or if the quality or file type is not specified), you will be prompted to enter any missing information.
5. Press **Start**.
   - The LCD shows the message [Connecting]. When the connection to the FTP server is successful, the machine starts scanning. If you are using the machine's scanner glass, follow the LCD instructions to complete the scanning job.

**DCP-7195DW/MFC-7895DW**

1. Load your document.
2. Press [Scan] > [to FTP].
3. Press ▲ or ▼ to select one of the network server profiles listed. If the profile is not complete (for example, if the logon account name and password are missing, or if the quality or file type is not specified), you will be prompted to enter any missing information.
4. Press [Start].
   - The machine starts scanning. If using the machine's scanner glass, follow the LCD instructions to complete the scanning job.

**Related Information**

- Scan to FTP
Scan to Network (Windows)

Scan documents directly to a CIFS server on your local network. For added convenience, you can configure different profiles to save your favourite Scan to Network destinations.

- Set up a Scan to Network Profile
- Upload Scanned Data to a CIFS Server
Set up a Scan to Network Profile

Set up a Scan to Network Profile to scan and upload scanned data directly to a folder on a CIFS server.

We recommend Microsoft Internet Explorer 11/Edge for Windows and Safari 9/10 for Mac. Make sure that JavaScript and Cookies are always enabled in whichever browser you use.

1. Start your web browser.
   Type "http://machine's IP address" in your browser's address bar (where "machine's IP address" is the IP address of the machine or the print server name). For example: http://192.168.1.2
   No password is required by default. If you have previously set a password, type it, and then click .

2. Click the Scan tab.

3. Click the Scan to FTP/Network menu in the left navigation bar.

4. Select the Network option, and then click Submit.
5. Click the **Scan to FTP/Network Profile** menu in the left navigation bar.
6. Select the profile you want to set up or change.
7. In the **Profile Name** field, type a name for this server profile (up to 15 alphanumeric characters). The machine will display this name on the LCD.
8. In the **Network Folder Path** field, type the path to the folder on the CIFS server where you want to send your scanned data.
9. Click the **File Name** drop-down list, and then select a file name prefix from the preset names provided, or from user-defined names. The file name used for the scanned document will be the file name prefix you select, followed by the last six digits of the flatbed/ADF scanner counter and the file extension (for example: "Estimate_098765.pdf").
10. Click the **Quality** drop-down list, and then select a quality setting. If you choose the **User Select** option, the machine will prompt users to select a setting each time they use the scan profile.
11. Click the **File Type** drop-down list, and then select the file type you want to use for the scanned document. If you choose the **User Select** option, the machine will prompt users to select a setting each time they use the scan profile.
12. Click the **Document Size** drop-down list, and then select your document size from the list. This is necessary to make sure the scanned file is the correct size.

13. Click the **File Size** drop-down list, and then select your file size from the list.

14. Click the **Remove Background Color** drop-down list, and then select the level from the list. You can use this feature to remove the background colour of documents to make the scanned data more legible.

15. To PIN-protect this profile, in the **Use PIN for Authentication** field, select **On**.

16. If you selected **On** for the **Use PIN for Authentication** field, type a four-digit PIN in the **PIN Code** field.

17. To set your authentication method, select **Auto**, or **NTLMv2** from the **Auth. Method** menu.

18. In the **Username** field, type a user name (up to 96 characters) that has permission to write data to the folder specified in the **Network Folder Path** field. If the user name is part of a domain, enter the user name in one of the following styles:

   - `user@domain`
   - `domain\user`  

19. In the **Password** field, type the password (up to 32 characters) associated with the user name you entered in the **Username** field. Type the password again in the **Retype password** field.

20. Click **Submit**.

   Using the following characters: ?, /, \, , :, <, >, | or * may cause a sending error.

21. You must configure the SNTP protocol (network time server) or you must set the date, time and time zone correctly on the control panel for all authentication methods. The time must match the time used by the CIFS Server.

---

**Related Information**

- Scan to Network (Windows)
- Set the Date and Time Using Web Based Management
Set the Date and Time Using Web Based Management

Make sure the date and time and the time zone settings are set correctly using Web Based Management or the control panel, so the machine's time matches the time being used by the server providing authentication.

Ignore step 1, if you already have a Web Based Management window open.

1. Start your web browser.
   Type "http://machine's IP address" in your browser's address bar (where "machine's IP address" is the IP address of the machine or the print server name). For example: http://192.168.1.2
   No password is required by default. If you have previously set a password, type it, and then click.

2. Click the Administrator tab.
3. Click the Date&Time menu in the left navigation bar.

4. In the Date fields, enter the date.
5. Select the clock type from the Clock Type field.
6. In the Time fields, enter the time.
7. Select the time difference between your location and UTC from the Time Zone drop-down list, for example, the time zone for Eastern time in the USA and Canada is UTC-05:00.
8. Click Submit.

Related Information

Upload Scanned Data to a CIFS Server

Related Models: MFC-7895DW

1. Load your document.
2. Press [Scan] > [to Network].
3. The server profiles you have set up using Web Based Management are listed. Select the profile you want. If the profile is not complete (for example, if the logon account name and password are missing, or if the quality or file type is not specified), you will be prompted to enter any missing information.
4. Press [Start].

The machine starts scanning. If using the machine’s scanner glass, follow the LCD instructions to complete the scanning job.

Related Information

• Scan to Network (Windows)
Web Services for Scanning on Your Network (Windows 7, Windows 8 and Windows 10)

The Web Services protocol enables Windows 7, Windows 8 and Windows 10 users to scan using a Brother machine on the network. You must install the driver via Web Services.

- Use Web Services to Install Drivers Used for Scanning (Windows 7, Windows 8 and Windows 10)
- Scan Using Web Services from the Brother Machine (Windows 7, Windows 8 and Windows 10)
- Configure Scan Settings for Web Services
Use Web Services to Install Drivers Used for Scanning (Windows 7, Windows 8 and Windows 10)

Use Web Services to monitor printers on the network.

- Make sure you have installed the Brother software and drivers.
- Verify that the host computer and the Brother machine are on the same subnet, or that the router is correctly configured to pass data between the two devices.
- You must configure the IP address on your Brother machine before you configure this setting.

1. Do one of the following:
   - Windows 7
     Click (Start) > Control Panel > Network and Internet > View network computers and devices.
     The machine's Web Services Name appears with the printer icon.
     Right-click the machine you want to install.
   - Windows 8
     Move your mouse to the lower right corner of your desktop. When the menu bar appears, click Settings > Change PC settings > Devices > Add a device.
     The machine's Web Services Name appears.
   - Windows 8.1
     Move your mouse to the lower right corner of your desktop. When the menu bar appears, click Settings > Change PC settings > PC and devices > Devices > Add a device.
     The machine's Web Services Name appears.
   - Windows 10
     Click Windows System > Control Panel. In the Hardware and Sound group, click Add a device.

     - The Web Services Name for the Brother machine is your model name and the MAC Address (Ethernet Address) of your machine (for example, Brother MFC-XXXX (model name) [XXXXXXXXXXXX] (MAC Address / Ethernet Address)).
     - Windows 8/Windows 10
       Move your mouse over the machine name to display the machine's information.

2. Do one of the following:
   - Windows 7
     Click Install in the displayed menu.
   - Windows 8/Windows 10
     Select the machine you want to install, and then follow the on-screen instructions.

   To uninstall drivers, click Uninstall or (Remove device).

</table>

**File Type**
Select the file type you want to use for the scanned data.

**Target Application**
Select the destination application from the drop-down list.

**OCR Language**
Set the OCR language to match the language of the scanned document's text.

**File Name**
Click **Change** to change the file name's prefix.

**Destination Folder**
Click the folder icon to browse and select the folder where you want to save your scanned documents.

**Scan Location**
Select the **Folder** or **SharePoint** radio button to specify the destination where you want to save your scanned documents.

**Show Save As Window**
Select this option to specify the scanned image's destination every time you scan.

**Show Folder**
Select this option to automatically display the destination folder after scanning.

**File Size Priority**
Adjust the data compression ratio of the scanned image. Change the file size by moving the **File Size Priority** slider to the right or left.

**Resolution**
Select a scanning resolution from the **Resolution** drop-down list. Higher resolutions take more memory and transfer time, but produce a finer scanned image.

**Scan Type**
Select from a range of scan colour depths.
• **Auto**
  Use for any type of document. This mode automatically picks an appropriate colour depth for the document.

• **Black & White**
  Use for text or line art images.

• **Gray (Error Diffusion)**
  Use for photographic images or graphics. (Error Diffusion is a method for creating simulated grey images without using true grey dots. Black dots are put in a specific pattern to give a grey appearance.)

• **True Gray**
  Use for photographic images or graphics. This mode is more accurate because it uses up to 256 shades of grey.

• **24bit Color**
  Use to create an image with the most accurate colour reproduction. This mode uses up to 16.8 million colours to scan the image, but it requires the most memory and has the longest transfer time.

**Document Size**
Select the exact size of your document from the **Document Size** drop-down list.

- If you select the **1 to 2 (A4)** option, the scanned image will be divided into two A5-size documents.

**Brightness**
Set the **Brightness** level by dragging the slider to the right or left to lighten or darken the image. If the scanned image is too light, set a lower brightness level and scan the document again. If the image is too dark, set a higher brightness level and scan the document again. You can also type a value into the field to set the **Brightness** level.

**Contrast**
Increase or decrease the **Contrast** level by moving the slider to the right or left. An increase emphasises dark and light areas of the image, while a decrease reveals more details in grey areas. You can also type a value into the field to set the **Contrast** level.

**ID Card Scan**
Select this check box to scan both sides of an identification card onto one page.

**Advanced Settings**
Configure advanced settings by clicking the **Advanced Settings** button in the Scan Settings dialog box.

- **Remove Bleed-through / Pattern**
  **Remove Background Color**
  Remove the base colour of documents to make the scanned data more legible.

- **Rotate Image**
  Rotate the scanned image.

- **Skip Blank Page**
  Remove the document's blank pages from the scanning results.

- **Display Scanning Results**
  Show the numbers of total pages saved and blank pages skipped on your computer screen.

- **ADF Auto Deskew**
  When scanning the document from the ADF, the machine corrects skewing of the document automatically.

**Default**
Select this option to restore all settings to their factory setting values.

Crop a Scanned Image Using ControlCenter4 Home Mode (Windows)

The crop tool on the Image Editing Toolbar lets you trim unwanted areas from your scanned image. Use the Zoom In and Zoom Out tools to help view the image to be cropped.

Image Editing Toolbar

1. Restart
   Cancels all the edits applied to the selected image. The edited image returns to its original state.

2. Fit to Window
   Displays the scanned image so that the entire image fits in the window.

3. Zoom In
   Zooms in on the scanned image.

4. Zoom Out
   Zooms out of the scanned image.

5. Crop and Edit
   Removes the outer parts of the image. Click the Crop and Edit button, and then change the frame to contain the area you want to keep after cropping.

6. Page Counter
   Indicates the page number of the scanned page currently shown in the image viewer. To display a different page, select the desired page number from the drop-down page number list.

If you have scanned multiple pages, you can see the next or previous scanned page by clicking the left or right arrow buttons in the preview window.

1. Scan a document.

2. Click (Crop and Edit) to edit the scanned image.

   The Crop and Edit - ControlCenter4 window appears.
a. Expands the scanned image so that the entire image fits in the window.
b. Zooms in on the image.
c. Zooms out of the image.
d. Rotates the image counter-clockwise 90 degrees.
e. Rotates the image clockwise 90 degrees.
f. Click and drag the frame to adjust the area to be cropped.

3. Click **OK**.

The edited image appears in the image viewer.

### File Type

Select the file type you want to use for the scanned data.

**For Image, Email and File**

- Windows Bitmap (*.bmp)
- JPEG (*.jpg) (recommended for most users when scanning pictures)
- TIFF Single-Page (*.tif)
- TIFF Multi-Page (*.tif)
- Portable Network Graphics (*.png)
- PDF Single-Page (*.pdf) (recommended for scanning and sharing documents)
- PDF Multi-Page (*.pdf) (recommended for scanning and sharing documents)
- PDF/A Single-Page (*.pdf) (recommended for scanning and sharing documents)
- PDF/A Multi-Page (*.pdf) (recommended for scanning and sharing documents)
- High Compression PDF Single-Page (*.pdf)
- High Compression PDF Multi-Page (*.pdf)
- Secure PDF Single-Page (*.pdf)
- Secure PDF Multi-Page (*.pdf)
- Searchable PDF Single-Page (*.pdf)
- Searchable PDF Multi-Page (*.pdf)
• XML Paper Specification (*.xps) (the XML Paper Specification is available for Windows 7, Windows 8 and Windows 10, and when using applications that support XML Paper Specification files)

For Email and File
• Microsoft Office Word (*.docx)
• Microsoft Office PowerPoint (*.pptx)
• Microsoft Office Excel (*.xlsx)

For OCR
• HTML 3.2 (*.htm)
• HTML 4.0 (*.htm)
• Microsoft Excel 2003, XP (*.xls)
• RTF Word 2000 (*.rtf)
• WordPad (*.rtf)
• WordPerfect 9, 10 (*.wpd)
• Text (*.txt)
• Searchable PDF Single-Page (*.pdf)
• Searchable PDF Multi-Page (*.pdf)

Target Application
Select the destination application from the drop-down list.

OCR Language
Set the OCR language to match the language of the scanned document's text.

File Name
Click Change to change the file name's prefix.

Scan Location
Select the Folder or SharePoint radio button to specify the destination where you want to save your scanned documents.

Destination Folder
Click the folder icon to browse and select the folder where you want to save your scanned documents.

Show Folder
Select this option to automatically display the destination folder after scanning.

Show Save As Window
Select this option to specify the scanned image's destination every time you scan.

File Size Priority
Adjust the data compression ratio of the scanned image. Change the file size by moving the File Size Priority slider to the right or left.

PreScan
Select PreScan to preview your image and crop unwanted portions before scanning.

Resolution
Select a scanning resolution from the Resolution drop-down list. Higher resolutions take more memory and transfer time, but produce a finer scanned image.

Scan Type
Select from a range of scan colour depths.

• Auto
Use for any type of document. This mode automatically picks an appropriate colour depth for the document.
• **Black & White**
  Use for text or line art images.

• **Gray (Error Diffusion)**
  Use for photographic images or graphics. (Error Diffusion is a method for creating simulated grey images without using true grey dots. Black dots are put in a specific pattern to give a grey appearance.)

• **True Gray**
  Use for photographic images or graphics. This mode is more accurate because it uses up to 256 shades of grey.

• **24bit Color**
  Use to create an image with the most accurate colour reproduction. This mode uses up to 16.8 million colours to scan the image, but it requires the most memory and has the longest transfer time.

**Document Size**
Select the exact size of your document from the **Document Size** drop-down list.

• If you select the **1 to 2 (A4)** option, the scanned image will be divided into two A5-size documents.

**Brightness**
Set the **Brightness** level by dragging the slider to the right or left to lighten or darken the image. If the scanned image is too light, set a lower brightness level and scan the document again. If the image is too dark, set a higher brightness level and scan the document again. You can also type a value into the field to set the **Brightness** level.

**Contrast**
Increase or decrease the **Contrast** level by moving the slider to the right or left. An increase emphasises dark and light areas of the image, while a decrease reveals more details in grey areas. You can also type a value into the field to set the **Contrast** level.

**Continuous Scanning**
Select this option to scan multiple pages. After a page is scanned, select either continue scanning or finish.

**2-sided Scanning**
Select this check box to scan both sides of the document. When using the Automatic 2-sided Scan feature, you must select the **Long-edge binding** or **Short-edge binding** option, depending on the layout of your original, to make sure the data file you create appears correctly.
(MFC-7895DW)

**ID Card Scan**
Select this check box to scan both sides of an identification card onto one page.

**Advanced Settings**
Configure advanced settings by clicking the **Advanced Settings** button in the Scan Settings dialog box.

• **Remove Bleed-through / Pattern**
  - **Remove Background Color**
    Remove the base colour of documents to make the scanned data more legible.

• **Rotate Image**
  Rotate the scanned image.

• **Skip Blank Page**
  Remove the document's blank pages from the scanning results.

• **Display Scanning Results**
  Show the numbers of total pages saved and blank pages skipped on your computer screen.

• **ADF Auto Deskew**
  When scanning the document from the ADF, the machine corrects skewing of the document automatically.
Default
Select this option to restore all settings to their factory setting values.

Related Information

- Scan Using ControlCenter4 Advanced Mode (Windows)
You can use the Nuance™ PaperPort™ 14SE application for scanning.

- To download the Nuance™ PaperPort™ 14SE application, click (Brother Utilities), select Do More in the left navigation bar, and then click PaperPort.
- For detailed instructions on using each application, click the application's Help menu, and then click Getting Started Guide in the Help ribbon.

The instructions for scanning in these steps are for PaperPort™ 14SE. For other Windows applications, the steps will be similar. PaperPort™ 14SE supports both TWAIN and WIA drivers; the TWAIN driver (recommended) is used in these steps.

1. Load your document.
2. Start PaperPort™ 14SE.
   Do one of the following:
   - Windows 7
     Using your computer, click (Start) > All Programs > Nuance PaperPort 14 > PaperPort.
   - Windows 8
     Click (PaperPort).
   - Windows 10
     Click Nuance PaperPort 14 > PaperPort.
3. Click the Desktop menu, and then click Scan Settings in the Desktop ribbon.
   The Scan or Get Photo panel appears on the left side of the screen.
4. From the available Scanners list, select TWAIN: TW-Brother XXX-XXXX or TWAIN: TW-Brother XXX-XXXX LAN (where XXX-XXXX is the model name of your machine). To use the WIA driver, select the Brother driver that has "WIA" as the prefix.
5. Select the Display scanner dialog box check box in the Scan or Get Photo panel.
6. Click Scan.
   The Scanner Setup dialog box appears.
7. Adjust the settings in the Scanner Setup dialog box, if needed.
8. Click the Document Size drop-down list, and then select your document size.

To scan both sides of the document (MFC-7895DW):
- Automatic 2-sided scan is available only when using the ADF.
- You cannot use PreScan to preview an image.
9. Click PreScan if you want to preview your image and crop unwanted portions before scanning.
10. Click Start.
   The machine starts scanning.

TWAIN Driver Settings (Windows)

- Note that the item names and assignable values will vary depending on the machine.
- The **Contrast** option is available only when selecting the **Gray (Error Diffusion)**, **True Gray**, or **24bit Color** options from the **Scan Type** settings.

1. **Scan**
   Select the **Photo**, **Web**, or **Text** option depending on the type of document you want to scan.

<table>
<thead>
<tr>
<th>Scan (Image Type)</th>
<th>Resolution</th>
<th>Scan Type</th>
</tr>
</thead>
<tbody>
<tr>
<td>Photo</td>
<td>300 x 300 dpi</td>
<td>24bit Color</td>
</tr>
<tr>
<td>Web</td>
<td>100 x 100 dpi</td>
<td>24bit Color</td>
</tr>
<tr>
<td>Text</td>
<td>200 x 200 dpi</td>
<td>Black &amp; White</td>
</tr>
</tbody>
</table>

2. **Resolution**
   Select a scanning resolution from the **Resolution** drop-down list. Higher resolutions take more memory and transfer time, but produce a finer scanned image.

