

Important Security Information

Factory Default Enabled Network Interfaces and Services*

Network Interfaces

- Ethernet: Network communication starts when a cable is connected.

Network Services

Service	Protocol	Description
Web server	HTTPS	The web server is used for viewing and changing the machine's information and settings through Web Based Management and Brother's management tools. It also supports printing using AirPrint and Artspira.
SNMP	SNMP v1/v2c	SNMP is used for viewing and changing the machine's information through Brother's management tools. In the factory default settings, only viewing is enabled.
LPD	LPD	LPD is primarily used for printing.
Port 9100 (Raw Port)	Port 9100	Port 9100 is primarily used for printing. It also supports viewing and changing the machine's information through Brother's management tools. In the factory default settings, only viewing is enabled.

*The above services may be disabled by default on some models.

You can disable these services in the left navigation bar on the Web Based Management page by selecting **Network > Network > Protocol**. If your model has the **Network** tab at the top of the screen, click this tab and select the **Protocol** option.

Product and Data Security

Product Installation

Unauthorised users may physically access or remotely manipulate the product through the network. Make sure you install the product in a secure location.

Personal Information

The personal information stored in the product may vary depending on the product - for example, it may include print data. Changing the product's settings may increase the risk of unauthorised access to the personal information. Make sure you review the content and impact of the settings before making any changes.

Using Telnet and TFTP

This product supports access to administrator information via Telnet and TFTP, but these protocols do not guarantee the secure network communications and are disabled by default. Make sure your network environment is protected against unauthorised access before enabling these protocols.

Other Information

Important

The available features depend on your model. For more information, see your model's Online User's Guide.

Trademarks

Apple, App Store, AirPrint, the AirPrint logo, Mac, macOS, iPadOS, iPad, iPhone, iPod touch, and Safari are trademarks of Apple Inc., registered in the U.S. and other countries.

Any trade names and product names of companies appearing on Brother products, related documents and any other materials are all trademarks or registered trademarks of those respective companies.
