Important Notice for Your Network Security: Default Login Password Change

The new default login password to manage machine settings is \textit{initpass}.

We recommend changing the default login password in order to protect your machine from unauthorized access, and to make the following features and software* more secure:

- Web Based Management
- BRAdmin Light/BRAdmin Professional
- Remote Setup Software (via a network only)
- Firmware Update Tool

To change the password:

1. Start your web browser.
2. Type “http://machine’s IP address” in your browser’s address bar (where “machine’s IP address” is the IP address of the machine or the print server name).
   \textit{For example:} http://192.168.1.2
3. In the \textbf{Login} field, type the default login password \textit{initpass}.
4. Click the \textbf{Administrator} tab.
5. In the \textbf{Enter New Password} field, type the password you want to use.
   If necessary, please write down the password and store it in a secure place.
6. In the \textbf{Confirm New Password} field, retype the new password.
7. Click \textbf{Submit}.

*Features and software may vary depending on your model.

For more information about your machine’s network features and software, visit \texttt{support.brother.com}, go to your model’s \textbf{Manuals} page, and view the Network Security section in your model’s \textit{Online User’s Guide} or \textit{Network User’s Guide}.