3. **Scan Type**
   Select from a range of scan colour depths.
• **Black & White**
  Use for text or line art images.

• **Gray (Error Diffusion)**
  Use for photographic images or graphics. (Error Diffusion is a method for creating simulated grey images without using true grey dots. Black dots are put in a specific pattern to give a grey appearance.)

• **True Gray**
  Use for photographic images or graphics. This mode is more accurate because it uses up to 256 shades of grey.

• **24bit Color**
  Use to create an image with the most accurate colour reproduction. This mode uses up to 16.8 million colours to scan the image, but it requires the most memory and has the longest transfer time.

4. **Document Size**
Select the exact size of your document from a selection of preset scan sizes.
If you select **Custom**, the **Custom Document Size** dialog box appears and you can specify the document size.

5. **Brightness**
Set the **Brightness** level by dragging the slider to the right or left to lighten or darken the image. If the scanned image is too light, set a lower brightness level and scan the document again. If the image is too dark, set a higher brightness level and scan the document again. You can also type a value in the field to set the brightness level.

6. **Contrast**
Increase or decrease the **Contrast** level by moving the slider to the right or left. An increase emphasises dark and light areas of the image, while a decrease reveals more details in grey areas. You can also type a value in the field to set the contrast level.

7. **2-sided Scanning**
Scan both sides of the document. When using the Automatic 2-sided Scan feature, you must select the **Long-edge binding** or **Short-edge binding** option from the **2-sided Scanning** drop-down list, so when you turn the pages, they are facing the way you want.

(MFC-7895DW)

8. **Advanced Settings**
Configure advanced settings by clicking the **Advanced Settings** button in the Scan Settings dialog box.

• **Paper**
  - **Auto Deskew**
    Set the machine to correct document skewing automatically as the pages are scanned from the ADF.
  - **Rotate Image**
Rotate the scanned image.

• **Enhancement**
  - **Background Processing**
    - **Remove Bleed-through / Pattern**
      Prevent bleed-through.
    - **Remove Background Color**
      Remove the base colour of documents to make the scanned data more legible.
  - **Colour Drop**
    Select a colour to remove from the scanned image.
  - **Boldface Formatting**
    Emphasise the characters of the original by making them bold.
  - **Blurred Character Correction**
    Correct the broken or incomplete characters of the original to make them easier to read.
  - **Edge Emphasis**
    Make the characters of the original sharper.
  - **Reduce Noise**
    Improve and enhance the quality of your scanned images with this selection. The **Reduce Noise** option is available when selecting the **24bit Color** option and the **300 x 300 dpi**, **400 x 400 dpi**, or **600 x 600 dpi** scan resolution.

• **Paper Handling**
  - **Edge Fill**
    Fill in the edges on four sides of the scanned image using the selected colour and range.
  - **Continuous scan**
    Select this option to scan multiple pages. After a page is scanned, select either continue scanning or finish.

- **Scan Using Nuance™ PaperPort™ 14SE or Other Windows Applications**
Scan Using Windows Fax and Scan

Windows Fax and Scan application is another option that you can use for scanning.

- Windows Fax and Scan uses the WIA scanner driver.
- If you want to crop a portion of a page after pre-scanning the document, you must scan using the scanner glass (also called the flatbed).

1. Load your document.
2. Launch Windows Fax and Scan.
3. Click **File** > **New** > **Scan**.
4. Select the scanner you want to use.
5. Click **Import** or **OK**.

   The **New Scan** dialog box appears.

6. Adjust the settings in the Scanner Setup dialog box, if needed.
   
   The scanner resolution can be set to a maximum of 1200 dpi. If you want to scan at higher resolutions, use the **Scanner Utility** software of **Brother Utilities**.
   
   If your machine supports 2-sided Scan and you want to scan both sides of your document, select **Feeder (Scan both sides)** as **Source**.

7. Click **Scan**.

   The machine starts scanning the document.

---

**Related Information**

2. **Scan Type**
   Select from a range of scan colour depths.
   - **Black & White**
     Use for text or line art images.
   - **Gray (Error Diffusion)**
     Use for photographic images or graphics. (Error Diffusion is a method for creating simulated grey images without using true grey dots. Black dots are put in a specific pattern to give a grey appearance.)
   - **True Gray**
     Use for photographic images or graphics. This mode is more accurate because it uses up to 256 shades of grey.
   - **24bit Color**
     Use to create an image with the most accurate colour reproduction. This mode uses up to 16.8 million colours to scan the image, but it requires the most memory and has the longest transfer time.

3. **Document Size**
   Select the exact size of your document from a selection of preset scan sizes.
   - If you select **Custom**, you can specify the document size.
4. Adjust Image

Click the Adjust Image button to adjust other image qualities.

![Adjust Image controls](image)

**Brightness**
Set the Brightness level by dragging the slider to the right or left to lighten or darken the image. If the scanned image is too light, set a lower brightness level and scan the document again. If the image is too dark, set a higher brightness level and scan the document again. You can also type a value in the box to set the brightness.

**Contrast**
Increase or decrease the Contrast level by moving the slider to the right or left. An increase emphasises dark and light areas of the image, while a decrease reveals more details in grey areas. You can also type a value in the box to set the contrast.

**Reduce Noise**
Improve and enhance the quality of your scanned images with this selection. The Reduce Noise option is available when selecting the 24bit Color option and the 300 x 300 dpi, 400 x 400 dpi, or 600 x 600 dpi scan resolutions.

5. 2-sided Scanning

If you select this check box, the machine scans both sides of the document. When using the Automatic 2-sided Scan feature, you must select the Long-edge binding or Short-edge binding option, depending on the layout of your original, to make sure the created data file appears correctly.

(MFC-7895DW)

6. Rotate Image

Rotate the scanned image.

**Related Information**

- Scan Using TWAIN-Compliant Applications (Mac)
Configure Scan Settings Using Web Based Management

- Set the Scan File Name Using Web Based Management
Set up a file name for scanned data using Web Based Management.

1. Start your web browser.
   Type "http://machine's IP address" in your browser's address bar (where "machine's IP address" is the IP address of the machine or the print server name). For example: http://192.168.1.2
   No password is required by default. If you have previously set a password, type it, and then click.

2. Click the Scan tab.

3. Click the Scan File Name menu in the left navigation bar.

4. Select the File Name Style from the drop-down list.

5. If you selected the option to include the date in File Name Style field, select the Date format from the drop-down list.

6. In the Time fields, select On to include the time information in the file name.

7. In the Counter field, select Continuous or Reset after each job.

   When you select Reset after each job, duplication of file names may occur.

8. If you want to create a user-defined file name prefix, type a file name in the user-defined fields of each scan function.

   Using the following characters: ?, /, \, or * may cause a sending error.

9. Click Submit.

DCP-7090DW/DCP-L2535DW/DCP-L2550DW/DCP-7190DW

1. Make sure you have loaded the correct size paper in the paper tray.
2. Do one of the following:
   • Place the document face up in the ADF. (available only for certain models)
     (If you are copying multiple pages, we recommend using the ADF.)
   • Place the document face down on the scanner glass.
3. Do one of the following:
   • For MFC models
     Press \COPY\ (COPY).
     Use the dial pad to enter the number of copies you want.
   • For DCP models
     Press \1\ or \2\ to enter the number of copies you want.
     The LCD displays:
     \Stack\ Copies:01
     100% Auto
4. Press Start.

DCP-7195DW/MFC-7895DW

1. Make sure you have loaded the correct size paper in the paper tray.
2. Do one of the following:
   • Place the document *face up* in the ADF.
     (If you are copying multiple pages, we recommend using the ADF.)

   • Place the document *face down* on the scanner glass.

3. Press \([\text{Copy}]\).

   The LCD displays:

   ![Copy Options LCD Display](image)

4. To enter the number of copies you want, do one of the following:
   • Press \([-\] or \([+\)] using the LCD.
   • Use the dial pad.
   • Press \([01]\) to display a numeric keypad on the LCD, and then enter the number of copies. Press \([\text{OK}]\).

5. Press [Start].

   ![Checkmark](image)

**Related Information**

- Copy
**Enlarge or Reduce Copied Images**

Select an enlargement or reduction ratio to resize your copied data.

1. Load your document.
2. Do one of the following:
   - For MFC models
     Press \( \text{(COPY)} \).
     Use the dial pad to enter the number of copies you want.
   - For DCP models
     Press \( \text{a} \) or \( \text{b} \) to enter the number of copies you want.
3. Press \( \text{Options} \) or \( \text{Copy/Scan Options} \).
4. Press \( \text{a} \) or \( \text{b} \) to select \( \text{[Enlarge/Reduce]} \), and then press \( \text{OK} \).
5. Press \( \text{a} \) or \( \text{b} \) to select the enlargement or reduction ratio you want, and then press \( \text{OK} \).
   - If you select \( \text{[Custom(25-400%)]} \), use the dial pad, or press \( \text{a} \) or \( \text{b} \) to enter an enlargement or reduction ratio from \( \text{[25%]} \) to \( \text{[400%]} \) and then press \( \text{OK} \).
6. Press \( \text{Start} \).

- \( \text{[Auto]} \) sets the machine to calculate the reduction ratio that best fits the size of paper.
- \( \text{[Auto]} \) is only available when using the ADF.

**DCP-7195DW/MFC-7895DW**

1. Load your document.
2. Press \( \text{[Copy]} \).
3. Enter the number of copies.
4. Press \( \text{[Options]} \).
5. Press \( \text{a} \) or \( \text{b} \) to display the \( \text{[Enlarge/Reduce]} \) option, and then press \( \text{[Enlarge/Reduce]} \).
6. Press \( \text{a} \) or \( \text{b} \) to display the available options, and then press the option you want to change.
7. Do one of the following:
   - If you select \( \text{[Enlarge]} \) or \( \text{[Reduce]} \), press the enlargement or reduction ratio you want to use.
   - If you select \( \text{[Custom(25-400%)]} \), press \( \text{[backspace]} \) to erase the displayed percentage, or press \( \text{[backspace]} \) to move the cursor, and then enter an enlargement or reduction ratio from \( \text{[25%]} \) to \( \text{[400%]} \).
Press [OK].

- If you selected [100%] or the [Auto] option, go to the next step.

8. When finished, press [OK]. (If the [OK] button is displayed.)

9. Press [Start].

- [Auto] sets the machine to calculate the reduction ratio that best fits the size of paper.
- [Auto] is only available when using the ADF.

Related Information

- Copy
Make N in 1 Copies Using the Page Layout Feature

The N in 1 copy feature saves paper by copying two or four pages of your document onto one page of the copy.

1. Load your document.
2. Do one of the following:
   - For MFC models
     Press (COPY). Use the dial pad to enter the number of copies you want.
   - For DCP models
     Press ▲ or ▼ to enter the number of copies you want.
3. Press Options or Copy/Scan Options.
4. Press ▲ or ▼ to select [Page Layout], and then press OK.
5. Press ▲ or ▼ to select [Off(1 in 1)], [2 in 1 (P)], [2 in 1 (L)], [4 in 1 (P)] or [4 in 1 (L)], and then press OK.
6. Press Start.
   If you placed the document in the ADF, the machine scans the pages and starts printing.
   If you are using the scanner glass, go to the next step.
7. Repeat the following steps for each page of the layout:
   - For MFC models
     After the machine scans the page, place the next page on the scanner glass, and then press ▲ to scan the page.
   - For DCP models
     After the machine scans the page, place the next page on the scanner glass, and then press ▲ to select the [Yes] option.
8. After scanning all the pages, press ▼ to select the [No] option.
2. Press ![Copy].
3. Enter the number of copies.
4. Press [Options].
5. Press ▲ or ▼ to display the [Page Layout] option, and then press [Page Layout].
6. Press ▲ or ▼ to display the options, and then press the option you want.

5. Press 4 or 5 to select [Sort], and then press **OK**.
6. Press **Start**.
   If you placed the document in the ADF, the machine scans the pages and starts printing.
   **If you are using the scanner glass, go to the next step.**
7. Repeat the following steps for each page:
   • For MFC models
     After the machine scans the page, place the next page on the scanner glass, and then press 4 to scan the next page.
   • For DCP models
     After the machine scans the page, place the next page on the scanner glass, and then press 4 to select the [Yes] option.
8. After scanning all the pages, press 5 to select the [No] option.

DCP-7195DW/MFC-7895DW

1. Load your document.
2. Press \( \) ([Copy]).
3. Enter the number of copies.
4. Press [Options].
5. Press 4 or 5 to display the [Stack/Sort] option, and then press [Stack/Sort].
6. Press [Sort].
7. When finished, press [OK].
8. Press [Start]. If you placed the document in the ADF, the machine scans the pages and starts printing.
   **If you are using the scanner glass, go to the next step.**
9. After the machine scans the page, place the next page on the scanner glass, and then press [Yes] to scan the next page.
Copy an ID Card

• You may copy an identification card only to the extent permitted under applicable laws. For more detailed information, see the Product Safety Guide.

>> DCP-7090DW/DCP-L2535DW/DCP-L2550DW/DCP-7190DW
>> DCP-7195DW/MFC-7895DW

DCP-7090DW/DCP-L2535DW/DCP-L2550DW/DCP-7190DW

1. (For MFC models)
   Press (COPY).

2. Place an identification card face down near the upper left corner of the scanner glass.

   1  4.0 mm or greater (top, left)

3. Press 2 in 1 (ID) Copy.

4. Do one of the following:
   • For MFC models
     Use the dial pad to enter the number of copies you want.
   • For DCP models
     Press ▲ or ▼ to enter the number of copies you want.

   You can change copy settings by pressing Options or Copy/Scan Options.

5. Press Start.
   The machine scans one side of the identification card.
6. After the machine has scanned the first side, turn over the identification card.

7. Press **Start** to scan the other side.

**DCP-7195DW/MFC-7895DW**

1. Place your identification card *face down* near the upper left corner of the scanner glass.

2. Press [Copy] > [2 in 1 ID Copy].

3. Enter the number of copies.

4. Press [Start].

The machine scans one side of the identification card.

5. After the machine has scanned the first side, turn over the identification card and press [Continue] to scan the other side.

**Related Information**

- Copy
Copy on Both Sides of the Paper (2-sided Copy)

Reduce the amount of paper you use by copying onto both sides of the paper.

- You must choose a 2-sided copy layout from the following options before you can start 2-sided copying.
- The layout of your original document determines which 2-sided copy layout you should choose.
- To use the automatic 2-sided copy feature, you must load your document in the ADF.
- When you manually make 2 sided copies from a 2-sided document, use the scanner glass.
- Select A4 sized paper when using the 2-sided copy option.

</table>

To stop faxing, press [X].

**Related Information**

- Send a Fax
You must select a 2-sided scanning format before sending a 2-sided fax. Select either Long Edge or Short Edge, depending on the layout of your document.

1. Load your document.
2. Press \[Fax\] > [Options] > [2-sided Fax].
3. Do one of the following:
   • If your document is flipped on the long edge, press the [2-sided Scan: Long Edge] option.
   • If your document is flipped on the short edge, press the [2-sided Scan: Short Edge] option.
4. Press [OK]
5. Enter the fax number.
6. Press [Fax Start].

Related Information

• Send a Fax
Send a Fax Manually

Manual fax transmission lets you hear the dialling, ringing and fax-receiving tones while sending a fax.

1. Load your document.
2. Press [Fax].
3. Press [Hook] and listen for a dial tone.
4. Dial the fax number you want to call.
5. When you hear the fax tone, press [Fax Start].
   • If you are using the scanner glass, press [Send].

Related Information

- Send a Fax
At the end of a conversation, you can send a fax to the other party before you both hang up.

1. Ask the other party to wait for fax tones (beeps) and then to press the Start button before hanging up.
2. Load your document.
3. Press \[\text{Scan}\].
4. Press [Fax Start].
   - If you are using the scanner glass, press [Send].
5. Replace the handset.

**Related Information**

- Send a Fax
You can change the process of manual fax send or receive.

If you often send or receive a fax manually to/from the other party at the end of a conversation, set the [Fax Mode] to [Easy Mode].

If you set to [Easy Mode]: You can send or receive a fax manually just simply press Start or [Fax Start]. If you are a caller, press Start or [Fax Start] to send a fax. If you are a receiver, press Start or [Fax Start] to receive a fax.

If you set to [Advanced Mode]: No matter you are a caller or receiver, you can select you will send or receive a fax manually. When you press Start or [Fax Start], the machine will ask you: [Send/Receive?]. If you want to send a fax, select [Send]. If you want to receive a fax, select [Receive].

Even if you set either [Easy Mode] or [Advanced Mode] and if there is a document in the ADF, the document in the ADF will be sent by pressing Start or [Fax Start].

1. Press ((Settings)) > [All Settings] > [Fax] > [Miscellaneous] > [Fax Mode].
2. Press [Easy Mode] or [Advanced Mode].
3. Press 🏠.

Related Information

- Send a Fax
Use the Broadcasting feature to send the same fax to multiple fax numbers at the same time.

1. Load your document.
2. Press [(Fax)] > [Options] > [Broadcasting].
3. Press [Add Number].
   You can add numbers to the broadcast in the following ways:
   • Press [Add Number] and enter a fax number using the LCD.
     Press [OK].
   • Press [Add from Address book] to select numbers, and then press [OK].
   • Press [Search in Address book] to search for a number.
     Enter a name using the LCD, and then press [OK].
     Select a name and a number you want to add.
4. When finished, press [OK].
5. Press [Fax Start].
6. Do one of the following:
   • If you are using the ADF, the machine scans and sends the document.
   • If you are using the scanner glass, the machine scans the first page.
     When the LCD displays [Next page?], press an option shown in the table.

<table>
<thead>
<tr>
<th>Option</th>

1. Press [Settings] > [All Settings] > [Fax] > [Setup Receive] > [Receive Mode].
2. Press [Fax Auto], [Fax Manual], or [PC Fax Receive].
3. Press .

Related Information

- Receive Mode Settings
Turn on the PC-Fax Receive feature, automatically store incoming faxes to your machine's memory, and then send them to your computer. Use your computer to view and store these faxes.

To transfer the received faxes to your computer you must have the PC-FAX Receiving software running on your computer.

Even if you have turned off your computer (at night or on the weekend, for example), your machine will receive and store your faxes in its memory.

When you start your computer and the PC-FAX Receiving software runs, your machine transfers your faxes to your computer automatically.

If you selected [Backup Print: On], the machine will also print the fax.

1. Press [Settings] > [All Settings] > [Fax] > [Setup Receive] > [PC Fax Receive].
2. Press [On].

- PC-Fax Receive is not available for the Mac operating systems.
- If you get an error message and the machine cannot print the faxes in the memory, you can use this setting to transfer your faxes to your computer.

