The symbols used in this manual are as follows:

	Action NOT allowed		DO NOT touch a given portion of the product
	Mandatory action		Unplugging is required
	DO NOT disassemble the product		Alerts to the possibility of electrical shock

WARNING

Follow these guidelines to avoid the risk of fire, burns, injury, electric shocks, rupture, overheating, abnormal odours or smoke.

-  Always use the specified voltage and the suggested AC adapter (AD-E001) for the P-touch to prevent any damage or failure.
-  Do not touch the AC adapter and P-touch during a thunder storm.
-  Do not use the P-touch/AC adapter in places of high humidity such as bathrooms.
-  Do not damage, or place heavy objects on the power cord or plug. Do not forcibly bend or pull the power cord. Always hold the AC adapter when disconnecting from the power outlet.
-  Make sure that the plug is fully inserted in the power outlet. Do not use an outlet that is loose or damaged.
-  Do not allow the P-touch/AC adapter/power plug/batteries to get wet, for example, by handling them with wet hands or spilling liquids on to them.
-  Since loss of eyesight may result when leaked fluid from batteries gets into your eyes, immediately rinse your eyes with a large amount of clean water, and then seek medical attention.
-  Do not disassemble or modify the P-touch/AC adapter/batteries.
-  Do not allow a metal object to contact both the plus and minus ends of a battery.
-  Do not use sharp objects, such as tweezers or a metallic pen, to change the batteries.
-  Do not throw the batteries into fire or expose to heat.
-  Disconnect the AC adapter and remove batteries immediately and stop using the P-touch if you notice abnormal odour, heat, discolouration, deformation or anything unusual while using or storing it.

⚠ WARNING

- ⊘ Do not use a damaged or leaking battery as the fluid may get on your hands.
- ⊘ Do not use a deformed or leaking battery or one whose label is damaged. There is a possibility of it generating heat.
- ⊘ Do not touch metal parts around the print head immediately after printing.
- ⊘ When the P-touch is not being used, store it out of the reach of children. In addition, do not allow children to put any P-touch parts or labels in their mouths. If any object has been swallowed, seek medical attention.
- ❗ Do not use a damaged adapter cord or power plug.
- ❗ Do not use the P-touch if a foreign object enters the P-touch. If any foreign object enters the P-touch, disconnect the AC adapter and remove the batteries, and contact Brother customer service.
- ⊘ DO NOT touch the blade of the cutter unit.

⚠ CAUTION

Follow these guidelines to avoid personal injury, liquid leakage, burns or heat.

- ❗ If leaked fluid from batteries gets on your skin or clothes, immediately rinse them with clean water.
- ❗ Remove the batteries and disconnect the AC adapter if you do not intend to use the P-touch.
- ⊘ Do not use a battery other than that specified. Do not use combinations of old and new batteries or combinations of different types, different charging levels, different manufacturers or different models. Do not insert a battery with the polarity (+ and -) reversed.
- ⊘ Do not drop or hit the P-touch/AC adapter.
- ⊘ Do not press on the LCD display.
- ⊘ Do not put your finger inside the P-touch when you close the tape compartment cover or battery compartment cover.
- ❗ Before using Ni-MH rechargeable batteries, carefully read the instructions for the batteries and battery charger, and be sure to use them correctly.
- ❗ When using Ni-MH rechargeable batteries, charge the batteries with a specialised battery charger before using the batteries.
- ⊘ DO NOT open the tape compartment cover when operating the cutter unit.
- ⊘ DO NOT apply excessive pressure to the cutter unit.

General Precautions

- Depending on the location, material, and environmental conditions, the label may unpeel or become irremovable, or the colour of the label may change or be transferred to other objects. Before applying the label, check the environmental conditions and the material.
- Do not use the P-touch in any way or for any purpose not described in this guide. Doing so may result in accidents or damage to the P-touch.
- Use Brother TZe tapes with the P-touch.
- Only use a soft, dry cloth to clean the labeller; never use alcohol or other organic solvents.
- Use a soft wipe to clean the print head; never touch the print head.
- Do not put any foreign objects into the tape exit slot, AC adapter connector or USB port, etc.
- Do not place the P-touch/batteries/AC adapter in direct sunlight or rain, near heaters or other hot appliances, in any location exposed to extremely high or low temperatures (e.g., on the dashboard or in the back of your car) or high humidity, or in dusty locations.
- Do not try to print if the cassette is empty; it will damage the print head.
- Do not pull the tape while printing or feeding; it will damage the tape and the P-touch.
- It is recommended that you use the USB cable supplied with the P-touch. Should another USB cable need to be used, ensure it is of high quality construction.

■ When using six new AA alkaline batteries (LR6) or fully charged Ni-MH batteries (HR6)

Make sure that the poles are pointing in the correct directions. To remove the batteries, reverse the installation procedure.

NOTE

- For memory back up, we recommend using AA alkaline batteries (LR6) or Ni-MH batteries (HR6) together when using the AC adapter.
- To safeguard and backup the P-touch's memory, when the AC adapter is unplugged it is recommended to have AA alkaline batteries (LR6) or Ni-MH batteries (HR6) installed in the P-touch.
- When power is disconnected for more than two minutes, all text and format settings will be cleared. Any text files saved in the memory will also be cleared.
- Remove the batteries if you do not intend to use the P-touch for an extended period of time.

- Dispose of the battery at an appropriate collection point, not in the general waste stream. In addition, be sure to observe all applicable federal, state, and local regulations.

Creating a Barcode Label

NOTE

- The P-touch is not designed exclusively for creating barcode labels. Always check that barcode labels can be read by the barcode reader.
- For best results, print barcode labels in black ink on white tape. Some barcode readers may not be able to read barcode labels created using coloured tape or ink.
- Use the [大] setting for [寬度] whenever possible. Some barcode readers may not be able to read barcode labels created using the [小] setting.
- Continuously printing a large number of labels with barcodes can overheat the print head, which may affect printing quality.

Streaks or poor quality characters on printed labels generally indicates that the print head is dirty. Clean the print head using a cotton swab or the optional print head cleaning cassette (TZe-CL4).

NOTE

- Do not touch the print head directly with your bare hands.
 - Refer to the instructions provided with the print head cleaning cassette for directions on how to use it.

NOTE

- About once a year, wipe the cutter blade using a cotton swab slightly moistened with Isopropyl alcohol.
 - Do not touch the cutter blade directly with your bare hands.
