Thank you for purchasing this cutting machine. This guide provides setup instructions so that you can use a wireless network to send data created in CanvasWorkspace to your cutting machine (hereafter referred to as “machine”) as well as save data that you have edited on your machine to CanvasWorkspace. Carefully read the instructions in this guide and complete the setup to easily transfer data without the need for any device such as a USB flash drive.

Before using this machine, carefully read the “IMPORTANT SAFETY INSTRUCTIONS” in “Product Safety Guide”.

For basic operations of your machine, refer to “Operation Manual”. The Operation Manual can be downloaded from <http://s.brother/cmoae/>.

For information on the operations of CanvasWorkspace, refer to the “Help” menu in CanvasWorkspace. In addition, after you have finished reading this guide, store it where it can quickly be accessed for future reference.

With this function, patterns edited in the dedicated application CanvasWorkspace can be transferred to the machine via a wireless network connection.

For details on transferring pattern data, refer to the Operation Manual.

Perform the setup with the following steps.

1. **Set up Wireless Network Connection**
2. **Login to CanvasWorkspace Internet version.**
   - In order to use CanvasWorkspace, a CanvasWorkspace (formerly ScanNCutCanvas) Login ID is necessary. If you do not have a free account, go to <http://CanvasWorkspace.Brother.com> to create a new account.
3. **Register machine under CanvasWorkspace.**
Quick Wireless Network Setup Instructions

For quick and easy instructions on how to set up your wireless network, please follow the steps below. For more detailed setup procedure, please refer to page 6, and if a connection is not established correctly and an error message appears, see “Error codes/Error messages” on page 13.

Requirements for the wireless network connection
The wireless network connection complies with IEEE 802.11 n/g/b standards and uses the 2.4 GHz frequency.

The Wireless Network Name (SSID) and Password (KEY)* for your wireless access point/router are required to connect your machine to a wireless network. Find this information and note it first.
Make sure that you have the right password and note some password are case (upper case & lower case) sensitive.

* Your network name selection should match the wireless network that your PC or mobile device is connected.

1 Turn on the machine.

When the following message appears, touch the “OK” key.

2 Touch ☁ in the home screen.

3 Select “ON” for “WLAN Enable”.

4 Under “Network” settings screen as shown below, touch “Setup Wizard”.

Available Network Name (SSID) will be displayed.

For step 5 & 6 please refer to “Requirements for the wireless network connection” before step 1.
You’ll need your Wireless Network Name (SSID) and Network Password (Network Key).

5 Select your Network Name (SSID), and then touch the “OK” key.

6 Type in the Network Password (Key), and then touch the “OK” key.
7 When the message shown below appears, touch the “Yes” key.

![Yes/No](image)

8 When a connection is established, the following message appears, touch the “Next” key.

![Connected to WLAN](image)

9 Once you have completed reading the message appears on the following screen, touch the “Next” key.

![Register the connection between](image)

10 After the following screen, describing how to obtain the PIN code, appears, leave the screen displayed, and then continue with the following operation using CanvasWorkspace Internet version.

![Your machine number appears on your machine in the screen shown in step 10](image)

12 Click 🌐 in the upper-right corner of the screen.

![The page for managing your account appears.](image)

13 Click “Machine(s) Registration”.

![Click “Machine(s) Registration”.](image)

14 Click “Register a New Machine”.

![Click “Register a New Machine”.](image)

15 Type in your machine number, and then click the “OK”.

![Type in your machine number, and then click the “OK”.](image)

11 Open CanvasWorkspace Internet version (http://CanvasWorkspace.Brother.com) on your computer and then log in.

![Note](image)

- First time users should obtain a free account.
- If you already have an account with CanvasWorkspace (formerly ScanNCutCanvas), you can use the same login ID and password to login.

![Memo](image)

- Your machine number appears on your machine in the screen shown in step 10 describing how to obtain the PIN code.
16 Note the four-digit PIN code that appears on the screen.

17 Go back to your machine's screen and then touch the “OK” key.

18 Type in the four-digit PIN code that appeared in the CanvasWorkspace screen, and then touch the “OK” key.

19 Touch the “OK” key.

The account registration screen appears.

- Touch twice to go back to the home screen.

The Wireless network connection has completed! Now, you can start transfer the data between your cutting machine and CanvasWorkspace via a wireless network connection. For details on transferring the data, refer to Operation Manual.
The following procedures are detailed information for network settings.

### Activate the Wireless Network

1. **Turn on the machine.**

   ![Turn on the machine]

   ► When the following message appears, touch the “OK” key.

2. **Touch ** in the home screen.**

   ![Touch in the home screen]

   ► The network settings screen appears.

   **Memo**

   - Another way to access the “Network” menu is to click located at the bottom of the home screen.

3. **Select “ON” for “WLAN Enable”.**

   ![Select “ON” for “WLAN Enable”]

   ► Your machine will begin to emit the wireless network signal.

### Set up the Wireless Network

Wireless LAN connection can be set up by using the wizard (recommended) or alternative method.

#### Requirements for the wireless network connection

The wireless network connection complies with IEEE 802.11 n/g/b standards and uses the 2.4 GHz frequency.