3. Press [OK].
4. Press [<USB>] or the name of the computer you want to receive faxes if you are on a network, and then press [OK].
6. Press [Home].

Related Information
- Receive Mode Settings
Set the Number of Rings Before the Machine Answers (Ring Delay)

When somebody calls your machine, you will hear the normal telephone ring sound. The number of rings is set in the Ring Delay option.

- The Ring Delay setting sets the number of times the machine rings before it answers in the Fax Auto Mode.
- If you have external or extension telephones on the same line as the machine, choose the maximum number of rings.

1. Press ![Settings] > [All Settings] > [Fax] > [Setup Receive] > [Ring Delay].
2. Press the number of rings you want the line to ring before the machine answers.
   - If you select [0], the machine will answer immediately and the line will not ring at all (available only for some countries).
3. Press ![Home].

8. Press .

Related Information

• Set up Groups for Broadcasting
Sometimes you may want to choose from several long-distance carriers when you send a fax. Rates may vary depending on the time and destination.

You can store these long dialling sequences by dividing them and setting them up as separate Address Book numbers in any combination. You can even include manual dialling using the dial pad.

For example: You might have stored '01632' and '960555' in your machine as shown in the following table.

<table>
<thead>
<tr>
<th>Applicable Models</th>
<th>'01632' stored in</th>
<th>'960555' stored in</th>
</tr>
</thead>
<tbody>
<tr>
<td>MFC-7895DW</td>
<td>Quick Dial: 003</td>
<td>Quick Dial: 002</td>
</tr>
<tr>
<td></td>
<td>Address Book: Brother 1</td>
<td>Address Book: Brother 2</td>
</tr>
</tbody>
</table>

You can use them both to dial '01632-960555' by using the following procedure.

1. Press [(Fax)] > [Address Book].
2. Press ▲ or ▼ to display the number of Brother 1.
3. Press the number.
4. Press [Apply].
5. Press [Options].
6. Press ▲ or ▼ to display the [Address Book] option, and then press it.
7. Press ▲ or ▼ to display the number of Brother 2.
8. Press the number.
9. Press [Apply].
10. Press [Fax Start].

The machine will dial '01632-960555'.

To temporarily change a number, you can substitute part of the number by pressing it using the LCD. For example, to change the number to '01632-960556', you could enter the number (Brother 1: 01632) using Address Book, press [Apply], and then press 960556 using the LCD.

If you must wait for another dial tone or signal at any point in the dialling sequence, create a pause in the number by pressing [Pause].

Telephone Services and External Devices

- Caller ID
- External and Extension Telephones
- Multi-line Connections (PABX)
The caller ID feature of this machine lets you use the caller ID subscriber service offered by certain telephone companies. The Caller ID is a telephone service that allows the subscriber to see a display of the caller's phone number as the telephone rings. It is a fast way to screen your calls. You can respond quickly to calls you missed, because caller IDs are received and stored in your fax machine memory. Besides the standard Caller ID feature, you can also select a single caller's phone number and call back.

- This feature is not available in certain area.
- To get the Caller ID service, you have to apply for it at your local telephone company.
- FSK and DTMF are the two modes for displaying your calls. Please ask your local telephone company for whether your mode is FSK or DTMF. If your local telephone company uses DTMF mode, please switch your mode.
- Contact your local telephone company or Brother dealer in the case that the feature does not work normally. Caller ID feature is not available in the following situation:
  - You have not applied for it at your local telephone company.
  - The fax machine is connected to an internal switchboard or other switch device.
  - Due to the switchboard problems or line problems of local telephone companies, the feature may not work in some areas.

Advantages of Caller ID

For Business
All businesses profit from a quicker response to customer calls.

At Home
Residential customers can protect themselves from unwanted calls.

Caller ID feature
The Caller ID feature of this machine lets you use the Caller ID subscriber service offered by many local phone companies.

You can view the list or select one of these numbers to add to Address Book (the Speed Dial or One Touch Dial in some models), or delete from the history.

After a few rings, the screen displays the telephone number of your caller (or name, if available). Once you answer the call, the Caller ID information disappears from the screen, but the call information remains stored in the Caller ID memory.

- The [ID Unknown] message means the call originated outside your Caller ID service area.
- The [ID Withheld] message means the caller has intentionally blocked transmission of Caller ID information.

You can print a list of the Caller ID information received by your machine.

- You can print a list of Caller ID information received by your machine.
- Caller ID service varies with different carriers. Call your local phone company to determine the kind of service available in your area.

Operation from Extension Telephones

Related Models: MFC-7895DW

If you answer a fax call at an extension telephone, you can make your machine take the call by using the Remote Activation Code. When you press the Remote Activation Code *51, the machine starts to receive the fax.

If the machine answers a voice call and pseudo/double-rings for you to take over, you can take the call at an extension telephone by pressing the Remote Deactivation Code #51.

If you answer a call and no one is on the line:

You should assume that you're receiving a manual fax.

Press *51 and wait for the chirp or until the LCD displays [Receiving], and then hang up.

Related Information

- External and Extension Telephones
Use the Remote Codes

Remote Activation Code

If you answer a fax call on an extension telephone, you can tell your machine to receive it by pressing the Remote Activation Code *51. Wait for the chirping sounds then replace the handset.

Related Information

- External and Extension Telephones
- Change the Remote Codes
The preset Remote Activation Code is \*51. The preset Remote Deactivation Code is \#51. If you are always disconnected when accessing your external answering phone device remotely, try changing the three-digit remote codes using the numbers 0-9, *, #.

1. Press [Settings] > [All Settings] > [Fax] > [Setup Receive] > [Remote Codes].

2. Do one of the following:
   - To change the Remote Activation Code, press [Act.Code]. Enter the new code, and then press [OK].
   - To change the Remote Deactivation Code, press [Deact.Code]. Enter the new code, and then press [OK].
   - If you do not want to change the Codes, go to the next step.
   - To turn off (or turn on) the Remote Codes, press [Remote Codes], and then press [Off] (or [On]).

3. Press 🔍.
Most offices use a central telephone system. Brother recommends that all our machines be connected to a discreet (dedicated) line. Although a particular PABX may appear to work with a particular model of fax machine, we cannot guarantee that the unit will operate correctly.

While it is often relatively simple to connect a fax machine to a PABX, (Private Automatic Branch Exchange), we suggest that you contact the company that installed your telephone system and ask them to connect the fax machine for you.

Brother does not recommend the use of a PABX line. PABX limitations in general can cause some functions of the fax machine not to work correctly.
Fax Reports

The Transmission Verification Report and the Fax Journal are available to confirm the results of fax transmission.

- Print a Fax Journal
You can set the machine to print a journal at specific intervals.

1. Press \[Settings\] > [All Settings] > [Fax] > [Report Setting] > [Journal Period] > [Journal Period].

2. Press [Every 50 Faxes] or [Off].

[Every 50 Faxes]: The machine will print the Journal when the machine has stored 50 reception and transmission log data.

3. Press \.

- Import Information to your PC-FAX Address Book (Windows)
Add a Member to your PC-FAX Address Book (Windows)

Add new people and their fax information to the PC-Fax Address Book if you want to send a fax using Brother PC-Fax software.

1. Do one of the following:
   - Windows 7
     
     Click (Start) > All Programs > Brother > Brother Utilities.
     
     Click the drop-down list and select your model name (if not already selected). Click PC-FAX in the left navigation bar, and then click Address Book (Send).
   
     - Windows 8 and Windows 10
     
     Launch (Brother Utilities), and then click the drop-down list and select your model name (if not already selected). Click PC-FAX in the left navigation bar, and then click Address Book (Send).

   The Address Book dialog box appears.

2. Click .

   The Address Book Member Setup dialog box appears.
3. Type the member's information in the corresponding fields. Only the Name field is required.
4. Click OK.

**Related Information**

- Configure your PC-Fax Address Book (Windows)
Create a Group in your PC-FAX Address Book (Windows)

Create a group to broadcast the same PC-FAX to several recipients at one time.

1. Do one of the following:
   - Windows 7
     Click (Start) > All Programs > Brother > Brother Utilities.
     Click the drop-down list and select your model name (if not already selected). Click PC-FAX in the left navigation bar, and then click Address Book (Send).
   - Windows 8 and Windows 10
     Launch (Brother Utilities), and then click the drop-down list and select your model name (if not already selected). Click PC-FAX in the left navigation bar, and then click Address Book (Send).

The Address Book dialog box appears.

2. Click .

The Address Book Group Setup dialog box appears.
3. Type the name of the new group in the Group Name field.

4. In the Available Names field, select each name you want to include in the group, and then click Add >>. Members added to the group appear in the Group Members box.

5. When finished, click OK.

Each group can contain up to 50 members.

Related Information

- Configure your PC-Fax Address Book (Windows)
You can export the Address Book as an ASCII text file (*.csv), a vCard (an electronic business card), or Remote Setup Dial Data and save it on your computer.

- You cannot export the group settings when you export the Address Book data.

1. Do one of the following:
   - Windows 7
     Click (Start) > All Programs > Brother > Brother Utilities.
     Click the drop-down list and select your model name (if not already selected). Click PC-FAX in the left navigation bar, and then click Address Book (Send).
   - Windows 8 and Windows 10
     Launch (Brother Utilities), and then click the drop-down list and select your model name (if not already selected). Click PC-FAX in the left navigation bar, and then click Address Book (Send).

   The Address Book dialog box appears.

2. Click the File menu, and then select Export.

3. Select one of the following:
   - Text
     The Select Items dialog box appears. Go to step 4.
   - vCard
     You must select the member you want to export from your address book before selecting this option. Browse to the folder where you want to save the vCard, type the vCard name in the File name field, and then click Save.
   - Remote Setup Dial Data
     Browse to the folder where you want to save the data, type the file name in the File name field, and then click Save.
4. In the **Available Items** field, select the data you want to export, and then click **Add >>**.

   ![Select Items](image)

   Select and add the items in the order you want them listed.

5. If you are exporting to an ASCII file, under the **Divide Character** section, select the **Tab** or **Comma** option to separate the data fields.

6. Click **OK**.

7. Browse to the folder on your computer where you want to save the data, type the file name, and then click **Save**.

You can import ASCII text files (*.csv), vCards (electronic business cards), or Remote Setup Dial Data into your Address Book.

1. Do one of the following:
   - Windows 7
     Click (Start) > All Programs > Brother > Brother Utilities.
     Click the drop-down list and select your model name (if not already selected). Click PC-FAX in the left navigation bar, and then click Address Book (Send).
   - Windows 8 and Windows 10
     Launch (Brother Utilities), and then click the drop-down list and select your model name (if not already selected). Click PC-FAX in the left navigation bar, and then click Address Book (Send).

   The Address Book dialog box appears.

2. Click the File menu, and then select Import.

3. Select one of the following:
   - Text
     The Select Items dialog box appears. Go to step 4.
   - vCard
     Go to step 7.
   - Remote Setup Dial Data
     Go to step 7.

4. In the Available Items field, select the data you want to import, and then click Add >>.
You must select and add fields from the **Available Items** list in the same order they are listed in the import text file.

5. If you are importing an ASCII file, under the **Divide Character** section, select the **Tab** or **Comma** option to separate the data fields.

6. Click **OK**.

7. Browse to the folder where you want to import the data, type the file name, and then click **Open**.

**Related Information**

- Configure your PC-Fax Address Book (Windows)
PC-FAX supports only monochrome faxes. A monochrome fax will be sent even if the original data is colour and the receiving fax machine supports colour faxes.

1. Create a file in any application on your computer.
2. Select the print command in your application.
3. Select Brother PC-FAX as your printer, and then complete your print operation. The BrotherPC-FAX dialog box appears.

4. Type a fax number using one of the following methods:
   - Click the numbers on the dial pad to type the number, and then click Add Send Address.
   - If you select the Dial Restriction check box, a confirmation dialog box will appear for you to re-type the fax number using the keyboard. This feature helps to prevent transmissions to the wrong destination.
     - Click the Address Book button, and then select a member or group from the Address Book.
     - If you make a mistake, click All Clear to delete all entries.

5. To include a cover page, select the Add Cover Page check box. You can also click to create or edit a cover page.
6. Click Start to send the fax.
   - To cancel the fax, click Cancel.
   - To redial a number, click Redial to show the last five fax numbers, select a number, and then click Start.

Related Information
- PC-FAX for Windows
Use Brother’s PC-FAX software to receive faxes on your computer, screen them and print only those faxes you want.

- Receive Faxes Using PC-FAX Receive (Windows)
Brother's PC-FAX Receive software lets you view and store faxes on your computer. It is automatically installed when you install the Brother software and drivers and works on locally- or network-connected machines.

- PC-FAX Receive supports only monochrome faxes.

When you turn off your computer, your machine will continue to receive and store faxes in your Brother machine's memory. The machine's LCD will display the number of stored faxes received. When you start this application, the software will transfer all received faxes to your computer at once. You can enable the Backup Print option if you want the machine to print a copy of the fax before the fax is sent to your computer, or before the computer is switched off. You can configure the Backup Print settings from your Brother machine.

Learn about Network Management Software and Utilities

Web Based Management

Web Based Management is a utility that uses a standard web browser to manage your machine using the Hyper Text Transfer Protocol (HTTP) or Hyper Text Transfer Protocol over Secure Socket Layer (HTTPS). Type your machine’s IP address into your web browser to access and change your print server settings.

BRAdmin Light (Windows)

BRAdmin Light is a utility for the initial setup of Brother network-connected devices. This utility can search for Brother products on your network, view the status and configure the basic network settings, such as IP address. Go to your model’s Downloads page on the Brother Solutions Center at support.brother.com to download BRAdmin Light.

• If using Windows Firewall, or the firewall function of an anti-spyware or antivirus application, temporarily disable them. When you are sure you can print, configure the software settings following the instructions.

BRAdmin Professional (Windows)

BRAdmin Professional is a utility for more advanced management of network-connected Brother devices. This utility can search for Brother products on your network and view the device status from an easy-to-read Windows Explorer-style screen that changes colour to identify the status of each device. You can configure network and device settings, and update device firmware from a Windows computer on your LAN. BRAdmin Professional can also log activity of Brother devices on your network and export the log data. For users who want to monitor locally-connected machines, install the Print Auditor Client software on the client computer. This utility allows you to use BRAdmin Professional to monitor machines that are connected to a client computer via the USB interface.

• Go to your model’s Downloads page on the Brother Solutions Center at support.brother.com to download the latest version of Brother’s BRAdmin Professional utility.

• Node name: The node name appears in the current BRAdmin Professional window. The default node name is "BRNxxxxxxxxxxxxx" for a wired network or "BRWxxxxxxxxxxxxx" for a wireless network (where "xxxxxxxxxxxxx" is your machine’s MAC Address / Ethernet address).

• If using Windows Firewall, or the firewall function of an anti-spyware or antivirus application, temporarily disable them. When you are sure you can print, configure the software settings following the instructions.

Remote Setup (Windows and Mac)

Remote Setup is a program for configuring many machine and network settings from either a Windows or a Mac application. When you start this application, the settings on your machine are automatically downloaded to your computer and displayed on your computer screen. If you change the settings, you can upload them directly to the machine.

(Windows)

This utility can be used with either a USB or a network connection.

(Mac)

• Go to your model’s Downloads page on the Brother Solutions Center at support.brother.com to download the Remote Setup.

• This utility can be used with a USB connection.

- **Configure Your Machine for a Wireless Network When the SSID Is Not Broadcast**
- **Use Wi-Fi Direct®**
Before Configuring Your Brother Machine for a Wireless Network

Before attempting to configure a wireless network, confirm the following:

• To achieve optimum results with normal everyday document printing, place the Brother machine as close to the wireless LAN access point/router as possible with minimal obstructions. Large objects and walls between the two devices and interference from other electronic devices can affect the data transfer speed of your documents. Due to these factors, wireless may not be the best method of connection for all types of documents and applications. If you are printing large files, such as multi-page documents with mixed text and large graphics, you may want to consider selecting wired Ethernet for faster data transfer (supported models only), or USB for the fastest throughput speed.

• Although the Brother machine can be used in both a wired and wireless network (supported models only), only one connection method can be used at a time. However, a wireless network connection and Wi-Fi Direct connection, or a wired network connection (supported models only) and Wi-Fi Direct connection can be used at the same time.

If you do not know the security information, please consult the router manufacturer, your system administrator, or your Internet provider.

Related Information

• Additional Methods of Configuring Your Brother Machine for a Wireless Network
Configure Your Machine for a Wireless Network

1. Turn on your computer and insert the Brother installation disc into your computer.
   • For Windows, follow these instructions:
   • For Mac, click Driver Download to go to the Brother Solutions Center. Follow the on-screen instructions to install printer drivers.
2. The opening screen appears automatically.
   Choose your language, and then follow the on-screen instructions.
   If the Brother screen does not appear, do the following:
   • (Windows 7)
     Go to Computer. Double-click the CD/DVD icon, and then double-click start.exe.
   • (Windows 8 and Windows 10)
     Click the (File Explorer) icon on the taskbar, and then go to Computer (This PC). Double-click the CD/DVD icon, and then double-click start.exe.
     • If the User Account Control screen appears, click Yes.
3. Choose Wireless Network Connection (Wi-Fi), and then click Next.
4. Follow the on-screen instructions.

You have completed the wireless network setup. To install Full Driver & Software Package necessary for operating your device, insert the Brother installation disc into your computer or go to your model's Downloads page on the Brother Solutions Center at support.brother.com.

• Additional Methods of Configuring Your Brother Machine for a Wireless Network
Configure Your Machine for a Wireless Network Using the One Push Method of Wi-Fi Protected Setup™ (WPS)

If your wireless access point/router supports WPS (PBC: Push Button Configuration), you can use WPS from your machine’s control panel menu to configure your wireless network settings.

Routers or access points that support WPS are marked with this symbol:

>> DCP-7090DW/DCP-L2535DW/DCP-L2550DW/DCP-7190DW
>> DCP-7195DW/MFC-7895DW

DCP-7090DW/DCP-L2535DW/DCP-L2550DW/DCP-7190DW

1. Press Menu.
2. Press ▲ or ▼ to select the [Network] option, and then press OK.
3. Press ▲ or ▼ to select the [WLAN] option, and then press OK.
4. Press ▲ or ▼ to select the [WPS] option, and then press OK.
5. When [WLAN Enable?] appears, enable the wireless network.
   This will start the wireless setup wizard.
6. When the LCD displays [Press Key on rtr], press the WPS button on your wireless access point/router. Then press OK on your machine. Your machine will automatically detect your wireless access point/router and try to connect to your wireless network.

If your wireless device is connected successfully, the machine’s LCD displays [Connected].

You have completed the wireless network setup. To install Full Driver & Software Package necessary for operating your device, insert the Brother installation disc into your computer or go to your model's Downloads page on the Brother Solutions Center at support.brother.com.

