Definitions of Notes

We use the following symbols and conventions throughout this User's Guide:

 WARNING	WARNING indicates a potentially hazardous situation which, if not avoided, could result in death or serious injuries.
 CAUTION	CAUTION indicates a potentially hazardous situation which, if not avoided, may result in minor or moderate injuries.
IMPORTANT	IMPORTANT indicates a potentially hazardous situation which, if not avoided, may result in damage to property or loss of product functionality.
NOTE	NOTE specifies the operating environment, conditions for installation, or special conditions of use.
	Tips icons indicate helpful hints and supplementary information.
Bold	Bold style identifies buttons on the machine's control panel or computer screen.
<i>Italics</i>	Italicised style emphasises an important point or refers you to a related topic.
Courier New	Courier New font identifies messages shown on the machine's LCD.

General Precautions

RD Rolls

- Use Brother accessories and supplies (indicated by the  mark).
- If the label is affixed to a wet, dirty, or oily surface, it may peel off easily. Before affixing the label, clean the surface to which the label is affixed.
- Store the RD Roll in a cool and dark place and use it soon after opening the package.
- Do not expose the RD Roll to direct sunlight, high temperature, high humidity, wind, or dust as it may cause labels to peel off or discolour.
- Scratching the printed surface of the label with your fingernails or metal objects, or touching the printed surface with wet hands, can cause the colour to change or fade.
- DO NOT affix labels to people, animals, or plants. Never affix labels to public or private property without permission.
- As the last label of the RD Roll may not be printed correctly, each roll contains more labels than is indicated on the package.
- When a label is removed after being affixed to a surface, a portion of the label may remain.
- When a label is affixed, it may be difficult to remove the label.
- For warnings and safety precautions, see the *Product Safety Guide*.

LCD Overview

 A protective film is applied to the LCD.

1. Update icon (Network)

Indicates that updated templates, databases, and other data are available.

	There is new data.
 (flashing)	There is incomplete update data.
 (flashing)	Cannot connect to the server.

- Remote Data Update (FTP)

Allows you to connect your printer to the FTP server to perform template and database updates, and to execute commands to distribute update data among multiple printers connected to a network.

- a. Printer (FTP Client)
- b. Retrieval of update data from the FTP server
- c. FTP Server
- d. Settings file (updateinfo.ini)
- e. Files you want to update, such as template and database files (BLF/BIN files)

For more information regarding how to update, visit the Brother support website at support.brother.com.

2. Update icon (USB Flash Drive)

Indicates that updated templates, databases, and other data are available.

	There is new data.
 (flashing)	There is remaining update data.

- Local Data Update (USB Flash Drive)

Allows you to perform template and database updates and execute commands after reading the files from a USB Flash Drive connected to the printer.

- a. Printer
- b. Retrieval of update data
- c. USB Flash Drive
- d. Settings file (UPDATE.INI)
- e. Files you want to update, such as template and database files (BLF/BIN files)

For more information regarding how to update, visit the Brother support website at support.brother.com.

3. Print Head Status icon

	Normal state.
	The Print Head is disconnected or there is a problem with the Print Head.

4. Wireless Direct icon

	Wireless Direct mode is on. Your printer is not connected to the mobile device.
	Wireless Direct mode is on. Your printer is connected to the mobile device.

5. WLAN icon

	Your printer is connected to the network.
	Your printer is searching for the network.

6. Bluetooth icon

	Bluetooth mode is on. Your printer is not connected to the mobile device.
	Bluetooth mode is on. Your printer is connected to the mobile device.
 (flashing)	The Auto Reconnect function is on, but your printer is not connected to the mobile device.

- 7. Date display
- 8. Time display
- 9. Template

NOTE

The printer may malfunction if you try to configure it while it is processing or printing a print job.

-

Install the Coin Cell Battery

A coin cell battery is used as a backup power supply to maintain the settings for the internal clock. Battery power is consumed even if the printer is not in use.

A coin cell battery is installed in the printer.

1. Make sure you disconnect the printer from the electrical socket.
2. Turn the printer over.

3. Remove the insulation seal on the coin cell battery.

Related Information

- [Set Up Your Printer](#)

Set the Date and Time

1. Press **Menu**.
2. Press ▲ or ▼ to select the following:
 - a. Select [Settings]. Press **OK**.
 - b. Select [Set Clock]. Press **OK**.
3. Press ▲ or ▼ to set the year, and then press **OK**. Repeat this step for setting the month and day.
4. Press ▲ or ▼ to set the hour, and then press **OK**. Repeat this step for setting the minute.
5. Press ▲ or ▼ to select [AM], [PM], or [24], and then press **OK**.

To change the date and time format, select [Administration] > [Date Format] or [Administration] > [Time Format], and then specify the settings.

6. Press .

Related Information

- [Set Up Your Printer](#)

Load the RD Roll

1. Press and hold  to turn the printer off.
2. Pull up the release levers on both sides of the printer to unlock the Roll Compartment Cover.

3. Hold the printer by the front, and firmly lift the Roll Compartment Cover to open it.

CAUTION

Do not directly touch the Tear Bar with your hands. Doing so may result in injury.

4. Slide both Roll Guides outwards.

Rotate the adjuster dial towards you to lock the Roll Guides into place.

5. Insert the roll so that the label print side is facing up, as shown in the illustration.

- For fanfold paper
Insert the fanfold paper as shown in the illustration.

a. Print side

Adjust the Roll Guides when using fanfold paper.

6. Feed the end of the roll under the Media Guide Tips (1).
Position the end of the paper slightly out of the Label Output Slot.

7. Close the Roll Compartment Cover until it locks into place.

⚠ CAUTION

Be careful when closing the Roll Compartment Cover. There is a risk of injury if your finger gets pinched between the upper and lower parts of the cover.

IMPORTANT

- Do not leave any printed labels in the printer. Doing so will cause label jams.
- When not in use, remove any rolls from inside the printer and close the Roll Compartment Cover to prevent dust and debris from accumulating in the printer.

✓ Related Information

- [Set Up Your Printer](#)

Check the Sensor Position

When using RD or other types of rolls, you must check the sensor position based on the type of paper you are using. You can use other types of rolls in addition to the RD Rolls.

Die-cut Labels With No Black Mark

The transmissive/gap sensor detects the beginning of the label and feeds the label to the correct position.

- Align the slider with ▼ on the printer.

Die-cut Labels With Black Mark

The reflective/black mark sensor detects the mark and feeds the media to the correct position.

- Align the slider as shown in the illustration.

1. Back of media
2. Black mark
3. Reflective/black mark sensor

Receipt Paper With No Black Mark

The reflective/black mark sensor detects if paper roll is finished.

- Align the slider with ▼ on the printer.

Media With a Black Mark

The reflective/black mark sensor detects the mark and feeds the media to the correct position.

- Align the slider with the centre of the black mark on the paper.

1. Back of media
2. Black mark
3. 4 mm or more

Make sure there is at least 4 mm on the left and right of the centre of the black mark.

4. Centre of the black mark
5. Reflective/black mark sensor

When using media with the maximum width of 118 mm, make a black mark at least 12 mm long in from either the left or right edge of the paper so that the reflective/black mark sensor can detect the black mark. If the black mark is too short, it cannot be detected by the reflective/black mark sensor.

Media With Holes

The reflective/black mark sensor detects the hole and feeds the media to the correct position.

- Align the slider as shown in the illustration.

1. Back of media
2. Hole in media
3. Reflective/black mark sensor

Wristband

The reflective/black mark sensor detects the mark and feeds the media to the correct position.

- Align the slider as shown in the illustration.

1. Back of media
2. Black mark
3. Reflective/black mark sensor

Install Software

- [Install Printer Drivers and Software on a Computer](#)
- [Connect the Printer to a Computer](#)

Install Printer Drivers and Software on a Computer

To print from your computer, install the printer drivers, P-touch Editor, and other applications to your computer.

1. Go to install.brother and download the Software/Documentation installer.
2. Double-click the downloaded installer, and follow the on-screen instructions to proceed with the installation.

To connect the printer to a computer using a wireless connection, we recommend the following:

- When you turn the printer on for the first time after purchasing it or after resetting it, the printer enters the mode for configuring the wireless settings. Start the installation after turning the printer on.
- Make a note of the SSID (network name) and password (network key) of the wireless network in advance. If you cannot find this information, contact your network administrator or wireless access point/router manufacturer.
- To connect the printer to a computer using Wireless Direct, select USB connection during the installation. At the end of the installation, click the link for Wireless Direct.

3. Close the dialog box when the installation is complete.

To use the printer with a different connection method than the one selected during installation, use the installer again to reinstall the software and printer drivers, and select the new connection method.

- [Connect the Printer to a Computer Using Wi-Fi](#)
- [Connect the Printer to a Computer Using a Wired LAN](#)
- [Connect the Printer to a Computer Using Bluetooth Connection](#)

Connect the Printer to a Computer Using a USB Cable

1. Make sure the printer is turned off before connecting the USB cable.
2. Connect the USB cable to the USB Port on the back of the printer, and then to your computer.

3. Turn the printer on.

Related Information

- [Connect the Printer to a Computer](#)

Connect the Printer to a Computer Using Wi-Fi

The following Wi-Fi connection methods are available:

- >> [Infrastructure Mode](#)
- >> [Wireless Direct](#)
- >> [WPS \(Wi-Fi Protected Setup™\)](#)

Infrastructure Mode

Infrastructure Mode allows you to connect the printer to a computer via a wireless access point/router.

• Before You Begin

Configure the Wi-Fi settings of your printer to communicate with your wireless access point/router. After the printer is configured, computers on your network will have access to the printer.

- To connect the printer to your network, we recommend contacting your system administrator before installation. You must confirm your Wi-Fi settings before you proceed with this installation.
- To configure the Wi-Fi settings again, or if the status of the Wi-Fi connection for your printer is unknown, reset the Wi-Fi settings of the printer.
- When you turn the printer on for the first time after purchasing it or after resetting it, the printer enters the mode for configuring the wireless settings. Start the installation after turning the printer on.
- To achieve the best results with normal everyday printing, use the printer as close to the wireless access point/router as possible with minimal obstructions. Large objects and walls between the two devices as well as interference from other electronic devices can affect communication, or the data transfer speed of your printing.

1. Write down the SSID (network name) and password (network key) of your wireless access point/router.
2. Turn the printer on.
3. Start the installation and follow the on-screen instructions.

If the network selection screen appears, select the SSID that you wrote down.

When the connection between the printer and your wireless access point/router is established, computers on the same network as the printer have access to the printer.

Wireless Direct

Wireless Direct allows you to connect the printer to your computer directly without a wireless access point/router; the printer serves as a wireless access point.

1. Follow the on-screen instructions to select connecting via USB and proceed with the installation.
2. Set the printer to Wireless Direct mode.
 - From the LCD menu:
 - a. Press **Menu**.
 - b. Press **▲** or **▼** to select the following:
 - i. Select [WLAN]. Press **OK**.
 - ii. Select [WLAN (On/Off)]. Press **OK**.
 - c. Press **▲** or **▼** to select [On]. Press **OK**.
 - d. Press **▲** or **▼** to select the following:
 - i. Select [WLAN]. Press **OK**.
 - ii. Select [Network Mode]. Press **OK**.
 - e. Press **▲** or **▼** to select [Direct Mode]. Press **OK**.

 appears on the LCD.

- Using a Windows computer:
 - a. Launch the **Printer Setting Tool** on your computer.
 - b. Click the **Communication Settings** button.
 - c. Click **General > Communication Settings**.
 - d. Confirm the **Infrastructure and Wireless Direct** or **Wireless Direct** option is selected for the **Selected Interface** setting, and then confirm the **Wireless Direct** tab.
 - e. Click **Apply** to set the printer to Wireless Direct mode.
 - f. Exit the Printer Setting Tool.
- 3. Use your computer to select the SSID of your printer. Make sure your computer and the printer are connected via wireless connection.

The printer must be added to the computer. Follow the on-screen instructions to add the printer.

- The default SSID and password are as follows:
 - SSID: "DIRECT-*****_TD-4550DNWB" where ***** is the last five digits of the product serial number.
 - Password: 455***** where ***** is the last five digits of the product serial number.
- The Communication Settings menu in the Printer Setting Tool also allows you to apply the network settings changes to multiple printers.
- You cannot connect to the Internet on your computer via Wi-Fi while using Wireless Direct.

If your printer is connected successfully,  changes to .

WPS (Wi-Fi Protected Setup™)

If your wireless access point/router supports WPS, wireless settings and connections can be configured quickly.

1. Confirm that your wireless access point/router has the WPS symbol.

2. Place your printer within the range of your wireless access point/router.

The range may differ depending on your environment. See the instructions provided with your wireless access point/router.
3. Press **Menu**.
4. Press **▲** or **▼** to select the following:
 - a. Select [WLAN]. Press **OK**.
 - b. Select [WPS Button Push]. Press **OK**.

You can also configure the setting using the PIN code by selecting [WPS PIN Code]. For more information, see the instructions provided with your wireless access point/router.

5. Press **▲** or **▼** to select [Start]. Press **OK**.
6. Press the WPS button on your wireless access point/router.

When the connection is established, the WLAN icon appears on the printer's LCD.

- Computers on the same network as the printer have access to the printer.
- Your printer tries to connect using WPS for two minutes. If **OK** is pressed during that time, the printer continues trying to connect for an additional two minutes.

Related Information

- [Connect the Printer to a Computer](#)

Connect the Printer to a Computer Using a Wired LAN

To use a static IP address to connect your printer with a wired LAN connection, install the printer drivers and Printer Setting Tool, and then specify the wired LAN connection settings.

Network Cable

Use a straight-through Category 5 (or greater) twisted-pair cable for 10BASE-T or 100BASE-TX Fast Ethernet Network.

IMPORTANT

Do not connect this product to any LAN connection that is subject to overvoltages.

1. If on-screen instructions appear during the installation, make sure the printer is turned off before connecting the LAN cable.
2. Connect the LAN cable to the LAN Port on the back of the printer.
3. Turn the printer on.

Create Labels Using P-touch Editor (Windows)

To use your printer with your computer, install P-touch Editor and the printer driver.

For the latest drivers and software, go to your model's **Downloads** page on the Brother support website at support.brother.com.

1. Start the P-touch Editor .

- **Windows 10/Windows Server 2016:**

Click **Start** > **Brother P-touch** > **P-touch Editor 5.2**, or double-click the **P-touch Editor 5.2** icon on the desktop.

- **Windows 8/Windows 8.1/Windows Server 2012/Windows Server 2012 R2:**

Click the **P-touch Editor 5.2** icon on the **Apps** screen, or double-click the **P-touch Editor 5.2** icon on the desktop.

- **Windows 7/Windows Server 2008/Windows Server 2008 R2:**

Click **Start** > **All Programs** > **Brother P-touch** > **P-touch Editor 5.2**, or double-click the **P-touch Editor 5.2** icon on the desktop.

P-touch Editor starts.

2. Do one of the following:

- To open an existing layout, click **Open** (1).
- To connect a preset layout to a database, select the check box next to **Connect Database** (2).
- To create a new layout, double-click the **New Layout** pane (3), or click the **New Layout** pane (3) and then click →.
- To create a new layout using a preset layout, double-click a category button (4), or select a category button (4) and then click →.

To change how P-touch Editor starts, click **Tools** > **Options** in the P-touch Editor menu bar to display the **Options** dialog box. On the left side, select the **General** heading, and then the setting you want in the **Operations** list box under **Startup Settings**.

Create Labels and Print without Installing Software and Drivers

- [Print Using USB Interface \(Mass Storage Mode\)](#)
- [Print Image Data without Using the Printer Driver](#)

Print Using USB Interface (Mass Storage Mode)

The mass storage feature allows you to send a file to the printer using the USB interface, without installing a printer driver.