**Memo**

- A wireless network cannot be set up with WPA/WPA2 Enterprise. For the authentication methods your machine supports, see “Err-03” on page 14.

#### Connect Using Setup Wizard (Recommended)

1. **The Wireless Network Name (SSID) & Network Password (KEY)* are required to connect your machine to a wireless network.**

   * Network Password is also described as the Network Key, Security Key, or Encryption Key.

   ![Connect Machine to a Wireless Network]

<table>
<thead>
<tr>
<th>Network Name (SSID)</th>
<th>Network Password (Network Key)</th>
</tr>
</thead>
</table>
Note
• If you do not know this information (Network Name (SSID) and Network Password (Key)), you cannot continue the wireless setup.
• How can I find this information?
  1) You should see the documentation provided with your wireless access point/router.
  2) The default Network Name (SSID) could be the manufacturer’s name or the model name.
  3) If you do not know the security information, please consult the router manufacturer, your system administrator, or internet provider.
  4) Some Wireless Network Name (SSID) and Network Password (Key) are case (upper case and lower case) sensitive. Please properly record your information.

2 Touch in the home screen.

The network settings screen appears.

Memo
• Another way to access the “Network” menu is to click located at the bottom of the home screen.

3 Under “Network” settings screen as shown below, touch “Setup Wizard”.

Available Network Name (SSID) will be displayed.

4 Select your Network Name (SSID), and then touch the “OK” key.

The screen for entering the Network Password (Key) appears.

Note
• If the desired Network Name (SSID) is not displayed, specify it as described below.
  1) Select “[New SSID]”, and then touch the “OK” key.
  2) Type in the desired Network Name (SSID), and then touch the “OK” key.
  3) Specify the authentication method and encryption mode and then touch the “OK” key.

Memo
• appears beside a previously connected network from the list of available networks. Since the Network Password (Key) has been saved for the network beside , a connection to that network can be re-established without having to re-enter the connection information (Network Password, etc.).
• The previously entered Network Password (Key) for a maximum of 12 connections are saved with “[Saved SSID]”. Touch the “[Saved SSID]” key to display the connection information.

5 Type in the Network Password (Key) noted in step 1, and then touch the “OK” key.

1 Character input display
2 Character keys
3 Uppercase/lowercase selection key
4 Space key
5 Letter/number/special character selection key
6 Backspace key (Deletes the character at the cursor’s position.)
7 Cursor keys (Move the cursor to the left or right.)
When the message shown below appears, touch the “Yes” key.

The following screen appears when a connection is established.

Touch the “Next” key, and then continue with “Register Machine Under CanvasWorkspace” on page 10.

Note

- If a connection was not successfully established:
  - If the message “Wrong Network Key: Err-04” appeared, the Network Password (Key) may have been entered incorrectly. Touch the “OK” key, and then repeat the procedure from step 5 of “Connect Using Setup Wizard (Recommended)” on page 6.
  - For details on other causes, see “Error codes/Error messages” on page 13.

- While connected, the strength of the signal is indicated by the blue icon in the upper-left corner of screens such as the home screen.
  - : Strong signal
  - : Medium signal
  - : Weak signal
  - : No signal

Memo

- If you have already completed the machine registration under CanvasWorkspace, the following screen appears. Touch the “OK” key to complete the wireless network setup.

Connect Using “WLAN Assistant Wizard” (WAW).

The wireless network can be set up using the dedicated application “WLAN Assistant Wizard” (WAW). Download the application from http://s.brother/cuoad/, and then follow the instructions that appear in the computer screen in order to complete the setup.

After a connection is established, touch the “Next” key, and then continue with “Register Machine Under CanvasWorkspace” on page 10.
Check the Wireless Network Setup/Status

Follow these instructions when you can't establish the wireless network connection.

1 Under “Network” settings screen as shown below, touch “WLAN Status”.

The wireless network connection status, protocol, signal strength and Network Name (SSID) are displayed.

- Displays the connection status. When “Active (xxx)” is indicated: The machine is connected to a wireless network. The characters within the parentheses indicate the protocol of the wireless network being used.
- Displays the wireless signal strength; communication speed and channel being used.
- Displays the Network Name (SSID).
- Displays the communication mode. The communication mode is fixed to the infrastructure mode.

Using the “Others” Menu

The “Others” menu is at the bottom of the network settings screen.

The “Others” menu contains the following items.

1 TCP/IP can be manually entered.
2 Displays the MAC address.
3 All applied network settings will be reset to manufacturers original settings when the machine was purchased. Any information you inputted will be removed (erased). After setting this function, turn the machine off, then on again.
4 Use this when proxy settings are required.
Register Machine Under CanvasWorkspace

Once you have registered your machine under CanvasWorkspace, you can now transfer data to and from CanvasWorkspace and your machine.

This section describes the procedure for linking a machine with a specific number to a CanvasWorkspace login ID.

If the setup is not completed correctly and an error message appears, see “Error codes/Error messages” on page 13.