DCP-7195DW/MFC-7895DW

1. Press [Settings] > [All Settings] > [Network] > [WLAN] > [WPS].
2. When [Switch Network interface to wireless?] appears, press [Yes].
   This will start the wireless setup wizard. To cancel, press [No].
3. When the touchscreen displays [Start WPS on your wireless access point/router, then press [OK].], press the WPS button on your wireless access point/router. Then press [OK] on your machine. Your machine will automatically detect your wireless access point/router and try to connect to your wireless network.

If your wireless device is connected successfully, the machine’s LCD displays [Connected].
You have completed the wireless network setup. To install **Full Driver & Software Package** necessary for operating your device, insert the Brother installation disc into your computer or go to your model's **Downloads** page on the Brother Solutions Center at support.brother.com.

Configure Your Machine for a Wireless Network Using the PIN Method of Wi-Fi Protected Setup™ (WPS)

If your wireless LAN access point/router supports WPS, you can use the Personal Identification Number (PIN) Method to configure your wireless network settings.

The PIN Method is one of the connection methods developed by the Wi-Fi Alliance®. By submitting a PIN created by an Enrollee (your machine) to the Registrar (a device that manages the wireless LAN), you can set up the wireless network and security settings. For more information on how to access WPS mode, see the instructions provided with your wireless access point/router.

**Type A**

Connection when the wireless LAN access point/router (1) doubles as the Registrar:

**Type B**

Connection when another device (2), such as a computer, is used as the Registrar:
Routers or access points that support WPS are marked with this symbol:

DCP-7090DW/DCP-L2535DW/DCP-L2550DW/DCP-7190DW
DCP-7195DW/MFC-7895DW

DCP-7090DW/DCP-L2535DW/DCP-L2550DW/DCP-7190DW

1. Press Menu.
2. Press ▲ or ▼ to select the [Network] option, and then press OK.
3. Press ▲ or ▼ to select the [WLAN] option, and then press OK.
4. Press ▲ or ▼ to select the [WPS w/PIN Code] option, and then press OK.
5. When [WLAN Enable?] appears, enable the wireless network.

   This will start the wireless setup wizard.

6. The LCD displays an eight-digit PIN and the machine starts searching for a wireless LAN access point/router.
7. Using a computer connected to the network, in your browser's address bar, type the IP address of the device you are using as the Registrar. (For example: http://192.168.1.2)
8. Go to the WPS settings page and type the PIN, and then follow the on-screen instructions.

   • The Registrar is usually the wireless LAN access point/router.
   • The settings page will differ depending on the brand of wireless LAN access point/router. For more information, see the instructions supplied with your wireless LAN access point/router.

If you are using a Windows 7, Windows 8, or Windows 10 computer as a Registrar, complete the following steps:
9. Do one of the following:
   • Windows 7
Click (Start) > Devices and Printers > Add a device.

- Windows 8
  Move your mouse to the lower right corner of your desktop. When the menu bar appears, click Settings > Control Panel > Hardware and Sound > View devices and printers > Add a device.

- Windows 10
  Click > Windows System > Control Panel. In the Hardware and Sound group, click Add a device.

- To use a Windows 7, Windows 8, or Windows 10 computer as a Registrar, you must register it to your network in advance. For more information, see the instructions supplied with your wireless LAN access point/router.
- If you use Windows 7, Windows 8, or Windows 10 as a Registrar, you can install the printer driver after the wireless configuration by following the on-screen instructions. To install the full driver and software package, use the Brother installation disc.

10. Select your machine and click Next.
11. Type the PIN displayed on the machine’s LCD, and then click Next.
12. (Windows 7) Select your network, and then click Next.
13. Click Close.

If your wireless device is connected successfully, the machine’s LCD displays [Connected].

You have completed the wireless network setup. To install Full Driver & Software Package necessary for operating your device, insert the Brother installation disc into your computer or go to your model’s Downloads page on the Brother Solutions Center at support.brother.com.

DCP-7195DW/MFC-7895DW

1. Press [Settings] > [All Settings] > [Network] > [WLAN] > [WPS w/ PIN Code].
2. When [Switch Network interface to wireless?] appears, press [Yes].
   This will start the wireless setup wizard. To cancel, press [No].
3. The LCD displays an eight-digit PIN and the machine starts searching for a wireless LAN access point/router.
4. Using a computer connected to the network, in your browser’s address bar, type the IP address of the device you are using as the Registrar. (For example: http://192.168.1.2)
5. Go to the WPS settings page and type the PIN, and then follow the on-screen instructions.

- The Registrar is usually the wireless LAN access point/router.
- The settings page will differ depending on the brand of wireless LAN access point/router. For more information, see the instructions supplied with your wireless LAN access point/router.

If you are using a Windows 7, Windows 8, or Windows 10 computer as a Registrar, complete the following steps:

6. Do one of the following:
   - (Windows 7)
     Click (Start) > Devices and Printers > Add a device.
   - (Windows 8)
     Move your mouse to the lower right corner of your desktop. When the menu bar appears, click Settings > Control Panel > Hardware and Sound > View devices and printers > Add a device.
To use a Windows 7, or Windows 8 computer as a Registrar, you must register it to your network in advance. For more information, see the instructions supplied with your wireless LAN access point/router.

If you use Windows 7 or Windows 8 as a Registrar, you can install the printer driver after the wireless configuration by following the on-screen instructions. To install the full driver and software package, use the Brother installer on the Installer CD-ROM.

7. Select your machine and click Next.
8. Type the PIN displayed on the machine's LCD, and then click Next.
9. (Windows 7) Select your network, and then click Next.
10. Click Close.

If your wireless device is connected successfully, the machine's LCD displays [Connected].

You have completed the wireless network setup. To install Full Driver & Software Package necessary for operating your device, insert the Brother installation disc into your computer or go to your model's Downloads page on the Brother Solutions Center at support.brother.com.

Configure Your Machine for a Wireless Network Using the Machine's Control Panel Setup Wizard

DCP-7090DW/DCP-L2535DW/DCP-L2550DW/DCP-7190DW

Before configuring your machine, we recommend writing down your wireless network settings. You will need this information before you continue with the configuration.

1. Check and record the current wireless network settings of the computer to which you are connecting.

<table>
<thead>
<tr>
<th>Network Name (SSID)</th>
</tr>
</thead>
<tbody>
<tr>
<td>HELLO</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Network Key</th>
</tr>
</thead>
<tbody>
<tr>
<td>12345</td>
</tr>
</tbody>
</table>

For example:

How can I find this information?
- Check the documentation provided with your wireless access point/router.
- The initial SSID could be the manufacturer’s name or the model name.
- If you do not know the security information, please consult the router manufacturer, your system administrator, or your Internet provider.

2. Press Menu.
3. Press ▲ or ▼ to select the [Network] option, and then press OK.
4. Press ▲ or ▼ to select the [WLAN] option, and then press OK.
5. Press ▲ or ▼ to select the [Setup Wizard] option, and then press OK.
6. When [WLAN Enable?] appears, enable the wireless network.
   This will start the wireless setup wizard.
7. The machine will search for your network and display a list of available SSIDs. When a list of SSIDs appears, press ▲ or ▼ to select the SSID you want.
8. Press OK.
9. Do one of the following:
   - If you are using an authentication and encryption method that requires a Network Key, enter the Network Key you wrote down in the first step.
Enter the WEP key, and then press OK to apply your settings. To apply the settings, select [Yes]. To cancel, select [No].

- If your authentication method is Open System and your encryption mode is None, go to the next step.
- If your WLAN access point/router supports WPS, [WPS is available] appears. To connect your machine using the automatic wireless mode, press ▲. (If you choose [No], enter the Network Key you wrote down in the first step.) When [Press WPS on rtr] appears, press the WPS button on your WLAN access point/router, and then press ▲ twice.

10. The machine attempts to connect to the wireless device you have selected.

If your wireless device is connected successfully, the machine’s LCD displays [Connected].

You have completed the wireless network setup. To install Full Driver & Software Package necessary for operating your device, insert the Brother installation disc into your computer or go to your model’s Downloads page on the Brother Solutions Center at support.brother.com.

**DCP-7195DW/MFC-7895DW**

Before configuring your machine, we recommend writing down your wireless network settings. You will need this information before you continue with the configuration.

1. Check and record the current wireless network settings of the computer to which you are connecting.

<table>
<thead>
<tr>
<th>Network Name (SSID)</th>
</tr>
</thead>
<tbody>
<tr>
<td>HELLO</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Network Key</th>
</tr>
</thead>
<tbody>
<tr>
<td>12345</td>
</tr>
</tbody>
</table>

For example:

**Network Name (SSID)**

HELLO

**Network Key**

12345

- Your access point/router may support the use of multiple WEP keys, however your Brother machine supports the use of the first WEP key only.
- If you need assistance during setup and want to contact Brother customer service, make sure you have your SSID (Network Name) and Network Key ready. We cannot assist you in locating this information.
- If you do not know this information (SSID and Network Key), you cannot continue the wireless setup.

**How can I find this information?**

- Check the documentation provided with your wireless access point/router.
- The initial SSID could be the manufacturer's name or the model name.
- If you do not know the security information, please consult the router manufacturer, your system administrator, or your Internet provider.

2. Press [Settings] > [All Settings] > [Network] > [WLAN] > [Setup Wizard].

3. When [Switch Network interface to wireless?] appears, press [Yes]. This will start the wireless setup wizard. To cancel, press [No].

4. The machine will search for your network and display a list of available SSIDs. If a list of SSIDs is displayed, press ▲ or ▼ to display the SSID to which you want to connect, and then press the SSID.
5. Press [OK].

6. Do one of the following:
   - If you are using an authentication and encryption method that requires a Network Key, enter the Network Key you wrote down in the first step.
     When you have entered all the characters, press [OK].
   - If your authentication method is Open System and your encryption mode is None, go to the next step.
   - If your WLAN access point/router supports WPS, [The selected access point/router supports WPS. Use WPS?] appears. To connect your machine using the automatic wireless mode, press [Yes]. (If you choose [No], enter the Network Key you wrote down in the first step.) When [Start WPS on your wireless access point/router, then press [Next].] appears, press the WPS button on your WLAN access point/router, and then press [Next].

7. The machine attempts to connect to the wireless device you have selected.

If your wireless device is connected successfully, the machine's LCD displays [Connected].

You have completed the wireless network setup. To install Full Driver & Software Package necessary for operating your device, insert the Brother installation disc into your computer or go to your model's Downloads page on the Brother Solutions Center at support.brother.com.

<td>AES</td>
<td>12345678</td>
</tr>
</tbody>
</table>

If your router uses WEP encryption, enter the key used as the first WEP key. Your Brother machine supports the use of the first WEP key only.

2. Press **Menu**.
3. Press ▲ or ▼ to select the **[Network]** option, and then press **OK**.
4. Press ▲ or ▼ to select the **[WLAN]** option, and then press **OK**.
5. Press ▲ or ▼ to select the **[Setup Wizard]** option, and then press **OK**.
6. When **[WLAN Enable?]** appears, enable the wireless network.

This will start the wireless setup wizard.

7. The machine will search for your network and display a list of available SSIDs. Press ▲ or ▼ to select the **[<New SSID>]** option, and then press **OK**.
8. Enter the SSID name, and then press **OK**.
9. Press ▲ or ▼ to select the **[Infrastructure]** option, and then press **OK**.
10. Press ▲ or ▼ to select the Authentication Method you want, and then press **OK**.
11. Do one of the following:
   - If you selected the **[Open System]** option, press ▲ or ▼ to select the Encryption Type **[None]** or **[WEP]**, and then press **OK**.
   - If you selected the **[WEP]** option for Encryption Type, enter the WEP key, and then press **OK**.
• If you selected the [Shared Key] option, enter the WEP key, and then press OK.
• If you selected the [WPA/WPA2-PSK] option, press ▲ or ▼ to select the Encryption Type [TKIP + AES] or [AES], and then press OK.

Enter the WPA™ key, and then press OK.

Your Brother machine supports the use of the first WEP key only.

12. To apply the settings, select [Yes]. To cancel, select [No].
13. The machine attempts to connect to the wireless device you have selected.

If your wireless device is connected successfully, the machine's LCD displays [Connected].

You have completed the wireless network setup. To install Full Driver & Software Package necessary for operating your device, insert the Brother installation disc into your computer or go to your model's Downloads page on the Brother Solutions Center at support.brother.com.

DCP-7195DW/MFC-7895DW

Before configuring your machine, we recommend writing down your wireless network settings. You will need this information before you continue with the configuration.

1. Check and write down the current wireless network settings.

<table>

Use Wi-Fi Direct®

• Print or Scan from Your Mobile Device Using Wi-Fi Direct

• Configure Your Wi-Fi Direct Network

• I Cannot Complete the Wireless Network Setup Configuration
Wi-Fi Direct is one of the wireless configuration methods developed by the Wi-Fi Alliance®. It allows you to configure a secured wireless network between your Brother machine and a mobile device, such as an Android™ device, Windows device, iPhone, iPod touch, or iPad, without using an access point. Wi-Fi Direct supports wireless network configuration using the one-push or PIN Method of Wi-Fi Protected Setup™ (WPS). You can also configure a wireless network by manually setting an SSID and password. Your Brother machine's Wi-Fi Direct feature supports WPA2™ security with AES encryption.

1. Mobile device
2. Your Brother machine

- Although the Brother machine can be used in both a wired and wireless network, only one connection method can be used at a time. However, a wireless network connection and Wi-Fi Direct connection, or a wired network connection (supported models only) and Wi-Fi Direct connection can be used at the same time.
- The Wi-Fi Direct-supported device can become a Group Owner (G/O). When configuring the Wi-Fi Direct network, the G/O serves as an access point.

Wi-Fi Direct Network Configuration Overview

The following instructions offer five methods for configuring your Brother machine in a wireless network environment. Select the method you prefer for your environment:

Check your mobile device for configuration.

1. Does your mobile device support Wi-Fi Direct?

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Yes</td>
<td>Go to Step 2</td>
</tr>
<tr>
<td>No</td>
<td>Go to Step 3</td>
</tr>
</tbody>
</table>

2. Does your mobile device support one-push configuration for Wi-Fi Direct?

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Yes</td>
<td>See Related Information: Configure Your Wi-Fi Direct Network Using the One-Push Method.</td>
</tr>
<tr>
<td>No</td>
<td>See Related Information: Configure Your Wi-Fi Direct Network Using the PIN Method.</td>
</tr>
</tbody>
</table>

3. Does your mobile device support Wi-Fi Protected Setup™ (WPS)?

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Yes</td>
<td>Go to Step 4</td>
</tr>
<tr>
<td>No</td>
<td>See Related Information: Configure Your Wi-Fi Direct Network Manually.</td>
</tr>
</tbody>
</table>

4. Does your mobile device support one-push configuration for Wi-Fi Protected Setup™ (WPS)?

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Yes</td>
<td>See Related Information: Configure Your Wi-Fi Direct Network Using the One-Push Method of Wi-Fi Protected Setup™ (WPS).</td>
</tr>
<tr>
<td>No</td>
<td>See Related Information: Configure Your Wi-Fi Direct Network Using the PIN Method of Wi-Fi Protected Setup™ (WPS).</td>
</tr>
</tbody>
</table>

To use Brother iPrint&Scan functionality in a Wi-Fi Direct network configured by one-push configuration using Wi-Fi Direct or by PIN Method configuration using Wi-Fi Direct, the device you use to configure Wi-Fi Direct must be running Android™ 4.0 or greater.

DCP-7090DW/DCP-L2535DW/DCP-L2550DW/DCP-7190DW

If your mobile device supports Wi-Fi Direct, follow these steps to configure a Wi-Fi Direct network:

1. Press **Menu**.
2. Press **a** or **b** to select the **[Network]** option, and then press **OK**.
3. Press **a** or **b** to select the **[Wi-Fi Direct]** option, and then press **OK**.
4. Press **a** or **b** to select the **[Push Button]** option, and then press **OK**.
5. When **[Wi-Fi Direct On?]** appears, enable the Wi-Fi Direct network.
6. Activate Wi-Fi Direct on your mobile device (see your mobile device's user's guide for instructions) when **[Activate Wi-Fi Direct on other device and press OK.]** appears on the machine's LCD. Press **OK** on your machine.

   This will start the Wi-Fi Direct setup. To cancel, press **Clear**.

7. Do one of the following:
   - When your Brother machine is the Group Owner (G/O), connect your mobile device to the machine directly.
   - When your Brother machine is not the G/O, it will display available device names with which to configure a Wi-Fi Direct network. Press **a** or **b** to select the mobile device you want to connect to and press **OK**. Search for available devices again by pressing [Rescan].

8. If your mobile device connects successfully, the machine's LCD displays **[Connected]**. You have completed the Wi-Fi Direct network setup. The Mobile Print/Scan Guide for Brother iPrint&Scan contains information on printing from or scanning to your mobile device. Go to your model's **Manuals** page on the Brother Solutions Center at support.brother.com to see the guide.

DCP-7195DW/MFC-7895DW

If your mobile device supports Wi-Fi Direct, follow these steps to configure a Wi-Fi Direct network:

When the machine receives the Wi-Fi Direct request from your mobile device, the message **[Wi-Fi Direct connection request received. Press [OK] to connect.]** will appear on the LCD. Press **[OK]** to connect.

1. Press **[Settings]** > **[All Settings]** > **[Network]** > **[Wi-Fi Direct]** > **[Push Button]**.
2. Activate Wi-Fi Direct on your mobile device (see your mobile device's user's guide for instructions) when **[Activate Wi-Fi Direct on other device. Then Press [OK].]** appears on the machine's LCD. Press **[OK]** on your machine.

   This will start the Wi-Fi Direct setup. To cancel, press **X**.

3. Do one of the following:
   - When your Brother machine is the Group Owner (G/O), connect your mobile device to the machine directly.
   - When your Brother machine is not the G/O, it displays available device names with which to configure a Wi-Fi Direct network. Select the mobile device you want to connect to. Search for available devices again by pressing [Rescan].

4. If your mobile device connects successfully, the machine's LCD displays **[Connected]**. You have completed the Wi-Fi Direct network setup. The Mobile Print/Scan Guide for Brother iPrint&Scan contains information on printing from or scanning to your mobile device.
printing from or scanning to your mobile device. Go to your model's Manuals page on the Brother Solutions Center at support.brother.com to see the guide.

Go to your model's Manuals page on the Brother Solutions Center at support.brother.com to see the guide.

DCP-7195DW/MFC-7895DW

If your mobile device supports the PIN Method of Wi-Fi Protected Setup™ (WPS), follow these steps to configure a Wi-Fi Direct network:

When the machine receives the Wi-Fi Direct request from your mobile device, the message [Wi-Fi Direct connection request received. Press [OK] to connect.] will appear on the LCD. Press [OK] to connect.

1. Press [Settings] > [All Settings] > [Network] > [Wi-Fi Direct] > [Group Owner].
2. Press [On].
4. When [Activate Wi-Fi Direct on other device. Then Press [OK].] appears, activate your mobile device's WPS PIN configuration method (see your mobile device's user's guide for instructions) and then press [OK] on your Brother machine.
   
   This will start the Wi-Fi Direct setup. To cancel, press [X].