This feature is useful for:

- Applying printer settings saved in a command file (BIN file format) and adding templates (BLF file format) into your printer without using any software tools. Both types of files must be distributed by an administrator.
- Executing commands without installing the printer driver.
- Using a device with an operating system (including non-Windows operating systems) supporting a USB host feature to print and transmit data.

1. Confirm that the printer is turned off.
2. Press and hold **OK** and  at the same time until the Power LED lights in green and [Mass Storage Mode] appears on the LCD.
3. Connect the computer or mobile device to the printer via USB.
The printer's mass storage area appears as a folder on the computer or device's screen.

If the mass storage area does not appear automatically, see the instructions for the operating system of your computer or mobile device for information about accessing the mass storage area.

4. Drag and drop the file you want to copy to the mass storage area.
5. Press **OK**.
The commands in the command file are executed, and the Status LED flashes once in green. When finished, the Power LED lights in green.
6. To turn mass storage mode off, turn the printer off.

NOTE

- When the printer is turned off, mass storage mode is deactivated and any files in the mass storage area are deleted.
- This feature supports only BIN and BLF files.
- Do not create folders in the mass storage area. If a folder is created, files in the folder cannot be accessed.
- The capacity of the mass storage area is 16 MB.
- If multiple files are copied, the commands may not be executed.
- Only USB connection is available while the printer is in mass storage mode.
- Do not access other files in the mass storage area when executing a copied file.

Related Information

- [Create Labels and Print without Installing Software and Drivers](#)

Print Image Data without Using the Printer Driver

- The mass storage feature supports the JPEG image printing.
- The Object Push Profile (OPP) is used for printing via a Bluetooth connection.
- The printer converts a colour JPEG image to a monochrome image using a dithering process.
- When sending a monochrome JPEG image, the dithering process may produce a fuzzy image.
- To improve the image quality, try to turn any preprocessing of the JPEG image off.

- Only JPEG images can be printed. (Limited to files with the .jpg extension.)
- The maximum file size is 16 MB.
(2 MB when the mass storage feature is used.)
- The maximum resolution is as follows:
 - Height × Width = 36000 × 1280 dotsIf these limits are exceeded, the data received by the printer is discarded and not printed.
- Print is at 1 pixel = 1 dot.
- The printer performs binary processing (simple binary) to print the image.
- The image is printed with the height-to-width proportions of the received data.

Related Information

- [Create Labels and Print without Installing Software and Drivers](#)

Print Labels Distributed to Multiple Printers to Reduce Printing Time (Windows)

When printing a large number of labels, printing can be distributed among multiple printers, via USB or network connection, to reduce printing time.

- The Distributed Printing function can only be used with printers of the same model number.
- The number of pages is divided among the selected printers. If the specified number of pages cannot be evenly divided among the printers, it is divided in the order of the printers as shown.

- It may not be possible to detect information for a printer connected via a USB hub or print server. Before printing, enter the settings manually, and check if the printer can be used for printing.
- Depending on whether a router is used and the security features in use, such as a firewall, it may not be possible to use this function.
- We recommend performing a connection test for your operating environment. Contact your information technology manager or administrator for assistance.

1. In P-touch Editor, click **File > Print**.
2. Click **Properties**.
3. Click the **Advanced** tab, select the **Distributed Printing** check box, and then click **Settings**.

The **Distributed Printing Settings** dialog box appears.

4. Select the printers you want to use for distributed printing.

If multiple printers are connected, you can find the printer you want using its port name. The xxxxxxxxxxxx in BRNxxxxxxxxxxx in the port name indicates the MAC address/Ethernet address of the printer. The MAC address/Ethernet address can be checked by printing the printer setup information.

5. Right-click the selected printer or printers, and then click **Settings**. From the **Paper Size** drop-down list, select the label size.
If multiple printers have been selected, the same label size setting is applied to all selected printers.
6. Click **OK** to close the label size setting dialog box.
7. Click **OK** to close the **Distributed Printing Settings** dialog box.
The setup is completed.
8. Click **OK** to close the **Properties** dialog box.
9. Start printing.

Print Barcode Labels Using Crop Print (Windows)

You can print one or multiple barcodes from an A4 or Letter size PDF file. The Crop Print feature automatically identifies and then individually crops and prints the barcodes you specify.

- The Crop Print function is available only when printing from the Windows printer driver, and cannot be executed using P-touch Editor.
- The accuracy of the Crop Print feature depends on the user's environment, printing material, and label content.

Clear, black-and-white barcodes are recommended.

Some labels may not print correctly or may differ from the original data if the conditions are not optimal.

For more information, visit the Brother support website at support.brother.com.

Barcode Document Compatible with Crop Print (Windows)

To use the Crop Print function, create a barcode document and save it as a PDF file.

Make sure the final barcode PDF meets the following requirements:

Barcode Conditions for Product Labels

Item	Condition
Total barcode number	Between 1-99 barcodes
Barcode type	Use only barcodes compatible with the Crop Print feature.
Barcode position	Make sure barcodes are not tilted or on an angle. They must be parallel with the top and bottom of each page. Make sure barcodes start in the top left corner and run down the column, continuing at the top of the next column to the right.

Barcode Layout for Product Labels

Correct Barcode Layout	Incorrect Barcode Layout
	<p>Not identified (not aligned along the top margin)</p> 

Barcode Conditions for Shipping Labels

Item	Condition
Total barcode number	Between 1-9 barcodes
Barcode type	Use only barcodes compatible with the Crop Print feature.
Barcode position	Make sure barcodes are straight.

Barcode Layout for Shipping Labels

Cropping is performed when any of the following conditions are satisfied:

- The label is surrounded by ruled lines.
- The label includes horizontal lines that extend the entire width of the label.
- The label includes vertical lines that extend the full height of the label.

Correct Barcode Layout

Related Information

- [Print Barcode Labels Using Crop Print \(Windows\)](#)

Print Barcode Labels Using Crop Print (Windows)

Make sure your printer is connected to a computer or mobile device via a USB cable or network connection.

1. Open the barcode document PDF file you want to print.
2. Click **File > Print**.
3. Click the **Printer** drop-down list, and then select your printer.
4. In the **Page Sizing & Handling** section, select the **Actual Size** radio button.
5. Under **Orientation**, select the **Portrait** radio button.
6. Click **Properties**.
7. Click the **Basic** tab, and do one of the following:
 - For Die-cut labels, clear the **Cut Every** check box.
 - For Continuous Rolls, select the **Cut Every** check box.

8. Click the **Crop Print** tab, and select the **Automatically print individual labels with barcodes.** check box.

9. Select the **Extract individual labels with barcodes** option for product labels or select the **Crop barcodes, text, and other objects** option for shipping labels.
10. Click the **Label/Paper Size** drop-down list, and then select your label or paper size.
If you select the **Crop barcodes, text, and other objects** option, only 102 mm width paper is listed.

Select the closest label size to match the original size of the crop data. We recommend testing a sample before printing a large number of labels.

11. Click **OK**.

12. Print from the application's print screen.

- Do not enlarge or reduce the size of the barcode sheet. The barcodes may not be identified correctly.
 - When printing from Acrobat Reader, do the following:
 - In the **Page Sizing & Handling** section, clear the **Choose paper source by PDF page size** check box.
 - Under **Orientation**, select the **Portrait** radio button.
-

Transfer Templates or Other Data from the Computer to the Printer (Windows)

You can transfer templates, databases, and images from the computer to the printer.

 To transfer templates from a mobile device to the printer, see *Related Information*.

1. Connect the printer and the computer via a USB cable, and then turn the printer on.
The printer model name appears next to a printer icon in the folder view.
If you select the printer in the folder view, the current templates and other data stored in the printer appear.

 If a printer is disconnected or offline, it does not appear in the folder view.

2. Select the printer you want to transfer the template or other data to.

3. Right-click the **Configurations** folder, select **New**, and then create a new folder.

4. Do one of the following:

- Drag the template or other data you want to transfer and place it in the new folder.
- To transfer multiple templates or other data, drag the files you want to transfer, and then place them in the new folder. Each file is assigned a key number (memory location in the printer) when it is placed in the new folder.

Data type	Maximum number of transferable items	Restriction details
Template	255	Each template can contain a maximum of 255 objects.
Database	255	<ul style="list-style-type: none"> • Only CSV files can be transferred. • Each CSV file can contain a maximum of 65000 records.
Image (transferred symbols)	255	<ul style="list-style-type: none"> • Only BMP files can be transferred. • Monochrome BMP files are recommended. • The size limit is 2560 x 2560 pixels.

Data type	Maximum number of transferable items	Restriction details
		<ul style="list-style-type: none"> Wide images may be cropped.

- You can confirm the available space in the transfer file memory by printing the Printer Setting Report. See **Available memory** in the report for the available space. The available space appearing in **Available memory: ****B** may be different from the actual available space.
- You can view the templates and other data by selecting:
 - The folder in the **Configurations** folder
 - All Contents**
 - One of the categories under **Filter**, such as **Layouts**

5. To change the key number assigned to an item, right-click the item, select the **Key Assign** menu, and then select the key number you want.

- Except for the data in databases, all data transferred to the printer is assigned a key number.
- If the template or other data transferred to the printer has the same key number as another template already saved in the printer, the new template overwrites the old one. You can confirm the assigned template numbers saved in the printer by backing up the templates or other data.
- If the printer memory is full, remove one or more templates from the printer's memory.

6. To change the template names or other data you want to transfer, click the item you want, and then type the new name.

The number of characters used for the template names may be limited depending on the printer model.

7. Select the folder containing the templates or other data you want to transfer, and then click **Transfer**.

A confirmation message appears.

- You can also transfer individual items to the printer without adding them to a folder. Select the template or other data you want to transfer, and then click **Transfer**.
- Multiple items and folders can be selected and transferred in one operation.

8. Click **OK**.

The selected items are transferred to the printer.

P-touch Template Operations Overview

P-touch Template mode allows you to insert data into text and barcode objects from a downloaded template using other devices connected to the printer.

- P-touch Template mode is also compatible with other input devices like a scale, testing machine, controller, or a programmable logic device.
- For more information, see the *P-touch Template Manual/ Command Reference* (English only). You can download the latest version from the Brother support website at support.brother.com/manuals.

Basic Operations

Standard Template Printing

Download frequently used templates or images and scan a barcode to select which one to print.

Advanced Template Printing

Download a template and scan a barcode to print a copy or to insert the scanned data into a different template.

Database Lookup Printing

Download a database linked to a template and scan a barcode to find a record to insert into the template and print.

See *Related Information*.

Advanced Operations

Numbered (Serialised Number) Printing

Increment printed text or barcodes in any downloaded template.

See *Related Information*.

Specify the Barcode Scanner Settings (Windows)

Before connecting the barcode scanner to the printer, specify the barcode scanner settings using the P-touch Template Settings (in the Printer Setting Tool).

1. Connect the printer and the computer via a USB cable, and then turn the printer on.
2. Start the Printer Setting Tool.
 - **Windows 10/Windows Server 2016:**
Click **Start > Brother > Printer Setting Tool**.
 - **Windows 8/Windows 8.1/Windows Server 2012/Windows Server 2012 R2:**
Click the **Printer Setting Tool** icon on the **Apps** screen.
 - **Windows 7/Windows Server 2008/Windows Server 2008 R2:**
Click **Start > All Programs > Brother > Label & Mobile Printer > Printer Setting Tool**.
3. Click the **P-touch Template Settings** button.
4. Select the settings you want, and then click **Set**.

- By default, printing begins when the code "^FF" is scanned from a barcode using a barcode scanner. (This can be changed with the settings highlighted by (A) in the previous image.)
If the **Received Data Size** option is selected with the number of bytes setting, the template is printed after the specified number of bytes have been scanned.
- Because the print mode setting returns to raster mode each time you print from the computer, you must change the setting to template mode again.
- If you turn the printer off and then turn it on again, the printer starts up in template mode.

Related Information

- [Print Labels Using Barcode Scanner or Other Devices \(P-touch Template\)](#)

Connect the Printer to a Barcode Scanner Using Bluetooth (Windows)

We recommend using a reliable high-quality barcode scanner and checking the barcode scanner specifications before selecting a model.

Recommended barcode scanner selection criteria: Bluetooth Version 2.1 + EDR (Class 1) models supporting SPP or OPP profiles

- For P-touch Template mode, templates must first be downloaded from a computer to the printer using P-touch Transfer Manager.
- The barcode scanner should be programmed to use the English keyboard. For beginners, the barcode scanner should be programmed to scan data with no prefix or suffix characters. For advanced users, the prefix and suffix characters can be scanned and used as commands with the printer for creating customised templates.
- Contact the manufacturer for more information on how to use and program a specific barcode scanner model.
- Follow the recommendations of the manufacturer of your Bluetooth-equipped devices, such as barcode scanners, and install any necessary hardware and software.
- The Bluetooth connection settings are saved even after the printer is turned off.

1. Press **Menu**.
2. Press **▲** or **▼** to select the following:
 - a. Select [Bluetooth]. Press **OK**.
 - b. Select [Bluetooth (On/Off)]. Press **OK**.
3. Press **▲** or **▼** to select [On]. Press **OK**.

 appears on the LCD.

4. Pair the printer with the barcode scanner via Bluetooth.

If the PIN of the printer is required, the default PIN is the last four digits of the product serial number. You can change the PIN using the Communication Setting Tool.

- If the **Request Secure Simple Pairing (SSP) settings during pairing** check box is not selected in the Bluetooth tab of Communication Settings, a Bluetooth pass key for a Bluetooth device appears on the LCD and the Bluetooth connection is made.
- If the **Request Secure Simple Pairing (SSP) settings during pairing** check box is selected in the Bluetooth tab of Communication Settings, a Bluetooth pass key appears on the LCD. Press **OK** on the printer. As the displayed Bluetooth pass key is entered to the Bluetooth device, the Bluetooth connection is made.

When a connection has been established, the printer remains connected until it is turned off, preventing it from connecting to another device.

Related Information

- [Print Labels Using Barcode Scanner or Other Devices \(P-touch Template\)](#)

Connect the Printer to a Barcode Scanner Using USB Host Interface

We recommend using a reliable high-quality barcode scanner and checking the barcode scanner specifications before selecting a model.

Recommended barcode scanner selection criteria: HID-class models identified as a keyboard

- For P-touch Template mode, templates must first be downloaded from a computer to the printer using P-touch Transfer Manager.
 - The barcode scanner should be programmed to use the English keyboard. For beginners, the barcode scanner should be programmed to scan data with no prefix or suffix characters. For advanced users, the prefix and suffix characters can be scanned and used as commands with the printer for creating customised templates.
 - Contact the manufacturer for more information on how to use and program a specific barcode scanner model.
-
- Connect a barcode scanner to the printer's USB host port.

Related Information

- [List of Barcodes for Specifying Settings](#)

Print the Transferred Templates Directly (Standard Template Printing)

You can download frequently used templates or images, and scan a barcode to select which one to print.

Example:

- For more information on the barcodes scanned using various settings, see *Related Information*.
- Grouped objects are converted and sent as an image.

1. Use P-touch Transfer Manager to transfer a template or label layout from the computer to the printer.
For more detailed information, see *Related Information*.
2. When you transfer data to the **Configurations** folder in P-touch Transfer Manager, select the folder containing the data you want to transfer.

You can add a custom folder under **Configurations**, and drag-and-drop a transferred template into the custom folder to manage different sets of templates.

When a template is transferred to the **Configurations** folder in P-touch Transfer Manager, the Key Assign number is automatically assigned.

- For basic operations, you can specify a Key Assign number between 1 and 10.
- For advanced operations, you can specify a Key Assign number between 1 and 255 for any templates downloaded into the printer but you must scan different barcodes to select and print them.