Note

- A computer that is connected to the network and can run CanvasWorkspace is required.
- Before continuing with this procedure, setup for the connection between your machine and wireless network must be completed. If your machine is not connected to the network, first follow the procedure in “Connect Machine to a Wireless Network” on page 6.

In the following procedures, [MACHINE] indicates operations performed from your machine, and [COMPUTER] indicates operations performed in CanvasWorkspace.

[MACHINE]

1. The following screen message will appear after the wireless network connection setup, once you have completed reading the message touch the “Next” key.

[MACHINE]

2. After the following screen, describing how to obtain the PIN code, appears, leave the screen displayed, and then continue with the next [COMPUTER] operation.

[COMPUTER]

The screens in the following descriptions are those that appear when CanvasWorkspace is opened on a computer.

3. Open CanvasWorkspace Internet version (http://CanvasWorkspace.Brother.com) on your computer and then log in.

Note

- First time users should obtain a free account.
- If you already have an account with CanvasWorkspace (formerly ScanNCutCanvas), you can use the same login ID and password to login.
4 Click  in the upper-right corner of the screen.  

![Image](image1.png)

► The page for managing your account appears.

5 Click “Machine(s) Registration”.

![Image](image2.png)

6 Click “Register a New Machine”.

![Image](image3.png)

Note

• If the maximum amount of registered machines has been reached, select the registered machine that you are not using and click “Remove” in the “Registered Machine Information” screen, and then register the new machine.

7 Type in your machine number, and then click the “OK” button.

![Image](image4.png)

Memo

• Your machine number appears on your machine in the screen shown in step 2 describing how to obtain the PIN code.

► A four-digit PIN code appears in the screen.

[MACHINE]

8 Touch the “OK” key.

![Image](image5.png)

► The PIN code input screen appears.

9 Type in the four-digit PIN code that appeared in the CanvasWorkspace screen, and then touch the “OK” key.

![Image](image6.png)

► The following screen appears.
Touch the “OK” key.

The account registration screen appears.

1. CanvasWorkspace login ID linked to your machine
2. Touch this key to link your machine with a different CanvasWorkspace login ID. Then perform the registration operation again, referring to “Deleting the linked CanvasWorkspace login ID” on page 12.
3. Touch this key to delete the currently linked CanvasWorkspace login ID. For the detail, refer to “Deleting the linked CanvasWorkspace login ID” on page 12.

This completes the registration of your machine with CanvasWorkspace.

Note

- If an error occurs while transferring data, refer to “ERROR MESSAGES” in the Operation Manual.

For details on transferring data between CanvasWorkspace and your machine, refer to “Operation Manual”.

Deleting the linked CanvasWorkspace login ID

To completely delete a linked CanvasWorkspace login ID from the machine, follow the procedure below.

1. Touch .

Touch the “OK” key.

The CanvasWorkspace login ID is deleted, and the following screen appears.

Memo

- Touch the “Register” key to register your machine with CanvasWorkspace again.

For details on the procedure, refer to “Register Machine Under CanvasWorkspace” on page 10.

For details on the procedure, refer to “Register Machine Under CanvasWorkspace” on page 10.
How can I find the wireless security information (Network Name (SSID) and Network Password)

1) You should see the documentation provided with your wireless access point/router.
2) The default Network Name (SSID) could be the manufacturer’s name or the model name.
3) If you do not know the security information, please consult the router manufacturer, your system administrator, or internet provider.
4) Some Wireless Network Name (SSID) and Network Password (Key) are case (upper case and lower case) sensitive. Please properly record your information.

* The Network Password may also be described as the Network Key, Security Key or Encryption Key.
* If the wireless access point/router is not broadcasting the Network Name (SSID), the Network Name (SSID) will not automatically be detected. You will have to manually enter the Network Name (SSID).

Error codes/Error messages

The following table contains a list of the various messages that may appear during setup or while registering the machine with CanvasWorkspace as well as the appropriate solutions. Perform the necessary operation according to the instructions in the message or the solution described here. If the problem persists, contact the retailer who sold you this machine or the nearest authorized service center.

<table>
<thead>
<tr>
<th>Error code</th>
<th>Cause/Solution</th>
</tr>
</thead>
<tbody>
<tr>
<td>Err-01</td>
<td>The wireless network setting is not activated. Activate the wireless network. See “Activate the Wireless Network” on page 6</td>
</tr>
</tbody>
</table>
| Err-02     | The wireless access point/router cannot be detected.  
1. Check the following 4 points.  
   - Make sure that the wireless access point/router is powered on.  
   - Move your machine to an area with no items which obstruct the wireless network signal, such as metal doors or walls, or closer to the wireless access point/router.  
   - Temporarily place your machine within about 1 m (3.3 feet) from the wireless access point when you are configuring the wireless settings.  
   - If your wireless access point/router is using MAC address filtering, confirm the MAC address of this machine is allowed in the filter.  
2. If you manually entered the Network Name (SSID) and security information (Network Name (SSID)/authentication method/encryption method/Network Password (Network Key)), the information may be incorrect. Reconfirm the Network Name (SSID) and security information and re-enter the correct information as necessary. See “How can I find the wireless security information (Network Name (SSID) and Network Password)” on page 13 to confirm. |