5. The machine will wait for a connection request from your mobile device. When [PIN Code] appears, enter the PIN displayed on your mobile device in to the machine. Press [OK].
6. If your mobile device connects successfully, the machine's LCD displays [Connected]. You have completed the Wi-Fi Direct network setup. The Mobile Print/Scan Guide for Brother iPrint&Scan contains information on printing from or scanning to your mobile device. Go to your model's Manuals page on the Brother Solutions Center at support.brother.com to see the guide.

Configure Your Wi-Fi Direct Network Manually

DCP-7090DW/DCP-L2535DW/DCP-L2550DW/DCP-7190DW

If your mobile device does not support Wi-Fi Direct or WPS, you must configure a Wi-Fi Direct network manually.

1. Press Menu.
2. Press ▲ or ▼ to select the [Network] option, and then press OK.
3. Press ▲ or ▼ to select the [Wi-Fi Direct] option, and then press OK.
4. Press ▲ or ▼ to select the [Manual] option, and then press OK.
5. When [Wi-Fi Direct On?] appears, enable the Wi-Fi Direct network.
6. The machine will display the SSID name and Password for two minutes. Go to your mobile device's wireless network settings screen, select the SSID name, and then enter the password.
7. If your mobile device connects successfully, the machine's LCD displays [Connected]. You have completed the Wi-Fi Direct network setup. For information on printing from or scanning to your mobile device, go to your model's Manuals page on the Brother Solutions Center at support.brother.com to see the Mobile Print/Scan Guide for Brother iPrint&Scan.

DCP-7195DW/MFC-7895DW

If your mobile device does not support Wi-Fi Direct or WPS, you must configure a Wi-Fi Direct network manually.

When the machine receives the Wi-Fi Direct request from your mobile device, the message [Wi-Fi Direct connection request received. Press [OK] to connect.] will appear on the LCD. Press [OK] to connect.

1. Press [Settings] > [All Settings] > [Network] > [Wi-Fi Direct] > [Manual].

# Wireless LAN Report Error Codes

If the Wireless LAN Report shows that the connection failed, check the error code on the printed report and see the corresponding instructions in the table:

<table>
<thead>
<tr>
<th>Error Code</th>
<th>Problem and Recommended Solutions</th>
</tr>
</thead>
<tbody>
<tr>
<td>TS-01</td>
<td>The wireless setting is not activated, change the wireless setting to ON. If a network cable is connected to your machine, disconnect it and change the wireless setting of your machine to ON.</td>
</tr>
</tbody>
</table>
| TS-02      | The wireless access point/router cannot be detected. 1. Check the following two points:  
  - Unplug the power to your wireless access point/router, wait for 10 seconds, and then plug it back in.  
  - If your WLAN access point/router is using MAC address filtering, confirm that the MAC address of the Brother machine is allowed in the filter.  
  2. If you manually entered the SSID and security information (SSID/authentication method/encryption method/Network Key), the information may be incorrect. Reconfirm the SSID and security information and re-enter the correct information as necessary.  
  This device does not support a 5 GHz SSID/ESSID and you must select a 2.4 GHz SSID/ESSID. Make sure the access point/router is set to 2.4 GHz or 2.4 GHz/5 GHz mixed mode. |
| TS-04      | The Authentication/Encryption methods used by the selected wireless access point/router are not supported by your machine. Change the authentication and encryption method of the wireless access point/router. Your machine supports the following authentication methods:  
  - WPA-Personal  
    TKIP or AES  
  - WPA2-Personal  
    TKIP or AES  
  - Open  
    WEP or None (without encryption)  
  - Shared key  
    WEP  
  If your problem is not solved, the SSID or network settings you entered may be incorrect. Confirm the wireless network settings. |
<p>| TS-05      | The security information (SSID/Network Key) is incorrect. Confirm the wireless security information (Authentication method/Encryption method/Network Key). |
| TS-06      | The machine cannot detect a WLAN access point/router that has WPS enabled. Confirm the wireless security information (Authentication method/Encryption method/Network Key). |
| TS-07      | The machine cannot detect a WLAN access point/router that has WPS enabled. If you want to connect with WPS, you must operate both your machine and the WLAN access point/router. Confirm the connection method for WPS on WLAN access point/router and try starting again. If you do not know how to operate your WLAN access point/router using WPS, see the documentation provided with your WLAN access point/router, ask the manufacturer of your WLAN access point/router or ask your network administrator. |</p>

Synchronize Time with the SNTP Server Using Web Based Management

The Simple Network Time Protocol (SNTP) is used to synchronize the time used by the machine for authentication with the SNTP time server. (This is not the time displayed on the machine's LCD.) You can automatically or manually synchronize the machine's time with the Coordinated Universal Time (UTC) provided by the SNTP time server.

- Configure Date and Time Using Web Based Management
- Configure the SNTP Protocol Using Web Based Management
Configure Date and Time Using Web Based Management

Related Models: MFC-7895DW

Configure date and time to synchronize the time used by the machine with the SNTP time server.

This feature is not available in some countries.

1. Start your web browser.
2. Type "http://machine's IP address" in your browser's address bar (where "machine's IP address" is the machine's IP address).
   For example:
   http://192.168.1.2
3. No password is required by default. Type a password if you have set one, and then click ✨.
4. Click the Administrator tab.
5. Click Date&Time in the left navigation bar.

![Date&Time](image)

Select the time difference between your location and UTC from the Time Zone drop-down list. For example, the time zone for Eastern Time in the USA and Canada is UTC-05:00.

6. Verify the Time Zone settings.
7. Select the Synchronize with SNTP server check box.
8. Click Submit.

Manage Your Network Machine Securely Using SSL/TLS

- Introduction to SSL/TLS
- Certificates and Web Based Management
- Manage Your Network Machine Securely Using Web Based Management
- Manage Your Network Machine Securely Using BRAdmin Professional (Windows)
- Print Documents Securely Using SSL/TLS
Introduction to SSL/TLS

Secure Socket Layer (SSL) or Transport Layer Security (TLS) is an effective method of protecting data sent over a local or wide area network (LAN or WAN). It works by encrypting data, such as a print job, sent over a network, so anyone trying to capture it will not be able to read it.

SSL/TLS can be configured on both wired and wireless networks and will work with other forms of security such as WPA keys and firewalls.

Related Information

- Manage Your Network Machine Securely Using SSL/TLS
- Brief History of SSL/TLS
- Benefits of Using SSL/TLS
SSL/TLS was originally created to secure web traffic information, particularly data sent between web browsers and servers. For example, when you use Internet Explorer for Internet Banking and you see https:// and the little padlock icon in the web browser, you are using SSL. SSL grew to work with additional applications, such as Telnet, printer, and FTP software, in order to become a universal solution for online security. Its original design intentions are still being used today by many online retailers and banks to secure sensitive data, such as credit card numbers, customer records, etc.

SSL/TLS uses extremely high levels of encryption and is trusted by banks all over the world.

Related Information

• Introduction to SSL/TLS
Benefits of Using SSL/TLS

The primary benefit of using SSL/TLS on Brother machines is to guarantee secure printing over an IP network by restricting unauthorised users from reading data sent to the machine. SSL's key selling point is that it can be used to print confidential data securely. For example, an HR department in a large company may be printing wage slips on a regular basis. Without encryption, the data contained on these wages slips can be read by other network users. However, with SSL/TLS, anyone trying to capture the data will see a confusing page of code and not the actual wage slip.

Related Information

- Introduction to SSL/TLS
Certificates and Web Based Management

You must configure a certificate to manage your networked Brother machine securely using SSL/TLS. You must use Web Based Management to configure a certificate.

- Supported Security Certificate Features
- Create and Install a Certificate
- Manage Multiple Certificates
Your Brother machine supports the use of multiple security certificates, which allows secure management, authentication, and communication with the machine. The following security certificate features can be used with the machine:

- **SSL/TLS communication**
- **SSL communication for SMTP**

The Brother machine supports the following:

- **Pre-installed certificate**
  Your machine has a pre-installed self-signed certificate. This certificate enables you to use SSL/TLS communication without creating or installing a different certificate.

  The pre-installed self-signed certificate cannot protect your communication from being compromised. We recommend using a certificate that is issued by a trusted organisation for better security.

- **Self-signed certificate**
  This print server issues its own certificate. Using this certificate, you can easily use the SSL/TLS communication without creating or installing a different certificate from a CA.

- **Certificate from a Certificate Authority (CA)**

  There are two methods for installing a certificate from a CA. If you already have a certificate from a CA or if you want to use a certificate from an external trusted CA:
  - When using a Certificate Signing Request (CSR) from this print server.
  - When importing a certificate and a private key.

- **Certificate Authority (CA) Certificate**

  To use a CA certificate that identifies the CA and owns its private key, you must import that CA certificate from the CA before configuring the security features of the Network.

  - If you are going to use SSL/TLS communication, we recommend contacting your system administrator first.
  - When you reset the print server back to its default factory settings, the certificate and the private key that are installed will be deleted. If you want to keep the same certificate and the private key after resetting the print server, export them before resetting, and then reinstall them.

---

**Related Information**

- Certificates and Web Based Management
Create and Install a Certificate

- Step by Step Guide for Creating and Installing a Certificate
- Create and Install a Self-signed Certificate
- Create and Install a Certificate from a Certificate Authority (CA)
- Import and Export a CA Certificate
Step by Step Guide for Creating and Installing a Certificate

There are two options when choosing a security certificate: use a self-signed certificate or use a certificate from a Certificate Authority (CA).

These are a brief summary of the actions required, based on the option you choose.

Option 1

Self-Signed Certificate

1. Create a self-signed certificate using Web Based Management.
2. Install the self-signed certificate on your computer.

Option 2

Certificate from a CA

1. Create a Certificate Signing Request (CSR) using Web Based Management.
2. Install the certificate issued by the CA on your Brother machine using Web Based Management.
3. Install the certificate on your computer.

Related Information

- Create and Install a Certificate
Create and Install a Self-signed Certificate

- Create a Self-signed Certificate
- Install the Self-signed Certificate for Windows users with Administrator Rights
- Import and Export the Self-signed Certificate on your Brother Machine
Create a Self-signed Certificate

1. Start your web browser.
2. Type "http://machine's IP address" in your browser's address bar (where "machine's IP address" is the machine's IP address).
   For example: 
   http://192.168.1.2
   • If you are using a Domain Name System or enable a NetBIOS name, you can type another name, such as "SharedPrinter" instead of the IP address.
     - For example: 
       http://SharedPrinter
     If you enable a NetBIOS name, you can also use the node name.
     - For example: 
       http://brnxxxxxxxxxxxx
   The NetBIOS name can be found in the Network Configuration Report.
   • For Mac, access Web Based Management by clicking the machine's icon on the Status Monitor screen.
3. No password is required by default. Type a password if you have set one, and then click .
4. Click the Network tab.
5. Click the Security tab.
6. Click Certificate.
7. Click Create Self-Signed Certificate.
8. Enter a Common Name and a Valid Date.
   • The length of the Common Name is less than 64 bytes. Enter an identifier, such as an IP address, node name, or domain name to use when accessing this machine through SSL/TLS communication. The node name is displayed by default.
   • A warning will appear if you use the IPPS or HTTPS protocol and enter a different name in the URL than the Common Name that was used for the self-signed certificate.
9. Select your setting from the Public Key Algorithm drop-down list. The default setting is RSA(2048bit).
10. Select your setting from the Digest Algorithm drop-down list. The default setting is SHA256.
11. Click Submit.
12. Click Network.
13. Click Protocol.
14. Click HTTP Server Settings.
15. Select the certificate you want to configure from the Select the Certificate drop-down list.
16. Click Submit.
   The following screen appears.
17. Click Yes to restart your print server.

The self-signed certificate is created and saved in your machine's memory.

To use SSL/TLS communication, the self-signed certificate must be installed on your computer.

  - Create and Install a Self-signed Certificate
Install the Self-signed Certificate for Windows users with Administrator Rights

The following steps are for Microsoft Internet Explorer. If you use another web browser, consult the documentation for your web browser to get help with installing certificates.

1. Do one of the following:
   - (Windows 7 and Windows Server 2008)
     Click (Start) > All Programs.
   - (Windows 8)
     Right-click the (Internet Explorer) icon on the taskbar.
     Click > Windows Accessories.
   - (Windows Server 2012 and Windows Server 2012 R2)
     Click (Internet Explorer), and then right-click the (Internet Explorer) icon that appears on the taskbar.

2. Right-click Internet Explorer, and then click Run as administrator.

   If the More option appears, click More.

3. Type “https://machine's IP address” in your browser’s address bar to access your machine (where “machine's IP address” is the machine's IP address or the node name that you assigned for the certificate).
4. Click **Continue to this website (not recommended).**

5. Click **Certificate error**, and then click **View certificate.**

6. Click **Install Certificate....**
7. When the Certificate Import Wizard appears, click Next.

8. Select Place all certificates in the following store, and then click Browse....

9. Select Trusted Root Certification Authorities, and then click OK.

10. Click Next.
11. Click **Finish**.

12. Click **Yes**, if the fingerprint (thumbprint) is correct.

The fingerprint (thumbprint) is printed on the Network Configuration Report.

13. Click **OK**.

The self-signed certificate is now installed on your computer, and SSL/TLS communication is available.

**Related Information**

- Create and Install a Self-signed Certificate
Import and Export the Self-signed Certificate on your Brother Machine

You can store the self-signed certificates on your Brother machine and manage them by importing and exporting.

- Import the Self-signed Certificate
- Export the Self-signed Certificate
Import the Self-signed Certificate

1. Start your web browser.
2. Type “http://machine’s IP address” in your browser’s address bar (where “machine’s IP address” is the machine’s IP address).
   For example:
   http://192.168.1.2
3. No password is required by default. Type a password if you have set one, and then click.
4. Click the Network tab.
5. Click the Security tab.
6. Click Certificate.
7. Click Import Certificate and Private Key.
8. Browse to the file you want to import.
9. Type the password if the file is encrypted, and then click Submit.

The self-signed certificate is imported to your machine.

To use SSL/TLS communication, the self-signed certificate must also be installed on your computer. Contact your network administrator.

Related Information

- Import and Export the Self-signed Certificate on your Brother Machine
Export the Self-signed Certificate

1. Start your web browser.
2. Type "http://machine’s IP address" in your browser's address bar (where "machine’s IP address" is the machine's IP address).
   For example:
   http://192.168.1.2

   • If you are using a Domain Name System or enable a NetBIOS name, you can type another name, such as "SharedPrinter" instead of the IP address.
   - For example:
     http://SharedPrinter
     If you enable a NetBIOS name, you can also use the node name.
   - For example:
     http://brnxxxxxxxxxxx
     The NetBIOS name can be found in the Network Configuration Report.
   • For Mac, access Web Based Management by clicking the machine's icon on the Status Monitor screen.

3. No password is required by default. Type a password if you have set one, and then click

4. Click the Network tab.
5. Click the Security tab.
6. Click Certificate.
7. Click Export shown with Certificate List.
8. If you want to encrypt the file, type a password in the Enter password field.
   If the Enter password field is blank, your output file will not be encrypted.
9. Type the password again in the Retype password field, and then click Submit.
10. Click Save.
11. Specify the location where you want to save the file.

The self-signed certificate is exported to your computer.

You can also import the self-signed certificate to your computer.

Related Information

• Import and Export the Self-signed Certificate on your Brother Machine
Create and Install a Certificate from a Certificate Authority (CA)

If you already have a certificate from an external trusted CA, you can store the certificate and private key on the machine and manage them by importing and exporting. If you do not have a certificate from an external trusted CA, create a Certificate Signing Request (CSR), send it to a CA for authentication, and install the returned certificate on your machine.

- Create a Certificate Signing Request (CSR)
- Install a Certificate on Your Brother Machine
- Import and Export the Certificate and Private Key
A Certificate Signing Request (CSR) is a request sent to a Certificate Authority (CA) to authenticate the credentials contained within the certificate.

We recommend installing a Root Certificate from the CA on your computer before creating the CSR.

1. Start your web browser.
2. Type "http://machine's IP address" in your browser's address bar (where "machine's IP address" is the machine's IP address).
   For example:
   http://192.168.1.2

   • If you are using a Domain Name System or enable a NetBIOS name, you can type another name, such as "SharedPrinter" instead of the IP address.
     - For example:
       http://SharedPrinter
   If you enable a NetBIOS name, you can also use the node name.
     - For example:
       http://brnxxxxxxxxxxxx
   The NetBIOS name can be found in the Network Configuration Report.

   • For Mac, access Web Based Management by clicking the machine's icon on the Status Monitor screen.

3. No password is required by default. Type a password if you have set one, and then click ➡.
4. Click the Network tab.
5. Click the Security tab.
6. Click Certificate.
7. Click Create CSR.
8. Type a Common Name (required) and add other information about your Organization (optional).

9. Select your setting from the Public Key Algorithm drop-down list. The default setting is RSA(2048bit).
10. Select your setting from the Digest Algorithm drop-down list. The default setting is SHA256.
11. Click Submit.

   The CSR appears on your screen. Save the CSR as a file or copy and paste it into an online CSR form offered by a Certificate Authority.
12. Click **Save**.

- Follow your CA’s policy regarding the method to send a CSR to your CA.
- If you are using the Enterprise root CA of Windows Server 2008/2012/2012 R2/2016, we recommend using the Web Server for the certificate template to securely create the Client Certificate. For more detailed information, go to your model's **FAQs & Troubleshooting** page on the Brother support website at [support.brother.com](http://support.brother.com). Search for "SSL".

**Related Information**

- **Create and Install a Certificate from a Certificate Authority (CA)**
Install a Certificate on Your Brother Machine

When you receive a certificate from a CA, follow the steps below to install it into the print server:

Only a certificate issued with your machine's CSR can be installed onto the machine. When you want to create another CSR, make sure that the certificate is installed before creating another CSR. Create another CSR only after installing the certificate on the machine. If you do not, the CSR you create before installing will be invalid.

1. Start your web browser.
2. Type "http://machine's IP address" in your browser's address bar (where "machine's IP address" is the machine's IP address).
   - For example:
     http://192.168.1.2
   - If you are using a Domain Name System or enable a NetBIOS name, you can type another name, such as "SharedPrinter" instead of the IP address.
   - For example:
     http://SharedPrinter
   - If you enable a NetBIOS name, you can also use the node name.
   - For example:
     http://brnxxxxxxxxxxxx
     The NetBIOS name can be found in the Network Configuration Report.
   - For Mac, access Web Based Management by clicking the machine's icon on the Status Monitor screen.
3. No password is required by default. Type a password if you have set one, and then click .
4. Click the Network tab.
5. Click the Security tab.
6. Click Certificate.
7. Click Install Certificate.
8. Browse to the file that contains the certificate issued by the CA, and then click Submit.
   The certificate has been created successfully and saved in your machine's memory successfully.

To use SSL/TLS communication, the Root Certificate from the CA must be installed on your computer. Contact your network administrator.