For more information, see the *P-touch Template Manual/ Command Reference* (English only). You can download the latest version from the Brother support website at support.brother.com/manuals.

3. Select the transferred template, and then click **Transfer** to download the template to the Key Assign number in the printer.
4. Scan the following barcode:
 - P-touch template command (initialise + begin specifying settings)

5. From the following barcode list, scan each barcode to send a command or setting to the printer:
 - Basic settings

Auto cut on (Cut every one label) + Cut at end on ^c01011	Auto cut on (Cut every two labels) + Cut at end on ^c01021
Auto cut off + Cut at end on ^c00001	Auto cut off + Cut at end off ^c00000
Number of copies ^cN	

- Settings can be made with multiple commands.
- If no settings have been made by scanning the barcode commands, a template is printed using the P-touch Template settings. The default P-touch Template settings are to print a single copy with Auto Cut turned on.

For more information on P-touch Template Settings, see the *P-touch Template Manual/ Command Reference* (English only). You can download the latest version from the Brother support website at support.brother.com/manuals.

6. Specify the number of copies you want.

- a. Scan the following barcode:

Number of copies

- b. Scan the following barcodes to specify a three-digit number:

Example:

Specify numbers by scanning the following barcodes: 7; [0][0][7], 15; [0][1][5]

- For entering numbers

1 	2 
3 	4 
5 	6 
7 	8 
9 	0 
00 	

To change the setting for the number of copies, repeat these steps.

7. Scan one of the following barcodes with the same number as the Key Assign number for the label layout you want:

- Preset template number

Preset template 1  ^TS001^FF	Preset template 2  ^TS002^FF
Preset template 3  ^TS003^FF	Preset template 4  ^TS004^FF
Preset template 5  ^TS005^FF	Preset template 6  ^TS006^FF
Preset template 7  ^TS007^FF	Preset template 8  ^TS008^FF
Preset template 9  ^TS009^FF	Preset template 10  ^TS010^FF

The specified label is printed.

Lock Labels for Editing

To protect frequently used templates from unwanted edits, convert a text object in the label layout to an image. After converting the label layout to an image, the text cannot be changed.

1. In the P-touch Editor Layout window, right-click the text object, and then click **Properties**.
2. Click the **Expanded** tab, and then select the **Text Cannot Be Edited** check box.

- If the **Expanded** tab does not appear, click **Tools > Options > General**, and then select the **Display Expanded Tabs of Object Properties** check box in the **Others** section.
- When the **Text Cannot Be Edited** check box is cleared, the object is converted back to editable text.

Related Information

- [Print the Transferred Templates Directly \(Standard Template Printing\)](#)

Print the Transferred Templates After Changing (Advanced Templated Printing)

You can download a template and scan a barcode to print a copy or insert the scanned data into a different template.

- For more information on the barcodes scanned using various settings, see *Related Information*.
- If a barcode has a different protocol than the barcode template already registered with the printer, you may be unable to create or print the barcode.
- Depending on the Barcode Scanner model, some barcode standards and protocols may not be supported by this printer.

1. Use P-touch Transfer Manager to transfer a template or label layout from the computer to the printer. For more detailed information, see *Related Information*.

CODE128/9-digit

NOTE

It is important to design a template to meet the barcode symbology or protocol requirements, especially for the label size and barcode position in the label to fit the maximum number and type of characters being inserted from the barcode scanner. A barcode in the template cannot be created or scanned if the barcode with the inserted data does not fit entirely within the label printable image area.

2. When you transfer data to the **Configurations** folder in P-touch Transfer Manager, select the folder containing the data you want to transfer.

You can add a custom folder under **Configurations**, and drag-and-drop a transferred template into the custom folder to manage different sets of templates.

When a template is transferred to the **Configurations** folder in P-touch Transfer Manager, the Key Assign number is automatically assigned.

You can specify a Key Assign number between 1 and 10 for any templates downloaded into the printer.

3. Select the transferred template, and then click **Transfer** to download the template to the Key Assign number in the printer.
4. Scan the following barcode:
 - P-touch template command (initialise + begin specifying settings)

Escia3^II

5. From the following barcode list, scan each barcode to send a command or setting to the printer:
 - Basic settings

Auto cut on (Cut every one label) + Cut at end on  ^c01011	Auto cut on (Cut every two labels) + Cut at end on  ^c01021
Auto cut off + Cut at end on  ^c00001	Auto cut off + Cut at end off  ^c00000
Number of copies  ^cN	

- Settings can be made with multiple commands.
- If no settings have been made by scanning the barcode commands, a template is printed using the P-touch Template settings. The default P-touch Template settings are to print a single copy with Auto Cut turned on.

For more information on P-touch Template Settings, see the *P-touch Template Manual/ Command Reference* (English only). You can download the latest version from the Brother support website at support.brother.com/manuals.

6. Specify the number of copies you want.

- a. Scan the following barcode:

Number of copies

- b. Scan the following barcodes to specify a three-digit number:

Example:

Specify numbers by scanning the following barcodes: 7; [0][0][7], 15; [0][1][5]

- For entering numbers

1  1	2  2
3  3	4  4
5  5	6  6
7  7	8  8

9  9	0  0
00  00	

To change the setting for the number of copies, repeat these steps.

7. Scan the following barcode:

- Select template

8. Scan the following barcodes with the same number (three digits) as the Key Assign number used for the downloaded template to be printed:

Example:

Specify numbers by scanning the following barcodes: 7; [0][0][7], 15; [0][1][5]

- For entering numbers

1  1	2  2
3  3	4  4
5  5	6  6
7  7	8  8
9  9	0  0
00  00	

The downloaded template is selected after the three digit numbers have been scanned.

You can use P-touch Editor to create and print a label with a single barcode.

Example:

9. Scan a barcode containing the data you want inserted into the barcode object in the selected downloaded template.

Example:

10. Scan the following barcode to send the command to start printing:

- Begin printing

The barcode in the printed template contains the data from the barcode scanned.

Example:

Print the Templates Related to a Database (Database Lookup Printing)

You can download a database linked to a template, scan a barcode as a keyword to find a record containing the keyword, and then insert the record into the template to print.

- For more information on the barcodes scanned using various settings, see *Related Information*.
- The printer has reserved the leftmost column (A) of a downloaded linked database for this operation, therefore the keyword scanned from a barcode must be in this column of the database.
- For the printer to find keywords successfully, the data in the leftmost column (A) must exactly match the keywords scanned from a barcode.
- P-touch Editor and the printer can read only one line of data in each field of a linked database so we do not recommend using databases with two or more lines of data in the leftmost column (A).

1. Use P-touch Editor to create a template and connect to a database file.

- You can link as many columns to a text and barcode objects in the template as needed.
- Make sure the keywords are included in the leftmost column (A) but do not link any text or barcode object in the template with field (A) if you do not need the data on the printed label.

- For more information on specifying the settings, refer to the **P-touch Editor Help** menu.

2. Use P-touch Transfer Manager to transfer a template or label layout from the computer to the printer.

For more information, see *Related Information*.

The linked database file will also be transferred.

When a template is transferred to the **Configurations** folder in P-touch Transfer Manager, the Key Assign number is automatically assigned.

You can add a custom folder under **Configurations**, and drag-and-drop a transferred template into the custom folder to manage different sets of templates.

3. Select the transferred template, and then click **Transfer** to download the template to the Key Assign number in the printer.

4. Scan the following barcode:

- P-touch template command (initialise + begin specifying settings)

5. From the following barcode list, scan each barcode to send a command or setting to the printer:

- Basic settings

<p>Auto cut on (Cut every one label) + Cut at end on</p>  <p>^C01011</p>	<p>Auto cut on (Cut every two labels) + Cut at end on</p>  <p>^C01021</p>
---	---

Auto cut off + Cut at end on

Auto cut off + Cut at end off

Number of copies

- Settings can be made with multiple commands.
- If no settings have been made by scanning the barcode commands, a template is printed using the P-touch Template settings. The default P-touch Template settings are to print a single copy with Auto Cut turned on.

For more information on P-touch Template Settings, see the *P-touch Template Manual/ Command Reference* (English only). You can download the latest version from the Brother support website at support.brother.com/manuals.

6. Specify the number of copies you want.

a. Scan the following barcode:

Number of copies

b. Scan the following barcodes to specify a three-digit number:

Example:

Specify numbers by scanning the following barcodes: 7; [0][0][7], 15; [0][1][5]

- For entering numbers

1 	2
3 	4
5 	6
7 	8
9 	0

To change the setting for the number of copies, repeat these steps.

7. Scan the following barcode:

- Select template

8. Scan the following barcodes with the same number (three digits) as the Key Assign number used for the downloaded template to be printed:

Example:

Specify numbers by scanning the following barcodes: 7; [0][0][7], 15; [0][1][5]

- For entering numbers

1 	2 
3 	4 
5 	6 
7 	8 
9 	0 
00 	

The downloaded template is selected after the three digit numbers have been scanned.

You can use P-touch Editor to create and print a label with a single barcode.

Example:

9. Scan a barcode containing the keyword to look up in the downloaded database.

Example:

10. Scan the following barcode to send the command to start searching the downloaded database for the scanned keyword:

- Delimiter

11. Scan the following barcode to send the command to start printing:

- Begin printing

You can use P-touch Editor to create and print a label with a single barcode.

Example:

The printer prints the template with the data inserted from the database record, found with the scanned keyword.

Print the Transferred Templates in Serialised Number (Numbered (Serialised Number) Printing)

You can increase text numbers or barcodes up to 999 when printing downloaded templates. Select text or barcode objects to increment while printing.

- >> [Text Numbering \(Serialising\)](#)
- >> [Barcode Numbering \(Serialising\)](#)
- >> [Print with Numbering \(Serialising\) Advanced Operation](#)

Text Numbering (Serialising)

1. Use P-touch Editor to create or open a template and select a text object you want to increment while printing.

2. Highlight or drag the cursor over a group of numbers and letters within the text object you want to increment (maximum of 15).

The selected group is called the Numbering field.

3. Right-click the Numbering field, and select the **Numbering** option.

Barcode Numbering (Serialising)

1. Use P-touch Editor to create or open a template and select a barcode object you want to increment while printing.
2. Right-click the barcode object, and select the **Properties** option.
The Bar Code Properties window appears.

Bar Code Properties

Input Protocol Setup Position Expanded

Protocol : CODE39

of Characters : Auto

Data:

1234567890

Numbering

OK Cancel

3. Highlight or drag the cursor over a group of numbers and letters within the barcode object you want to increment (maximum of 15).

The selected group is called the Numbering field.

Bar Code Properties

Input Protocol Setup Position Expanded

Protocol : CODE39

of Characters : Auto

Data:

1234567890

Numbering

OK Cancel

The **Numbering** button is enabled after a group of numbers and letters are highlighted.

4. Click the **Numbering** button, and then click **OK**.

Print with Numbering (Serialising) Advanced Operation

1. Use P-touch Transfer Manager to transfer a template or label layout from the computer to the printer.
For more information, see *Related Information*.

2. Scan the following barcode:

- Number of serialised copies

3. Scan the following barcodes with the number of copies you want to print (three digits):

Example:

For five copies, specify the three digit numbers by scanning barcodes for [0][0][5]

- For entering numbers

1  1	2  2
3  3	4  4
5  5	6  6
7  7	8  8
9  9	0  0
00  00	

4. Follow the P-touch Template mode basic operation procedures to start printing.

- The Numbering field increments by one number or letter with each printed label, and the count is permanently saved in the printer.
- To reset a text or barcode object back to the original value, scan the following barcode:
 - Initialise template data

Install Mobile Apps

Brother offers various applications for use with your printer, including applications to print directly from your iPhone, iPad, iPod touch, and Android™ mobile devices, and applications to transfer data wirelessly, such as templates, symbols, and databases created using a computer, to your standalone printer.

- Download these free Brother apps from Google Play or App Store:

Application	Features
Print SDK	Download the Software Development Kit (SDK) from the Brother Developer Center (brother.com/product/dev).
Mobile Transfer Express	This application allows you to use a mobile device to download databases and label data, which were created on a computer using P-touch Editor and saved to a cloud service, and send them to your printer.
Mobile Deploy	Allows you to perform updates for the settings and firmware of printers using a mobile device. This software will send printer update files pre-uploaded to DropBox or an HTTP(S) server to target printers.

Connect Using Wireless Direct

- When using a mobile device, change any necessary settings using the application before printing. The settings vary by application.
- Before connecting a mobile device, you can specify detailed settings by connecting the printer to a computer and using the Printer Setting Tool.
- To connect, you will need a USB cable (sold separately).

1. Set the printer to Wireless Direct mode using one of the following options, and then connect the printer to your computer using a USB cable:
 - From the LCD menu:
 - a. Press **Menu**.
 - b. Press **▲** or **▼** to select the following:
 - i. Select [WLAN]. Press **OK**.
 - ii. Select [WLAN (On/Off)]. Press **OK**.
 - c. Press **▲** or **▼** to select [On]. Press **OK**.
 - d. Press **▲** or **▼** to select the following:
 - i. Select [WLAN]. Press **OK**.
 - ii. Select [Network Mode]. Press **OK**.
 - e. Press **▲** or **▼** to select [Direct Mode]. Press **OK**.

 appears on the LCD.
 - Using a Windows computer:
 - a. Launch the **Printer Setting Tool** on your computer.
 - b. Click the **Communication Settings** button.
 - c. Click **General > Communication Settings**.
 - d. Confirm the **Infrastructure and Wireless Direct** or **Wireless Direct** option is selected for the **Selected Interface** setting, and then confirm the **Wireless Direct** tab.
 - e. Click **Apply** to set the printer to Wireless Direct mode.
 - f. Exit the Printer Setting Tool.
2. From your mobile device's Wi-Fi settings screen, select your wireless network's SSID, the SSID of the printer, and then enter the password.

- The default SSID and password are as follows:
 - SSID: "DIRECT-*****_TD-4550DNWB" where ***** is the last five digits of the product serial number.
 - Password: 455***** where ***** is the last five digits of the product serial number.
- You can connect the printer to a mobile device in the Infrastructure mode via a wireless access point/router.

If your printer is connected successfully,  changes to .

Connect Using Bluetooth

1. Press **Menu**.
2. Press **▲** or **▼** to select the following:

-
- a. Select [Bluetooth]. Press **OK**.
 - b. Select [Bluetooth (On/Off)]. Press **OK**.
3. Press ▲ or ▼ to select [On]. Press **OK**.
-  appears on the LCD.
4. From your mobile device's Bluetooth settings screen, select your printer.
- If your printer is connected successfully,  changes to .

Transfer Templates Created on a Computer to the Printer Using a Mobile Device

Make sure Mobile Transfer Express is installed on your mobile device.

Use P-touch Transfer Manager to save template data created using P-touch Editor, in the BLF and PDZ format. Then, you can use Mobile Transfer Express to send the saved file from your mobile device to the printer and print the file.

1. Save the template data using P-touch Transfer Manager.

For more information, see *Related Information*.

2. Follow one of these methods to use a file with your mobile device:
 - Save the file using a cloud storage service, and then use the sharing function of the mobile device's operating system to share the file.
 - Send the file as an email attachment from the computer to the mobile device, and then save the file to the mobile device.
3. Connect the printer to your mobile device, and then start Mobile Transfer Express.
The template data appears.
4. Select the template you want to print, and then transfer the template to the printer.

To download a file from a cloud storage service to your mobile device, you must connect your mobile device using Infrastructure Mode. By connecting your mobile device to the printer using Infrastructure Mode, you can also quickly transfer downloaded files (BLF files only).