Related Information

- Create and Install a Certificate from a Certificate Authority (CA)
Import and Export the Certificate and Private Key

Store the certificate and private key on your machine and manage them by importing and exporting them.

- Import a Certificate and Private Key
- Export the Certificate and Private Key
**Import a Certificate and Private Key**

1. Start your web browser.
2. Type "http://machine's IP address" in your browser's address bar (where "machine's IP address" is the machine's IP address).
   
   For example:
   
   http://192.168.1.2

3. No password is required by default. Type a password if you have set one, and then click.

4. Click the **Network** tab.
5. Click the **Security** tab.
6. Click **Certificate**.
7. Click **Import Certificate and Private Key**.
8. Browse to the file you want to import.
9. Type the password if the file is encrypted, and then click **Submit**.

The certificate and private key are imported to your machine.

To use SSL/TLS communication, the Root Certificate from the CA must also be installed on your computer. Contact your network administrator.

**Related Information**

- Import and Export the Certificate and Private Key
1. Start your web browser.
2. Type “http://machine’s IP address” in your browser’s address bar (where “machine’s IP address” is the machine’s IP address).
   For example:
   http://192.168.1.2

   • If you are using a Domain Name System or enable a NetBIOS name, you can type another name, such as “SharedPrinter” instead of the IP address.
     - For example:
       http://SharedPrinter

   If you enable a NetBIOS name, you can also use the node name.
   - For example:
     http://brnxxxxxxxxxxxx

     The NetBIOS name can be found in the Network Configuration Report.

   • For Mac, access Web Based Management by clicking the machine’s icon on the Status Monitor screen.

3. No password is required by default. Type a password if you have set one, and then click ▶
4. Click the Network tab.
5. Click the Security tab.
6. Click Certificate.
7. Click Export shown with Certificate List.
8. Enter the password if you want to encrypt the file.
   If a blank password is used, the output is not encrypted.
9. Enter the password again for confirmation, and then click Submit.
10. Click Save.
11. Specify the location where you want to save the file.

The certificate and private key are exported to your computer.

You can also import the certificate to your computer.
You can import, export and store CA certificates on your Brother machine.

- Import a CA Certificate
- Export a CA Certificate
Import a CA Certificate

1. Start your web browser.
2. Type "http://machine's IP address" in your browser's address bar (where "machine's IP address" is the machine's IP address).
   For example:
   http://192.168.1.2

   - If you are using a Domain Name System or enable a NetBIOS name, you can type another name, such as "SharedPrinter" instead of the IP address.
     - For example:
       http://SharedPrinter
   If you enable a NetBIOS name, you can also use the node name.
   - For example:
     http://brnxxxxxxxxxxxxx
   The NetBIOS name can be found in the Network Configuration Report.

3. No password is required by default. Type a password if you have set one, and then click.
4. Click the Network tab.
5. Click the Security tab.
6. Click CA Certificate.
7. Click Import CA Certificate.
8. Browse to the file you want to import.
9. Click Submit.

Related Information

- Import and Export a CA Certificate
Export a CA Certificate

1. Start your web browser.
2. Type "http://machine's IP address" in your browser's address bar (where "machine's IP address" is the machine's IP address).
   For example: http://192.168.1.2
   • If you are using a Domain Name System or enable a NetBIOS name, you can type another name, such as "SharedPrinter" instead of the IP address.
     - For example: http://SharedPrinter
     If you enable a NetBIOS name, you can also use the node name.
     - For example: http://brmxxxxxxxxxxx
     The NetBIOS name can be found in the Network Configuration Report.
   • For Mac, access Web Based Management by clicking the machine's icon on the Status Monitor screen.
3. No password is required by default. Type a password if you have set one, and then click .
4. Click the Network tab.
5. Click the Security tab.
6. Click CA Certificate.
7. Select the certificate you want to export and click Export.
8. Click Submit.
9. Click Save.
10. Specify where on your computer you want to save the exported certificate, and save it.
Related Information
   • Import and Export a CA Certificate
Manage Multiple Certificates

The multiple certificate feature allows you to use Web Based Management to manage each certificate installed on your machine. In Web Based Management, navigate to the Certificate or CA Certificate screen to view certificate content, delete, or export your certificates.

<table>
<thead>
<tr>
<th>Maximum Number of Certificates Stored UP on Brother Machine</th>
</tr>
</thead>
<tbody>
<tr>
<td>Self-signed Certificate or Certificate Issued by a CA</td>
</tr>
<tr>
<td>5</td>
</tr>
<tr>
<td>CA Certificate</td>
</tr>
<tr>
<td>5</td>
</tr>
</tbody>
</table>

You can store up to 5 Certificate Authority (CA) certificates using SMTP over SSL (only available for certain models).

We recommend storing one less certificate than allowed, reserving an empty spot in case of certificate expiration. When a certificate expires, import a new certificate into the reserved spot, and then delete the expired certificate. This ensures that you avoid configuration failure.

- When you use SSL for SMTP communications, you do not have to choose the certificate. The necessary certificate will be chosen automatically.

Related Information

- Certificates and Web Based Management
Manage Your Network Machine Securely Using Web Based Management

To manage your network machine securely, you must use management utilities with security protocols.

We recommend using the HTTPS protocol for secure management. To use this protocol, HTTPS must be enabled on your machine.

- The HTTPS protocol is enabled by default.
- You can change the HTTPS protocol settings using the Web Based Management screen.

1. Start your web browser.
2. Type "https://Common Name" in your browser's address bar (where "Common Name" is the Common Name that you assigned to the certificate; this could be your IP address, node name, or domain name).
3. No password is required by default. Type a password if you have set one, and then click.
4. You can now access the machine using HTTPS.

- If you use the SNMPv3 protocol, follow the steps below.
- You can also change the SNMP settings by using BRAdmin Professional.

5. Click the Network tab.
6. Click Protocol.
7. Make sure the SNMP setting is enabled, and then click Advanced Settings.
8. Configure the SNMP settings.

There are three options for SNMP Mode of Operation.

- **SNMP v1/v2c read-write access**
  In this mode, the print server uses version 1 and version 2c of the SNMP protocol. You can use all Brother applications in this mode. However, it is not secure since it will not authenticate the user, and data will not be encrypted.

- **SNMPv3 read-write access and v1/v2c read-only access**
In this mode, the print server uses the read-write access of version 3 and the read-only access of version 1 and version 2c of the SNMP protocol.

When you use **SNMPv3 read-write access and v1/v2c read-only access** mode, some Brother applications (such as BRAdmin Light) that access the print server do not work correctly since they authorise the read-only access of version 1 and version 2c. If you want to use all applications, we recommend using **SNMP v1/v2c read-write access** mode.

- **SNMPv3 read-write access**
  In this mode, the print server uses version 3 of the SNMP protocol. If you want to manage the print server securely, use this mode.

When you use **SNMPv3 read-write access** mode, note the following:
- You can use only BRAdmin Professional or Web Based Management to manage the print server.
- Except for BRAdmin Professional, all applications that use SNMPv1/v2c will be restricted. To allow the use of SNMPv1/v2c applications, use **SNMPv3 read-write access and v1/v2c read-only access** or **SNMP v1/v2c read-write access** mode.

9. Click **Submit**.

### Related Information

- Manage Your Network Machine Securely Using SSL/TLS
To use BRAdmin Professional utility, you must:

- Use the latest version of BRAdmin Professional. Go to your model's Downloads page on the Brother Solutions Center at support.brother.com.
- Use Web Based Management with the HTTPS protocol if you use BRAdmin Professional and Web Based Management together.
- Use a different password in each group if you are managing a mixed group of older and newer print servers with BRAdmin Professional. This will ensure security is maintained on the newer print servers.

- "Older versions of BRAdmin" refer to BRAdmin Professional older than Ver. 2.80 and BRAdmin Light for Mac older than Ver.1.10.
- "Older print servers" refer to NC-2000 series, NC-2100p, NC-3100h, NC-3100s, NC-4100h, NC-5100h, NC-5200h, NC-6100h, NC-6200h, NC-6300h, NC-6400h, NC-8000, NC-100h, NC-110h, NC-120w, NC-130h, NC-140w, NC-8100h, NC-9100h, NC-7100w, NC-7200w and NC-2200w.

Related Information

- Manage Your Network Machine Securely Using SSL/TLS
Print Documents Securely Using SSL/TLS

To print documents securely with IPP protocol, use the IPPS protocol.

1. Start your web browser.
2. Type "http://machine's IP address" in your browser's address bar (where "machine's IP address" is the machine's IP address).
   For example:
   http://192.168.1.2
   - If you are using a Domain Name System or enable a NetBIOS name, you can type another name, such as "SharedPrinter" instead of the IP address.
   - For example:
     http://SharedPrinter
   If you enable a NetBIOS name, you can also use the node name.
   - For example:
     http://brmxxxxxxxxxx
   The NetBIOS name can be found in the Network Configuration Report.
   • For Mac, access Web Based Management by clicking the machine's icon on the Status Monitor screen.

3. No password is required by default. Type a password if you have set one, and then click.
4. Click the Network tab.
5. Click Protocol. Make sure the IPP check box is selected.
   - If the IPP check box is not selected, select the IPP check box, and then click Submit.
   - Restart your machine to activate the configuration.
   After the machine restarts, return to the machine's web page, click the Network tab, and then click Protocol.

6. Click HTTP Server Settings.
7. Select the HTTPS(Port 443) check box in the IPP, and then click Submit.
8. Restart your machine to activate the configuration.

Communication using IPPS cannot prevent unauthorised access to the print server.

Send an Email Securely

- Configure Email Sending Using Web Based Management
- Send an Email with User Authentication
- Send an Email Securely Using SSL/TLS
Configure Email Sending Using Web Based Management

We recommend using Web Based Management to configure secured email sending with user authentication, or email sending using SSL/TLS.

1. Start your web browser.
2. Type "http://machine's IP address" in your browser's address bar (where "machine's IP address" is the machine's IP address).
   For example: http://192.168.1.2
3. No password is required by default. Type a password if you have set one, and then click.
4. Click the Network tab.
5. Click the Protocol menu in the left navigation bar.
6. In the SMTP field, click Advanced Settings and make sure the status of SMTP is Enabled.
7. Configure the SMTP settings.
   • Confirm that the email settings are correct after configuration by sending a test email.
   • If you do not know the SMTP server settings, contact your network administrator or Internet Service Provider (ISP).
8. When finished, click Submit.
   The Test Send E-mail Configuration dialog box appears.
9. Follow the instructions in the dialog box to test the current settings.

Related Information
• Send an Email Securely
Send an Email with User Authentication

Your Brother machine supports the SMTP-AUTH method to send email via an email server that requires user authentication. This method prevents unauthorised users from accessing the email server.

You can use SMTP-AUTH for email notification and email reports (available for certain models).

We recommend using Web Based Management to configure the SMTP authentication.

Email Server Settings

You must configure your machine's SMTP authentication method to match the method used by your email server. For details about your email server settings, contact your network administrator or Internet Service Provider (ISP).

To enable SMTP server authentication: in the Web Based Management SMTP screen, under Server Authentication Method, you must select SMTP-AUTH.

Related Information

- Send an Email Securely
Send an Email Securely Using SSL/TLS

Your Brother machine supports SSL/TLS methods to send an email via an email server that requires secure SSL/TLS communication. To send email via an email server that is using SSL/TLS communication, you must configure SMTP over SSL/TLS.

We recommend using Web Based Management to configure SSL/TLS.

Verify Server Certificate

Under SSL/TLS, if you choose SSL or TLS, the Verify Server Certificate check box will be selected automatically.

- Before you verify the server certificate, you must import the CA certificate issued by the CA that signed the server certificate. Contact your network administrator or your Internet Service Provider (ISP) to confirm if importing a CA certificate is necessary.
- If you do not need to verify the server certificate, clear the Verify Server Certificate check box.

Port Number

If you select SSL, the Port value will be changed to match the protocol. To change the port number manually, type the port number after you choose SSL/TLS.
You must configure your machine's SMTP communication method to match the method used by your email server. For details about your email server settings, contact your network administrator or your ISP.

In most cases, the secured webmail services require the following settings:

<table>
<thead>
<tr>
<th>SMTP</th>
<th>Port</th>
<th>Server Authentication Method</th>
<th>SSL/TLS</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>25</td>
<td>SMTP-AUTH</td>
<td>TLS</td>
</tr>
</tbody>
</table>

Send a Fax Using AirPrint (macOS)

Related Models: MFC-7895DW

Make sure your Brother machine is in the printer list on your Mac computer. Apple TextEdit is used in the example below.

- AirPrint supports only monochrome fax documents.

1. Make sure your Brother machine is turned on.
2. On your Mac computer, open the file that you want to send as a fax.
3. Click the File menu, and then select Print.
4. Click the Printer pop-up menu, and then select Brother MFC-XXXX - Fax (where XXXX is your model name).
5. Type the fax recipient information.
6. Click Fax.

Mobile Printing for Windows

Mobile printing for Windows is a function to print wirelessly from your Windows mobile device. You can connect to the same network that your Brother machine is connected to and print without installing the printer driver on the device. Many Windows apps support this function.

1. Windows mobile device (Windows 10 Mobile or later)
2. Wi-Fi® connection
3. Your Brother machine

Related Information

- Mobile
Mopria® Print Service

Mopria® Print Service is a print feature on Android™ mobile devices (Android™ version 4.4 or later) developed by the Mopria® Alliance. With this service, you can connect to the same network as your machine and print without additional setup. Many native Android™ apps support printing.

1. Android™ 4.4 or later
2. Wi-Fi® Connection
3. Your Brother machine

You must download the Mopria® Print Service from the Google Play™ Store and install it on your Android™ device. Before using this service, you must turn it on.

Brother iPrint&Scan for Mobile Devices

Use Brother iPrint&Scan to print and scan from various mobile devices.

• For Android™ Devices
  Brother iPrint&Scan allows you to use features of your Brother machine directly from your Android™ device, without using a computer.
  Go to your model's Downloads page on the Brother Solutions Center at support.brother.com to download Brother iPrint&Scan.

• For all iOS supported devices including iPhone, iPad and iPod touch
  Brother iPrint&Scan allows you to use features of your Brother machine directly from your iOS device.
  Download and install Brother iPrint&Scan from the App Store.

• For Windows Devices
  Brother iPrint&Scan allows you to use features of your Brother machine directly from your Windows device, without using a computer.
  Download and install Brother iPrint&Scan from the Microsoft Store.

For more detailed information, visit support.brother.com/ips.

Change the Operation Mode in ControlCenter4 (Windows)

ControlCenter4 has two operation modes: **Home Mode** and **Advanced Mode**. You can change modes at any time.

**Home Mode**

ControlCenter4 Home Mode lets you access your machine's main features easily.

**Advanced Mode**

- **Home Mode**
  ControlCenter4 Home Mode lets you access your machine's main features easily.
- **Advanced Mode**
ControlCenter4 Advanced Mode gives you more control over the details of your machine's features and allows you to customise one-button scan actions.

To change operation mode:

1. Click the ControlCenter4 icon in the task tray, and then select Open.
2. Click the Configuration button, and then select Mode Select.
3. The mode selection dialog box appears. Select either the Home Mode or Advanced Mode option.
4. Click OK.

If Secure Function Lock is set to On, you cannot use Remote Setup.

1. Click the (ControlCenter4) icon in the task tray, and then click Open.
2. Click the Device Settings tab.
3. Click the Remote Setup button.
4. Configure the settings as needed.

Export
Click to save the current configuration settings to a file.

Click Export to save your address book or all settings for your machine.

Import
Click to import a file and read its settings.

Print
Click to print the selected items on the machine. You cannot print the data until it is uploaded to the machine. Click Apply to upload the new data to the machine, and then click Print.
OK
Click to start uploading data to the machine, and then exit the Remote Setup Program. If an error message appears, confirm that your data is correct, and then click **OK**.

Cancel
Click to exit the Remote Setup Program without uploading data to the machine.

Apply
Click to upload data to the machine without exiting the Remote Setup Program.

5. Click **OK**.

- If your computer is protected by a firewall and is unable to use Remote Setup, you may need to configure the firewall settings to allow communication through port numbers 137 and 161.
- If you are using Windows Firewall and you installed the Brother software and drivers from the installation disc, the necessary firewall settings have already been set.

Use this section to resolve typical problems you may encounter when using your machine. You can correct most problems yourself.

IMPORTANT

For technical help, you must call Brother customer service or your local Brother dealer. Using non-Brother supplies may affect the print quality, hardware performance, and machine reliability. To prevent you from losing the received fax data in the machine's memory, transfer the data to another Fax machine or to your computer before turning off the machine.

If you need additional help, visit support.brother.com.

First, check the following:

- The machine's power cord is connected correctly and the machine's power is on. See the Quick Setup Guide.
- All of the protective materials have been removed. See the Quick Setup Guide.
- Paper is loaded correctly in the paper tray.
- The interface cables are securely connected to the machine and the computer, or the wireless connection is set up on both the machine and your computer.
- Error and maintenance messages

If you did not solve the problem with the checks, identify the problem and then see Related Information.

Error and Maintenance Messages

As with any sophisticated office product, errors may occur and supply items may have to be replaced. If this happens, your machine identifies the error or required routine maintenance and shows the appropriate message. The most common error and maintenance messages are shown in the table.

You can correct most errors and perform routine maintenance by yourself. If you need more tips: Visit us at support.brother.com, and click FAQs & Troubleshooting.

Paper Jams

Always remove the remaining paper from the paper tray and straighten the stack when you are adding new paper. This helps prevent multiple sheets of paper from feeding through the machine at one time and prevents paper jams.

- Paper is Jammed in the Paper Tray
- Paper is Jammed in the MP tray
- Paper is Jammed in the Output Paper Tray
- Paper is Jammed in the Back of the Machine
- Paper is Jammed inside the Machine
- Paper is Jammed in the 2-sided Tray
Paper is Jammed in the Paper Tray

If the machine's control panel or the Status Monitor indicates that there is a jam in the paper tray, follow these steps:

1. Pull the paper tray completely out of the machine.

2. Slowly pull out the jammed paper.

   Pulling the jammed paper downward using both hands allows you to remove the paper more easily.

3. Fan the stack of paper to prevent further jams, and slide the paper guides to fit the paper size.

4. Make sure the paper is below the maximum paper mark (¶¶¶).

5. Put the paper tray firmly back in the machine.
Related Information

- Paper Jams
Paper is Jammed in the MP tray

If the machine's control panel or the Status Monitor indicates that there is a jam in the machine's MP tray, follow these steps:

1. Remove the paper from the MP tray.
2. Remove any jammed paper from in and around the MP tray.
3. Fan the paper stack, and then put it back in the MP tray.
4. Reload paper in the MP tray and make sure the paper stays under the maximum paper height guides (1) on both sides of the tray.
5. Follow the instructions on the machine's LCD.