- [Backup Templates or Other Data Saved in the Printer \(Windows\)](#)
- [Delete Printer Data \(Windows\)](#)
- [Create Transfer Files and Transfer Package Files \(Windows\)](#)

Notes on Using P-touch Transfer Manager (Windows)

Because some P-touch Editor functions are not available with the printer, keep the following points in mind when using P-touch Editor to create templates.

You can check a preview of the printed template before the created template is transferred to the printer.

Notes on Creating Templates

- Some of the text in the template transferred to the printer may be printed using similar fonts and character sizes loaded in the printer. As a result, the printed label may differ from the image of the template created in P-touch Editor.
- Depending on the text object setting, the character size may be automatically reduced or some of the text may not be printed. If this occurs, change the text object setting.
- Although character styles can be applied to individual characters with P-touch Editor, styles can be applied to a block of text only with the printer. In addition, some character styles are not available on the printer.
- Backgrounds specified with P-touch Editor are not compatible with the printer.
- A P-touch Editor layout using the split printing function (enlarging the label and printing it on two or more labels) cannot be transferred.
- Only the portion of the label within the printable area is printed.
- Fields overflowing the print area may not be printed completely.

Notes on Transferring Templates

- The printed label may differ from the image appearing in the preview area of P-touch Transfer Manager.
- If a 2-dimensional barcode not loaded on the printer is transferred to the printer, the barcode is converted into an image. The image of the converted barcode cannot be edited.
- All transferred objects that cannot be edited by the printer are converted into images.
- Grouped objects are converted into a single bitmap.

Notes on Transferring Data Other Than Templates

- If the number or order of fields in a database is changed and only the database (CSV file) is transferred to update it, the database may not link correctly with the template. In addition, the first line of data in the transferred file must be recognised by the printer as "field names".
- Logos, symbols, and graphics downloaded to the printer are automatically scaled to the resident font or any of the resident symbols in the library.

Displays a list of folders and printers. When you select a folder, the templates in the selected folder appear in the template list. If you select a printer, the current templates and other data stored in the printer appear.

6. Toolbar

Provides access to frequently used commands.

Explanations of the Toolbar Icons

Icon	Button name	Function
	Transfer	Transfers templates and other data from the computer to the printer.
	Save Transfer File (When not connected to a printer)	Changes the file type of the data to be transferred to other applications. Select BLF for the filename extension when printing labels using Mass Storage Mode (USB), or when transferring the data using BRAdmin Professional (LAN or Wi-Fi) or Mobile Transfer Express (Wi-Fi). Select PDZ when transferring the data using Transfer Express (USB). The available interfaces differ depending on your model.

Icon	Button name	Function
	Backup	Retrieves the templates and other data saved in the printer and saves it on the computer.
	Open	Opens the selected template.
	Search	Allows you to search for templates or other data registered to P-touch Library.
	Display Style	Changes the file display style.

Transfer Templates or Other Data from the Computer to the Printer (Windows)

You can transfer templates, databases, and images from the computer to the printer.

To transfer templates from a mobile device to the printer, see *Related Information*.

1. Connect the printer and the computer via a USB cable, and then turn the printer on.
The printer model name appears next to a printer icon in the folder view.
If you select the printer in the folder view, the current templates and other data stored in the printer appear.

If a printer is disconnected or offline, it does not appear in the folder view.

2. Select the printer you want to transfer the template or other data to.

3. Right-click the **Configurations** folder, select **New**, and then create a new folder.

4. Do one of the following:

- Drag the template or other data you want to transfer and place it in the new folder.
- To transfer multiple templates or other data, drag the files you want to transfer, and then place them in the new folder. Each file is assigned a key number (memory location in the printer) when it is placed in the new folder.

Data type	Maximum number of transferable items	Restriction details
Template	255	Each template can contain a maximum of 255 objects.
Database	255	<ul style="list-style-type: none"> • Only CSV files can be transferred. • Each CSV file can contain a maximum of 65000 records.
Image (transferred symbols)	255	<ul style="list-style-type: none"> • Only BMP files can be transferred. • Monochrome BMP files are recommended. • The size limit is 2560 x 2560 pixels.

Data type	Maximum number of transferable items	Restriction details
		<ul style="list-style-type: none"> Wide images may be cropped.

- You can confirm the available space in the transfer file memory by printing the Printer Setting Report. See **Available memory** in the report for the available space. The available space appearing in **Available memory: ****B** may be different from the actual available space.
- You can view the templates and other data by selecting:
 - The folder in the **Configurations** folder
 - All Contents**
 - One of the categories under **Filter**, such as **Layouts**

5. To change the key number assigned to an item, right-click the item, select the **Key Assign** menu, and then select the key number you want.

- Except for the data in databases, all data transferred to the printer is assigned a key number.
- If the template or other data transferred to the printer has the same key number as another template already saved in the printer, the new template overwrites the old one. You can confirm the assigned template numbers saved in the printer by backing up the templates or other data.
- If the printer memory is full, remove one or more templates from the printer's memory.

6. To change the template names or other data you want to transfer, click the item you want, and then type the new name.

The number of characters used for the template names may be limited depending on the printer model.

7. Select the folder containing the templates or other data you want to transfer, and then click **Transfer**.

A confirmation message appears.

- You can also transfer individual items to the printer without adding them to a folder. Select the template or other data you want to transfer, and then click **Transfer**.
- Multiple items and folders can be selected and transferred in one operation.

8. Click **OK**.

The selected items are transferred to the printer.

Backup Templates or Other Data Saved in the Printer (Windows)

You can retrieve templates or other data saved in the printer and save it on the computer.

- Backed up templates or other data cannot be edited on the computer.
- Depending on the printer model, backed up templates or data may not be transferable between different models.

1. Connect the computer and the printer and turn the printer on.

The printer model name appears next to a printer icon in the folder view. If you select the printer in the folder view, the current templates and other data stored in the printer appear.

2. Select the printer to back up from, and then click **Backup**.

A confirmation message appears.

3. Click **OK**.

A new folder is created under the printer in the folder view. The folder name is based on the date and time of the backup. All of the printer's templates and other data are transferred to the new folder and saved on the computer.

Delete Printer Data (Windows)

You can delete all templates or other data saved on the printer.

1. Connect the computer and the printer and turn the printer on.
The printer model name appears next to a printer icon in the folder view.
2. Right-click the printer, and then select the **Delete All** menu.

A confirmation message appears.

3. Click **OK**.
All templates and other data saved in the printer is deleted.

Create Transfer Files and Transfer Package Files (Windows)

Use P-touch Transfer Manager to save template data created using P-touch Editor in the BLF or PDZ format, and transfer these files in this format to a printer over a network, from a computer or mobile device.

You can also print files in the BLF format using mass storage mode.

Template Transfer Method		File Format
From a mobile device (Using Mobile Transfer Express)	via USB	PDZ
	via Wi-Fi	BLF
	via Wireless Direct	BLF

Template Transfer Method		File Format
	via Bluetooth	PDZ
	Mass storage	BLF
From a computer	P-touch Transfer Express	PDZ
	Mass storage	BLF

1. Create the template using P-touch Editor, and then transfer it to P-touch Transfer Manager.

- For more information, see *Related Information*.
- When transferring a new template, make sure you specify a Key Assign number (in P-touch Transfer Manager) that is not currently used. If the specified Key Assign number is already being used, the existing template will be overwritten with the new one.

2. Without connecting the printer to the computer, select the **Configurations** folder in the P-touch Transfer Manager window, and then select the template to save.

You can select multiple templates at the same time.

3. Click **File > Save Transfer File**.

NOTE

The **Save Transfer File** button appears when the printer is disconnected from the computer or offline.

- If you click the **Save Transfer File** button after selecting **Configurations**, all templates in the folder are saved as the Transfer file (BLF) or Transfer Package file (PDZ).
- You can combine multiple templates into a single Transfer file (BLF) or Transfer Package file (PDZ).

4. In the **Save as type** field, select the template format you want, and then type in the name and save the template.

Distribute Templates to be Transferred to Users Without Using P-touch Transfer Manager (Windows)

You can transfer templates to the printer using P-touch Transfer Express. First, the administrator creates a template, and then distributes it together with P-touch Transfer Express. You can then use P-touch Transfer Express to transfer the template directly to your printer.

To download the latest version of P-touch Transfer Express, go to your model's **Downloads** page on the Brother support website at support.brother.com.

- When transferring a new template, make sure you specify a Key Assign number (in P-touch Transfer Manager) that is not currently used. If the specified Key Assign number is already being used, the existing template will be overwritten with the new one.
- This function requires a USB connection.

- >> [Administrator tasks](#)
- >> [User tasks](#)

Administrator tasks

- >> [Preparing P-touch Transfer Express](#)
- >> [Transfer the Template to P-touch Transfer Manager](#)
- >> [Save the Template as a Transfer Package File \(PDZ\)](#)
- >> [Distribute the Transfer Package File \(PDZ\) and P-touch Transfer Express to Others](#)

Preparing P-touch Transfer Express

The printer driver must be installed before using P-touch Transfer Express.

P-touch Transfer Express is available only in English.

1. Download P-touch Transfer Express to any location on the computer.
2. Decompress the downloaded file (ZIP).

Transfer the Template to P-touch Transfer Manager

1. Start the P-touch Editor .
 - **Windows 10/Windows Server 2016:**
Click **Start > Brother P-touch > P-touch Editor 5.2**, or double-click the **P-touch Editor 5.2** icon on the desktop.
 - **Windows 8/Windows 8.1/Windows Server 2012/Windows Server 2012 R2:**

Click the **P-touch Editor 5.2** icon on the **Apps** screen, or double-click the **P-touch Editor 5.2** icon on the desktop.

- **Windows 7/Windows Server 2008/Windows Server 2008 R2:**

Click **Start > All Programs > Brother P-touch > P-touch Editor 5.2**, or double-click the **P-touch Editor 5.2** icon on the desktop.

P-touch Editor starts.

2. Open the template you want.
3. Click **File > Transfer Template > Transfer**.

The template is transferred to P-touch Transfer Manager. P-touch Transfer Manager starts.

Save the Template as a Transfer Package File (PDZ)

To create a file in a format that can be used by P-touch Transfer Express, save the template as a Transfer Package file (PDZ).

1. Select the **Configurations** folder in the P-touch Transfer Manager window.
2. Select the templates you want to distribute.
3. Click **File > Save Transfer File**.

- The **Save Transfer File** option appears only if the printer is disconnected from the computer or offline.
- If you click the **Save Transfer File** option after selecting the **Configurations** folder or a created folder, all templates in the folder are saved as the Transfer Package file (PDZ).
- You can combine multiple templates into a single Transfer Package file (PDZ).

4. Type the name, and then click **Save**.

The template is saved as a Transfer Package file (PDZ).

Distribute the Transfer Package File (PDZ) and P-touch Transfer Express to Others

If you already have downloaded P-touch Transfer Express, it is not necessary for the administrator to send the Transfer Express folder. In this case, you can simply move the distributed Transfer Package file to the downloaded folder, and then double-click PtTrExp.exe.

1. Move the Transfer Package file (PDZ) to the downloads folder.

2. Distribute all the files in the downloads folder to others.

User tasks

Transfer the Transfer Package File (PDZ) to Your Printer

You can transfer the Transfer Package file (PDZ) to the printer using the P-touch Transfer Express received from the administrator.

Do not turn the power off when transferring templates.

1. Turn the printer on.
2. Connect the printer to the computer using a USB cable.
3. Double-click the **PtTrExp.exe** file received from the administrator.
4. Do one of the following:
 - To transfer a single Transfer Package file (PDZ) within the folder containing the **PtTrExp.exe** file, click **Transfer**.
 - To transfer multiple Transfer Package files (PDZ) within the folder containing the **PtTrExp.exe** file, do the following:
 - a. Click **Browse**.

- b. Select the Transfer Package file you want to transfer, and then click **Open**.
 - c. Click **Transfer**.
 - d. Click **Yes**.
5. When completed, click **OK**.

Search Templates Using P-touch Library (Windows)

You can search for templates registered to P-touch Library.

1. Start the P-touch Library.

- **Windows 10/Windows Server 2016:**
Click **Start > Brother P-touch > P-touch Library 2.3**.
- **Windows 8/Windows 8.1/Windows Server 2012/Windows Server 2012 R2:**
Click the **P-touch Library 2.3** icon on the **Apps** screen.
- **Windows 7/Windows Server 2008/Windows Server 2008 R2:**
Click **Start > All Programs > Brother P-touch > P-touch Tools > P-touch Library 2.3**.

The main window appears.

2. Click **Search**.

The **Search** dialog box appears.

3. Specify the search criteria.

The following search criteria are available:

Settings	Details
Multiple Parameters	Determines how the program searches when multiple criteria are specified. If you select AND , the program searches for files meeting all of the criteria. If you select OR , the program searches for files meeting any of the criteria.
Name	Search for a template by specifying the file name.
Type	Search for a template by specifying the file type.
Size	Search for a template by specifying the file size.
Date	Search for a template by specifying the file date.

4. Click **Begin Search**.

The search begins and the search results are displayed.

5. Close the **Search** dialog box.

To confirm the search results, click **Search Results** in the folder view.

You can register templates to P-touch Library by dragging and dropping them into the **All Contents** folder or to the folder list.

Learn about Network Management Software and Utilities

Web Based Management

Web Based Management is a utility that uses a standard web browser to manage your machine using the Hyper Text Transfer Protocol (HTTP) or Hyper Text Transfer Protocol over Secure Socket Layer (HTTPS). Type your machine's IP address into your web browser to access and change your print server settings.

BRAdmin Light (Windows)

BRAdmin Light is a utility for the initial setup of network-connected Brother printers. This utility can search for Brother printers on your network, view their status and configure the basic network settings, such as IP address.

Go to your model's **Downloads** page on the Brother support website at support.brother.com to download BRAdmin Light.

If using a firewall, anti-spyware, or antivirus software, temporarily disable them. When you are sure you can print, re-enable them.

BRAdmin Professional (Windows)

BRAdmin Professional is a utility for more advanced management of network-connected Brother printers. This utility can search for Brother printers on your network and view their status from an easy-to-read Windows Explorer-style screen that changes colour to identify the status of each printer. You can configure network and printer settings, and update printer firmware from a Windows computer on your LAN. BRAdmin Professional can also log activity of Brother printers on your network and export the log data.

Go to your model's **Downloads** page on the Brother support website at support.brother.com to download the latest version of Brother's BRAdmin Professional utility.

- The node name appears in the current BRAdmin Professional window.
The default node name is "BRWxxxxxxxxxxxx" or "BRNxxxxxxxxxxxx". ("xxxxxxxxxxxx" is based on the printer's MAC Address / Ethernet Address.)
- If using a firewall, anti-spyware, or antivirus software, temporarily disable them. When you are sure you can print, re-enable them.

- [Update the Firmware](#)

Update P-touch Editor (Windows)

Before updating P-touch Editor, install the printer driver.

1. Start the P-touch Update Software.

- **Windows 10/Windows Server 2016:**

Click **Start > Brother P-touch > P-touch Update Software**, or double-click the **P-touch Update Software** icon on the desktop.

- **Windows 8/Windows 8.1/Windows Server 2012/Windows Server 2012 R2:**

Click the **P-touch Update Software** icon on the **Apps** screen, or double-click the **P-touch Update Software** icon on the desktop.

- **Windows 7/Windows Server 2008/Windows Server 2008 R2:**

Click **Start > All Programs > Brother P-touch > P-touch Update Software**, or double-click the **P-touch Update Software** icon on the desktop.

2. Click the **Computer software update** icon.

3. Select the **Printer** and **Language** options, select the check box next to P-touch Editor, and then click **Install**.

When finished, a confirmation dialog appears.

Related Information

- [Update](#)

Update the Firmware

- Before updating the firmware, you must install the printer driver.
- Do not turn the power off when transferring data or updating firmware.
- If another application is running, exit the application.

1. Turn the printer on and connect the USB cable.
2. Start the P-touch Update Software.
 - **Windows 10/Windows Server 2016:**
Click **Start > Brother P-touch > P-touch Update Software**, or double-click the **P-touch Update Software** icon on the desktop.
 - **Windows 8/Windows 8.1/Windows Server 2012/Windows Server 2012 R2:**
Click the **P-touch Update Software** icon on the **Apps** screen, or double-click the **P-touch Update Software** icon on the desktop.
 - **Windows 7/Windows Server 2008/Windows Server 2008 R2:**
Click **Start > All Programs > Brother P-touch > P-touch Update Software**, or double-click the **P-touch Update Software** icon on the desktop.
3. Click the **Machine update** icon.

4. Select the **Printer** option, make sure the machine is connected correctly, and then click **OK**.

5. Select the **Language** option, select the check box next to the firmware you want to update to, and then click **Transfer**.

NOTE

Do not turn the printer off or disconnect the cable during data transfer.

6. Check the content to be updated, and then click **Start** to begin the update.
The firmware update begins.

NOTE

Do not turn the printer off or disconnect the cable during the update process.

- [Change Printer Settings Using the Printer](#)

Change Printer Settings Using the Printer Setting Tool (Windows)

- Make sure the AC Adapter is connected to the printer and the AC Power Cord is connected to an electrical socket.
- Make sure the printer driver has been installed correctly and you can print.
- Connect the printer to a computer with a USB cable.

- The Printer Setting Tool is installed in addition to the printer driver and other software when using the installer.
- The Printer Setting Tool is available only with compatible Brother printers.

1. Connect the printer you want to configure to the computer.
2. Start the Printer Setting Tool.
 - **Windows 10/Windows Server 2016:**
Click **Start > Brother > Printer Setting Tool**.
 - **Windows 8/Windows 8.1/Windows Server 2012/Windows Server 2012 R2:**
Click the **Printer Setting Tool** icon on the **Apps** screen.
 - **Windows 7/Windows Server 2008/Windows Server 2008 R2:**
Click **Start > All Programs > Brother > Label & Mobile Printer > Printer Setting Tool**.

The main window appears.

- 1. Printer**
Lists the connected printers.
- 2. Communication Settings**
Specifies wired LAN, wireless LAN and Bluetooth communication settings.
- 3. Device Settings**
Specifies device settings. For example, power settings.
- 4. P-touch Template Settings**
Specifies P-touch Template settings.
For more information, see the *P-touch Template Manual/ Command Reference* (English only). You can download the latest version from the Brother support website at support.brother.com/manuals.

5. Paper Size Setup

Add media information and settings to the printer driver to use sizes not listed in the **Paper Size** list of the printer driver.

NOTE

To open **Paper Size Setup**, you must be logged on with administrator rights.

6. Exit

Closes the window.

3. Make sure the printer you want to configure appears next to **Printer**.
If a different printer appears, select the printer you want from the drop-down list.
4. Select the settings you want to change, and then specify or change the settings in the dialog box.
5. Click **Apply** to apply the settings to the printer.
6. Click **Exit** in the main window to finish specifying settings.

Use the Printer Setting Tool to configure the printer only when the printer is idle. The printer may malfunction if you try to configure it while it is processing or printing a print job.

Communication Settings of the Printer Setting Tool (Windows)

Use Communication Settings in the Printer Setting Tool to specify or change the printer communication information, when connecting the printer and computer with a USB cable or via a Bluetooth connection. Not only can you change the communication settings for one printer, but you can also apply the same settings to multiple printers.

- >> Settings Dialog Box
- >> Menu Bar
- >> General Tab
- >> Wired LAN/Wireless LAN Tabs
- >> Wireless Direct Tab (TD-4550DNWB)
- >> Bluetooth Tab (TD-4550DNWB)

Settings Dialog Box

1. Menu Bar

Provides access to various commands grouped under each menu title (the **File**, **Tools**, and **Help** menus) according to their functions.

2. Node Name

Displays the node name (nodes can be renamed).

3. Settings Display/Change Area

Displays the current settings for the selected item.

4. Refresh

Updates the displayed settings with the most recent information.

5. Exit

Exits the **Communication Settings** window, and returns to the main window of the Printer Setting Tool.

Settings are not applied to printers if **Exit** is clicked without clicking the **Apply** button after changing the settings.

6. Apply

Applies the settings to the printer. To save the specified settings in a command file, select the **Save in Command File** command from the drop-down list. The saved command file can be used with the mass storage mode to apply the settings to a printer.

Clicking **Apply** applies all settings in all tabs to the printer. If the **Disable these settings** check box is selected, the settings are not applied.

7. Items

When the **Current Status** menu is selected, the current settings appear in the settings display/change area. Select the item for the settings you want to change.

8. Disable these settings

When this check box is selected,  appears in the tab, and the settings can no longer be specified or changed. Settings in a tab where  appears are not applied to the printer even if **Apply** is clicked. In addition, the settings in the tab are not saved or exported when the **Save in Command File** or **Export** command is used. To apply the settings to the printer, or to save or export them, make sure you clear the check box.

9. Settings Tabs

Contains settings that may be specified or changed. If  appears in the tab, the settings are not applied to the printer.

10. Printer

Lists the connected printers.

Menu Bar

File Menu Options

- **Apply Settings to the Printer**

Applies the settings to the printer.

- **Save Settings in Command File**

Saves the specified settings in a command file. The file extension is BIN. The saved command file can be used with the mass storage mode to apply the settings to a printer.

- If the **Disable these settings** check box is selected, the settings are not saved.
- The following information is not saved with the command file:
 - Node name
 - IP address, subnet mask and default gateway (when the IP address is set to **STATIC**)
- The saved communication settings commands are intended to be used only for applying settings to a printer. To apply the settings to the printer using this command file, use the mass storage mode.
- Saved command files contain authentication keys and passwords. Take necessary measures to protect saved command files, such as saving them in a location that cannot be accessed by other users.
- Do not send command files to a different printer model.

- **Install Certificates**

Some network authentication methods may require a certificate.

Install a certificate on the connected printer or save a certificate as a command file that can be distributed to the same printer models.

- **Import**

- **Import from the current computer wireless settings**

Imports the settings from the computer.

- When importing the computer's wireless settings, administrator privileges for the computer are needed.
- Only personal security authentication settings (open system, public key authentication and WPA/WPA2-PSK) can be imported. Enterprise security authentication (such as EAP-FAST), WPA2-PSK (TKIP) and WPA-PSK (AES) settings cannot be imported.
- If multiple wireless LANs are enabled for the computer you use, the first detected wireless settings (only personal settings) are considered for the import data.
- Only the settings from the **Wireless LAN** tab - **Wireless Settings** pane can be imported (communication mode, SSID, authentication method, encryption mode and authentication key).

- **Select a Profile to import**

Imports the exported file and applies the settings to a printer. Click **Browse** and select the file you want to import. The settings in the selected file appear in the settings display/change area.

- All settings can be imported, except for node names.
- Only the profiles compatible with the selected printer can be imported.
- If the imported profile's IP address is set to **STATIC**, change the IP address of the imported profile, if needed, so that it does not duplicate the IP address of an existing configured printer on the network.

• **Export**

Saves the current settings in a file. If the **Disable these settings** check box is selected, the settings are not saved.

Exported files are not encrypted.

Tools Menu Options

• **Option Settings**

- **Automatically restart the printer after applying new settings**

If this check box is selected, the printer automatically restarts after communication settings are applied. If this check box is cleared, you must restart the printer manually.

When configuring multiple printers, you can reduce the time needed to change settings by clearing this check box. In this case, we recommend selecting this check box when configuring the first printer so that you can confirm that each setting is operating as intended.

- **Automatically detects the connected printer, and retrieves the current settings**

If this check box is selected and a printer is connected to the computer, the printer is automatically detected and the printer's current settings are displayed in the **Current Status** pane.

If the connected printer is different from the printer shown in the **Printer** drop-down list, the settings available on all tabs change to match the connected printer.

• **Change Node Name/Bluetooth Device Name**

Allows renaming a node name and Bluetooth device name.

• **Reset to Default Communication Settings**

Returns the communication settings to their factory settings.

Help Menu Options

• **Display Help**

Displays the Help topics.

General Tab

Communication Settings

• **Network Settings on Power On**

Specifies the conditions for connecting via network connection when the printer is turned on. Select the **Wireless LAN by Default**, **Wired LAN by Default**, or **Keep Current State** option.

• **Selected Interface**

Selects the **Infrastructure**, **Infrastructure and Wireless Direct**, or **Wireless Direct** option.

- **Bluetooth on Power On**

Specifies the conditions for connecting via Bluetooth when the printer is turned on. Select the **On by Default**, **Off by Default**, or **Keep Current State** option.

IPv6

- **IPv6 usage**

Selects **Enable** or **Disable**.

- **Priority on IPv6 address**

Selects to give priority to an IPv6 address.

Remote Update

- **IP Address of FTP server**

Type the FTP server address.

- **Port**

Specifies the port number used to access the FTP server.

- **User name**

Type a user name that has permission to log in to the FTP server.

- **Password**

Type the password associated with the user name you entered in the **User name** field.

- **Path**

Type the path to the folder on the FTP server where you want to download the update file from.

- **Setting file name**

Specifies the update file name on the FTP server.

Log

- **Log storage**

Selects whether to export the update log to the FTP server.

- **Log storage path of FTP server**

Type the path to the folder on the FTP server where you want to export the log data.

Wired LAN/Wireless LAN Tabs

TCP/IP

- **Boot Method**

Selects the **AUTO**, **BOOTP**, **DHCP**, **RARP**, or **STATIC** option.

- **IP Address/Subnet Mask/Gateway**

Specifies the various networking values. You can enter these settings only when the IP address is set to **STATIC**.

- **DNS Server Method**

Selects the **AUTO** or **STATIC** option.

- **Primary DNS Server IP Address/Secondary DNS Server IP Address**

You can enter these settings only when the DNS server is set to **STATIC**.

IPv6

- **Static IPv6 Address**

Specifies a permanent IPv6 address.

- **Enable this address**

Enables the specified static IPv6 address.

- **Primary DNS Server IPv6 Address/Secondary DNS Server IPv6 Address**

Specifies the DNS server IPv6 addresses.

- **IPv6 Address List**

Displays the list of IPv6 addresses.

Wired 802.1x Authentication

Configures IEEE 802.1x authentication.

- **Wired 802.1x Status**

Enable or disable IEEE 802.1x authentication for wired network.

- **Authentication Method**

Select the authentication method.

- **User ID/Password**

You can specify settings only when EAP-MD5, EAP-FAST, PEAP, EAP-TTLS, or EAP-TLS is selected as the authentication method. In addition, with EAP-TLS, it is not necessary to register a password, but a client certificate must be registered. To register a certificate, connect to the printer from a web browser, and then specify the certificate. Installation of the authentication certificate can also be performed with the Printer Setting Tool by going to the menu bar: **File > Install Certificates**.

Wireless Settings

- **Communication Mode**

Displays communication mode.

- **SSID(Network Name)**

Clicking **Search** displays the available SSIDs in a separate dialog box.

- **Channel**

Displays the automatically selected channel.

- **Authentication Method/Encryption Mode**

The supported encryption modes for the authentication methods are shown in the table below.

Authentication Method	Encryption Mode
Open System	None / WEP
Shared Key	WEP
WPA/WPA2-PSK	TKIP+AES / AES
EAP-FAST/NONE	TKIP+AES / AES
EAP-FAST/MS-CHAPv2	TKIP+AES / AES
EAP-FAST/GTC	TKIP+AES / AES
PEAP/MS-CHAPv2	TKIP+AES / AES
PEAP/GTC	TKIP+AES / AES
EAP-TTLS/CHAP	TKIP+AES / AES
EAP-TTLS/MS-CHAP	TKIP+AES / AES
EAP-TTLS/MS-CHAPv2	TKIP+AES / AES
EAP-TTLS/PAP	TKIP+AES / AES
EAP-TLS	TKIP+AES / AES

To specify higher level security settings: When performing certificate verification with EAP-FAST, PEAP, EAP-TTLS, or EAP-TLS authentication methods, the certificate cannot be specified from the Printer Setting Tool. After the printer is configured to connect to the network, specify the certificate by accessing the printer from a web browser. Installation of the authentication certificate can also be performed with the Printer Setting Tool by going to the menu bar: **File > Install Certificates**.

- **WEP Key**

You can specify a setting only when WEP is selected as the encryption mode.

- **Passphrase**

You can specify a setting only when WPA/WPA2-PSK is selected as the authentication method.

- **User ID/Password**

You can specify settings only when EAP-FAST, PEAP, EAP-TTLS, or EAP-TLS is selected as the authentication method. In addition, with EAP-TLS, it is not necessary to register a password, but a client certificate must be registered. To register a certificate, connect to the printer from a web browser, and then specify the certificate.

- **Display the key and password on-screen**

If this check box is selected, keys and passwords are displayed in plain (non-encrypted) text.

Wireless Direct Tab (TD-4550DNWB)

Wireless Direct Settings

- **SSID/Network Key Generation**

Selects the **AUTO** or **STATIC** option.

- **SSID(Network Name)/Network Key**

Specifies the SSID (25 ASCII characters or fewer) and the network key (63 characters or fewer) you want to use in the Wireless Direct mode.

- The default SSID and password are as follows:

- SSID: "DIRECT-*****_TD-4550DNWB" where ***** is the last five digits of the product serial number.
- Password: 455***** where ***** is the last five digits of the product serial number.

- **Channel**

Specifies the channel to use for the Wireless Direct mode.

Bluetooth Tab (TD-4550DNWB)

Bluetooth Settings

Bluetooth Mode

Selects the control mode when Bluetooth is enabled.

Classic

- **Visible to Other Devices**

Allows the printer to be “discovered” by other Bluetooth devices.

- **Change PIN code**

Changes the PIN.

- **Display the PIN code on-screen**

Displays the PIN on your computer.

- **Request Secure Simple Pairing (SSP) settings during pairing**

If this check box is selected when using Classic Bluetooth mode, it is necessary to perform additional printer button operations when pairing with devices running Bluetooth 2.1 or later.

- **Auto re-pairing**

Sets whether to automatically reconnect to a previously connected Apple device (iPad, iPhone or iPod touch).

Low Energy

- **Minimum Security Mode**

Selects the minimum security level when using the **Low Energy Only** mode.

- **Request Secure Simple Pairing (SSP) settings during pairing**

If this check box is selected when using the **Low Energy Only** mode, it is necessary to perform additional printer button operations when pairing with Low Energy compatible devices.

Device Settings of the Printer Setting Tool (Windows)

Use Device Settings in the Printer Setting Tool to specify or change printer settings when connecting the printer and computer with a USB cable or via a Bluetooth connection (available models only). Not only can you change the device settings for one printer, but you can also apply the same settings to multiple printers. When printing from a computer application, various printing settings can be specified from the printer driver; however, using the Device Settings tool in the Printer Setting Tool, more advanced settings can be specified. When you open the **Device Settings** window, the printer's current settings are retrieved and displayed. If the current settings cannot be retrieved, the previous settings are displayed. If the current settings cannot be retrieved and previous settings were not specified, the machine's factory settings appear.

- >> [Settings Dialog Box](#)
- >> [Menu Bar](#)
- >> [Basic Tab](#)
- >> [Advanced Tab](#)
- >> [Print Position / Sensors Tab](#)
- >> [Display Settings Tab \(TD-4550DNWB\)](#)
- >> [Management Tab](#)

Settings Dialog Box

1. Menu Bar

Provides access to various commands grouped under each menu title (the **File**, **Maintenance**, and **About** menus) according to their functions.