Related Information

- Paper Jams
When the paper is jammed in the output paper tray, follow these steps:

1. Use both hands to open the scanner.

2. Remove the paper.

3. Push the scanner down with both hands to close it.

Related Information

- Paper Jams
If the machine's control panel or the Status Monitor indicates that there is a jam in the back (Rear) of the machine, follow these steps:

1. Leave the machine turned on for 10 minutes for the internal fan to cool the extremely hot parts inside the machine.
2. Open the back cover.
3. Pull the blue tabs at the left and right sides toward you to release the fuser cover.

**WARNING**

HOT SURFACE

The machine's internal parts will be extremely hot. Wait for the machine to cool down before touching them.

If the green envelope levers inside the back cover are pulled down to the envelope position, lift these levers to the original position before pulling the green tabs down.

4. Use both hands to gently pull the jammed paper out of the fuser unit.
5. Close the fuser cover.

If you print on envelopes, pull down the green envelope levers to the envelope position again before closing the back cover.

6. Close the back cover until it locks in the closed position.

- Paper Jams
Paper is Jammed inside the Machine

If the machine's control panel or the Status Monitor indicates that there is a jam inside the machine, follow these steps:

1. Leave the machine turned on for 10 minutes for the internal fan to cool the extremely hot parts inside the machine.
2. Open the front cover.
3. Remove the toner cartridge and drum unit assembly.

**WARNING**

HOT SURFACE

The machine's internal parts will be extremely hot. Wait for the machine to cool down before touching them.

4. Pull out the jammed paper slowly.
5. Install the toner cartridge and drum unit assembly into the machine.
6. Close the front cover.

Related Information

- Paper Jams
If the machine's control panel or the Status Monitor indicates that there is a jam in the 2-sided paper tray, follow these steps:

1. Leave the machine turned on for 10 minutes for the internal fan to cool the extremely hot parts inside the machine.

2. Pull the paper tray completely out of the machine.

3. At the back of the machine, pull the 2-sided tray completely out of the machine.

4. Pull the jammed paper out of the machine or out of the 2-sided tray.

5. Remove paper that may have jammed under the machine due to static electricity.
6. If paper is not caught inside the 2-sided tray, open the back cover.

![Image of machine open back cover]

**WARNING**

**HOT SURFACE**

The machine's internal parts will be extremely hot. Wait for the machine to cool down before touching them.

![Image of hot machine]

7. Use both hands to gently pull the jammed paper out of the back of the machine.

![Image of paper being pulled]

8. Close the back cover until it locks in the closed position.
9. Put the 2-sided tray firmly back in the rear of the machine.
10. Put the paper tray firmly back in the front of the machine.

** Improve the Print Quality

If you have a print quality problem, print a test page first. If the printout looks good, the problem is probably not the machine. Check the interface cable connections and try printing a different document. If the printout or test page printed from the machine has a quality problem, check the examples of poor print quality and follow the recommendations in the table.

**IMPORTANT**

Using non-genuine supplies may affect the print quality, hardware performance, and machine reliability.

1. To get the best print quality, we suggest using recommended print media. Make sure you use paper that meets our specifications.
2. Check that the toner cartridge and drum unit are installed correctly.

<tbody>
<tr>
<td>Dialling does not work. (No dial tone)</td>
<td>Check all line cord connections. Make sure the telephone line cord is plugged into the telephone wall socket and the LINE socket of the machine. Make sure your machine has a dial tone by pressing the Hook button in Fax mode. If you subscribe to DSL or VoIP services, contact your service provider for connection instructions.</td>
</tr>
<tr>
<td></td>
<td>(Available only for some countries.)</td>
</tr>
<tr>
<td></td>
<td>Change the Tone/Pulse setting.</td>
</tr>
<tr>
<td></td>
<td>Send a manual fax by pressing Hook or Hook/Hold button, and dialing the number. Wait to hear fax-receiving tones before pressing Start button.</td>
</tr>
<tr>
<td>The machine does not answer when called.</td>
<td>Make sure the machine is in the correct receive mode for your setup.</td>
</tr>
<tr>
<td></td>
<td>Check for a dial tone. If possible, call your machine to hear it answer. If there is still no answer, check that the telephone line cord is plugged into the telephone wall socket and the LINE socket of the machine. Make sure your machine has a dial tone by pressing the Hook button in Fax mode. If there is no ringing when you call your machine, ask your telephone company to check the line.</td>
</tr>
</tbody>
</table>

## Handling Incoming Calls

<table>
<thead>
<tr>
<th>Difficulties</th>
<th>Suggestions</th>
</tr>
</thead>
<tbody>
<tr>
<td>The machine ‘Hears’ a voice as a CNG Tone.</td>
<td>If Fax Detect is set to On, your machine is more sensitive to sounds. It may mistakenly interpret certain voices or music on the line as a fax machine calling and respond with fax receiving tones. Deactivate the machine by pressing Stop/Exit or . Try avoiding this problem by turning Fax Detect to Off.</td>
</tr>
<tr>
<td>Sending a Fax Call to the machine.</td>
<td>When your machine answers, hang up.</td>
</tr>
<tr>
<td>Custom features on a single line.</td>
<td>If you have Call Waiting, Call Waiting/Caller ID, Caller ID, Voice Mail, an answering machine, an alarm system or other custom feature on a single telephone line with your machine, it may create a problem sending or receiving faxes.</td>
</tr>
<tr>
<td></td>
<td><strong>For Example:</strong> If you subscribe to Call Waiting or some other custom service and its signal comes through the line while your machine is sending or receiving a fax, the signal can temporarily interrupt or disrupt the faxes. Brother’s ECM (Error Correction Mode) feature should help overcome this problem. This condition is related to the telephone system industry and is common to all devices that send and receive information on a single, shared line with custom features. If avoiding a slight interruption is crucial to your business, we recommend using a separate telephone line with no custom features.</td>
</tr>
</tbody>
</table>

## Receiving Faxes
<table>
<thead>
<tr>
<th>Difficulties</th>
<th>Suggestions</th>
</tr>
</thead>
<tbody>
<tr>
<td>Cannot receive a fax.</td>
<td>Check all line cord connections. Make sure the telephone line cord is plugged into the telephone wall socket and the LINE socket of the machine. If you subscribe to DSL or VoIP services, contact your service provider for connection instructions. If you are using a VoIP system, try changing the VoIP setting to Basic (for VoIP). This will lower modem speed and turn off Error Correction Mode (ECM).</td>
</tr>
<tr>
<td></td>
<td>Make sure your machine has a dial tone by pressing Hook or Hook/Hold button in Fax mode. If you hear static or interference on your fax line, contact your local telephone provider.</td>
</tr>
<tr>
<td></td>
<td>Make sure the machine is in the correct Receive Mode.</td>
</tr>
<tr>
<td></td>
<td>• If you have a dedicated fax line and want your Brother machine to automatically answer all incoming faxes, you should select Fax Auto mode.</td>
</tr>
<tr>
<td></td>
<td>• If your Brother machine shares a line with other telephones and you want it to automatically answer all incoming faxes, you should select the Fax Auto mode. In Fax Auto mode, your Brother machine will receive faxes automatically and produce a pseudo/double-ring to alert you to answer voice calls.</td>
</tr>
<tr>
<td></td>
<td>• If you do not want your Brother machine to answer any incoming faxes automatically, you should select the Manual mode. In Manual mode, you must answer every incoming call and activate the machine to receive faxes.</td>
</tr>
<tr>
<td></td>
<td>Another device or service at your location may be answering the call before your Brother machine answers. To test this, lower the Ring Delay setting:</td>
</tr>
<tr>
<td></td>
<td>• If the Receive Mode is set to Fax Auto, reduce the Ring Delay to 1 ring. See Related Information: Set the Number of Rings Before the Machine Answers (Ring Delay).</td>
</tr>
<tr>
<td></td>
<td>• If the Receive Mode is set to Manual, DO NOT adjust the Ring Delay setting.</td>
</tr>
<tr>
<td></td>
<td>Have someone send you a test fax:</td>
</tr>
<tr>
<td></td>
<td>• If you received the test fax successfully, your machine is operating correctly. Remember to reset your Ring Delay or answering machine setting back to your original setting. If receiving problems recur after resetting the Ring Delay, then a person, device, or subscriber service is answering the fax call before the machine has a chance to answer.</td>
</tr>
<tr>
<td></td>
<td>• If you were not able to receive the fax, then another device or subscriber service may be interfering with your fax reception or there may be a problem with your fax line.</td>
</tr>
<tr>
<td></td>
<td>Make sure your Brother machine’s Fax Detect feature is turned On. Fax Detect is a feature that allows you to receive a fax even if you answered the call on an external or extension telephone.</td>
</tr>
<tr>
<td></td>
<td>If you often get transmission errors due to possible interference on the telephone line or if you are using a VoIP system, try changing the Compatibility setting to Basic (for VoIP).</td>
</tr>
</tbody>
</table>

Set Dial Tone Detection

Setting the Dial Tone to [Detection] will shorten the Dial Tone detect pause.

1. Press [Settings] > [All Settings] > [Initial Setup] > [Dial Tone].
2. Press [Detection] or [No Detection].
3. Press .

Related Information

- Telephone and Fax Problems
Set Telephone Line Compatibility for Interference and VoIP Systems

Related Models: MFC-7895DW

Problems sending and receiving faxes due to possible interference on the telephone line may be solved by reducing the modem speed to minimise errors in fax transmission. If you are using a Voice over IP (VoIP) service, Brother recommends changing the compatibility to Basic (for VoIP).

- VoIP is a type of phone system that uses an Internet connection, rather than a traditional phone line. Telephone providers frequently bundle VoIP together with Internet and cable services.

1. Press [Settings] > [All Settings] > [Initial Setup] > [Compatibility].
2. Press [High], [Normal] or [Basic (for VoIP)].

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>High</td>
<td>Select High to set the modem speed at 33600 bps.</td>
</tr>
<tr>
<td>Normal</td>
<td>Select Normal to set the modem speed at 14400 bps.</td>
</tr>
<tr>
<td>Basic (for VoIP)</td>
<td>Select Basic (for VoIP) to reduce the modem speed to 9600 bps and turn off Error Correction Mode (ECM). Unless interference is a recurring problem on your telephone line, you may prefer to use it only when needed. To improve compatibility with most VoIP services, Brother recommends changing the compatibility setting to Basic (for VoIP).</td>
</tr>
</tbody>
</table>

<tr>
<td>Direct configuration, do the following:</td>
<td>• If you are using your Brother machine as a client, confirm how many devices are allowed in the current Wi-Fi Direct network, and then check how many devices are connected.</td>
<td></td>
</tr>
</tbody>
</table>

**For Windows**

If your wireless connection has been interrupted, and you have checked and tried all of the above, we recommend using the Network Connection Repair Tool.

### Related Information

- **Network Problems**

**Related Topics:**

- Configure Your Machine for a Wireless Network When the SSID Is Not Broadcast
- Use Wi-Fi Direct®
Use the Network Connection Repair Tool (Windows)

Use the Network Connection Repair Tool to fix the Brother machine’s network settings. It will assign the correct IP address and Subnet Mask.

- Windows 7/Windows 8/Windows 10
  You must log on with Administrator rights.
- Make sure the Brother machine is turned on and is connected to the same network as your computer.

1. Do one of the following:

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Windows 7</td>
<td>Click (Start) &gt; All Programs &gt; Brother &gt; Brother Utilities. Click the drop-down list and select your model name (if not already selected). Click Tools in the left navigation bar, and then click Network Connection Repair Tool.</td>
</tr>
<tr>
<td>Windows 8/Windows 10</td>
<td>Launch (Brother Utilities), and then click the drop-down list and select your model name (if not already selected). Click Tools in the left navigation bar, and then click Network Connection Repair Tool.</td>
</tr>
</tbody>
</table>

- If the User Account Control screen appears, click Yes.

2. Follow the on-screen instructions.
3. Check the diagnosis by printing the Network Configuration Report or the Printer Settings Page.

The Network Connection Repair Tool will start automatically if you select the Enable Connection Repair Tool option in the Status Monitor. Right-click the Status Monitor screen, and then click Other Settings > Enable Connection Repair Tool. This is not recommended when your network administrator has set the IP address to Static, since it will automatically change the IP address.

If the correct IP address and the Subnet Mask are still not assigned even after using the Network Connection Repair Tool, ask your network administrator for this information.

## Reset Functions Overview

The following reset functions are available:

Unplug the interface cable before you choose Network Settings Reset function, All Settings Reset function or Factory Reset function.

### DCP-7090DW/DCP-L2535DW/DCP-L2550DW/DCP-7190DW

1. **Machine Reset**
   - This function resets the following settings:
     - Programmed fax jobs in the memory (For MFC Models)
       (Delayed Fax, Batch TX)
     - Setting Lock (For MFC Models)
     - Language Setting

2. **Network Settings Reset (DCP-7090DW/DCP-L2535DW/DCP-L2550DW/DCP-7190DW/DCP-7195DW/MFC-7895DW)**
   - Reset the print server back to its default factory settings (includes Password and IP Address information).

3. **Address Book and Fax Settings Reset (For MFC Models)**
   - This function resets the following settings:
     - Address Book
       (One Touch Dial / Speed Dial / Setup Groups)
     - Programmed fax jobs in the memory
     - Station ID
       (name and number)

Routine Maintenance

• Replace Supplies
• Clean the Machine
• Check the Remaining Part Life
• Pack and Ship Your Brother Machine
Replace Supplies

You must replace supplies when the machine indicates that the life of the supply is over. Using non-Brother supplies may affect the print quality, hardware performance, and machine reliability. The toner cartridge and drum unit are two separate supplies. Make sure both are installed as an assembly. The model name of supplies may vary depending on the country.

NOTE

- Be sure to seal up the used supplies tightly in a bag so that toner powder does not spill out of the cartridge.
- Discard used consumable items according to local regulations, keeping it separate from domestic waste. If you have questions, call your local waste disposal office. Be sure to reseal the consumable items tightly so that the material inside does not spill.
- We recommend placing used and new supplies on a piece of paper to prevent accidentally spilling or scattering the material inside.
- If you use paper that is not a direct equivalent for the recommended print media, the life of supplies and machine parts may be reduced.
- The projected life for each of the toner cartridges is based on ISO/IEC 19752. Frequency of replacement will vary depending on the print volume, percentage of coverage, types of media used, and powering on/off the machine.
- Frequency of replacing supplies except toner cartridges will vary depending on the print volume, types of media used, and powering on/off the machine.
- Handle the toner cartridge carefully. If toner scatters on your hands or clothes, immediately wipe or wash it off with cold water.

IMPORTANT

- To avoid print quality problems, DO NOT touch the shaded parts shown in the illustrations.

Replace the Toner Cartridge

1. Make sure the machine is turned on.
2. Open the front cover.

3. Remove the toner cartridge and drum unit assembly from the machine.

4. Push down the green lock lever and take the toner cartridge out of the drum unit.

5. Unpack the new toner cartridge.
6. Remove the protective cover.

7. Push the new toner cartridge firmly into the drum unit until you hear it lock into place.
Make sure you put the toner cartridge in correctly or it may separate from the drum unit. If you put it in properly, the green lock lever will lift automatically.

8. Clean the corona wire inside the drum unit by gently sliding the green tab from left to right and right to left several times.

Be sure to return the tab to the Home position (▲). The arrow on the tab must be aligned with the arrow on the drum unit. If it is not, printed pages may have a vertical stripe.

9. Install the toner cartridge and drum unit assembly back into the machine.

10. Close the front cover of the machine.
• After replacing a toner cartridge, DO NOT turn off the machine or open the front cover until the machine's display returns to Ready Mode.
• The toner cartridge that comes with your Brother machine is a Inbox toner cartridge.
• It is a good idea to keep a new toner cartridge ready for use when you see the Toner Low warning.
• To ensure high quality printing, we recommend using only Brother Original toner cartridges. When you want to buy toner cartridges, contact Brother Dealer.
• DO NOT unpack the new toner cartridge until you are ready to install it.
• If a toner cartridge is left unpacked for a long time, the toner life will be shortened.
• Brother strongly recommends you DO NOT refill the toner cartridge provided with your machine. We also strongly recommend you continue to use only Brother Original replacement toner cartridges. Use or attempted use of third party toner and/or cartridges in the Brother machine may cause damage to the machine and/or may result in unsatisfactory print quality. Our limited warranty coverage does not apply to any problem that is caused by the use of third party toner and/or cartridges. To protect your investment and obtain premium performance from the Brother machine, we strongly recommend the use of Brother Original Supplies.

Replace the Drum Unit

1. Make sure the machine is turned on.
2. Open the front cover.

3. Remove the toner cartridge and drum unit assembly from the machine.

4. Push down the green lock lever and take the toner cartridge out of the drum unit.

5. Unpack the new drum unit.
6. Push the toner cartridge firmly into the new drum unit until you hear it lock into place.
Make sure you put the toner cartridge in correctly or it may separate from the drum unit. If you put it in properly, the green lock lever will lift automatically.

7. Install the toner cartridge and drum unit assembly back into the machine.

8. Close the front cover of the machine.

**NOTE**

- Drum wear and tear occurs due to use and rotation of the drum and interaction with paper, toner and other materials in the paper path. In designing this product, Brother decided to use the number of rotations of the drum as a reasonable determinant of the drum life. When a drum reaches the factory-established rotation limit corresponding to the rated page yield, the product's LCD will advise you to replace the drum. The product will continue to function; however, print quality may not be optimal.

- If an unpacked drum unit is placed in direct sunlight (or room light for long periods of time), the unit may be damaged.

- There are many factors that determine the actual drum life, such as the temperature, humidity, type of paper, type of toner used and so on. Under ideal conditions, the average drum life is estimated at approximately 12,000 pages (based on 1 page per job [A4/Letter single-sided pages]. The number of pages may be affected due to a variety of factors including but not limited to media type and media size. Because we have no control over the many factors that determine the actual drum life, we cannot guarantee a minimum number of pages that will be printed by your drum.

- For best performance, use only Brother Original toner.

- The machine should be used only in a clean, dust-free environment with adequate ventilation.

- Printing with a non-Brother drum unit may reduce not only the print quality but also the quality and life of the machine itself. Warranty coverage does not apply to problems caused by the use of a non-Brother drum unit.

Clean the Machine

Clean the outside and inside of the machine regularly with a dry, lint-free cloth. When you replace the toner cartridge or the drum unit, make sure you clean the inside of the machine. If printed pages are stained with toner, clean the inside of the machine with a dry, lint-free cloth.

**WARNING**

- DO NOT use flammable substances, any type of spray, or an organic solvent/liquid containing alcohol or ammonia to clean the inside or outside of the product. Doing so could cause a fire. Instead, use only a dry, lint-free cloth.

**IMPORTANT**

- DO NOT use isopropyl alcohol to remove dirt from the control panel. It may crack the panel.
- To avoid print quality problems, DO NOT touch the shaded parts shown in the illustrations.

Set the Continue Mode

The Continue Mode forces the machine to continue printing after the control panel displays Replace Toner.

The machine will continue printing until the LCD displays Toner Ended.
The factory setting is Stop.