2. Current Settings

Retrieves the settings from the currently connected printer and displays them in the dialog box. Settings can also be retrieved for the parameters on tabs with .

3. Disable these settings

When this check box is selected,  appears on the tab, and the settings can no longer be specified or changed. Settings in a tab where  appears are not applied to the printer even if **Apply** is clicked. In addition, the settings in the tab are not saved or exported when you use the **Save in Command File** or **Export** command.

4. Parameters

Displays the current settings.

5. Exit

Exits the **Device Settings** window and returns to the main window of the Printer Setting Tool.

6. Apply

Applies the settings to the printer. To save the specified settings in a command file, select the **Save in Command File** command from the drop-down list.

The saved command file can be used with the mass storage mode to apply the settings to a printer.

7. Settings Tabs

Contains settings that may be specified or changed.

If  appears in the tab, the settings cannot be changed. In addition, the settings in the tab are not applied to the printer even if you click **Apply**. The settings in the tab are not saved or exported when you use the **Save in Command File** or **Export** commands.

8. Printer

Specifies the printer you want to configure.

Menu Bar

File Menu Options

- **Apply Settings to the Printer**
Applies the settings to the printer.
- **Check Setting**
Displays the current settings.
- **Save Settings in Command File**
Saves the specified settings in a command file.
- **Import**
Imports an exported file.
- **Export**
Saves the current settings in a file.
- **Exit**
Exits the **Device Settings** window and returns to the main window of the Printer Setting Tool.

Maintenance Menu Options

You must have administrator privileges for the computer or the printer to display some items. Check if you have administrator privileges for the printer by clicking the **Printer properties** menu, and then clicking the **Security** tab.

- **Save Print Log in File**
Saves the print log in a file in the CSV format.
- **Print Unit Settings**
Prints a report containing the current firmware version and device setting information.

When you print this report, we recommend using a 62 mm or wider RD Roll.

- **Check Print Head Status**
Checks if there are no problems with the print head.
- **Reset to Factory Defaults**
Resets all the settings to the factory settings, including device settings, transferred data, and network settings.
- **Reset only Device Settings**
Resets the settings that can be changed in the Device Settings to factory settings.

- **Delete Template and Database**

Deletes the templates and databases stored in the printer.

- **Delete Print Log**

Deletes the print log stored in the printer.

- **Option Settings**

If the **Do not display an error message if the current settings cannot be retrieved at startup** check box is selected, a message is not displayed the next time.

Basic Tab

- **Auto Power On**

Specifies whether the printer turns on automatically when the AC Power Code is plugged into an electrical socket.

- **Auto Sleep**

Specifies the amount of time to pass before the printer automatically goes into sleep mode.

- The printer will automatically enter sleep mode when the specified time elapses under the following conditions:

- The printer does not receive data.
- A LAN cable is not connected.
- In idle mode or template selection mode.
- When no device is connected to the USB host port.
- When not communicating using the serial port.

- Sleep mode is cancelled when the following operations are performed:

- Any of the printer buttons is pushed.
- The Roll Compartment Cover is opened or closed.
- The printer receives data. (excluding via the serial port)
- A USB cable is disconnected and then reconnected.

- **Auto Power Off**

Specifies the period of time that passes before the printer turns off automatically when connected to an electrical socket.

- The printer will automatically enter power off mode when the specified time elapses under the following conditions:

- The printer does not receive data.
- A LAN cable is not connected.
- In idle mode or template selection mode.
- When no device is connected to the USB host port.
- When not communicating using the serial port.

- Power off mode is cancelled when the following operations are performed:

- Any of the printer buttons is pushed.
- The Roll Compartment Cover is opened or closed.
- The printer receives data. (excluding via the serial port)
- A USB cable is disconnected and then reconnected.

- **Text Direction**

Selects the printing orientation.

- **Print Speed**

Selects the printer's printing speed.

- **Print Density**

Adjusts the printer's printing density.

- **Align Paper Leading Edge when the Cover is Closed**
Selects whether the paper is automatically fed when the cover is closed.
- **Exit Position**
Selects the media output location.
- **Auto Cut**
Sets the cutting method when printing multiple labels.
- **Auto Speed Configuration**
Automatically adjusts the printing speed and prints at the optimal print density.

Advanced Tab

- **Feed Key Function**
Selects the operation performed when  is pressed. If **Program Settings** is selected, click **File** and select the command file.
- **Print Information Report**
Selects the information you want to include in the printer Information Report.
- **JPEG Printing Setting**
Selects the method of image processing when printing JPEG images.
- **Serialize Mode**
Specifies the serialise (number) method for your printed labels.
- **Save Printer Print Log**
Selects whether to save the printer's print log. If **Disable** is selected, the **Save Print Log in File** option cannot be enabled.
- **Print Data after Printing**
Specifies whether print data is erased after printing.

Print Position / Sensors Tab

If RD Rolls are being used, it is unnecessary to adjust the sensors.

- **Printing Reference Point Adjustment**
Adjusts the position of the reference point (point of origin for printing). This corrects printing misalignments resulting from differences in printer models or from the fixed margins of some software.
The reference point cannot be adjusted for raster printing.
- **Tear Adjust**
Adjusts the tear bar tear-off position for paper media.
- **Media Sensor (Transmissive/Gap)**
 - **Detection Sensitivity**
Adjusts the sensitivity of gap (spacing) detection for die-cut labels.
 - **Luminescence Adjustment**
Adjusts the amount of light emitted by the transmissive/gap sensor.
- **Media Sensor (Reflective/Bar)**
 - **Mark Detection Sensitivity**
Adjusts the sensitivity of black mark detection.
 - **Luminescence Adjustment**
Adjusts the amount of light emitted by the reflective/black mark sensor.
- **Media Sensor (Peeler)**
Specifies the settings when the Label Peeler (optional) is used.

- **Detection Sensitivity**

Adjusts the precision of the sensor that detects whether the label has been peeled.

Display Settings Tab (TD-4550DNWB)

- **Set Clock**
Sets date and time.
- **LCD Contrast**
Sets the contrast of the LCD.
- **Backlight Timeout**
Sets the period of time before the backlight turns off if the printer is not used.
- **Template Mode**
Specifies whether the printer operates in P-touch Template Mode.
P-touch Template Mode allows you to enter only text and print labels using a previously configured template.
- **Confirm Print**
Specifies whether a message appears before printing so that the number of copies can be confirmed.
- **Default Print**
Specifies the default value for the print quantity.
- **QR Code Data**
Creates custom QR code data based on the required text or web page and displays it on the printer's LCD.
The displayed QR code can be read using a mobile device to retrieve information.

Management Tab

To display this tab, you must have administrator privileges for the computer or the printer. Check if you have administrator privileges for the printer by clicking the **Printer properties** menu, and then clicking the **Security** tab.

- **Time & Date**
Selects whether to display date and time on the printer's LCD.
- **Unit**
Specifies the default unit.
- **Language**
Specifies the language displayed on the LCD.
- **Airplane Mode**
Allows disabling the Bluetooth or Wi-Fi interfaces. This function is useful when you use the printer in a place where signal transmissions are not allowed.
- **Lock Settings**
Locks the menu settings so that they cannot be changed.
- **Admin Password**
Select **On** to configure administrator mode. Set a four-digit password that must be used change the menu settings.
- **Command Mode**
Selects the command mode type.
- **Date Format**
Selects the date format for the clock.
- **Time Format**
Selects the time format for the clock.
- **Print Head Check When Powered On**
Sets whether to check the status of the print head when you turn the printer on.

P-touch Template Settings of the Printer Setting Tool (Windows)

P-touch Template mode allows you to insert data into text and barcode objects from a downloaded template using other devices connected to the printer. The available options and supplies may vary depending on your country. Use P-touch Template Settings in the Printer Setting Tool to specify or change P-touch Template functions.

- P-touch Template mode is also compatible with other input devices like a scale, testing machine, controller, or a programmable logic device.
- For more information on P-touch Template Settings, see the *P-touch Template Manual/ Command Reference* (English only). You can download the latest version from the Brother support website at support.brother.com/manuals.

1. Default Command Mode

Specifies the P-touch Template mode as the default mode. To change the mode, select the mode by accessing the **Management** tab on the **Device Settings** window.

2. Default Template Number

Specifies a default template number that the printer sets when it is turned on. If you do not want to transfer a template to the printer, do not specify a template number.

3. Data Delimiter for P-touch Template

Displays a symbol used to indicate the boundaries between groups of data in a file (maximum of 20 characters).

4. Trigger for P-touch Template Printing

Specifies a trigger to begin printing from a number of options.

- **Command Character:** Printing starts when the command character specified here is received.
- **Data Insertion into All the Objects:** Printing starts when the delimiter for the last object is received.

- **Received Data Size:** Printing starts when the number of characters specified here is received. However, delimiters are not counted in the number of characters.

5. Character Code Table

Selects one of the character code sets.

6. International Character Set

Lists character sets for specific countries. The following codes vary depending on the selected country:

23h 24h 40h 5Bh 5Ch 5Dh 5Eh 60h 7Bh 7Ch 7Dh 7Eh

To change the characters, see the *P-touch Template Manual/ Command Reference* (English only). You can download the latest version from the Brother support website at support.brother.com/manuals.

7. Command Prefix Character

Specifies the prefix character code identifying commands used in P-touch Template mode.

8. Non-Printed Character

Characters specified here are not printed when data is received (maximum of 20 characters).

9. Available Return Code

The line feed code is used when feeding data to indicate that the following data should be moved to the next line in a text object. Select one of four line feed codes or type the line feed code you want (maximum of 20 characters).

10. Replace FNC1

Replaces GS codes with FNC1.

11. Number of Copies

Sets the number of copies (maximum of 99 copies).

12. Auto Cut

Specifies if the printer should cut the labels and how many labels to print before cutting (maximum of 99 labels).

13. Inverted 180 Degrees

If this check box is selected, the data will be printed after it has been rotated 180 degrees.

14. Communication Settings

Sets the parameters for serial communication.

15. Default

Returns all setting values in the P-touch Template Settings dialog box to the default values.

16. Cancel

Cancels the settings and closes the dialog box. The settings remain unchanged.

17. Set

Applies the settings to the printer. To save the specified settings to a command file to reuse in the future, select the **Save in Command File** command from the drop-down list.

The saved command file can be used with the mass storage mode to apply the settings to a printer.

Paper Size Setup of Printer Setting Tool (Windows)

Use the Paper Size Setup in the Printer Setting Tool to add paper sizes not available in the **Paper Size** list of the printer driver.

Before you print using a paper size other than the available ones, you must register the new paper size by sending it to the printer.

Printing with a paper size not registered with the printer may produce incorrect print results.

Paper Size Setup Dialog Box

1. Current settings

Displays the current settings for the selected paper format.

2. New

Click this button to display the **New** dialog box and register a new paper size.

NOTE

Do not register a paper size already registered, to avoid incorrect print results. To use paper of the same size as one that is currently registered, select the size you want from the **Currently Registered Paper Sizes** list in the **Paper Size Setup** dialog box, and then change and overwrite the settings from the **Edit** dialog box.

3. Edit

Edits the settings for the selected paper format.

To save the selected paper format with the new settings, click **Overwrite**. To add a paper format with the new settings, change the name in the **Paper Size Name** box, and then click **Add**.

4. Delete

Deletes the selected paper format. A deleted paper format cannot be restored.

5. Import

Reads the text file containing the paper format settings and uses it to replace the contents of the **Currently Registered Paper Sizes** list.

NOTE

When the list is imported, the entire contents of the **Currently Registered Paper Sizes** list will be replaced with the imported paper formats.

6. Export

Exports the paper formats in the **Currently Registered Paper Sizes** list to a file. The exported formats can then be distributed to other computers.

7. Exit

Exits the **Paper Size Setup** window and returns to the main window of the Printer Setting Tool.

8. Option

Click ▼, and then select an operation.

Click **Register Paper Size With Printer** to register the settings for the selected paper format in the printer.

Click **Save in Command File** to export the paper settings as a command file. (The file extension is BIN.)

NOTE

When the paper format is registered with the printer and **Exit** is clicked, the **Paper Size Setup** dialog box appears with the added paper size in the **Currently Registered Paper Sizes** list. If the software is running, exit the software, and then restart it for the new paper format to appear in the list.

- If the following functions are being used, you can quickly apply their settings to the printer:
 - Mass storage feature
 - Bluetooth (Object Push Profile (OPP))
 - Wi-Fi (File Transfer Protocol (FTP))
- These commands are only intended to be used to apply settings to a printer. These commands cannot be imported into the Paper Size Setup.

>> [New Dialog Box](#)

>> [Advanced Printing Adjustments Dialog Box](#)

New Dialog Box

1. Paper Size Name

Type in the name of the paper format to be added.

2. Auto media configuration

Retrieves and displays the information of the paper set in the printer. For more information, see *Related Information*.

Place the printer in idle when using this option. The printer may malfunction if you try to configure it while it is processing or printing a print job.

3. Paper Types

Select the paper type.

4. Detailed settings

Specify details for the paper format to be added.

5. Advanced Printing Adjustments

Click this button to display the **Advanced Printing Adjustments** dialog box and make advanced printing adjustments for each paper format.

6. Cancel

Cancel the settings and close the dialog box. The settings will remain unchanged.

7. Add

Click this button to add the paper format and apply the settings.

Advanced Printing Adjustments Dialog Box

1. Printing Reference Point Adjustment

Adjust the position of the reference point (point of origin for printing). This corrects printing misalignments resulting from differences in printer models or from the fixed margins of some software.

2. Tear Adjust

Adjust the cutting position when the paper is cut using the Tear Bar.

3. Energy Rank

Adjust the amount of heat (energy) from the print head, for example, with special paper.

There may be contrast variations in the print result due to the operating environment and media used. Modify the settings as necessary.

4. Media Sensor (Transmissive/Gap)

Adjust the precision with which the transmissive/gap sensor detects the gaps (spacing) for die-cut labels and the amount of light emitted by the sensor.

Settings can be specified when **Paper Types** is set to **Die-cut Label**.

The settings for **Media Sensor (Transmissive/Gap)** in the **Device Settings** dialog box can influence the detection and calibration results. Make sure you specify the appropriate values.

Example settings:

	Setting EX1	Setting EX2
Device Settings	+2	-2
Paper Size Setup	+2	+2
Actual effect	4	0

5. Media Sensor (Reflective/Bar)

Adjust the precision with which the reflective/black mark sensor detects black marks and the amount of light emitted by the sensor.

Settings can be specified when **Paper Types** is set to **Media With Marks**.

The settings for **Media Sensor (Reflective/Bar)** in the **Device Settings** dialog box can influence the detection and calibration results. Make sure you specify the appropriate values.

Example settings:

	Setting EX1	Setting EX2
Device Settings	+2	-2
Paper Size Setup	+2	+2
Actual effect	4	0

6. Cancel

Cancels the settings and closes the dialog box. The settings will remain unchanged.

7. OK

Saves the settings and returns to the previous dialog box.

Related Topics:

- [Auto Media Configuration](#)

Distribute Paper Formats to Other Computers (Windows)

The paper formats exported from the **Currently Registered Paper Sizes** list in the **Paper Size Setup** dialog box can be distributed to other computers. If the printer driver has been installed on the recipient's computer, only the paper formats need to be distributed.

1. At the sender's computer, specify the paper format settings, and then click **Export**.

The following files are created:

TD-4550DNWB	bst455ed.ptd bst455ed.txt pdt4235.bin
-------------	---

2. Save the TXT file in any location on the recipient's computer.
3. At the recipient's computer, click **Import**.

The paper formats are replaced with the imported ones.

- [Paper Size Setup of Printer Setting Tool \(Windows\)](#)

Apply Setting Changes to Multiple Printers (Windows)

>> [Communication Settings \(TD-4550DNWB\)](#)

>> [Device Settings](#)

Communication Settings (TD-4550DNWB)

1. After applying settings to the first printer, disconnect the printer from the computer, and then connect the second printer to the computer.
2. Select the newly connected printer from the **Printer** drop-down list.
If the **Automatically detects the connected printer, and retrieves the current settings** check box in the **Option Settings** dialog box is selected, the printer connected with the USB cable is automatically selected.
3. Click **Apply**.
We recommend selecting the **Automatically restart the printer after applying new settings** check box when configuring the first printer so that you can confirm that the printer can be correctly connected to the wireless router/access point with the new settings.
The same settings that were applied to the first printer are applied to the second printer.
4. Repeat these steps for all printers whose settings you want to change.

- If the IP address is set to **STATIC**, the printer's IP address is changed to the same address as the first printer. Change the IP address if needed.
- To save the current settings in a file, click **File > Export**. The same settings can be applied to another printer by clicking **File > Import**, and then selecting the exported settings file.

Device Settings

1. After applying the settings to the first printer, disconnect it from your computer, and then connect the second printer.
2. Select the newly connected printer from the **Printer** drop-down list.
3. Click **Apply**. The same settings that were applied to the first printer are applied to the second printer.
4. Repeat these steps for all printers whose settings you want to change.

To save the current settings in a file, click **File > Export**. The same settings can be applied to another printer by clicking **File > Import**, and then selecting the exported settings file.

Change Printer Settings Using Web Based Management

You can use a standard web browser to change your print server settings using the Hyper Text Transfer Protocol (HTTP) or Hyper Text Transfer Protocol over Secure Socket Layer (HTTPS).

When using Web Based Management, the following operations are available:

- Displaying your printer status information
- Changing network settings, such as TCP/IP information
- Displaying software version information of the printer and print server
- Changing network and printer configuration details

- We recommend Microsoft Internet Explorer 11/Microsoft Edge for Windows. Make sure that JavaScript and Cookies are always enabled in whichever browser you use.
- The default login password to manage printer settings is **initpass**. We recommend you change it to protect your printer from unauthorised access.

To use Web Based Management, your network must use TCP/IP, and the printer and computer must have a valid IP address.

1. Start your web browser.
2. Type "https://machine's IP address" in your browser's address bar (where "machine's IP address" is the machine's IP address).

For example:

https://192.168.1.2

If you are using a Domain Name System or enable a NetBIOS name, you can type another name, such as "SharedPrinter" instead of the IP address.

- For example:

https://SharedPrinter

If you enable a NetBIOS name, you can also use the node name.

- For example:

https://brnxxxxxxxxxxxx

3. If the machine prompts you for a password, type it, and then click .
4. Change the print server settings.

Every time you access Web Based Management, type the password in the **Login** field, and then click . After configuring the settings, log out by clicking .

Related Information

- [Printer Settings](#)
 - [Set or Change a Login Password for Web Based Management](#)

Set or Change a Login Password for Web Based Management

We recommend changing the default login password to prevent unauthorised access to Web Based Management.

1. Start your web browser.
2. Type "https://machine's IP address" in your browser's address bar (where "machine's IP address" is the machine's IP address).

For example:

https://192.168.1.2

If you are using a Domain Name System or enable a NetBIOS name, you can type another name, such as "SharedPrinter" instead of the IP address.

- For example:

https://SharedPrinter

If you enable a NetBIOS name, you can also use the node name.

- For example:

https://brnxxxxxxxxxxxx

3. Do one of the following:
 - If you have previously set your own password, type it, and then click .
 - If you have not previously set your own password, type **initpass**, and then click .
4. Click the **Administrator** tab.
5. Type the password you want to use in the **Enter New Password** field (up to 32 characters).
6. Re-type the password in the **Confirm New Password** field.
7. Click **Submit**.

Settings Tables

The Settings tables will help you understand the menu selections and options.

Some settings may differ depending on the firmware (printer software).

- >> [Settings]
- >> [Template Settings]
- >> [Information]
- >> [Administration]
- >> [Wired LAN]
- >> [WLAN]
- >> [Bluetooth]
- >> [Media]
- >> [Remote Update] (Network)
- >> [Update] (USB Flash Drive)
- >> [Custom QR Code]

[Settings]

Level 1	Level 2	Descriptions
Print Density	-	Adjust the printer's printing density.
Auto Cut	-	Set the cutting method when printing multiple labels.
Print Adjust (X)	-	Adjust the print position.
Print Adjust (Y)	-	Adjust the print position.
Exit Position	-	Select the media exit location.
Tear Position	-	Adjust the tear position.
Print Speed	-	Select the printer's printing speed.
Text Direction	-	Select the printing orientation.
Set Clock	-	Specify the date and time.
Auto Power Off	-	Specify the period of time that passes before the printer turns off automatically.
Auto Sleep	-	Set the amount of time to pass before the printer automatically goes into sleep mode.
LCD Contrast	-	Set the contrast of the LCD. The higher the number, the stronger the contrast.
Backlight	-	Switch the backlight on or off.
Sensor (Transmissive)	Detection Sensitivity	Adjust the precision of the sensor that detects the gaps (spacing) for die-cut labels.
	Luminescence	Adjust the amount of light emitted by the transmissive/gap sensor.
Sensor (Reflective)	Mark Detection	Adjust the precision of the sensor that detects the black marks.
	Luminescence	Adjust the amount of light emitted by the reflective/black mark sensor.

[Template Settings]

Level 1	Level 2	Descriptions
Template Mode	-	Select whether the template mode starts when the printer is turned on.

Level 1	Level 2	Descriptions
		In the template mode, you can replace the contents of the templates stored in the printer and print them.
Confirm Print	-	Select whether a message appears before printing so that the number of copies can be confirmed.
Serialize Mode	Cont From Last	Select to serialise from the last number printed.
	From Starting #	Select to serialise from the default number each time you print.
Serialize Reset	-	Reset the sequential number to the default number.
Default Print Quantity	-	Specify the default value for the print quantity.
Temporary Date	-	Directly enter the date into the template.
Temporary Time	-	Directly enter the time into the template.

[Information]

Level 1	Level 2	Descriptions
Configuration	-	Display the printer information.
Print Configuration	All	Print the printer setup information (missing dot test pattern, usage log, printer settings, wireless setting information and transfer data).
	Usage Log	Print the printer usage log.
	Printer Settings	Print the printer settings.
	Transfer Data	Print the transfer data.

[Administration]

Level 1	Level 2	Descriptions
Command Mode	-	Select the type of command mode.
Date Format	-	Select the date format for the clock.
Time Format	-	Select the time format for the clock.
 Language	-	Select the language of the LCD.
Unit	-	Select the measurement units for displayed settings.
Reset	Factory Reset	Returns all printer settings, including the communication settings and device settings, to their default values. Templates and databases stored in the printer are also deleted.
	User Data Reset	Returns all device settings to their default values. Templates and databases stored in the printer are also deleted.
	Network Reset	Returns the communication settings to their default values.
Airplane Mode	-	Turn the Airplane mode on or off. When set to on, the WLAN and Bluetooth icons do not appear on the LCD.
Time & date	-	Select whether to display the date and time on the LCD.
Print Head Check	-	Check the status of the print head.
Menu Lock	-	Select the check boxes for any options you want to prevent changes from the printer's LCD. After selecting the check boxes, press ▲ or ▼ to select Finish, and then press OK to complete the settings.

Level 1	Level 2	Descriptions
		If the Menu Locks are set, a lock icon is displayed for parameters that cannot be selected.
Menu Security	-	Select whether a passcode is required to enter the Administration mode. When set to on, specify the four-digit password.

[Wired LAN]

Level 1	Level 2	Descriptions
TCP/IP Settings	-	Specify TCP/IP settings.
Wired LAN Status	-	Display the Wired LAN status.

[WLAN]

Level 1	Level 2	Descriptions
WLAN (On/Off)	-	Turn the WLAN function on or off.
Network Mode	-	Select the network mode when you set the WLAN function to on.
WPS Button Push	-	Try to connect to a nearby wireless access point/router.
WPS PIN Code	-	Display the printer's eight-digit PIN.
Infra Manual Setup	-	Display the SSID of a nearby wireless access point/router. After you select the SSID and press OK , the password entry screen appears.
Direct Manual Setup	-	Manually enter the SSID and password of a wireless access point/router to connect.
TCP/IP Settings	-	Specify TCP/IP settings.
WLAN Assistant	-	Use the WLAN connection assistant function to configure your wireless network settings.
WLAN Status	Infrastructure Mode	Display the WLAN status.
	Direct Mode	

[Bluetooth]

Level 1	Level 2	Descriptions
Bluetooth (On/Off)	-	Turn the Bluetooth function on or off.
Mode	-	Select the Bluetooth mode.
Print Barcode	-	Print the Bluetooth address and corresponding barcode.
Automatic Reconnection	-	Switch to Automatic Reconnection mode (only for Apple devices: iPad, iPhone, or iPod touch).
Clear History	-	Delete information for auto re-paired devices registered in the printer.
Bluetooth Status	-	Display the status of the Bluetooth function.

[Media]

Level 1	Level 2	Descriptions
Selection	-	Select the paper size and paper type.
Calibration	-	Detect the size of the set paper.
Detection	-	Detect the width of the set paper. Display paper settings in the <code>Selection</code> option that match the detection results from the paper settings registered with the Printer Setting Tool.

[Remote Update] (Network)

Level 1	Level 2	Descriptions
Remote Update	-	Available only when the printer is connected to the FTP server and when the templates, databases, and other files need to be updated.

Set the information of the FTP server in advance using **Communication Settings** in the Printer Setting Tool.

[Update] (USB Flash Drive)

Level 1	Level 2	Descriptions
Update	-	Available only when a USB flash drive containing saved templates, databases, and other files that need to be updated is connected to the printer.

[Custom QR Code]

Display the custom QR code set with the Printer Setting Tool.

Routine Maintenance

- [Clean Your Printer](#)
- [Replace the Coin Cell Battery](#)

Clean Your Printer

We recommend cleaning your printer on a regular basis to maintain its correct performance.

Always disconnect the printer from any power source before cleaning.

- >> [Clean the Exterior of the Unit](#)
- >> [Clean the Label Output Slot](#)
- >> [Clean the Roller](#)
- >> [Clean the Print Head](#)

Clean the Exterior of the Unit

- Wipe any dust and marks from the main unit using a soft, dry cloth. Use a cloth slightly damp with water on difficult to remove marks.

IMPORTANT

Do not use paint thinner, benzene, alcohol or any other organic solvent. These may deform or damage the printer case.

Clean the Label Output Slot

- If adhesive residue gets attached to the Label Output Slot, it may cause label jams. Clean the Label Output Slot with a dry cotton swab.

IMPORTANT

Do not use alcohol to clean the Label Output Slot.

NOTE

- Always remove the ejected labels from the Label Output Slot. If the slot becomes blocked, label jams may occur.

Clean the Roller

- Wipe the roller with a lint-free cloth dipped in isopropyl alcohol or ethanol. After cleaning the roller, make sure that no lint or other material remains on the roller.

Use isopropyl alcohol or ethanol according to the manufacturer's safety guidelines, as applicable.

Clean the Print Head

- Wipe the print head with a lint-free cloth or cotton swab dipped in isopropyl alcohol or ethanol.
 - We recommend cleaning the print head monthly.

Use isopropyl alcohol or ethanol according to the manufacturer's safety guidelines, as applicable.

-

Replace the Coin Cell Battery

A coin cell battery is used as a backup power supply to maintain the settings for the internal clock. Battery power is consumed even if the printer is not in use.

- Remove the battery if you do not intend to use the printer for an extended period of time.
- We recommend replacing the battery every two years.
- If the clock is reset while power is supplied to the machine, replace this battery. When replacing the battery, use a CR2032 Coin Cell battery.
- Dispose of the battery at an appropriate collection point, not in the general waste stream. Be sure to observe all applicable federal, state, and local regulations.

IMPORTANT

- Use only recommended batteries. Other batteries may cause damage to the printer.
- When storing or discarding a battery, wrap it with cellophane tape to prevent it from short-circuiting.

1. Cellophane tape
2. Coin cell battery

1. Disconnect the printer from the electrical socket.
2. Turn the printer over.

3. Remove the front cover base using a flathead screwdriver.

4. Remove the battery.

5. Insert the new battery into the battery slot, making sure the battery is level and its positive side is facing up.

6. Reattach the front cover base using a flathead screwdriver.

7. Reconnect the AC Power Cord to an electrical socket.

If You Are Having Difficulty with Your Machine

This chapter explains how to resolve typical problems you may encounter when using the printer. If you have any problems with the printer, first make sure you have performed the following tasks correctly:

- Connect the printer to an electrical socket. For more information, see *Related Information*.
- Remove all protective packaging from the printer.
- Install and select the correct printer driver. For more information, see *Related Information*.
- Connect the printer to a computer or mobile device. For more information, see *Related Information*.
- Close the Roll Compartment Cover completely.
- Insert the RD Roll correctly. For more information, see *Related Information*.

If you still have problems, see *Related Information*. If, after reading the topics, you are unable to resolve the problem, visit the Brother support website at support.brother.com.

Printing Problems

Printing Problems

Problem	Solution
The LED indicator or the LCD is not lit.	<ul style="list-style-type: none"> Is the adapter cord connected correctly? Check the cord is connected correctly. If the LED indicator or the LCD still does not light up, contact Brother customer service.
The printer does not print, or a printing error is received.	<ul style="list-style-type: none"> Is the cable loose? Make sure the cable is connected securely. Is the roll installed correctly? If not, remove the roll and reinstall it. Has the roll run out? Install a new roll. Is the Roll Compartment Cover open? Make sure the Roll Compartment Cover is closed. Has a print error or transmission error occurred? Turn the printer off, and then turn it on again. If there is still a problem, contact Brother customer service. If the printer is connected via a USB hub, try connecting it directly to the computer. If not, try connecting it to another USB port.
A data transmission error appears on the computer.	<ul style="list-style-type: none"> Is the correct port selected? Make sure the correct port is selected. Is the printer in cooling mode? If the Power LED lights in green and the Status LED is flashing in orange, wait until the Status LED stops flashing, and then try printing again. Are there any unfinished print jobs? If you try to print while other users are printing large amounts of data, the printer is unable to accept your print job until the current print jobs are completed. If this occurs, send the print job again after the other jobs are completed.
I want to cancel the current printing job.	Press  while printing is paused.
The print quality is poor.	Is there dust or dirt on the print head or roller preventing it from rotating freely? Clean the print head or roller. For more information, see <i>Related Information</i> .
The printer does not feed paper.	<ul style="list-style-type: none"> Is there dirt or lint on the roller preventing it from rotating freely? Clean the roller. For more information, see <i>Related Information</i>. Make sure the ejection path of the paper is not blocked. Remove the roll and install it again. For more information, see <i>Related Information</i>. Make sure the Roll Compartment Cover is closed completely.
The printer feeds paper continuously.	<ul style="list-style-type: none"> Open the Roll Compartment Cover. Press any button to stop feeding. Press  while printing is paused to cancel the print job. Press any button except for , ▲, or ▼ while printing is paused to resume printing.