- When the control panel indicates an error, you cannot change the mode.
- If you continue printing in the Continue Mode, we cannot guarantee the print quality.
- While using Continue Mode the print may appear faint.
- After replacing the toner cartridge with a new one, the Continue Mode will go back to the default setting (Stop).

DCP-7090DW/DCP-L2535DW/DCP-L2550DW/DCP-7190DW

1. Press Menu.
2. Press ▲ or ▼ to display the [General Setup] option, and then press OK.
3. Press ▲ or ▼ to display the [Replace Toner] option, and then press OK.
4. Press ▲ or ▼ to display the [Continue] or [Stop] option, and then press OK.
5. Press Stop/Exit.

DCP-7195DW/MFC-7895DW

Learn About Receiving Faxes in Continue Mode

The machine can store received faxes in the memory if you choose the Continue Mode when the LCD displays Replace Toner. When received faxes are printed in Continue Mode the LCD will ask if the print quality of the fax is OK. If the quality is not good, choose No. The machine will keep the faxes stored in the memory so you can reprint them after you replace the toner cartridge with a new one. If the print quality is good, choose Yes. The LCD will ask if you want to delete the printed faxes from the memory. If you choose not to delete them, you will be asked again after you replace the toner cartridge with a new one.

- (MFC-7895DW)
  - The machine can store up to 500 faxes in memory.
  - The machine will keep faxes stored in Continue Mode even if you change the Continue setting to Stop.
  - If you install a new toner cartridge when the LCD displays Toner Ended, the machine will ask if you want to print the stored faxes. Choose Print to print stored faxes.

Toner End in Continue Mode

When the LCD displays Toner Ended, the machine will stop printing. If the memory is full and you want to continue receiving faxes, you must install a new toner cartridge.

Add a Prefix to Every Fax Number

The Dial Prefix setting will automatically dial a predefined number before every fax number you dial. For example: If your telephone system requires a 9 to dial an outside number, use this setting to automatically dial 9 for every fax you send.

- Use the numbers and symbols from 0 to 9, #, and *. (You cannot use ! with any other numbers or symbols.)
- If your telephone system requires a time break recall (hookflash), press ! on the LCD.

1. Press [Settings] > [All Settings] > [Initial Setup] > [Dial Prefix].

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>On</td>
<td>To activate the prefix number setting, select On. If you selected On, go to the next step to set a prefix number.</td>
</tr>
<tr>
<td>Off</td>
<td>To deactivate the prefix number setting, select Off. If you selected Off, press to exit.</td>
</tr>
</tbody>
</table>

3. Press [Dial Prefix].
4. Enter a prefix number (up to 5 digits) using the LCD, and then press [OK].

To change the prefix number, press ◀ or ▶ to position the cursor under the digit to be deleted and press . Then press the correct digit. Repeat until the prefix number is correct, and then press [OK].

5. Press .

Prevent Dialling a Wrong Number (Dial Restriction)

Related Models: MFC-7895DW

This feature prevents users from sending a fax or call to the wrong number by mistake. You can set the machine to restrict dialling when you use the dial pad, Address Book and Shortcuts.

1. Press \textit{[Settings]} > \textit{[All Settings]} > \textit{[Fax]} > \textit{[Dial Restriction]}.
2. Press one of the following options:
   - \textit{[Dial Pad]}
   - \textit{[Address Book]}

   If you combine Address Book numbers when dialling, the address will be recognised as dial pad input and will not be restricted.

   - \textit{[Shortcuts]}
3. Press one of the following options:

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Enter # Twice</td>
<td>The machine will prompt you to re-enter the number, and then if you re-enter the same number correctly, the machine will start dialling. If you re-enter the wrong number, the LCD will display an error message.</td>
</tr>
<tr>
<td>On</td>
<td>The machine will restrict all fax sending and outbound calls for that dialling method.</td>
</tr>
<tr>
<td>Off</td>
<td>The machine does not restrict the dialling method.</td>
</tr>
</tbody>
</table>

   - The \textit{[Enter \# Twice]} setting will not work if you use an external phone or press \textit{[Hook]} before entering the number. You will not be asked to re-enter the number.
   - If you choose \textit{[On]} or \textit{[Enter \# Twice]}, you cannot use the Broadcasting feature.

4. Press \textit{[On]}.
Reduce Printing Noise

The Quiet Mode setting can reduce printing noise. When Quiet Mode is turned on, the print speed becomes slower. The factory setting is off.

DCP-7090DW/DCP-L2535DW/DCP-L2550DW/DCP-7190DW

1. Press Menu.
2. Press ▲ or ▼ to display the [General Setup] option, and then press OK.
3. Press ▲ or ▼ to display the [Ecology] option, and then press OK.
4. Press ▲ or ▼ to display the [Quiet Mode] option, and then press OK.
5. Press ▲ or ▼ to display the [On] or [Off] option, and then press OK.
6. Press Stop/Exit.

DCP-7195DW/MFC-7895DW

1. Press [Settings] > [All Settings] > [General Setup] > [Ecology] > [Quiet Mode].

Add Shortcuts

Related Models: DCP-7195DW/MFC-7895DW

You can add the Fax, Copy, or Scan settings you use most frequently by saving them as your Shortcuts. Later you can press the Shortcut to apply these settings instead of manually re-entering them.

These instructions describe how to add a Copy Shortcut. The steps for adding a Fax or Scan Shortcut are very similar.

1. Press 
2. Press the button where you have not added a Shortcut.
3. Press ▲ or ▼ to display [Copy], and then press [Copy].
4. Press ▲ or ▼ to display the available settings, and then press the setting you want to change.
5. Press ▲ or ▼ to display the available options for the setting, and then press the option you want.
   - Repeat these two steps until you have selected all the settings and options you want, and then press [OK].
6. When you have finished changing settings, press [Save as Shortcut].
7. Read and confirm the displayed list of settings you have selected, and then press [OK].
8. Enter a name for the Shortcut using the LCD, and then press [OK].

Related Information

Print Reports

- Reports
- Print a Report
The following reports are available:

**Address Book (MFC models)**
The Address Book report prints an alphabetical list of names and numbers stored in the Address Book memory.

**Fax Journal (MFC models)**
The Fax Journal prints a list of information about your last 200 incoming and outgoing faxes. (TX means Transmit, RX means Receive)

**User Settings**
The User Settings report prints a list of your current settings.

**Printer Settings**
The Printer Settings report prints a list of your current printer settings.

**Network Configuration (Models with network functionality)**
The Network Configuration report prints a list of your current network settings.

**Print File List**
The Print File List prints a list of the fonts and print macros stored in the machine.

**Drum Dot Print**
The Drum Dot Print prints the drum dot sheet, which helps when it is time to clean the drum unit.

**WLAN Report (Models with wireless network functionality)**
The WLAN Report prints the wireless LAN connectivity diagnosis.

**Caller ID history (MFC models)**
The Caller ID history report prints a list of the available Caller ID information for the last 30 received faxes and telephone calls.

To print the Caller ID list, use the Print Report option in the caller ID setting menu.

- Network Management Software and Utilities
What is Web Based Management?

Web Based Management is a utility that uses a standard web browser to manage your machine using the Hyper Text Transfer Protocol (HTTP) or Hyper Text Transfer Protocol over Secure Socket Layer (HTTPS). Type your machine's IP address into your web browser to access and change your print server settings.

- We recommend Microsoft Internet Explorer 11/Edge for Windows and Safari 9/10 for Mac. Make sure that JavaScript and Cookies are always enabled in whichever browser you use.
- You must use the TCP/IP protocol on your network and have a valid IP address programmed into the print server and your computer.

The actual screen may differ from the screen shown above.

Related Information

- Change Machine Settings Using Web Based Management
Access Web Based Management

- We recommend using the HTTPS security protocol when configuring settings using Web Based Management.
- When you use HTTPS for Web Based Management configuration, your browser will display a warning dialog box.

1. Start your web browser.
2. Type "http://machine's IP address" in your browser's address bar (where "machine's IP address" is the machine's IP address).
   - For example: http://192.168.1.2
   - If you are using a Domain Name System or enable a NetBIOS name, you can type another name, such as "SharedPrinter" instead of the IP address.
     - For example: http://SharedPrinter
     If you enable a NetBIOS name, you can also use the node name.
     - For example: http://brnxxxxxxxxxxxx
     The NetBIOS name can be found in the Network Configuration Report.
- For Mac, access Web Based Management by clicking the machine's icon on the Status Monitor screen.

3. No password is required by default. Type a password if you have set one, and then click Submit.

You can now change the print server settings.

If you change the protocol settings, you must restart the machine after clicking Submit to activate the configuration.

Related Information

- Change Machine Settings Using Web Based Management

Related Topics:
- Print the Network Configuration Report
Set a Login Password for Web Based Management

We recommend setting a login password to prevent unauthorised access to Web Based Management.

1. Start your web browser.

2. Type "http://machine's IP address" in your browser's address bar (where "machine's IP address" is the machine's IP address).
   For example:
   http://192.168.1.2
   - If you are using a Domain Name System or enable a NetBIOS name, you can type another name, such as "SharedPrinter" instead of the IP address.
     - For example:
       http://SharedPrinter
       If you enable a NetBIOS name, you can also use the node name.
       - For example:
         http://brnxxxxxxxxxxxx
         The NetBIOS name can be found in the Network Configuration Report.
   - For Mac, access Web Based Management by clicking the machine's icon on the Status Monitor screen.

3. No password is required by default. Type a password if you have set one, and then click.

4. Click Administrator.

5. Type the password you want to use in the Enter New Password field (8 to 32 characters).

6. Retype the password in the Confirm New Password field.

7. Click Submit.

In the future, every time you access Web Based Management, type the password in the Login field, and then click.

After configuring the settings, log off by clicking.

If you have not previously set a login password, you can also set a password by clicking the Please configure the password button on the machine's web page.

Set Up the Brother Machine from Your Computer (Windows)

Related Models: MFC-7895DW

If Secure Function Lock is set to On, you cannot use Remote Setup.

1. Do one of the following:
   - Windows 7
     Click (Start) > All Programs > Brother > Brother Utilities.
     Click the drop-down list and select your model name (if not already selected). Click **Tools** in the left navigation bar, and then click **Remote Setup**.
   - Windows 8 and Windows 10
     Launch **Brother Utilities**, and then click the drop-down list and select your model name (if not already selected). Click **Tools** in the left navigation bar, and then click **Remote Setup**.

     The Remote Setup Program window appears.

2. Configure the settings as needed.

   ![Remote Setup Program](image)

   **Export**
   
   Click to save the current configuration settings to a file.
Click **Export** to save your address book or all settings for your machine.

**Import**
Click to import a file and read its settings.

**Print**
Click to print the selected items on the machine. You cannot print the data until it is uploaded to the machine. Click **Apply** to upload the new data to the machine, and then click **Print**.

**OK**
Click to start uploading data to the machine, and then exit the Remote Setup Program. If an error message appears, confirm that your data is correct, and then click **OK**.

**Cancel**
Click to exit the Remote Setup Program without uploading data to the machine.

**Apply**
Click to upload data to the machine without exiting the Remote Setup Program.

3. Click **OK**.

- If your computer is protected by a firewall and is unable to use Remote Setup, you may need to configure the firewall settings to allow communication through port numbers 137 and 161.
- If you are using Windows Firewall and you installed the Brother software and drivers from the installation disc, the necessary firewall settings have already been set.

<td>12.1 kg</td>
</tr>
<tr>
<td>(MFC-7895DW)</td>
<td>12.8 kg</td>
</tr>
</tbody>
</table>
### Noise Level

| Sound Pressure | Printing | • LpAm = 49 dB (A) |
| Printing (Quiet Mode) | • LpAm = 44 dB (A) |
| Ready | • LpAm = 30 dB (A) |

| Sound Power | Printing | • LWAd = 6.59 B (A) |
| Printing (Quiet Mode) | • LWAd = 6.11 B (A) |
| Ready | • LWAd = Inaudible |

### Temperature

| Operating | • From 10°C to 32°C |
| Storage | • From 0°C to 40°C |

### Humidity

| Operating | • 20 to 80% (without condensation) |
| Storage | • 35 to 85% (without condensation) |

### ADF (automatic document feeder)

(DCP-L2550DW/DCP-7190DW/DCP-7195DW/MFC-7895DW)

- Up to 50 sheets
- For best results we recommend:
  - Temperature: 20 to 30 °C
  - Humidity: 50 to 70%
  - Paper: 80 g/m²

1 Measured diagonally.
2 USB connections to computer
3 Measured according to IEC 62301 Edition 2.0.
4 Power consumption varies slightly depending on the usage environment.
5 To ensure the high print quality, the maximum ambient temperature we recommend is 32 °C. The maximum ambient temperature to safely use this machine is 35 °C.

### Document Size Specification

| Document Size | ADF Width ¹ | • 105 mm to 215.9 mm |
| ADF Length ¹ | • 147.3 mm to 355.6 mm |
| Scanner Glass Width | • Maximum 215.9 mm |
| Scanner Glass Length | • Maximum 300 mm |

1 ADF models only

### Print Media Specifications

| Paper Size | • A4, Letter, B5 (JIS), A5, A5 (Long Edge), A6, Executive, 16K (195x270mm) |
| Paper Weight | • 60 to 163 g/m² |
| Maximum Paper Capacity | • Up to 250 sheets of 80 g/m² Plain Paper |

| Paper Size | • Width: 76.2 to 215.9 mm |
| Length: |
### Paper Input

| Manual Feed Slot (DCP-7090DW/DCP-L2535DW/DCP-L2550DW/DCP-7190DW) | 127 to 355.6 mm  
  - Envelope: COM-10, DL, C5, Monarch |

| Paper Weight | • 60 to 230 g/m² |
| Maximum Paper Capacity | • One sheet at a time |

### Multi-Purpose Tray (MP tray) (DCP-7195DW/MFC-7895DW)

| Paper Type | • Plain Paper, Thin Paper, Thick Paper, Thicker Paper, Recycled Paper, Bond, Label, Envelope, Env. Thin, Env. Thick |
| Paper Size | • Width: 76.2 to 215.9 mm  
  - Length: 127 to 355.6 mm  
  - Envelope: COM-10, DL, C5, Monarch |
| Paper Weight | • 60 to 230 g/m² |
| Maximum Paper Capacity | • Up to 30 sheets of 80 g/m² Plain Paper  
  • Envelope: 2 envelopes |

### Paper Output

| Face Down Output Tray | • Up to 120 Sheets (face down delivery to the face down output paper tray) |
| Face Up Output Tray | • One sheet (face up delivery to the face up output tray) |

| 2-sided Automatic 2-sided Printing | Paper Type | • Plain Paper, Thin Paper, Recycled Paper |
| Paper Size | • A4 |
| Paper Weight | • 60 to 105 g/m² |

1 For labels, we recommend removing the printed sheets from the output paper tray immediately after they exit the machine to avoid the possibility of smudging.

2 Calculated with 80 g/m² in a temperate, non humid environment.

### Fax Specifications

### NOTE

This feature is available for MFC models.

| Compatibility | • ITU-T Super Group 3 |
| Coding System | • MH / MR / MMR / JBIG |

1 The print speed may change depending on the type of document you print.
2 Print speed may be slower when the machine is connected by wireless LAN.
3 From Ready mode and standard tray

**Interface Specifications**

| USB 1 2 | • Hi-Speed USB 2.0 |
|         | Use a USB 2.0 interface cable that is no more than 2 metres long. |
| LAN     | • (DCP-L2550DW/DCP-7190DW/DCP-7195DW/MFC-7895DW) |
|         | 10Base-T/100Base-TX 3 |
| Wireless LAN | • IEEE 802.11b/g/n (Infrastructure Mode) |
|           | IEEE 802.11g/n (Wi-Fi Direct®) |
| NFC      | • (DCP-7195DW/MFC-7895DW) |
|         | Yes |

1 Your machine has a USB 2.0 Hi-Speed interface. The machine can also be connected to a computer that has a USB 1.1 interface.
2 Third party USB ports are not supported.
3 Use a straight-through Category 5 (or greater) twisted-pair cable.

**Supported Protocols and Security Features**

**Ethernet**

10Base-T/100Base-TX

**Wireless LAN**

IEEE 802.11b/g/n (Infrastructure Mode), IEEE 802.11g/n (Wi-Fi Direct)
Protocols (IPv4)
ARP, RARP, BOOTP, DHCP, APIPA(Auto IP), WINS/NetBIOS name resolution, DNS Resolver, mDNS, LLMNR responder, LPR/LPD, Custom Raw Port/Port9100, SMTP Client, IPP/IPPS, FTP Client and Server, CIFS Client, SNMPv1/v2c/v3, HTTP/HTTPS server, TFTP client and server, ICMP, Web Services (Print/Scan), SNMP Client

Protocols (IPv6)
NDP, RA, DNS resolver, mDNS, LLMNR responder, LPR/LPD, Custom Raw Port/Port9100, IPP/IPPS, SMTP Client, FTP Client and Server, CIFS Client, SNMPv1/v2c/v3, HTTP/HTTPS server, TFTP client and server, ICMPv6, SNMP Client, Web Services (Print/Scan)

Network Security (Wired)
SMTP-AUTH, SSL/TLS (SMTP, HTTP, IPP), SNMP v3

Network Security (Wireless)
SMTP-AUTH, SSL/TLS (SMTP, HTTP, IPP), SNMP v3

Wireless Network Security
WEP 64/128 bit, WPA-PSK (TKIP/AES), WPA2-PSK (TKIP/AES)(Wi-Fi Direct supports WPA2-PSK (AES) only)

Wireless Certification
Wi-Fi Certification Mark License (WPA™/WPA2™ - Personal), Wi-Fi Protected Setup (WPS) Identifier Mark License, Wi-Fi CERTIFIED™ Wi-Fi Direct

How to Enter Text on Your Brother Machine

DCP-7090DW/DCP-L2535DW/DCP-L2550DW/DCP-7190DW

When text is required, enter characters on the machine. The characters that are available may differ depending on the operation you perform.

- Hold down or repeatedly press ▲ or ▼ to select a character from this list:
  0123456789abcdefghijklmnopqrstuvwxyzABCDEFGHIJKLMNOPQRSTUVWXYZ(space)!#$%&'()*+,-./:;<=>?@[]^_`

- Press OK when the character or symbol you want is displayed, and then enter the next character.
- Press Clear to delete characters entered incorrectly.

DCP-7195DW/MFC-7895DW

- When you must enter text on your Brother machine, a keyboard appears on the LCD.
- The characters that are available may differ depending on your country.
- The keyboard layout may differ depending on the operation you perform.

- Press A 1 @ to cycle between letters, numbers and special characters.
- Press ▲ aA to cycle between lowercase and uppercase letters.
- To move the cursor to the left or right, press ▼ or ▲.

Inserting spaces
- To enter a space, press [Space].

Making corrections
- If you entered a character incorrectly and want to change it, press ▼ or ▲ to move the cursor to the incorrect character and press X. Enter the correct character.
- To insert a character, press ▼ or ▲ to move the cursor to the correct place, and then enter the character.
- Press X for each character you want to erase, or press and hold X to erase all the characters.