Problem	Solution
The printer does not pause between labels.	<ul style="list-style-type: none"> • Make sure you entered the media information correctly. You can set the media information using Paper Size Setup in the Printer Setting Tool. • If the sensor is dirty, wipe it with a dry cotton swab. • Make sure there are no items blocking the sensor.
An error occurs when the roll cannot be fed to the beginning of the printing.	<p>If a feed error occurs, use the Paper Size Setup of the Printer Setting Tool to assign the correct paper settings to the printer.</p> <p>Press Menu, and then press Media > Selection to check whether correct media is set in the printer when an RD roll is used.</p>
Printer is in cooling mode.	<p>The thermal head is too hot.</p> <p>The printer stops and resumes printing only after the thermal head has cooled down. The thermal head may become too hot if you are printing a large number of labels.</p> <p>When the thermal head becomes too hot, it may produce imaging outside the print area. To avoid or delay overheating, make sure the printer has adequate ventilation and is not located in an enclosed space.</p> <p>If the printer must cool down because it overheated due to the type of roll you are using or the contents of the label, printing may take longer than usual.</p> <div data-bbox="555 824 1473 1003" style="border: 1px solid black; background-color: #e6f2ff; padding: 5px;"> <p>NOTE</p> <p>This condition may occur more often when the printer is used at high altitude (more than 3,048 m) due to a lower air density available to cool the printer.</p> </div>
I want to reset the printer/delete the data transferred from the computer.	See <i>Related Information</i> .
Print head cannot be attached.	<p>The print head cannot be attached if the print head spring is sticking out. Place the print head spring correctly and try again.</p> <div data-bbox="564 1200 890 1523" style="text-align: center;"> </div>
The media is not ejected correctly when using the optional label peeler.	<p>Has the sensor of the label peeler been exposed to direct sunlight?</p> <p>If the sensor of the label peeler has been exposed to direct sunlight, loaded media may not be detected correctly. Use the printer in a location not exposed to direct sunlight.</p>

Problem	Solution
<p>When printing via the USB cable, the printer repeatedly pauses, and then continues printing.</p>	<ul style="list-style-type: none"> • Is the printer set for sequential printing? If so, set print mode to buffered printing. <ul style="list-style-type: none"> - Windows 10/Windows Server 2016: Click Start > Settings > Devices > Printers & scanners. Click the printer you want to set up, and then click Open queue. Click Printer > Printing Preferences. Click the Other tab and select the After one page of data is received option. - Windows 8/Windows 8.1/Windows Server 2012/Windows Server 2012 R2: Click Orientation in the Apps screen. Click Hardware and Sound > Devices and Printers. Right-click the printer you want to set up, and then click the Printing preferences menu. Click the Other tab and select the After one page of data is received option. - Windows 7/Windows Server 2008/Windows Server 2008 R2: Click Start > Devices and Printers. Right-click the printer you want to set up, and then click the Printing preferences menu. Click the Other tab and select the After one page of data is received option. • An alternative solution is to disconnect the LAN cable until USB printing is completed. <p>For Windows</p> 

Problem	Solution
Barcodes printed using applications other than P-touch Editor cannot be read.	<p>If the barcode data was created using a landscape orientation, change the Orientation setting in the Basic tab of the printer driver to Landscape and try again.</p> 

Printed Image Problems

Problem	Solution
Printed paper contains streaks or poor quality characters, or paper is not fed correctly.	<p>Is the print head or roller dirty?</p> <p>Although the print head generally remains clean under normal use, lint or dirt from the roller may become stuck on the printer head. If this occurs, clean the roller. For more information, see <i>Related Information</i>.</p>
Printed barcodes cannot be read.	<ul style="list-style-type: none"> Print labels so that barcodes are aligned with the print head as shown below: <div style="text-align: center;">  </div> <ol style="list-style-type: none"> Print head Barcodes Printing orientation Barcodes may not be read if they are reduced or enlarged. Try using another scanner.

Network Problems

Problem	Solution
You are using security software.	<ul style="list-style-type: none"> Confirm your settings in the installation dialog box. Allow access when the security software alert message appears during the printer installation.
Your security settings (SSID/ Network Key) are incorrect.	<p>Recheck and select the correct security settings.</p> <ul style="list-style-type: none"> The manufacturer's name or model number of the wireless access point/router may be used as the default security settings. See the instructions supplied with your wireless access point/router for information on how to find the security settings.

Problem	Solution
	<ul style="list-style-type: none"> Contact the wireless access point/router manufacturer, Internet provider, or network administrator.
Your printer cannot connect to the host device using Wi-Fi or Bluetooth.	<ul style="list-style-type: none"> Move your printer within about one metre of the mobile device when you configure the Wi-Fi network settings. Move your printer to an obstruction-free area.
Your printer cannot print using Wi-Fi or Bluetooth.	<ul style="list-style-type: none"> If a wireless computer, Bluetooth-equipped device, microwave oven, digital cordless phone, or other device is near your printer or the wireless access point/router, move the device away from your printer or wireless access point/router.
There are obstructions (walls or furniture, for example) between your printer and the mobile device.	Move your printer to an obstruction-free area.
You are using MAC Address filtering.	You can confirm the MAC address by printing the Printer Settings Report. For more information, see <i>Related Information</i> .
Your printer is not connected correctly to the network.	<ul style="list-style-type: none"> Make sure the printer is in the mode you want to connect to. If the printer is still not connected, do the following: <ul style="list-style-type: none"> For Wi-Fi connection <div data-bbox="635 824 785 869" data-label="Image"> </div> : Your printer is searching for the network. Wait until the search is complete. For Wireless Direct <p>If the Wireless Direct icon is displayed on the LCD, search for the printer from the device you want to connect.</p> For Wired LAN <p>Make sure the LAN cable is connected correctly.</p> For Bluetooth <p>If the Bluetooth icon is displayed on the LCD, search for the printer from the device you want to connect.</p>
I have checked and tried all of the above, but still cannot set the Wi-Fi/Bluetooth function.	Turn the printer off, and then turn it on again. Then, configure the Wi-Fi and Bluetooth settings again.
Your printer is not connected if the Bluetooth connection with an Apple device (iPad, iPhone, or iPod touch) is lost.	Turn the Auto Reconnect function on. You can set it from the Printer Setting Tool. For more information, see <i>Related Information</i> . You can also set it using the Bluetooth menu on the printer's LCD.
Your printer is not assigned with an available IP address.	<ul style="list-style-type: none"> Confirm the IP address and the Subnet Mask. Verify both the IP addresses and Subnet Masks of your computer and your printer are correct and located on the same network. For more information on how to verify the IP address and the Subnet Mask, contact your network administrator. Confirm your IP address, Subnet Mask and other network settings using the Printer Setting Tool. For more information, see <i>Related Information</i>. You can also confirm network settings on the printer's LCD.
Your previous printing job was unsuccessful.	<ul style="list-style-type: none"> If an unfinished print job is still in your computer's print queue, delete it. For example, when using Windows 10: Click Start > Settings > Devices > Printers & scanners. Click the printer you want to set up, and then click Open queue. Click Printer > Cancel All Documents.
I have checked and tried all of the above, but my printer does not print.	Uninstall the printer driver and the software, and then reinstall them.

Problem	Solution
You did not select to allow access when the security alert dialog box appeared during the standard installation, BRAdmin Light installation, or when printing.	If you did not select to allow access when the security alert dialog box appeared, the firewall function of your security software may be blocking access. Some security software may block access without displaying a security alert dialog box. To allow access, see your security software instructions or contact the manufacturer.
Incorrect port numbers are being used for the Brother network features.	The following port numbers are used for Brother network features: <ul style="list-style-type: none"><li data-bbox="555 376 1145 405">• BRAdmin Light: Port number 161 / Protocol UDP For more information on how to open the port, see your security software instructions or contact the manufacturer.

Printing

Printing Technology	Direct Thermal
Print Resolution	• 300 dpi
Print Speed (depending on the media used)	• Maximum 152.4 mm/s ¹
Maximum Print Width	• 108.4 mm
Maximum Print Length	3000 mm

¹ Under Brother standard environment

Size

Weight	• Approximately 2.08 kg
Dimensions	Approximately 180 mm (W) x 155 mm (H) x 224 mm (D)

Interface

USB	USB Ver.2.0 (Full Speed) (Type B)
Serial	RS232C (DB9 male) ¹
Wired LAN	10/100BASE-TX
USB Host Port	USB Ver.2.0 (Full Speed) (Type A)
Bluetooth	Bluetooth Ver.4.2 / BLE MFi SPP, OPP, HCRP (Bluetooth Classic), GATT (Bluetooth Low Energy)
Wireless LAN	IEEE 802.11 a/b/g/n (Infrastructure Mode) IEEE 802.11 g/n (Wireless Direct mode)

¹ Use a serial cable that is under 3 m.

Environment

Operating Temperature	Between 5°C and 40°C
Operating Humidity	Between 20% and 85% (without condensation) Maximum wet bulb temperature: 27°C
Storage Temperature	Between -20°C and 60°C
Storage Humidity	Between 10% and 90% (without condensation)

Power Supply

Adapter	AC Adapter (100 to 240 V 50/60 Hz)
----------------	------------------------------------

Media Specification

The media material may affect print quality.

In order to achieve optimum print results, we recommend using Brother thermal paper (RD Rolls).

Media Type	Wristbands, Continuous, Die-Cut, Fan Fold, Perforated, Tag
Media Width	From 19 mm to 118 mm
Minimum Media Length	6.4 mm Continuous: 6.4 mm Label Peeler: 17 mm Cutter: 20 mm Tear: 18 mm
Thickness	From 0.058 mm to 0.279 mm
Roll Outside Diameter (maximum)	127 mm
Core Diameter (minimum)	12.7 mm
Media Sensor	Transmissive, Reflective

Compatible Operating Systems

Auto Media Configuration

- [Auto Media Configuration Overview](#)
- [Use the Auto Media Configuration Function](#)
- [Check the Sensor Position](#)

Auto Media Configuration Overview

Auto Media Configuration allows the printer to automatically detect the characteristics of the installed paper, and then select the correct paper size settings.

Model	Automatic Detection Items
TD-4550DNWB	<ul style="list-style-type: none">• Paper type• Width• Length• Label spacing• Width of marks• Gap/Black mark detection sensitivity

Auto Media Configuration Workflow

After Auto Media Configuration is started, the printer will feed the paper to detect its characteristics. By default, the printer uses the continuous feed setting unless:

- The transmissive/gap sensor detects a die-cut label.
- The reflective/black mark sensor detects marked media.¹

- If the paper runs out during the Auto Media Configuration, the printer will not detect the media type successfully and an error will be displayed.
- If the paper width is not aligned correctly, the calibration will not be successful.
- Depending on the paper's shape and material, media detection may not be possible.
- The paper width is obtained by subtracting 2.0 mm from the left and right from the detected width.

Related Information

- [Auto Media Configuration](#)

¹ It may be necessary to feed the paper again depending on the results.

Use the Auto Media Configuration Function

- >> [Calibrate Media Information Using the LCD Menu](#)
- >> [Calibrate Media Information Using the Printer Setting Tool](#)

Calibrate Media Information Using the LCD Menu

1. Press **Menu**.
2. Press **▲** or **▼** to select the following:
 - a. Select [Media]. Press **OK**.
 - b. Select [Calibration]. Press **OK**.After the calibration is completed, the detected paper information is set on the printer.
3. Press .

Calibrate Media Information Using the Printer Setting Tool

1. Connect the printer you want to configure to the computer.
2. Start the Printer Setting Tool.
 - **Windows 10/Windows Server 2016:**
Click **Start > Brother > Printer Setting Tool**.
 - **Windows 8/Windows 8.1/Windows Server 2012/Windows Server 2012 R2:**
Click the **Printer Setting Tool** icon on the **Apps** screen.
 - **Windows 7/Windows Server 2008/Windows Server 2008 R2:**
Click **Start > All Programs > Brother > Label & Mobile Printer > Printer Setting Tool**.
3. Click **Paper Size Setup**.
4. Click **Edit** or **New**.
5. Click the **Auto media configuration** drop-down list, and then select the **Auto media configuration** option or **Acquire width only (no feed)** option.
Detection results are displayed.
6. Click **Import** to apply the results to the paper size settings.

Clean Other Printer Components

We recommend cleaning the printer on a regular basis to maintain optimal performance.

Always disconnect the printer from any power source before cleaning.

- >> [Roller](#)
- >> [Print Head](#)
- >> [Cutter](#)
- >> [Label Peeler](#)

Roller

TD-4550DNWB	PA-PR3-001
-------------	------------

- Wipe the roller with a lint-free cloth dipped in isopropyl alcohol or ethanol. After cleaning the roller, make sure that no lint or other material remains on the roller.

Use isopropyl alcohol or ethanol according to the manufacturer's safety guidelines, as applicable.

Print Head

TD-4550DNWB	PA-HU3-001
-------------	------------

- Wipe the print head with a lint-free cloth or cotton swab dipped in isopropyl alcohol or ethanol.
 - We recommend cleaning the print head monthly.

Use isopropyl alcohol or ethanol according to the manufacturer's safety guidelines, as applicable.

Cutter

TD-4550DNWB	PA-CU-001
-------------	-----------

NOTE

- Always remove the ejected labels from the Label Output Slot. If the slot becomes blocked, label jams may occur.
 - Cutting accuracy cannot be guaranteed for labels with perforations or creases.
-
- If adhesive residue gets attached to the Label Output Slot, it may cause label jams. Clean the Label Output Slot with a dry cotton swab.

IMPORTANT

Do not use alcohol to clean the Label Output Slot.

Label Peeler

TD-4550DNWB

PA-LP-002

1. Wipe the roller with a lint-free cloth dipped in isopropyl alcohol or ethanol. After cleaning the roller, make sure that no lint or other material remains on the roller.

Use isopropyl alcohol or ethanol according to the manufacturer's safety guidelines, as applicable.

2. If adhesive residue gets on the Label Peeler, it may cause label jams. Clean the Label Peeler with a dry cotton swab.

IMPORTANT

Do not use alcohol to clean the Label Peeler.

Change the Label Peeler Options

After attaching the Label Peeler, set the printer driver peeler option.

1. Do one of the following:
 - **Windows 10/Windows Server 2016:**
Click **Start** > **Settings** > **Devices** > **Printers & scanners**. Click the printer you want to set up, and then click **Open queue**. Click **Printer** > **Printing Preferences**.
 - **Windows 8/Windows 8.1/Windows Server 2012/Windows Server 2012 R2:**
Click **Orientation** in the **Apps** screen. Click **Hardware and Sound** > **Devices and Printers**. Right-click the printer you want to set up, and then click the **Printing preferences** menu.
 - **Windows 7/Windows Server 2008/Windows Server 2008 R2:**
Click **Start** > **Devices and Printers**. Right-click the printer you want to set up, and then click the **Printing preferences** menu.
2. Select the **Use Peeler Function** check box.
3. Click **OK**.

Change the Cutting Options

The cutting options allow you to specify how labels are fed and cut. If you do not use P-touch Editor, you can change the cutting options in the printer driver properties.

1. Do one of the following:
 - **Windows 10/Windows Server 2016:**
Click **Start > Settings > Devices > Printers & scanners**. Click the printer you want to set up, and then click **Open queue**. Click **Printer > Printing Preferences**.
 - **Windows 8/Windows 8.1/Windows Server 2012/Windows Server 2012 R2:**
Click **Orientation** in the **Apps** screen. Click **Hardware and Sound > Devices and Printers**. Right-click the printer you want to set up, and then click the **Printing preferences** menu.
 - **Windows 7/Windows Server 2008/Windows Server 2008 R2:**
Click **Start > Devices and Printers**. Right-click the printer you want to set up, and then click the **Printing preferences** menu.
2. Select the **Cut Every** check box, and then select where to cut when multiple labels are printed.
3. Select the **Cut at End** check box.
4. Click **OK**.

Label Cutting Options

Auto Cut (Cut every one label)	Cut at End	Image
Off	On	
Off	Off	
On	On or Off
